In the new game law is an important section which went into effect Saturday. It forbids the shipment out of the state of "any kind of birds, game or fish, the killing, taking or having in possession of which is at any time or at all times prohibited." It therefor applies to grayling, trout and all protected game. Another section of the act forbids the sale of the same during the close season.

Good roads are clearly a part of the environment that determine character and whatever else environment effects. A person may even arrive at church in a more pious frame of mind, if he has come over a good, hard, smooth road, than he would if he had come spattered with mud, or all shaken up by ruts and cobble stones. We are our brother's keeper in public relations as well as in private.

The Schools.

School matters have been in somewhat of an unsettled condition here for some time. School opens next Monday, but at this writing we are unable to say who the principle will be. By reading the minutes of the board meeting published elsewhere in this issue our readers will see why Prof. McDonald was not re-engaged. The board have several in view and one undoubtedly be on hand to open school next Monday morning. The teachers for the other positions are:

Asst. Principle, Miss May Henderson; Intermediate Dept. Miss Laura Black; Primary Dept. Miss Ida Taylor; Ward school, Miss Fanny Lee.

Miss Lee takes the place of two teachers here before engaged in the ward school.

LATER.—Director Hartingh informs us that the board has engaged Mr. F. E. Birkhead, of Lansing, as principal. Mr. Birkhead holds a state certificate and comes personally recommended ex-superintendent of Public Instruction Esterbrook.

The Fair.

It is only about a month now till the Fair takes place and it is high time that our farmers were giving the matter serious consideration. It should be the aim each year to make the Fair better than the year before. There is no one thing that that inspires the farmers and gives them courage to go ahead as a successful Fair.

The prizes, to be sure, are not large but the premiums are not a drop in the bucket, to what the gain is in other ways, when the farmers, particularly, meet and compare notes they are benefiting themselves inestimably. One may show up a product or kind of product that another never thought of trying to raise or produce. He immediately catches on to the idea and goes home to try many new things that he has had impressed on him at the Fair. This is only one example out of a hundred of the advantages of the Fair.

N. C. HARTINGH, Esq.,
Sir:—I return letter of J. W. Humphrey, and after careful perusal and study of the law, I feel in duty bound to refuse acceptance of the certificate of Mr. J. E. McDonald. ***
It is a breach of the law, of the State for any commissioner to grant a certificate of the first class without a written examination, and as he had no written examination, the certificate sent to file is not valid. Hoping you will soon obtain a good teacher, I am Yours Truly,

DR. HENRY GEORGE says copious doses of single tax will relieve the patient and prevent relapse.

WITH the loss of his official head Webb Flanagan fully realized one thing the democrats are here for.

OTHER countries have in periods of stagnation provided work for their citizens, why not the United States.

THE people appear to be rapidly approaching the time when the lack of money—any kind of money—will dwarf all other wants.

SENATOR QUAY has gone home in disgust. Well, the Senate could get along very well without him in he never returned to his seat.

THE man who keeps his money in active circulation in times like these is both a patriot and a philanthropist. May his tribe increase.

SENSIBLE people will wait until the democrats in Congress have failed to find a satisfactory solution of the financial problem before beginning to find fault.

No wonder Benjamin Harrison expresses sympathy for the country; he is, perhaps, responsible to a greater extent than any other one man for the present condition of affairs.

COMMISSIONER SEYMOUR says the Patent Office needs new blood, and he proposes injecting it. Commissioner Seymour's disease ought to spread at Washington. New blood is needed all around.

REPUBLICANS newspapers, in their anxiety to make political capital out of the financial situation, for which their party is solely responsible, are throwing more men out of employment than the financial stringency.

Those who are now so impudently asserting that it is the "threat of free trade" that has produced the present depression, will be ashamed to acknowledge that they ever did so, before the present democratic administration closes.

THE man who states that the Sherman act is running the country is talking through his hat.—Alpena Pioneer.

The author of the above has evidently got bees in his hat.

WE CAN see no good reason why good democrats cannot honestly differ as to the expediency of the free coinage of silver at this time, without in the least impairing their standing as democrats. In the end the will of the majority will prevail.

THE hoarders of money are making trouble for themselves. Business cannot be conducted with all money hid away, and business cannot stagnate without injury to all, including the hoarders. Put your money where it will circulate, and everybody will be benefited.

WE are now reaping the fruits of the vicious republican legislation of the past thirty years. But the dawn of a better day is at hand. Class legislation which has brought this great nation to verge of ruin will soon be wiped from the statute books and prosperity will follow.

THE democrats who have allowed their tempers to run away with their discretion should remember that nothing good was ever yet accomplished by appealing to the passions of men. Let there be no more effigy burnings; let only a club into the hands of our enemies.

LAST fall the Eighth congressional district chose a Republican to represent it. The Tenth did the sensible thing and re-elected a Democrat, and thereby won the first Congressional honors of the state in the way of committee appointments, Mr. Weadock being appointed chairman of the committee on mines and mining, which is the only chairmanship which come to Michigan—Saginawan.

CONGRESS does not deserve all the abuse it is getting. It is all well enough to talk about its passing a financial relief bill in 48 hours, but in Congress, as elsewhere, there are always two sides to every question, and it would be a violation of every principle of our method of government to deny both sides a hearing. Congress is trying to reach a decisive result, and more cannot reasonably be expected.

No man who is capable of thinking for himself, or is honest in his convictions, will deny for a moment but what the miss rule of the republican party in the passing of such infamous measures as the McKinley and Sherman bills, is the only, and direct cause of the present depression. It has always been the policy of the republican party to lay the cause of its miss doings on the shoulders of others.

A Scheme for Relief.

Albert A. Pope, that indefatigable worker for good roads, is out in the advocacy of a plan which he urges not alone for the accomplishment of his main purpose, but because it will serve to relieve the idleness and suffering incident to hard times, put money into circulation and result in permanent improvements from which the entire country will benefit. After reviewing the situation, the closing of industrial establishments, and the resulting distress, he proceeds to the discussion of his plan for preventing those who are willing to work becoming objects of charity. He suggests that the state legislatures and city and town authorities take immediate steps to furnish employment in the construction of public works, and especially in the betterment of highways. As illustrating the good to be done in this direction, he says that the loss to the state of Massachusetts from bad roads amounts to between five and ten millions a year, and that in Illinois it has been estimated by expert authority at \$100,000,000 per annum.

He advises the states, cities and towns, to borrow the money and to judiciously expend it while labor and material are cheaper than in times of prosperity. In his judgment the dictates of philanthropy, economy and wise statesmanship should be followed by giving work to the idle when the result is a benefit to the entire community, promoting health, happiness, and prosperity by the preventing of poverty and its attendant evils. He further advocates a national appropriation for the irrigation of arid lands, thus giving employment to the minors of Colorado, Montana, and other western states, and opening up vast tracts for agricultural purposes. This would add greatly to the value of public lands, and in the end prove a financial investment with large profits.—Detroit Free Press.

Changes in School Law.

Several changes in the school law, made by the legislature of 1893, went into effect Monday.

Section 1 of chapter 12, house bill No. 69, says: "Any person shall be eligible to the office of examiner who shall hold at least a third grade certificate, and have taught in the public schools at least nine months, or have the qualification required of commissioner in section 3 of this act."

Section 4 is changed by making date of regular examination the last Thursday in March instead of the first Thursday.

In section 5 the age of those eligible as teachers is raised from 16 to 17. "The board of examiners shall have the right, however, to renew without examination the certificates of persons who shall have previously obtained an average standing of at least 85 per cent in all branches covered in two or more previous examinations and who shall have been since that examina-

tion continuously and successfully teaching in the same county."

Section 6 says: "All examination papers for first grade certificates favorably passed upon by the board of examiners together with such certificates shall be forwarded to the superintendent of public instruction within ten days from date of examination for inspection, and provided further, that no first grade certificate shall be valid in any county other than that in which it is granted unless approved and countersigned by the superintendent of public instruction and a copy filled with the county commissioner in the county in which the holder of said certificate desires to teach." "The certificates of the third grade shall be divided into two classes known as A and B. Third grade certificates of class A shall be granted only to persons who have taught successfully and continuously for at least three years next preceding the examination in primary department of graded schools, and certificates of this class shall entitle holder to teach in primary departments of graded schools, only. Third grade certificates of class B shall license the holder to teach in any school of the county in which it shall be granted for one year; but no more than three certificates of this class shall be granted to the same person."

Section 1 of chapter 12, house bill No. 215, says: "In case a vacancy shall occur in the office of school examiner, the judge of probate together with the board of school examiners of the county in which such vacancy shall have occurred shall, within ten days after the occurrence of such vacancy, appoint some suitable person to fill such vacancy, and the person so appointed shall hold the office for the unexpired portion of the term, and until his or her successor is appointed and qualified."

Senate bill No. 303 appropriates \$20,000 for a building for physical training school at the state normal school.

House bill No. 327 makes it lawful for the state board of education to grant teachers' certificates on graduates of certain colleges.

Tenth District P. O.'S.

A Washington special says: Representative Weadock has obtained a statement of the date of appointment and confirmation of postmasters of the more important post-offices of the Tenth district. The post office department hold that the four years tenure of postmasters is from the date of confirmation by the senate and not from the date of original appointment. For instance Postmaster Lyman G. Wilcox, of Bay City, was appointed April 6, 1889, but was not confirmed until January 8, 1890. Therefore his four years will not be up until January 8, 1894. L. B. Edinborough's term as postmaster at West Bay City will expire June 2, 1894. The expiration of the four-year term of other tenth district presidential postmasters is as follows: Alpena, December 21, 1893; West Branch, April 11, 1894; Oscoda, May 27, 1894; Au Sable, January 8, 1894; Cheboygan, December 20, 1893; Petosky, June 27, 1894; Gaylord, January 14, 1897; Grayling, December, 20, 1893. The postoffice at Roseburg, Sanilac county, has had its name amended by striking out the terminal "h" and that at Waldenburg, Macomb county, has had the same amendment.

A Racking Cough

Cared by Ayer's Cherry Pectoral.
Mrs. P. D. HALL, 217 Genesee St.,
Lockport, N. Y., says:

"Over thirty years ago, I remember hearing my father describe the wonderful curative effects of Ayer's Cherry Pectoral. During a recent attack of La Grippe, which assumed the form of a catarrh, soreness of the lungs, accompanied by an aggravating cough, I used various remedies and prescriptions. While some of these medicines partially alleviated the coughing during the day, none of them afforded me any relief from that spasmodic action of the lungs which would seize me the moment I attempted to lie down at night. After ten or twelve such nights, I was

Nearly in Despair,

and had about decided to sit up all night in my easy chair, and procure what sleep I could in that way. It then occurred to me that I had a bottle of Ayer's Cherry Pectoral. I took a spoonful of this preparation in a little water, and was able to lie down without coughing. In a few moments, I fell asleep, and awoke in the morning greatly refreshed and feeling much better. I took a teaspoonful of the Pectoral every night for a week, then gradually decreased the dose, and in two weeks my cough was cured."

The tug Wilcox, cleared from this
port Tuesday forenoon for French
River, when about ten miles off
Oscoda, at 3 o'clock p. m. she en-
countered a heavy gale, sprung a
leak and sunk in about 150 feet of
water. Capt Tobin and crew of
twelve men escaped in the yawl
boat, and after a severe trip, reached
this port again about 10 o'clock the
same day. The tug was owned by
T. & J. Hurley, of Detroit, and is a
total loss.

About 2 o'clock last Sunday morn-
ing while tug Annie Moiles was
towing a raft about ten miles off
Tawas Point, occurred one of the
most sad and distressing accidents
we have been called on to report
for some time. Myron D. Boutell,
second engineer, was in the hold
when one leg slipped into the crack
pit, and was taken off above the

knee. The tug cut loose from the
raft and immediately came to this
place for medical assistance. The
unfortunate man died in about an
hour and a half after reaching this
place. The remains were taken
to his home in Bay City, on the tug
Sweepstakes the same evening. He
leaves a wife and one child.

Fretting.

There is one sin which seems to
me is everywhere and by everybody
underestimate, and quite too much
overlooked in valuation of character.
It is the sin of fretting; so common
that unless it rises above its usual
monotone, we do not observe it. Watch
any ordinary coming together
of people and see how many min-
utes it will be before somebody frets
—that is makes more or less com-
plaining statement of something or
other, which most probably every
one in the room, or in the car or in
the street corner, it may be, knew
before, and which probably nobody
can help. Why say anything about
it? It is cold; it is hot; it is wet;
it is dry; somebody has broke an
appointment; illcooked a meal
stupidity or bad faith somewhere
has resulted in discomfort. There
are plenty of things to fret about.
It is simply astonishing how much
annoyance may be found in the
course of every day's living, even at
the simplest, if one has a sharp eye
out on that side of things. Even
Holy Writ says we are prone to
trouble as sparks to fly upward. But
even to the sparks flying upward, in
the blackest of smoke, there is a
blue sky above and the less time
they waste on the road the sooner
they will reach it. Fretting is all
the time wasted on the road.—Helen
Huat.

THE FLINT & PERE MARQUETTE RAIL
AND WATER LINES offer the public a
way to reach Chicago, that for comfort,
far surpasses the all rail lines, to say
nothing of the difference of fare in it
favor, an item well worthy of consid-
eration.

Passengers are landed in Chicago in
the morning after a night's refresh-
ing and invigorating rest in a commod-
ious state room on a first-class steam-
ship. The experienced traveler need
not be told of the advantages of a rail

the all rail route with its crowded, dusty
sleeping cars, and very little thought on
the part of the inexperienced, will con-
vince him of the same. Ask you local

The case of the people vs. Badely for outraging poor Lillian Sauter at Mackinac Island, will be tried at St. Ignace, Sept. 12, at the special term of the circuit court ordered by Judge Fairbairn. Pros. Attorney Moloney was arrested by Sheriff Kuhlmann last Monday on a charge of having unlawfully obtained possession of some legal documents from Justice of the peace Frank Sommer. The case, however, failed to come to trial. As it was amicably settled by Moloney agreeing to give up the papers and paying the cost incurred by the suit, which amounted to \$1.80. Inconning is all torn up over one "Jack the Peeper," who it is alleged, is a man dressed in woman's clothes. Two little boys had their arms squeezed by him and come running home almost frightened to death. When asked what was the matter they said that a woman had peeked into their faces and pinched their arms. Some older persons report having seen the person and say it is a man.—Bay City Times-Press.

Phillip McNamarn, a demented inmate of the poor house, escaped from the bath room of that institution, clothed only with a smile, but was captured by the police. A number of farmers saw him passing along the road, but paid little attention to him, thinking it was some dude from town dressed in the latest summer style. Some young ladies who saw him supposed it was cupid, and they sat by the road and cried, for fear he was after them and because they were away from home.—Alpena Echo.

The work of dredging the Alpena harbor, on the government contract, was brought to a conclusion last week, as the money appropriated had been expended. The work was at the mouth of Thunder

Bay river, and a channel 206 feet wide and 16½ feet deep has been dredged from the river out into Thunder Bay. The amount of earth removed is estimated at 50,000 cubic yards. The Alpena harbor is now in good condition, and vessels drawing sixteen feet of water now can safely enter the river.—Saginawan.

State road Commissioner Standish Munroe of Maple Ridge, was in George Mordy looking up the prospects of building the state road bridge across the Rifle river. He reports that he finds \$225. subscribed in Standish and that among other subscriptions Wm. Halley of Melita will give \$25. Mr. Munroe thinks at the present rate that he will have no difficulty in building the bridge. When this bridge is built appropriating another road which will only increase the distance a little people in the direction of Melita can get to Standish much easier than now.—Standish Independent.

Four long timber trains have been laid off on the Mud Lake branch within the past week. Two long timber trains are all that are presently engaged in hauling long timber to Black River. The men who were thus laid off received there pay in full, but some of those who are still retained have not been paid for two months. There is no special significance in either of the foregoing facts. To lay off long trains is and has been a matter of frequent occurrence every year. The non-payment of wages is attributed entirely to the tightness of the money market and the absolute impossibility of corporations employing large numbers of men to get a sufficient amount of currency from the banks to meet the demands of their pay rolls.—Harrisville Review.
