A Grim Tragedy

is daily enacted in thousands of homes as death claims, in each one, another victim of consumption or pneumonia. But when coughs and colds are properly treated the tragedy is averted. F. G. Huntly of Oaklandon, Ind. writes: "My wife had the consumption and three doctors gave her up. Finally she took Dr. King's New Discovery for consumption, coughs and colds which cured her and today she is well and strong." It kills the germs of all diseases. One dose relieves. Guaranteed at 50c. and \$1 by Dr. Darling and J. M. Wuggazer & Co., druggists. Trial bottle free.

Conveniences on D. & M. Trains.

The D. & M. Ry. is the only line into Detroit from the north having porters in the ladies' day coaches. These porters make themselves useful in every way possible, and pay particular attention to the wants of the ladies, children and elderly passengers. A pleasing and convenient feature in the coaches is that they are provided with free lavatories supplied with towels and soap. All coaches on through trains were built last summer and have six-wheel trucks to insure smooth riding; are equipped with the famous high-back seat, patent window shades, double windows, lighted with electricity, with pintech compressed gas and acetylene gas auxiliary lights. Its parlor cars are not surpassed by any line in the United States, and the remarkable low charge of 50 cents applies from Cheboygan and intermediate points to Detroit. Only 25 cents is exacted between Cheboygan and Bay City. No line in Michigan excels the D. & M.'s track. On account of 96 per cent of it being a straight line with very few curves the highest speed is attainable together with safety and comfort. Its new 94-ton passenger engines running between Alpena and Bay City are the newest and largest in Michigan. All trains are heated by steam, provided with regular and emergency automatic air brakes, air whistle signals, and all other up-to-date appliances. It has long been a matter of record that no road more successfully combats snow and cold weather and keeps its trains closer on time during the winter season. Meals in its cafe cars on the la carte plan are most excellent and at reasonable prices. Through solid, wide-vest-

hule trains are operated without change between Detroit and Cheboygan, and through sleeping cars run between the same points. If you are going anywhere, try the D. & M.; its rates are as low as the lowest and its service above the standard. If you desire any information, confer with D. & M. agents or communicate with the general passenger department at Bay City, Mich.

Sickening, Shivering Fits.

of ague and malaria can be relieved and cured with Electric Bitters. This is a pure tonic medicine; of especial benefit in malaria, for it exerts a true curative influence on the disease driving it entirely out of the system. It is much to be preferred to quinine, having none of this drug's bad after-effects. E. S. Munday of Henrietta, Tex., writes: "My brother was very low with malarial fever and jaundice till he took Electric Bitters, which saved his life." At Dr. Darling's and J. M. Wuggazer & Co.'s drug stores; price 50c. guaranteed.

Mr. Parker's Suit of Silk.

A. D. Parker, recently elected vice president of the Colorado and Southern railroad, made a fortune of more than \$1,000,000 after grubstaking a prospector for some years without result. Mr. Parker carried the man along when it was frequently a great strain on his resources, but his reward came a short time ago. In spite of the change in his fortune Mr. Parker continues to live in Denver just as he always did, and when he realized that Goldfields had made him a millionaire he permitted himself but one extravagance; he bought a suit of silk underwear. That had always seemed to him the height of luxury. Mr. Parker's million is otherwise intact.

The Japanese Parliament.

Perhaps the greatest sign of the westernization of Japan was when it formed its parliament, only sixteen years ago. The first meeting, a somewhat stormy one, took place in the winter of 1890-91. Japanese members of parliament are paid about £80 a year as salary in addition to traveling allowances, which they are not at liberty to refuse even if disposed to do so. The number of qualified voters in Japan amounts to little over 1 per cent of the total population. All electors must be twenty-five years of age and must pay 15 yen (about 30 shillings in English money) direct national taxation.—*Era Magazine*.

Japanese Cartoons.

Japanese newspapers teemed with cartoons during the recent outbreaks following the treaty of peace. One published by the Osaka Asahi depicts the triumphal progress through the streets of Admiral Togo, borne aloft on a portable shrine by a score of coolies, and in contrast to this another sketch setting forth the funeral of Baron Koruma. The bearers wear tall silk hats and have extremely long and cadaverous faces, while the baron himself is seated, dead, and with a very resigned expression. The Asahi also publishes a map of Sakhalin island being cut in half by a sword.

Swinburne's Lost Vote.

Algernon Charles Swinburne, the poet, lost his vote at the Wadsworth revision court. He claimed a qualification as the occupier of a house in Putney, which he inhabits jointly with Theodore Watts-Dunton. The claim was resisted on the ground that Mr. Watts-Dunton only was recognized as the occupier by the landlord, and, although it was stated that Mr. Swinburne paid half the rent and shared the household expenses, his name was struck off the list.

What We Eat.

More shocking even than the stories of poisonous preservatives and dyes used in foods to which the public has been treated so abundantly of late is the story of a Boston baker who used 1,000 pounds a day of rotten eggs deodorized with formaldehyde. This fact is stated in the last report of the Massachusetts board of health.

A Grim Tragedy

is daily enacted in thousands of homes as death claims, in each one, another victim of consumption or pneumonia. But when coughs and colds are properly treated the tragedy is averted. F. G. Huntly of Oaklandon, Ind. writes: "My wife had the consumption and three doctors gave her up. Finally she took Dr. King's New Discovery for consumption, coughs and colds which cured her and today she is well and strong." It kills the germs of all diseases. One dose relieves. Guaranteed at 50c. and \$1 by Dr. Darling and J. M. Wuggazer & Co., druggists. Trial bottle free.

ALL OVER THE HOUSE.

Rules to Be Observed in Cooking Vegetables.

Onions should always be boiled in hard water, salted, because they lose much of their flavor and aroma if boiled in pure soft water.

String beans usually need to boil forty-five minutes. The addition of a small bit of salt pork will generally minimize any rank flavor and will improve them. When done drain thoroughly, season with salt, pepper and butter.

Turnips, carrots, cabbage and onions should be boiled in a great deal of water and taken up immediately and drained when sufficiently done. Overcooking destroys the taste, and too little water will allow them to turn dark in color.

A very little sugar added to tomatoes, squash, peas, corn, beets and turnips will improve them.

Turnips will cook more quickly when cut into thin slices; otherwise they will need to cook a long time.

Cauliflowers should be tied in a net to prevent boiling to pieces.

Potatoes on Half Shell.

Bake large, smooth potatoes of uniform size until they yield to the pinching fingers. Divide each carefully in half lengthwise, scrape out the interior, taking care not to break the skin; mash the potato with a little hot milk and melted butter until you can beat it into a cream; salt and pepper, beat in two tablespoonfuls of grated cheese for two cupfuls of potato and return to the waiting shells. Set into the oven until hot through and slightly browned. Serve in the skins.

To Clean Ribbons.

Pin them upon a board covered with a clean white cloth and scrub with a bit of soft white flannel from end to end with cold water to which you have added a little household ammonia. Do this faithfully, and dry upon the board in the sun, bleaching at last if necessary with peroxide of hydrogen, then exposing to the sun. When almost dry, cover with thin muslin and iron on the board.

The Dust Cloth.

A damp cloth is the best of all dusters, although many women will not use it on any account, claiming that it injures the polish on the furniture. This objection is absurd, for if the cloth is clean it will not harm the furniture in the least. It may remove the gloss, but this can easily be brought back when the surface of the wood is dry by rubbing hard with a dry, soft cloth.

Deviled Chicken.

Take the left over meat of cold cooked chicken and cut into neat pieces as large as possible, dust each piece lightly with cayenne pepper and salt and brush with a little made mustard. Melt a tablespoonful of mustard in a chafing dish and put in the chicken with a quarter of a cup of stock or milk. Heat thoroughly, turning the pieces over in the gravy, and serve on toast.

SMOKING REFORM.

Smoking is to be reformed by its friends. A convention of pipe smokers was held in Belgium to combat the abuse of tobacco. The best way to prevent the abuse of tobacco is to smoke slowly. M. Kos, the president of the convention, informed his hearers that it took him three hours and seven minutes to get through one pipe. It is obvious that at this rate of going one could hardly smoke more than four pipes a day. A pipe, according to M. Kos, will outlast three hours if filled in a particular way—loosely—that is, at the bottom—firmly in the middle and again loosely at the top. "Further," said he, "you must give up your whole mind to the process. Patience and determination make the true smoker." M. Kos went on to affirm that the object of the convention, strange as it might appear, was to combat the abuse of tobacco. Those who smoke slowly get the greatest amount of pleasure out of their tobacco, while the nicotine is absorbed in the wood and does not reach the lips.

A Bit of Human Nature.

An amusing bit of human nature comes to light in Paris. The management of the underground railway until recently provided at every station a small box in an out of the way corner for passengers to deposit their tickets in. As a natural result of this system only one ticket in ten was deposited in the box. The rest fluttered about at will all over the station. The authorities noted this and changed the small inaccessible box for a large one in a prominent position. The surprising sequel was that instead of one in ten only one in a hundred tickets found its way into the new box. The easier it was to deposit the tickets the more careless were the passengers in disposing of them.
