Number 14

Comparative Digestibility of Food

Made with different Baking Powders

From a Series of Elaborate Chemical Tests:

An equal quantity of bread (biscuit) was made with each of three different kinds of baking powder—cream of tartar, phosphate, and alum—and submitted separately to the action of the digestive fluid, each for the same length of time.

The relative percentage of the food digested is shown as follows:

Bread made with Royal Cream of Tartar Powder:

100 Per Cent. Digested

Bread made with phosphate powder:

68 1/4 Per Cent. Digested

Bread made with alum powder:

67 3/4 Per Cent. Digested

These tests, which are absolutely reliable and unprejudiced, make plain a fact of great importance to everyone: Food raised with Royal, a cream of tartar Baking Powder, is shown to be entirely digestible, while the alum and phosphate powders are found to largely retard the digestion of the food made from them.

Undigested food is not only wasted food, but it is the source of very many bodily ailments.

J. A. Blust writes us from Masinasin, Alberta, Canada, under date of March 24, as follows: "Inclosed please find postal note for which I would like to receive that old beloved Tawas Herald for one whole year. Am at present located at this place putting in steel bridges across Milk river for traffic purposes. This sure is the finest section of country I ever laid my eyes on."

Last Friday evening Mrs. Clare Bewick Colby, of Washington, D. C., addressed an audience that filled the court house to its capacity, on the question of equal suffrage. Her address was not only entertaining but was highly of the educational on the suffrage question. Her arguments were clear, concise and convincing, and the effect can't fail to strengthen the cause.

Insure in the old reliable Tawas Bay Fire Insurance Agency, F. F. French proprietor, representing twenty of the largest companies in the world. Losses paid promptly. The Herald loss was adjusted and paid within ten days to the satisfaction of the assured. Cheap rates. Farm insurance. Let us insure you. Call on or write us. A record of a quarter of a century of fair dealing.

Next Monday the voters of Iosco county will be called upon to settle the local option question for another two years. The Herald is well pleased with the stand it took in the past, and believes that our prediction that the county would be much better off without saloons than with has been proven. At this time we are convinced that the people of the county are so well pleased with the conditions of the past two years that there is no doubt but what they will continue in the dry column for the ensuing two years. We hope so, and can see no reason why we should not.

The address by Prof. Brumm, of the University, last Friday evening was one of the treats which was greatly appreciated by the large audience which gathered at the court house. It abounded with good thought and was delivered in a most pleasing manner. All hope that he will again visit the city.

The Northeastern Michigan Rural Carriers Association will meet at Standish May 30, and already plans are under way to entertain about 50 visitors expected on that date, consisting of rural carriers, postmasters, substitutes and others accompanied by their ladies and friends. A. D. Elwell, president, and M. F. Parker, secretary, Standish.

Dr. W. N. Yeager, the dentist, will be at his office in this city again Tuesday, Wednesday and Thursday, May 6th, 7th and 8th. He does all kinds of dental work in first-class manner and guarantees all work satisfactory. Special attention given to crown and bridge work. Painless extraction.

About Birds.

BY L. H. BELKNAP

It is of general interest to all to know that a new federal law providing for the protection of migratory birds is now being put in operation. This law prohibits, among other things, the killing at any time of song birds and insectivorous birds whose value to agriculture overbalances their food value. Robins and bobolinks, now slaughtered by the millions in the south, are specifically included in this category. Also, all migratory game birds, such as ducks, geese and swans, are protected during the mating and rearing season. In addition, all birds in danger of extinction are given special protection.

It will be several months before the law can be put in active operation to do the good that it will do when fully enforced. This delay will be necessary because under its terms the department of agriculture must first adopt regulations providing for its special application to the different parts of the country. One of the things to be regulated is the closed seasons according to the climate, varying habits of the birds, and so forth. These regulations must then be left open for inspection and criticism for three months before they are put in force.

The purpose of this law is to supplement and strengthen the state laws now in operation and to make all states protect their birds. The next step will be, undoubtedly, to make an international pact with Canada to the north of us and Mexico to the south of us to cooperate with the United States thru international agreement for the protection of useful bird life. The countries of Europe are already doing this very thing because they have suffered greatly from the slaughter of birds.

The United States Department of Agriculture has recently gotten out a bulletin entitled, "Fifty Common Birds of Farm and Orchard," and it is such a useful bulletin that I wish to call attention to it. The first paragraph of the introduction states the purpose of its issue. It is as follows: "This bulletin is intended to serve the very practical purpose of enabling our farmers and their boys and girls to identify the birds that frequent the farm and orchard. The material prosperity of the state and nation depends largely on agriculture, and any agent that serves to increase the size of crops and insure their certainty is of direct interest and importance to the farmer. Birds constitute one of the most valuable of these agents, since they depend largely for their food on insects which are among the farmer's most dreaded foes."

Not all of the birds described in this bulletin are common to us here in Michigan, but those that are common are splendidly illustrated in colors. This bulletin is Farmers' Bulletin 513, and can be secured by writing to the United States Department of Agriculture for the same. Now, I wonder how many of our farmers and their boys and girls will write for this bulletin?

I have noted the following arrivals from the South to date, March 31st, with the date of their arrival in this vicinity: The crow, March 8th; the blue bird, March 13th; the robin, the 18th; the song-sparrow, the 19th; the bronzed grackle, the 20th; the kingfisher, the 24th; the meadowlark, the 24th, and the killdeer, the 25th. Some of these may have arrived earlier than these dates, as the dates given are as I noted them.

The blue bird is hailed as the harbinger of spring, and is one of our most useful birds. It is very domestic in its habits and at one time used to nest about our homes. Now it seeks the burnt over lands because the saucy and scrappy English sparrow has driven it out. Sixty-eight per cent of its food consists of insects, while thirty-two per cent is made up of vegetable matter. The blue bird has endeared itself to all bird lovers because of its beautiful plumage, its simple but pleasing song, and its great usefulness. Also, because it returns in earliest spring.

The robin is the most cherished of our native birds. Everyone is eager to see his or first robin. I know of no bird whose song is so enjoyed as the robin's. The robin has quite a taste for fruit, but its general usefulness is so great that every means ought to be taken to protect the fruit before the birds are killed. Farmers' Bulletin 54 of the United States Department of Agriculture gives means to protect the fruit from the

robin. The robins should visit us in greater numbers after this year because they cannot now be killed for pot-pies in the south.

Our common meadow lark is another great friend of the farmer. In some localities the meadow lark is killed by sportsmen, but this should not be tolerated because the bird is protected by law, and is very useful. The meadow lark is very common in this vicinity. The bird is recognizable at a glance by the gray and brown streaked upper parts, and the brilliant yellow throat and breast separated by a broad, V-shaped black collar. Prof. Walter Barrows, of the Michigan Agricultural College, says that from the standpoint of the agriculturalist the meadow lark has few rivals.

The kingfisher is one of the few birds in which blue predominates. It has a conspicuous double crest of blue, a long bill, and breast band and sides of blue-gray like the black. Their food is entirely of fish. It is very interesting to watch them dive into the water with a splash and capture the fish in their bill. Their nest is generally at the end of a tunnel in a sand bank. Their note is a loud, harsh rattle, easily heard a half mile away on a clear, quiet day.

The killdeer is very well known to nearly everyone, because as he flies he cries "kill-dee," and so makes himself known. This bird is one of our best known shore birds, and commonly visits farmyards, and nests in pastures and cornfields. The killdeer is a great insect eater, and is particularly valuable to the farmer because of its fondness for grasshoppers and insects of cultivated lands.

The habits of the crow are universally known. He is a shrewd, sly bird, and the way he gets away from pulling corn and stealing eggs is quite marvelous. He eats a great many wireworms, cut-worms, white grubs and grasshoppers, but whether he does more harm than good has been in dispute for more than a hundred years, and I am not prepared to say.

Next week I shall write about some members of the sparrow family.

Found a Cure for Rheumatism.

"I suffered with rheumatism for two years and could not get my right hand to my mouth for that length of time," writes Lee L. Chapman, Mapleton, Iowa. "I suffered terrible pain so I could not sleep or lie still at night. Five years ago I began using Chamberlain's Liniment, and in two months I was well and have not suffered with rheumatism since." For sale by all dealers.

Coughs and Consumption.

Coughs and colds, when neglected, always lead to serious trouble of the lungs. The wisest thing to do when you have a cold that troubles you is to get a bottle of Dr. King's New Discovery. You will get relief from the first dose, and finally the cough will disappear. O. H. Brown, of Muscadine, Ala., writes: "My wife was down in bed with an obstinate cough, and I honestly believe had it not been for Dr. King's New Discovery, she would not be living today." Known for forty-three years as the best remedy for coughs and colds. Price 50c and \$1.00. Recommended by J. M. Wuggazer & Co., Tawas City, and Jas. E. Dillon, East Tawas.

Master of State Grange.

MICHIGAN STATE FEDERATION OF WOMEN'S CLUBS.

I want the ballot for the same reasons that all honorable men want it. I must obey the laws, so I should be allowed to vote for those who make them. I must pay taxes, therefore I want the privilege of saying for what purposes the money will be spent. And greater than all these, I am a citizen and feel a moral responsibility to help by my vote all the moral and civic reforms of the day. The co-operation of men and women for all good measures can only be accomplished by Equal Suffrage.

Farmers, Beware!

Dr. Mary Thompson Stevens, president of the College Equal Suffrage Club, Monday night issued a warning to presidents of the state's country districts to look out for persons disguised as farmers who travel about the state preaching against equal suffrage. The warning declares that the society learned of such practices in Livingston county.

Such disguised actions are an insult to the intelligence of Michigan farmers.

FARMER'S ORGANIZATION FOR EQUAL SUFFRAGE.

The joint resolution by the Grange, the Gleasers and the Farmers' clubs of Michigan, which has just been sent out over the state, is the direct result of the policy so long in force in these organizations.

The inequality of men and women, and their separation in all other social and co-operative societies has been noticeable everywhere. But these orders from the very first put their women on an equal plane with men. The working out of this feature is very interesting.

While in St. Louis Mrs. Crane was the guest of Mrs. Phillip N. Moore, and spoke before several important civic organizations. Last month she gave a series of addresses in New York City on Municipal Sanitation under the auspices of the League for Political Education. During this visit to the metropolis, Mrs. Crane also spoke before Rabbi Wise's congregation on "Some Fundamental Reasons for Giving the Ballot to Women."

Of Doubtful Status.
"Have you much of a friendship with Wombat? I see you going home with him occasionally." "The status of our friendship is a puzzle to me. He never takes me to his house except when he has been drinking."—Louisville Courier Journal.

Pains in the Stomach.

If you continually complain of pains in the stomach, your liver or your kidneys are out of order. Neglect may lead to dropsy, kidney trouble, diabetes or Bright's disease. Thousands recommend Electric Bitters as the very best stomach and kidney medicine made. H. T. Alston, of Raleigh, N. C., who suffered with pain in the stomach and back, writes: "My kidneys were deranged and my liver did not work right. I suffered much, but Electric Bitters was recommended, and I improved from the first dose. I now feel like a new man." It will improve you, too. Only 50c and \$1.00. Recommended by J. M. Wuggazer & Co., Tawas City, and Jas. E. Dillon, East Tawas.

Mr. John H. Ketcham, the eloquent Master of the State Grange, is a suffragist of many years standing, in spite of his youthful appearance. He attended the Suffrage Convention at Lansing in January, and without reserve he pledged his personal influence and the power of the Grange to obtain the ballot for the women of Michigan.

Rev. Caroline Bartlett Crane carried the "Clery Banner" in the Washington procession, marching with the collegiate women in cap and gown. Mrs. Crane states that the failure to afford police protection to a peaceable procession of unfranchised persons was the best possible argument for

giving them the franchise, when protection of other kinds would naturally result. While in St. Louis Mrs. Crane was the guest of Mrs. Phillip N. Moore, and spoke before several important civic organizations. Last month she gave a series of addresses in New York City on Municipal Sanitation under the auspices of the League for Political Education. During this visit to the metropolis, Mrs. Crane also spoke before Rabbi Wise's congregation on "Some Fundamental Reasons for Giving the Ballot to Women."

Fish's Strange Method.

The fish Paratithapa multicolor hatches her eggs in pockets in her mouth.

Mrs. Clara B. Arthur, President of the Michigan Equal Suffrage Association, is also a prominent club woman. Among the many projects which she has advanced for the furtherance of Detroit reforms, has been the playground movement. The present campaign for the vote for Michigan women has been entirely under Mrs. Arthur's energetic management.

Certain anti-suffragists have persistently misrepresented Judge Lindsey in their speeches and the following telegram from Mr. Lindsey is a most emphatic denial of the false statements:

Denver, Colorado, Feb. 27, 1913.

Any statement that I have repudiated woman suffrage is absolutely false. I am more than ever in hearty favor of woman suffrage. I have written in behalf of woman suffrage and lectured in its favor all over the country. Woman suffrage is right. It is fair and just and I believe will be adopted in every state in the Union within a few years as it ought to be. Equal suffrage has been of great benefit in Colorado. It has been a great uplift to the moral and political life of our state. It has given women, children and men opportunities and rights they would not have had but for the fact that women vote in Colorado. Women have been chiefly instrumental in the overthrow of the boss, the corrupt machines and the beast in Colorado. I favor equal suffrage with all my heart and soul and all the strength that I am capable of giving to so just a cause. I have never wavered in this behalf in which I am more confirmed now than ever before.

BEN B. LINDSEY.

Literally True.

"Say, Chimpie, wot's a suffragette?" "A suffragette's a woman who wants a chance to knock the stuffing out of the ballot-box."—Judge.

MICHIGAN'S OPPORTUNITY

To Stand For Nonpartisanship In Her Highest Court.

The Decline of Political Intolerance Should Place Rollin H. Person and Alfred J. Murphy On the Supreme Bench.

One of the most noteworthy phenomena of the past decade is the decline of political intolerance. Ten years ago a president or a governor who would pass by the faithful in his own party to appoint to office men, belonging to the opposition would have been denounced as a traitor to his friends. But all this has been changed. President Taft bestowed some of the highest places within his gift upon democrats. Governor Osborn did the same. Both President Wilson and Governor Ferris have already gone far in the same direction. The opportunity is here for the people to emulate these distinguished leaders. If there is reason for non-partisanship anywhere, it is doubly strong in the case of the judiciary. With men of the same degree of ability and integrity the Supreme Court of Michigan would be a better court if its members did not all come from the same political party. Two groups of men looking at the same thing from different angles are more sure to see all there is to be seen than one larger group all having the same view point.

We speak of this partisan phase of judicial election, because if we expect judges to be free from partisan bias in the rendition of decisions which may be of a political nature, the voter likewise should be just as free from party ties in casting his vote. In the election of Judges of the Supreme Court, party lines ought to fall, but they should only fall before the bulwark of integrity, ability and judicial temperament. Only when a minority presents candidates of the highest grade has it a right to ask for representation on the bench and for a bipartisan judiciary. This spring, those who recognize this spirit as a hopeful thing, have no excuse for failing to join in the effort to place upon the Supreme bench, now solidly Republican, men of the Democratic faith. Canvass the entire bench and bar of Michigan and one cannot find two men better fitted by temperament, learning and experience to be Justices of the Supreme Court than Rollin H. Person and Alfred J. Murphy.

Rollin H. Person.

Judge Rollin H. Person was born on a farm in Ioseco, Livingston county, October 15th, 1850. He lived and labored on the farm except as he taught school for a time until 1871, when he became deputy register of deeds at Howell. He studied law in the office of Dennis Shields at Howell and spent

a year in the law department of the University of Michigan where he sawed wood in about every yard in the city to pay his way. In 1873, he was admitted to the bar at Howell before Judge Turner. After admission to the bar, he went to Nebraska to practice but the grasshopper invasion of '73 and '74 led to his return to his active state and county where he practiced law from 1875 to 1891.

In 1891 Governor Winans appointed him to the Circuit bench of Livingston and Ingham counties and that spring he was elected for the balance of the term. That was before the law forbidding a candidate's name to appear on more than one ticket was passed. In 1893, there were four tickets in the field in his circuit and his popularity was such that his name was on every ticket. Since his retirement from the bench in 1899 he has been engaged actively in practice in the capital city. While on the bench he presided over the grand juries which brought to light the so-called constitutional amendment frauds in 1894 and the military steal in 1899. His career both as judge and practicing lawyer has been a notable one. His acquaintance with lawyer and layman is a very wide one and all agree that he would fill the high position of supreme justice with honor to himself and splendid service to the state.

Alfred J. Murphy.

Judge Alfred J. Murphy has been on the bench in Detroit for the past thir-

teen years continuously. He was elected Judge of the Recorder's Court of Detroit in 1899 for a term of six years, elected Circuit Judge in 1905, and re-elected Circuit Judge in 1911 for the term ending December 31, 1917. In all these elections, he overturned large adverse majorities, and not only did that, but carried Wayne county by as high a majority as 18,000. In Detroit, personal property and family rights are continually arising involving large interests. Diligent in duty, cultivated in mind, and definite

and choice in expression, Judge Murphy dispatches the business of his court with a broad intelligence, and yet with sympathetic understanding. It has come to be an axiom that justice goes forward smoothly, quietly and with all due celerity in Judge Murphy's court.

Alfred J. Murphy was born in Detroit, January 1, 1868, and has always lived there. Courteous in all relations, wise, upright and fearless as a judge, he has commanded the support of the bar, the press, and the people of his city, without regard to party lines. Beyond his professional experience, his understanding and sympathies have been enlarged by frequent contact with all classes of the community. In the prime of life, he is splendidly equipped for the work of a Justice of the Supreme Court. We presume that the entire history of Michigan does not furnish an example of the unanimity of favor on the part of the newspapers of every phase of political belief as to the fitness of a man for judicial life, as has characterized the enthusiastic praise of Judge Murphy's official work in Detroit, on the part of every newspaper in that city of every political belief, and no matter in what language printed.

We have no wish to detract one iota from the merits of any other of the candidates before the people of Michigan for the Supreme bench this spring, but we do say that in the interest of a non-partisan judiciary, in the interest of all those things that tend to the uplifting of Michigan as a leader among the States of this union, the high minded independent voting citizenship of this State should accord such minority representation upon the highest court of our commonwealth as the election of Judge Person and Murphy would accomplish.

FOR REGENTS OF UNIVERSITY

Voters Have Offered Two Able and Cultivated Men

If Political Bias is Cast Aside, Fred H. Begole and William A. Comstock Will Sit on the Board.

It has always been a matter of comment and pride to the people of Michigan that the principle of separating the election of judicial and educational officers from the heated conflicts of partisan campaigns was uppermost in the minds of the great leaders in the early history of our State. It was this principle that placed the election of Judges of our Supreme Court and Regents of our University in the spring, taking them out of the violent partisan contests incidental to the general fall elections. It is a matter of regret, however, that as a rule there has not been a great application of that principle in practice, and it has rarely been the case that we have had a single regent of the University not a member of the dominant party of the State. There is no better time than the present, when the progressive ideas of government are taking root in the minds of men of all parties, for Michigan to put into practice the ideas of her early leaders. The Democratic party of Michigan, this spring presents as candidates for the office of Regent of her great University, two men especially fitted to sit upon that honorable board.

Fred H. Begole.

The first of these candidates, Fred H. Begole, bears a name honored in this State. He was born in 1866 on Governor Begole's farm in Genesee county, and was educated in the Flint High school. On graduation, he adopted the profession of teaching and labored in the public schools of Michigan for five years. He settled in the upper peninsula in 1885 as principal of the Baraga schools. For one year,

THE PROGRESS OF DEMOCRATIC REFORM.

Governor Ferris' reform recommendations to the legislature and the situation of legislation at this date, March 20, embodying his suggestions.

Gov. Ferris' Recommendations.	Bills in both houses; and one incorporating provision to do away with 15 per cent clause, on general order in senate.
Reform of primary election systems.	Legislative Action. Resolutions submitting all three principles in practical form passed for people's attention at Spring election.
Establishment of initiative, referendum and recall.	Bills to provide for simplification of election system in the house; corrupt practices act passed the house. Resolution passed senate by unanimous vote but lacked ten votes in house of two-thirds majority.
Ballot reform.	Bills embodying this before both houses.
Short ballot reform.	Legislature adopted resolution approving proposed constitutional amendment to establish this system.
Publicity for candidates.	Bills granting board powers passed and signed by Governor.
Popular election U. S. Senators.	Bills before both houses.
Home rule for cities.	Bills introduced in senate.
Tax reforms.	Bills before both houses.
Public utilities commission.	Bills have passed house.
"Blue sky" laws.	Bill abolishing office passed and signed by Governor.
Encouragement of agriculture.	Bills before senate.
Abolition of state salt inspection.	Bills before house.
Abolition state oil inspection.	Bill before senate.
Abolition state livestock commission.	Bill of this character has passed senate providing for semi-monthly payment.
Civil service.	
Weekly payment of employees.	
Senate and house committees on appropriation working in harmony with governor to keep appropriations down to limit of reason.	

he was editor of the Baraga County News, a Democratic paper. He entered the employ of the Honorable Peter White at Marquette in 1889, and two years later was taken into partnership under the firm name of White and Begole. He was continually connected

with Peter White in different enterprises up to the time of the latter's death. Thousands of men and women in Michigan remember the great service Peter White rendered to the State of Michigan, and especially to the University as one of its Regents, and they must be impressed with the fact that Mr. Begole cannot fail to have imbibed some of the public spirit and faithful devotion to the public welfare always evidenced by Mr. White, during his association with him.

Mr. Begole was one of the organizers of the Marquette National bank in 1901, and has for many years been its vice president. He is president of the Lake Shore Engine Works operating the largest foundry, machine shop, blacksmith shop, and plate shop in the upper peninsula, employing from 150 to 200 men. He is also treasurer and one-third owner of the Prickett Land Company which owns large acreage of timber and mineral lands in Iron, Keweenaw, Ontonagon, and Marquette counties. He is a believer in the university as evidenced by the fact that his three sons, Donald, Charles, and Hurlburt are pursuing their studies at Ann Arbor. In religion he is a member of the Episcopal church and is regarded in the locality in which he lives as one of the foremost citizens in all that tends to the upbuilding of the community.

William A. Comstock.

Few men of his age have had the remarkable, successful, varied and widespread business experience possessed by William A. Comstock, the second candidate on the Democratic ticket for the office of Regent of the University. He was born in Alpena, this State, July 2, 1877, and was graduated from the Alpena High school in 1895, and entered the University of Michigan the same year, from which he was graduated in the Literary department with the degree of Bachelor of Philosophy in 1899. On graduation, he entered at once into business life, taking up electric railway construction as secretary of the Comstock Construction company, building the Toledo, Fremont and Norwalk railway from Toledo, Ohio, to Norwalk, Ohio. In 1902, the Comstock-Haigh-Walker company was formed to do general electric railway construction. He has been secretary of this company from its organization to the present time. This company built the

Rochester and Eastern Rapid railway from Rochester, N. Y., to Geneva, N. Y., in 1902-1905.

His father, W. B. Comstock, died in February, 1905, and he succeeded to the management of the business. He changed the Alpena Banking company of Comstock Bros., a private institution, to the State Savings bank of Alpena, in 1906. He was president of this bank until 1908 when it was consolidated with the Alpena County Savings bank, of which he is now a director. In 1906, the Comstock-Haigh-Walker company started construction of the Milwaukee Northern railway from Milwaukee to Sheboygan, Wisconsin. This property was completed in 1908, and he is president of the company operating the property.

Among fraternal organizations, he is a member of the Zeta Psi Fraternity of North America; F. & A. M., Hopper lodge, Alpena; I. O. O. F., Alpena; Fraternal Order of Eagles, Alpena; B. P. O. Elks and Maccabees. In civic positions, Mr. Comstock is president of the Alpena Hospital association; president of the Alpena Scholarship Fund association, which sends one student each year from the Alpena High school to the University of Michigan; second vice president and director of the Alpena Chamber of Commerce; Alderman of the first ward, Alpena common council. Few graduates of the University of Michigan have ever taken keener interest in its welfare after leaving its college halls. Ever since his graduation, he has been a fre-

quent visitor to Ann Arbor, and his personal hobby is the study of University education and University methods. He has made an inspection of nearly every great university and college in the United States from the Atlantic to the Pacific.

Why should one political party fill every place on the Supreme bench and the Board of Regents of the University and every state educational office in Michigan? In such non-political offices, is it not the part of good citizenship to advocate, work for, and vote for minority representation?

Why should the patriotic, independent voters of Michigan not have the courage of their convictions and vote to give this State minority representation on the Supreme bench, on the Board of Regents of the University, and other educational state boards?

Is there a high minded citizen of Michigan who regrets that Woodbridge N. Ferris was made Governor at the last November election? Is there one who can honestly say that the election of Governor Ferris has not been a good thing for the State?

STATE EDUCATIONAL AFFAIRS

Well Guarded By Nominations On Democratic Ticket

Sketches of Candidates Who Invite the Support of Voters of Michigan Regardless of Party.

For Superintendent of Public Instruction.

John M. Munson was born near Kane, Pa., thirty-five years ago. His parents came to this country from Sweden in the early seventies. For several years his father worked in the coal mines near Wilkesbarre and later settled down to make a farm in the rocky forests of the Blue Ridge mountains. Here Mr. Munson's life was that of the pioneer child—work of every description with the winter months for district school. As opportunity at home seemed meagre he started for the west at thirteen and arrived in the upper peninsula in 1891. Here he spent nine years at various occupations. He was mill hand and lumberjack on the Menominee river; printer and night school student; farm hand and finally teacher in the county

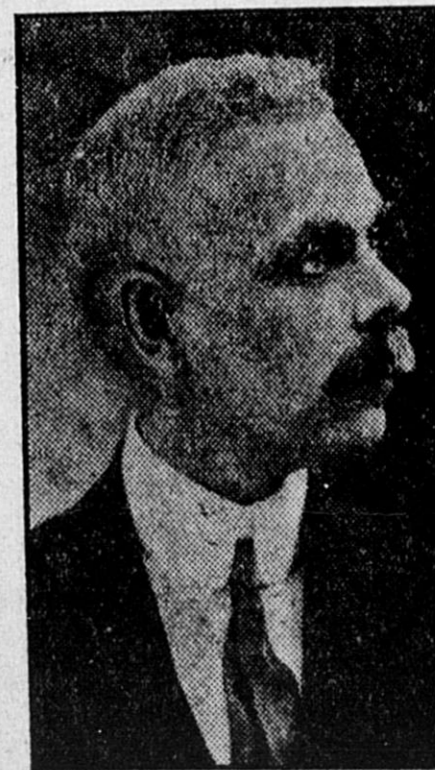

and village schools for five years. In the meantime, he attended the Ferris Institute and was graduated from that school in 1901. Next he entered Michigan State Normal College and was graduated in 1903. In school Mr. Munson was a leader. He was president of his class and in debate won first honors. Twice he was a member of the teams that represented the Normal college in intercollegiate contests. Later, Mr. Munson studied at the University of Chicago and was graduated from the institution in 1911.

During the years 1903-5, Mr. Munson was principal of the Clarkston Union school. For the last eight years he has been superintendent of schools at Harbor Springs. He is prominent in the educational activities of the State, a superior teacher, one who knows boys and girls and inspires young people to do and to dare. What his home people think of him we may conclude from the following extract from the Harbor Springs Republican:

"Mr. Munson is quiet and unassuming with no trace of brag or bluster in his makeup. He is a man of unquestioned ability and in every way capable of attending to the duties of the office. While his election would necessitate the selection of another to fill his place in the local schools, yet we feel that, inasmuch as the office of Superintendent of Public Instruction is not a political one, every citizen of the community should endorse his candidacy."

Member State Board of Education.

A democrat who has the ability to carry Grand Traverse county by a plurality of 159 against a Republican candidate for State Senator, who is running for a second term and who has given general satisfaction, is a feat that has never been accomplished by any man except Emanuel Wilhelm, who is candidate for member of the State Board of Education on the Democratic ticket this spring. Mr. Wil-

helm, was born August 18, 1862, and is the son of Northern Michigan pioneers, who were factors in developing the Grand Traverse region. His early days were spent on the farm upon which he was born, and all his time except eight years which were spent in the west and in Milwaukee, Wiscon-

sin, have been lived in his home county. Since his return home he has been engaged in the mercantile business being head of a large dry goods house in Traverse City. He has always been a consistent democrat and although the city has been almost solidly Republican, he was elected mayor three years ago by the largest majority ever given a candidate for that office, which position he filled for one term. Last fall, he was nominated for State Senator and carried every ward in the city, except one, against his Republican and Progressive opponents. Socially he is exceedingly popular, being a member of the Knights of Pythias, Elks, and Maccabee lodges.

For the State Board of Agriculture.

Robert W. Hemphill, Jr., is the first candidate for member of the State Board of Agriculture. He is descended from Scotch-Irish stock; his parents were born and lived all their lives in Ypsilanti. He, himself, was born in Ypsilanti and lived there until he en-

tered college; he attended the public schools of his native city, and the State Normal college, and then entered the Michigan Agricultural college, and completed a four year course in 1885. He engaged in the banking business in Detroit for three years, and the following ten years were spent in Chicago. He was superintendent of construction, and manager of the Detroit, Ypsilanti, and Ann Arbor railway, and has always shown business ability of a high order in organization; he originated the Washtenaw Electric company, and has been deeply interested in forestry work as well as landscape development, being in charge of four thousand acres of forest farming lands in the Huron valley. He has been president of the Park Commission of Ypsilanti, and since its organization, he has served as president of the Board of Commerce; the Art association, the Civic association, and has been director of the Board of Commerce of Ann Arbor, and treasurer of the Ann Arbor Art association. He is a member of the National Geographical society; an associate member of the American Institute of Electrical Engineers; National Electric Light association, and American Forestry association.

Alfred E. Souter.

Alfred E. Souter, of Shelby, Oceana county, who is one of the candidates on the Democratic ticket for member of the State Board of Agriculture, is a lawyer by profession, but was for many years and still is a practical farmer.

Mr. Souter was born in England, March 23, 1851, and came to Canada with his parents when a babe in arms. He was married to Miss Susan McClellie, July 2, 1875, and came to Shelby in the spring of 1876. In the spring

of 1883, Mr. Souter was elected Justice of the Peace and has been re-elected every four years since that time, and in nearly every instance on a straight party ticket, although the Democrats are considerably in the minority in that community. Mr. Souter studied law in his justice office and was admitted to practice in 1892, but spends much of his time in farming. He was for many years an active worker in connection with the Oceana county fair, being a member of the Executive Board and its President for several years. He is now serving his eighth year as president of the Patrons Mutual Fire Insurance company of Newaygo, Muskegon and Oceana counties.

Is there one member of the dominant party in this State who helped lift Michigan last fall from the unenviable position of intolerance in politics, who is ashamed of this patriotic course?

AN OPPORTUNITY FOR THE FARMER

A Farmer For State Highway Commissioner.

George G., Son of Michigan's Popular Farmer Governor, Edwin B. Winans, The Democratic Nominee.

The farmers of Michigan, whose direct interest in the highways is of greater moment than can possibly be that of any other class of our citizenship, have an opportunity now to place in charge of our rural thoroughfares a practical farmer in the person of George G. Winans of Livingston county.

George G. Winans the Democratic nominee for State Commissioner of Highways, is a son of Edwin B. Winans, who was Governor of the State in 1891-2. He was born in a mining camp in California, in 1856, where his father was mining with pick and shovel. The family returned to Michigan in 1858, and the father bought a large farm in Livingston county. George Winans lived at home on the farm during his boyhood, attending the district school, and later the high school at Howell and DeVeaux college Niagara Falls. At the age of twenty years he accepted a position with Alex. McPherson & Co., bankers at Howell, Mich., remaining in their employ five years. He then engaged in the mercantile business in Howell. Selling his business in Howell he accepted a position with Rogers Bros., manufacturers of silverware, as their representative in the Southern and Western States.

Ferrie Out For Woman Suffrage.
Woodbridge N. Ferris, governor, has issued this statement in favor of woman suffrage.

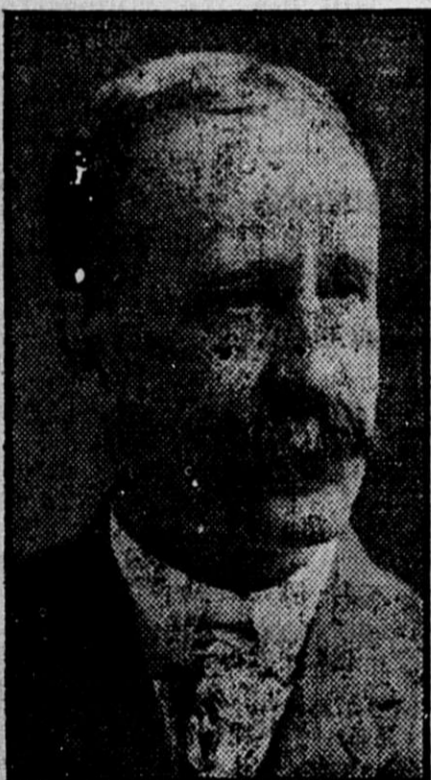

"So long as any human being is dependent upon any other human being for his or her food, clothing or shelter, he or she is that person's slave. Millions of women in America, notwithstanding they toil early and late, are thus dependent. The laws by which they are governed are not of their making. This nation is still half free, half slave. A true democ-

racy demands freedom for all the people. Women are the guardians of our homes. They should have a voice in making the laws under which they live and labor. The arguments against woman's suffrage are the arguments of tyranny. The arguments for woman's suffrage are the arguments for a vital self-sustaining democracy. Give woman the ballot and convert our great republic into a great brotherhood."

When his father was nominated for Governor, George came home and gave his time to campaign work, acting as private secretary during his father's term as Governor. Since his father's death in 1894, George has lived on the farm and given his attention to its management. Mr. Winans is a practical farmer and takes an active interest in every movement looking to the advancement of the farming industry.

When the American Society of Equity was incorporated in Indianapolis, in 1901, for the purpose of enabling farmers to secure a more equitable system of marketing their products, Mr. Winans was one who gave great assistance in working out its plan. He undertook the bringing of Michigan into the society and became state organizer. For several years, he gave largely of his time and money to build up the society and held meetings in every county in the State, and through his work has probably a larger personal acquaintance among Michigan farmers than almost any other man in the State. Mr. Winans belongs to a number of societies. He is a Gleaner, a member of the Masonic Fraternity, an Odd Fellow, and a member of the Loyal Guard.

Every place to be filled at the coming State Election is essentially non-political, and was so declared by the legislature whenever the time of electing such officials was removed from that of the regular fall biennial elections. A vote for a third party candidate will be a vote to continue the possession of such places by the party now controlling them. A vote for the Democratic candidates will be a vote of actual minority representation.

"I hate the word charity—not the charity that means love—there is not enough love to go around—but the kind of charity that leads a man when he sees a poor shivering wretch, to go down into his pockets, produce a quarter, and then go away with his heart warming and thing: 'I am a fine fellow.' We do not want charity,—we want justice."—Woodbridge N. Ferris.

"We have continued to be occupied by our little affairs and have given little thought to the nation and to our posterity."—Woodbridge N. Ferris.

"It is true that where one gets without working, many work without getting."—Woodbridge N. Ferris.

"What this dear world wants is less charity and more justice."—Woodbridge N. Ferris.

for the purpose of registering the names of all persons who shall be possessed of the necessary qualifications of electors, who may apply for that purpose.

WOMEN ELECTORS

In accordance with Section 4, of Article 3 of the Constitution of the State of Michigan, and Act 206, Public Acts of 1909, the Board of Registration of said city will register the names of all women possessing the qualifications of male electors who make Personal Application for such registration; provided that all such applicants must own property assessed for taxes somewhere within the county of which said city forms a part, except that any woman otherwise qualified who owns property in the county jointly with her husband or other person, or who owns property within said county on contract and pays taxes thereon, shall be entitled to registration.

Following are the qualifications of the male electors in the State of Michigan: Every male inhabitant of this state, being a citizen of the United States; every male inhabitant residing in this state on the twenty-fourth day of June, eighteen hundred thirty-five; every male inhabitant residing within this state on the first day of January, eighteen hundred fifty; every male inhabitant of foreign birth who, having resided in this state two years and six months prior to the eighth day of November, eighteen hundred ninety-four, and having declared his intention to become a citizen of the United States two years and six months prior to said last named date; and every civilized male inhabitant of Indian descent, a native of the United States and not a member of any tribe, shall be an elector and entitled to vote; but no one shall be an elector or entitled to vote at any election unless he shall be above the age of twenty-one years, and has resided in this state six months and in the township or ward in which he offers to vote twenty days next preceding such election.

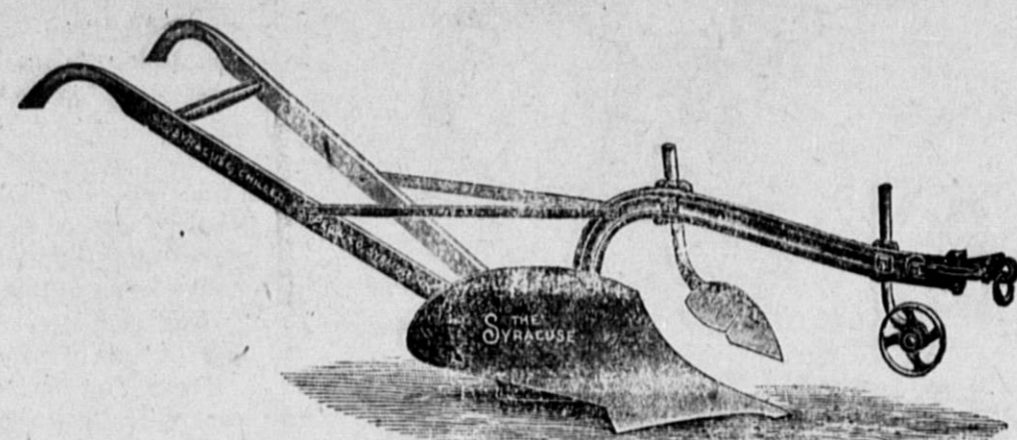

Said Board of Registration will be in session on the day and at the place aforesaid from 8 o'clock in the forenoon until 8 o'clock in the afternoon for the purpose aforesaid.

Dated this 17th day of March, A. D. 1913.

How Michigan Farmers Are Successfully Fighting Live Stock Diseases

If you are not doing something to rid your farm animals of the deadly stomach and intestinal worms you are simply **Letting Down the Bars** to hog cholera and all the other fatal diseases which have cost the farmers of this country over fifty millions of dollars the past year. YOU can't afford to run this risk. YOU can't afford not to take preventive measures. The best way of preventing these deadly plagues from getting a foothold among your stock is to keep every animal **worm free** and in the best possible condition.

Worms are the cause of 90 per cent of live stock losses. Thousands of Michigan farmers have learned this fact and by effectually striking at the cause have successfully won their fight. They have found "an ounce of prevention is better than a pound of cure." Read how they have stopped the loss and improved the value of their live stock.

"I have fed SAL-VET to all my sheep, hogs and pigs, and also to one of my work horses that was not in condition. The horses have rounded out splendidly; my sheep never looked so well at this time of the year and my hogs and spring pigs are in the best of health. I have always been slow to feed any of the stock foods or medicines, believing that good feeding, and ordinary conditions ought to keep stock in good health. But I am well satisfied with the results obtained from SAL-VET; it has certainly improved to a marked degree, the condition of my stock."—W. H. SOHANEZ, Supt. Sheep Dept., Michigan Agricultural Society, Hastings, Mich.

"We keep SAL-VET accessible to our sheep all the time and have found its use very effective in keeping out worms, and the sheep in a generally healthy condition. We have also found it an excellent conditioner and worm cleaner for horses. Our experience is that of many of the best farmers in this locality."—A. A. WOOD & SONS, Per Roscoe M. Wood, Salina, Mich.

"I have been feeding your SAL-VET to my sheep, hogs, horses and cattle for some time, and feel that I would not willingly do business without it. It keeps all my stock in fine condition and in a high state of health, and since feeding your remedy, I have seen no evidence of parasitic infection. I can confidently recommend SAL-VET to every stockman."—W. M. H. ANDERSON, Pres. Fourth National Bank, Grand Rapids, Mich.

"My SAL-VET is all gone, and as common salt does not begin to take its place, I want you to send me another lot at once. I am sure that \$5.00 worth of SAL-VET saves me \$10.00 worth of feed; all my sheep, cows and hogs are doing remarkably well. My experience has been that SAL-VET and worms cannot dwell together."—E. A. BETHHEIMER, East Tawas, Mich.

"My horses are free from worms, and look sleek since giving them SAL-VET. I feed it just as I do salt—just keep it before them constantly."—FRED MANLEY, R. 2, White Cloud, Michigan.

"Having thoroughly tested your 'SAL-VET' I have found it to be exactly as you say it is. I feed it to hogs and pigs and never had better results in my life. Many hogs in the neighborhood died of cholera; I have had no trouble here."—J. H. LEVENECKER, R. 6, Byron Center, Mich.

The Great Worm Destroyer and Live Stock Conditioner

Look Out for These Danger Signs

Coughing, rough coats, laggard steps, poor appetites and dull eyes. These are the common symptoms of worm infection and should disease break out in your neighborhood the chances are a hundred to one against you, and your entire herds may be swept away with a suddenness that will appall you. You can greatly lessen this danger from disease if not altogether avoid these heavy losses simply by letting your stock run to "Sal-Vet"—the cheapest and greatest worm destroyer as well as the best preventive of live stock diseases.

"Sal-Vet" is a medicated salt which works a wonderful change in all live stock. It first destroys and expels the deadly worms and gives nature a chance to put every animal you own in a healthy, vigorous condition. It is the best stock insurance you can get because it costs so little and does so much. For one-twelfth of a cent a day any hog or sheep can run to it freely and will doctor themselves. It costs only a trifle more for larger animals and requires no mixing, no dosing, no drenching, no starving—no bother at all. I prove all this or no pay.

Here is My Money-Back Trial Offer

Simply call at my "Sal-Vet" dealer's store and get enough "Sal-Vet" to last all your stock 60 days. Take it home with you and place it where all your farm animals can run to it freely. Then watch results. If "Sal-Vet" does not do what I claim—if it don't rid your stock of the deadly stomach and intestinal worms and prove entirely satisfactory TO YOU, simply notify the dealer and he will refund your money in full. You won't be out a single penny. I take all the risk. Remember, you get ALL your money back if you are not pleased. You certainly can't afford to risk the loss of a single animal when such a fair, square, liberal offer like this is made to you. You know your dealer—he accepts your word as to the results. You take no risk whatever.

SIDNEY R. FELL, Pres., The S. R. Fell Co., Cleveland, Ohio

To Our Patrons: Get rid of the worms in your stock and watch your profits grow. "Sal-Vet" is giving wonderful satisfaction to our customers. We carry it in stock and will gladly arrange to let any farmer in this vicinity try it 60 days on "S. R. Fell's" liberal money-back offer. Come in and get a supply the next time you come to town. We guarantee "Sal-Vet" and back up every statement in this advertisement. You take no risk. You'll find it the cheapest stock conditioner you ever used.

The State Fair.

With the idea of making the 1913 Michigan State Fair the greatest exhibition Michigan has ever had, the management is offering \$100,000 in premiums. This was recently decided at a meeting of the Premiums committee in Detroit. This vast amount exceeds by \$10,000 the greatest sum ever before appropriated by the Fair authorities. Over \$60,000 of this money will be devoted to premiums for the educational end of the Fair alone. This grant will enable General Manager Dickinson to carry out his ideas ament to the fact that the Michigan State Fair should teach its patrons a great deal as well as amuse them.

The Premium and Business committees backed Mr. Dickinson up in the contention that more premiums should be devoted to educating both the tiller of the soil and the city bred man alike. In the new appropriation these ideas have been carried out to larger extent than at any time in the Fair's history. There are handsome inducements for growers in every line to excel. There are liberal prizes for the best dairy, fruit, grain and stock and produce exhibitions. More incentive than ever before for the farmer to surpass in his products.

Actual demonstrations and investigations will be conducted on the grounds for the purpose of educating the unsuccessful farmer in proper methods of farm management. Boys and girls from the several counties in Michigan will be brought to the Fair free of charge and given scientific instruction in farm systems and domestic sciences.

Richer purses and consequently bigger and better fields will embellish the racing program. The rich stakes will unquestionably attract the greatest exponents of the light harness pastime in the country. In fact, every desirable phase of the Michigan State Fair will be elevated to a higher and better standard as a result of the liberal policy of its management.

Coughs and Consumption.

Coughs and colds, when neglected, always lead to serious trouble of the lungs. The wisest thing to do when you have a cold that troubles you is to get a bottle of Dr. King's New Discovery. You will get relief from the first dose, and finally the cough will disappear. O. H. Brown, of Muscadine, Ala., writes: "My wife was down in bed with an obstinate cough, and I honestly believe had it not been for Dr. King's New Discovery, she would not be living today." Known for forty-three years as the best remedy for coughs and colds. Price 50c and \$1.00. Recommended by J. M. Wuggazer & Co., Tawas City, and Jas. E. Dillon, East Tawas.
