Father and Son.

Fathers and sons do not have enough of each other's society. So patent is the fact that Mayor Baker of Cleveland has issued a proclamation asking for an increased intimacy, and closing with these

"If we can begin the new year with the resolve that our sons shall be more our companions and our fathers more our comrades it will add both to the sweetness of out private life and to the value of our citizenship."

Mayor Baker is the first of 500 mayors of American cities to join officially in the "father and son" movement started in Cleveland, and which has now got as upon commenced suit against him for far east as Bangor, Mc., and west as far as Denver.

The average father and son are pretty of \$42.80 including costs. No appeal good comrades up to the time that the 155 was taken by Mr. Snyder to the circuit hoy becomes of high school age. When the boy goes away to school and forms new associations the distance between the two increases. A surprising number of the letters from fathers to sons in college takes the form of hastily scribbled checks. At the end of school days father and son feel an ill defined uneasiness in each other's presence. They have nothing in common. The father fears that the son may think him old-fashioned, and the son fences, expecting every moment some solemnly

delivered "good advice." It is unfortunate that it is so, but the fact may as well be faced. There are exceptions and these constitute a peculiarly happy contrast.

What is finer, indeed, than the sight of a vouth admitted into the circle of his father's friends? The boy that is a companion of "dad" all the way may not know more than the boy that had drifted from his father, but he has less
