RELIGIOUS NEWS.

The fifteenth international Christian Endeavor convention will be held at Washington, July 8-13, 1896.

The two hundredth anniversary of the founding of Christ P. E. church, Philadelphia, Pa., has just been celebrated.

Last month five Chinamen were baptized and admitted to membership in the Lafayette Avenue Presbyterian church, Brooklyn, N. Y.

The Rev. Thomas Treadwell Stone D. D., one of the oldest ministers in the country, died a short time ago in Boston, at the age of ninety-five years.

The Christian Endeavor societies of Steubenville (O.) Presbytery have arranged to support a foreign missionary, Rev. Charles W. Swan, of Canton China.

The Rev. Dr. C. H. Parkhurst, of New York will deliver a lecture in Scranton, Pa., on Dec. 17, for the benefit of the Court Street Methodist Episcopal church of that city.

The Lutheran young people of Illinois and adjacent territory are sending our Rev. Will M. Back as a young people's missionary to Africa, under the authority of the foreign board.

The general missionary conference of the Methodist Episcopal church, at its recent meeting in Denver, decided to appropriate \$1,000,000 for missions next year, 45 per cent for home and 55 per cent for foreign missions.

By the death of the late Rev. Henry Edward Bell, B. A., at Chatton Bedford, England, the Church of England has lost its oldest clergyman. Mr. Bell, who was ninety years of age, graduated at Oxford in 1843 and was ordained fifty-eight years ago.

Bishop B. B. Usher, rector of Christ Church, Reformed Episcopal, Peoria, Ill., has been licensed to practise medicine in the state. In an interview he says he will not practice medicine. He will continue his ministerial duties, but will minister to the poor and needy of the city free of charge.

The missionary schooner-yacht Robert W. Logan sailed from San Francisco for the southern seas recently. She is to replace the boat of the same name which was lost on the Carolines nearly two and a half years ago, and is owned by the American Board of Missions of the Congregational church.

The women have carried the day in the Methodist Protestant Church. The overture submitted to the annual conference authorizing the admission of women as lay delegates to the General Conference, and their ordination to the ministry, has been approved by the required majority.

The Board of Church Extension of the Methodist Episcopal Church held its annual meeting in Chicago last week. The receipts were reported as \$171,237, of which amount conference collections furnished \$127,743; personal gifts, \$11,871, and bequests, \$6,776. The disbursements included \$103,289 in gifts to the churches.

A Congress on Africa, to be held in connection with the exhibition at Atlanta, Dec. 13-15, is under the officers of the Stewart Missionary Foundation for Africa in Gammon Theological Seminary. This insures it great interest and value. Among those who are to be present are Mr. Cyrus C. Adams, Heli Chatelin, Dr. E. W. Blyden, of Liberia; the Rev. Ross Taylor, Bishop H. M. Turner, and a large number of prominent ecclesiastics and educators.

The subject of religious unity is still much discussed abroad. The Bishop of Lincoln, in a pastoral letter, has declared that the Church of England cannot accept the terms of reunion offered by Pope Leo XIII. They would involve absorption in and submission to Rome, not reunion. Dr. Parker, the famous Congregationalist, of the Holborn Viaduct Temple, London, has forwarded a letter to Pope Leo XIII, on his recent "reunion" encyclical, in which he says: "It may be right that I should add that the Archbishop (of Canterbury) would disallow my orders as distinctly as Your Holiness would sceptically regard the Archbishop's pretensions." All indications go to show that the various religious bodies cannot reconcile their difference and that the unity movement will be barren of results.—Y. N. World.

Rev. Cope, pastor of the M. E. church is a very enthusiastic sportsman and killed two deer, during the hunting season; but he had an experience that confirmed his opinion that hunters cannot be too careful about shooting in the woods. He and a companion were hunting together one day trailing a deer, when they came to a ravine and in a dark thicket, about twenty rods away, saw the deer moving rather indistinctly. At first they raised their Winchesters to fire but Mr. Cope warned his partner not to shoot until they could see it plain. In a few seconds more, the taken for the game, raised up from the ground and fired at the deer farther on. Our two hunters looked each other squarely in the eyes for a minute and silently walked away. The other hunter never knew what a close call he had.—Grayling News.

At their annual meeting yesterday the Michigan State Grange passed resolutions condemning 'goldbugism,' and declaring in favor of free coinage of silver.

The next republican national convention will be held at St. Louis, June 16, 1896. It was thus decided by the National committee at Washington last Tuesday.

CROP REPORT

The following Michigan crop report was issued Dec. 9: The average condition of wheat December 1 was 82 per cent of condition in average years. This is a gain of four per cent since November 1, but is eight per cent below condition December 1, 1894. The average condition in the southern counties is 78; central, 86, and northern, 95. One year ago the condition in these sections respectively was 88, 92 and 96.

Snow fell in all or nearly all parts of the State in sufficient quantity to cover the ground November 19 and 20. This was added to by a storm on the 25th and 26th, and by another on November 30 and December 1. December 2 the average depth in the northern part of the lower peninsula was about six inches, and south of this to the south line of the State, about three inches. At this date, December 9, the ground is still well covered and is not frozen.

The total number of bushels of wheat reported marketed by the farmers since the November report was published is 1,195,296, and in the four months, August, September, October and November, 4,118,011. This is 622,356 bushels less than reported marketed in the same months last year. The amount reported marketed in November this year is 75,657 bushels more than reported for November, 1894.

The mean temperature of the State for November was 34.6 degrees, or about 1.5 degrees below the normal. In the southern counties there was a deficiency of 1.4 degrees, in the central of 2.7 degrees, and in the northern of 1.3 degrees.

The average precipitation, including both rain and melted snow, in the States was 3.28 inches; in the southern counties, 3.82 inches; in the central, 3.23 inches, and in the northern, 2.06 inches. Compared with an average or normal there was an excess of 0.26 inches in the State, of 0.67 inches in the southern, and of 0.27 inches in the central counties; and a deficiency of 0.85 inches in the northern counties.

Feeding Oats to Farm Stock.

Oats have long been recognized as one of the very best grains for most classes of farm animals. This is especially true of horses and young stock of all kinds, unless it be pigs. The weight of evidence of many careful feeding experiments is against the profitability of feeding oats to young pigs except as a small part of their ration. One year with another oats are relatively higher in price than is corn in most parts of the United States. It is not alone a comparison of the price per bushel, but of the relative weight of a bushel of oats and one of corn that must be made. This year, however, with the largest crop of oats ever grown in the country, the price is exceptionally low, lower than for many years. There is no reason why farmers should not feed oats freely at present prices, except in localities in which the crop was a failure or very poor. How then to feed is a question about which there is much difference of opinion. For horses and colts, calves and sheep and lambs the writer would feed the grain

unground. For cows, steers and hogs it is an advantage to grind it. Good oat straw is a valuable food, and if the feeding is carefully done there is much to commend the plan of feeding sheaf oats. If large quantities are fed at once much of the straw will be left uneaten. Where there are convenient facilities for cutting the sheaf oats a larger percentage of the straw can be utilized by so doing. The greater danger of injury by rats and mice if the oats are left unthreshed is the only reason which can be urged in favor of threshing the crop in many cases. There are horses which do not properly masticate oats, but these are rather exceptional cases. If the grain is mixed with cut straw, hay or clover it will be better eaten. Young animals usually pretty thoroughly masticate their food and the writer has not found sufficient gain from grinding to repay the cost of the work. This does not apply to pigs, however. It is better to have oats ground if to be fed to hogs of any age. In many cases a mixture of oats and corn will be better than either grain fed alone. The younger the stock the larger may be the proportion of oats. Many insist that oats alone are much better than any mixture of corn as a food for colts. The writer has a higher appreciation of the value of corn, reasonably used, as a food for even young animals, than have many feeders, but he would use oats freely in present conditions. It would be a consummation much to be rejoiced over if the present low prices for oats would lead to the much larger use of this grain as food for the human animal. Its use for this purpose has greatly increased within the last quarter of a century, but it may wisely become more general.—*Prairie Farmer.*

WALKING.

There is no more important pace for the farm horse than the walk. It has not received the attention by judges at our leading fairs that it deserves. It is a most important pace in any horse, and it should receive a great deal of attention, more especially in the heavy draught classes. In the Clyde classes a horse may receive a prize that has not been made to go a dozen paces at a square walk. The groom may know very well that the horse is a poor walker, and when he is sent out at a walk he goes through a caper or two and then trots. Such a sire will get poor walkers just as surely as he will pass to his progeny his good points. For the draught horse the walk is the most important pace, and it should be carefully considered by the judge. Some Hackneys that have good front action are poor walkers, but this is not so common. Some of the standard-bred trotters are miserable walkers. For racing records, of course, walking is not needed; but for the thousands of standard-bred horses that have to be used on the road, walking is the most important pace. Some Thoroughbreds are excellent walkers, and it has been remarked that a good walker, one that moves over the ground with a free, elastic stride, is invariably a good galloper. In fact, some of the buyers of fast yearlings always judge them by their appearance at the walk. All our horses should have more attention given to their walking in the show ring, and the animal that walks well should be given credit for it. Our shows are over for this year, but it is a point that should be always before our breeders in selecting sires.—*Farming.*

JOHN PRESTON.

FOR A BIG FRAUD.

THREE TOWNSHIP OFFICERS ARE UNDER ARREST.

A Roscommon special to the Evening News last Thursday says: There was great excitement in the village when it was known that the ex-officers of Nestor township were to be arrested on a charge of criminal conspiracy to cheat and defraud the public, by issuing and circulating a large amount of township contingent and highway orders during the years 1892-'93 all payable to themselves. These orders are of large denominations, and are now scattered broadcast over the United States, of from \$40,000 to \$50,000.

The complaint was made by Attorney DeWaele after his return from Lansing, after an audience with Gov. Rich and Asst. Atty. Gen. Chase, R. C. Huntley and N. T. McDonald, respectively ex-treasurer and ex-highway commissioner, are now under arrest in the county jail.

Alexander Robinson ex-clerk, disappeared, but was also arrested. A warrant is out for ex-supervisor, William Finley, who is a fugitive from justice, charged with stealing cattle. It is strongly asserted that some influential persons other than the ex-officers will be implicated, and the trial bids fair to be one of the most important cases ever tried in northern Michigan. The examination of the prisoners will be held before Justice Gifford on the 17th inst.

Shortly after the fraudulent orders were issued the school house, containing all the records was burned to the ground, so there was nothing to show in the way of proceedings. The fire was undoubtedly incendiary.

Many of the orders went to pay Ingham and Shiawassee county farmers for draft horses. Several suits were brought to collect pay from the purchasers, but in every case the jury disagreed or found for the defendant. One Kentucky man was stuck to the amount of \$3,700.

As most of the land in Nester township is pine woods, owned by Saginaw and Bay City lumbermen, they would have to pay the taxes should collections on the orders be enforced.

From LaGrippe.

How Dr. Miles' Nervine Restored One of Kentucky's Business Men to Health.

NO DISEASE has ever presented so many peculiarities as LaGrippe. No disease leaves its victims so debilitated, useless, sleepless, nerveless, as LaGrippe.

Mr. D. W. Hilton, state agent of the Mutual Life Insurance Co., of Kentucky, says: "In 1889 and '90 I had two severe attacks of LaGrippe, the last one attacking my nervous system with such severity that my life was despaired of. I had not slept for more than two months except by the use of narcotics that stupefied me, but gave me no rest. I was only conscious of intense mental weakness, agonizing bodily pain and the fact that I was hourly growing weaker. When in this condition, I commenced using Dr. Miles' Restorative Nervine. In two days I began to improve and in one month's time I was cured, much to the surprise of all who knew of my condition. I have been in excellent health since and have recommended your remedies to many of my friends."

 No town can become great or even prosper, if its citizens refuse to impart interest to its affairs, or fail to feel a sense of pride in what it possesses. It is the feeling which its citizens extend to the welfare of a town that makes it great or small, that means its success or failure. Local interests and local pride are the very life of a town.

 C. D. Bennet and G. W. Mount have applied for a patent on a steam fire extinguisher, for dry kilns, packing rooms, and other rooms in manufacturing plants in which inflammable material is kept, which promises to be a bonanza for the inventors. The principle is that of steam and hot water, which is forced into the room where the fire is, smothering it. They have already disposed of a number. We will give our readers an illustration of the machine and its workings in some future issue.
 Mufflers only 10 cents at Friedman's.
 The Scientific American gives the following receipt for the whole world to know: At the first indication of diphtheria in the throat of a child, make the room close; then take a tin cup and pour into it an equal quantity of tar and turpentine, then hold the cup over the fire so as to fill the room with the fumes. The patient in inhaling the fumes will cough and spit out the membranous matter and diphtheria will pass off. The fumes of the tar and turpentine lessons the trouble in the throat and thus affords the relief that has baffled the skill of physicians.
 Friedman is still selling ladies' jackets at manufacturers' prices. Do not miss this opportunity of getting a good wrap cheap.
 An exchange is fair in its criticism when it says that some people are so anxious to avoid paying the home merchant a legitimate margin they really believe any fairy tale told them by sleek-tongued trayling frauds who are entire strangers to them. Ninety-nine out of a hundred of these "soft snaps" offered by these fellows are swindles. The best plan is to patronize home merchants. They help pay a very large part of our taxes, help support our churches and schools, and are citizens among us. They are responsible for the goods they sell and can be found at any time should anything be wrong or the goods not as represented.

Reeves, his wife, on the 15th day of September, 1892, to Mary E. Schmeckel, and recorded in the office of the register of Deeds of Isosco county, Michigan, on the 19th day of December, 1892, at 7:30 o'clock, p. m., in liber 13 of mortgages on page 32, which mortgage was, on the 28th day of December, 1892, assigned to Benjamin J.
