(3) To attend services more regularly.

(4) To do some act of kindness each day.

(5) To be cheerful in the performance of duty.

Hoping, that by personal experience, our people will be benefited this holy season, rather than discouraging others in an exercise, of which, perhaps, they know nothing, we beg of you to find out, each one of you, what good a season of retirement from worldly things can do.

THE RECTOR.

Dwelling Burned.

About 9:30 last Friday evening our citizens were routed by the ringing of the fire bell. The residence of Edward Musolf, on Bay Street was found to be on fire.

The bad condition of the roads and the long distance to go caused considerable delay in getting the fire apparatus on the scene, and the fire had gained such headway that nothing could be done except save the adjoining buildings. The house together with considerable household goods were destroyed. Mr. Musolf places his loss at about \$800 with no insurance, his policy having expired but a few days previous. The fire is supposed to have originated from a defective flue.

TAWAS CITY, MICH., FEB. 26, 1904

The republican leaders of Ohio have
agreed that Congressman Dick shall
be successor of the late Senator Han-
na.

There are well founded rumors that
the Hon. "Tip" Applin is quietly at
work laying plans to defeat Col. Lound
for the congressional nomination in
this district next fall. That "Tip"
can secure strong backing in this dis-
trict there is little doubt, and these
reports are true another warm cam-
paign may be looked for.

The war department has issued
orders for the entire Third regiment
of infantry to proceed to the isthmus
of Panama at the earliest possible time
on the transports Sumner and McClel-
lan from New York. The regiment
will relieve the marines now stationed
there. It is now stationed at Fort
Thomas, Ky., and Fort Sheridan,
Chicago, Ill.

Somebody clever at figures has found
out that the weather bureau has cost
us about two cents apiece during the
present year. And just think what a
lot of weather you get for this insigni-
ficant sum.

Some of the daily papers which have
been making fun of the canvas of
William Randolph Hearst for the pres-
idency are coming to realize that it is
a serious matter. Why should Mr.
Hearst not aspire to this high and
honorable office. He is a man of ma-
ture years and sound business judge-
ment, who has made a success of ev-
ery business enterprise with which he
has been connected. He is the one
great newspaper publisher who is
known to the people of all classes. He
is not like a majority of those who do
so much talking about him, who are
practically unknown.

Congressman Burton, of Cleveland,
chairman of the river and harbor com-
mittee, made a speech in the house
Tuesday in opposition to the naval
appropriation bill, saying this country
does not need so great a navy. The
appropriation of \$96,000,000 carried
by the bill he said, meant an invita-
tion to the powers of the earth to at-
tack this country and he could not
vote for a bill carrying such a large
sum for naval purposes. The Monroe
doctrine and the supremacy of this
country on this side of the world is
secure, he said, and the control of the
Philippines by this country had not
been questioned.

Change Tax Law.

There are indications that a sys-
tematic effort will be made during
the coming campaign by the railroads
of the state to elect, not only a gov-
ernor, but a majority in the legisla-
ture that will agree to an amendment
of the tax law, so as to lighten the
burden of the roads as they would be
imposed under the law as it now
stands.

Evidences that the railroads feel
themselves aggrieved by the present
law are plentiful, as they began suit
to prevent the collection of taxes un-
der the law as it now stands. That
suit has been pending in the federal
court at Grand Rapids for almost a
year and much testimony has been
taken. Since that suit was begun the
tax commissioners raised the valua-
tions for the roads to a figure even
higher than the original amount.

The trend of the testimony in the
railroad suit has been against the
companies and they feel that finally
they will be compelled to pay the
heavy amounts for taxes held in abey-
ance through their litigation. They
seem to figure that it may be easier to
change the law than to beat it in the
courts. At all events, soon after it
was learned that the roads would be
asked to pay taxes on \$20,000,000
more than the original assessment of a
year ago, indications began to crop
out that the roads have decided upon
one of the hottest campaigns ever
waged in Michigan.—The Detroit Free
Press.

To Twelve a Year.

Port Huron, Feb. 20.—The Su-
preme Hive, Ladies of the Maccabees
of the World, some time ago appoint-
ed a special rating committee which
has just closed an interesting session
at the headquarters in this city, at
which a new plan of rating was con-
sidered that will be presented for leg-
islative action at the triennial re-
view of the supreme hive to be held
in Detroit next July. Under direc-
tion of the executive officers a valua-
tion of the insurance certificates car-
ried in the order has been made to
determine upon the adequacy of the
present rates and as to what increase,
if any, is necessary to put the busi-
ness on a perfectly safe basis. The
data was submitted to an actuary and
the opinion given that twelve assess-
ments levied a year, according to the
present table of rates, would be am-
ple, considering that fraternal insur-
ance policies have no surrender value
to guarantee the protection promised.
For the purpose of carrying into
effect the recommendations of the
actuary, steps will be taken for
amendments of the laws at the com-
ing review, raising the assessment
levies to the number stated. The law
under which the order is now work-
ing provides for the levying of only
ten assessments within a year.

Effect of War on Market.

In view of the general sympathy
with the cause of Japan, both at home
and abroad, Japanese victories are
likely to have a stimulating effect up-
on the stock markets, while Russian
success might, on the contrary, exert
depressing influences. says Henry
Clews in his weekly letter. Thus far
none of the world's money markets
have seriously felt the war, the worst
effect falling upon Paris, where Rus-
sian bonds are largely held. It has
been estimated that France holds not
less than \$1,200,000,000 of Russian
bonds; so that Russia's chances of in-
creasing her borrowings from her best
friend on good terms are not very bril-
liant. Later on Russia may make a
better show of resistance, but the su-
perior alertness of the Japanese has
already won them important advan-
tages.

Cooked in Hot Lye.

Alpena, Feb. 20.—Edward Breit-
kritz, an employe of the Northern Ex-
tract works, was cooked to death to-
day. Breitkritz had charge of the
leaches, and while he was repairing a
leak in one of the doors, it is presum-
ed his hammer struck the latch, for
the door flew open and Breitkritz was
completely covered in the hot liquid,
receiving injuries from which he died
at noon. The leach is about 30x40 feet
and contained liquid to the depth of
nine feet. The fluid was heated to a
temperature of 190 degrees.

Nearly Forefits His Life.

A runaway almost ending fatally,
started a horrible ulcer on the leg of
J. B. Orner, Franklin Grove, Ill. For
four years it defied all doctors and all
remedies. But Bucklen's Arnica Salve
had no trouble to cure him. Equally
good for burns, bruises, skin eruptions
and piles. 25c at G. S. Darling's and

Kentucky's Grand Old Man.

Colonel Thomas Johnson is the
grand old man of Kentucky. He has
just celebrated his ninety-first birth-
day at his home at Mount Sterling,
near which place he was born in
1812. In early manhood he was in-
terested in the Kentucky militia.
He entered the Confederate army
as a colonel and served with the fa-
mous Morgan. Since the war his
business has been stock raising and
his diversion politics. He served
many terms in the lower house and
senate of Kentucky. He has a large
family living, and all Kentucky
worships him.—Exchange.

Sarcastic Hetty Green.

Hetty Green one day went into a
broker's office and was mistaken for
a book agent by the manager, who
pretended he was too busy to see
her. Mrs. Green, however, made
one or two remarks which struck
him as being very sagacious, and he
was beginning to thaw out when
his quiet visitor said: "Don't let me
disturb you. I am Mrs. Hetty Green.
Maybe you've heard of me." The
manager had not yet recovered his
breath when Mrs. Hetty left the of-
fice.

Leipsic's Triple Ambition.

The Leipsic (Germany) city coun-
cil has passed an ordinance com-
pelling city employees to take up
their residence within the city lim-
its. As the waterworks, lighting
plants, storage warehouses, markets,
pawn shops, hospitals, etc., are mun-
icipal, a large number of people will
be affected. It is said that this ac-
tion was taken in order to foster
Leipsic's growth, to increase the
city's income and to concentrate the
Conservative vote.

An Unnecessary Luxury.

In a Wurttemberg mountain vil-

summer resort a demand arose for
a bath house. The matter was dis-
cussed by the city fathers pro and
con. Finally one of them arose and
said: "Gentlemen, I am seventy-five
years old and have never had a bath
in my life. I am in good health."
The bath house was voted unneces-
sary.

A bill has been introduced in the United States senate by Senator Frye and in the house by Representative Lovering providing for a pension for members of the life saving crews. The men are paid \$65 per month for eight months in a year and out of that sum have to provide their own board. The bill provides for retirement on three-quarter pay after 30 years service

Beaver Island, near the foot of Lake Michigan, will be connected with the outside world by a government cable early in the spring. The island, which is the largest in Lake Michigan, has been cut off from the outside world ever since it was settled, early in the last century, except by boats during the summer. Vesselsmen have been earnestly pushing the project on account of the large number of boats that shelter there during the summer in the commodious harbors of the island.

The "Grayling Times," reached our table last week. It is the first issue of J. E. Spencer's paper since its removal from Frederic to Grayling and is just what anyone acquainted with the publisher would expect, a neat, live local sheet which is a credit to the town. It is a six column quarto and starts out with a liberal advertising patronage. As a former resident of that village we congratulate them on the location among them of Mr. Spencer, whom we know to be an able editor and up-to-date printer. Here's success to the Times.

The house committee on postoffices and postroads last Saturday completed the postoffice appropriation bill, which carries \$169,997,588. The estimates on which the bill is based were \$168,085,770. The appropriation last year was \$153,500,000. The committee first cut the estimates to the extent of \$3,256,000, and then added \$5,180,000 caused by a provision increasing from \$600 to \$720 the salaries of rural free delivery carriers. The total appropriation for rural free delivery service is \$21,000,000. Last year this item was \$12,600,000.

Mr. H. Haggins of Melbourne, Fla. writes "My doctor told me I had consumption and nothing could be done for me. I was given up to die. The offer of a free trial bottle of Dr. King's New Discovery for Consumption, induced me to try it. Results were startling. I am now on the road to recovery and owe all to Dr. King's New Discovery. Mortality During January.

There were 3,126 deaths reported to the secretary of state for the month of January, corresponding to a death rate of 14.7 per 1,000 population. The number was 184 larger than that registered for the preceding month, and is also greater than the number for January, 1903.

By ages there were 490 deaths of infants under 1 year of age, 210 deaths of children aged 1 to 4, and 982 deaths of elderly people over 65 years of age. The age distribution was practically the same as for the preceding month.

Important causes of death were as follows: pulmonary tuberculosis, 176; other forms of tuberculosis, 25; typhoid fever, 57; diphtheria and croup, 83; scarlet fever, 34; measles, 12; whooping cough, 19; pneumonia, 412; influenza, 101; cancer, 134; accidents and violence, 180.

There was one death by smallpox, which occurred in Kalkaska county.

Torpedo Tubes.

Submerged torpedo tubes are to be placed in the New Orleans, Georgia, New Jersey and Rhode Island. The tubes are provided for those ships in the original designs, and it has now been recommended that each be equipped with two forward tubes. Emphasis of the necessity of such type of armament has been afforded by the experience of the Russians at Chemulpo and Port Arthur, probably much to the satisfaction of the advocates of torpedo tubes, concerning which there has been much discussion in our own service the past few months. There has always been a question whether the Russian disaster could not have been prevented by watchfulness and due regards for the liability of such attack. Such protections as the Russians possessed availed nothing. For instance, the Czarevitch was especially designed with 1½ inch bulkhead, instead of the average ¾ inch, as a protection against a torpedo attack, yet that vessel was torpedoed and beached.

Out of Mails.

The postoffice department has begun a crusade against the printing of objectionable advertisements and stories in newspapers and periodicals throughout the country. The action is based on section 3893 of the revised statutes, which imposes a fine of not exceeding \$5,000, or imprisonment for not over five years, or both, for any person depositing in the mails, or aiding in circulation through the mails of any obscene print, pamphlet, etc. It is proposed to amend this law to include vulgar advertisements and other printed matter.

Under the new policy a number of papers containing questionable matter have been thrown out of the mails under telegraphic orders to the postmasters, and a campaign will be waged against objectionable medical advertisements, which are being widely published.

Liability of Farmer Employers.

An English farm laborer recently died from blood poisoning, and his widow brought suit for damages against his employer under the provisions of the workmen's compensation act. It was shown that the deceased had suffered an abrasion of the skin on the nape of the neck as the result of carrying heavy bags of fertilizer upon his shoulders, and the inflammation that followed developed into blood poisoning, the inference being that the wound was poisoned by the fertilizing material.

Although it did not appear that the employer had been unduly careless or that he had imposed unnecessary risk upon his employee, the court ordered him to pay \$150 (nearly \$750) to the widow and children of the deceased workman, and as an appeal was taken he was ordered to pay the widow \$2 a month until the matter was settled. The case is of interest to farmers generally as showing the sweeping nature of a law that would seem at first thought to apply chiefly to factories and other lines of industrial effort far removed from the farm.—Rural New Yorker.
