

THE TAWAS HERALD.

Volume XXXI

TAWAS CITY, MICHIGAN, FRIDAY, JUNE 12, 1914

Number 24

HAPPENINGS OF THE WEEK

Local, Personal and General News Furnished in Condensed Paragraphs for the Convenience of the Busy Reader

Fire insurance. Henry Hanson, adv
Let Merschel, East Tawas, do your
cavertouring.

Under-Sheriff Chase went to Flint on
official business Tuesday.
James Daley of Hale was a business
visitor in the city Monday.

S. C. Williams spent a few days the
past week visiting his daughter in Saginaw.

A clean tooth never decays. See Dr.
Carson and have him clean your
teeth.

Frank Laidlaw returned to Detroit
Monday after spending a few days at his
home here.

Dr. and Mrs. C. V. Crane returned last
Friday from Detroit, where they had been
on business.

Waterman's Ideal fountain pens make
most acceptable graduation presents.
L. L. Johnson, adv

Mr. and Mrs. George A. Prescott, jr.,
went Monday to their home at Prescott,
where they will spend some weeks.

Miss Victoria Green returned Saturday
from Rose City, near which place she
has been teaching school the past year.

Miss Elizabeth Leudtke returned last
Friday from a two weeks visit at the
home of her brother, George, at Whit-
more Lake.

Mrs. R. J. Goldie of Detroit has been
visiting the past week with her sister-in-
law, Mrs. M. A. Crandall, and other
friends here.

The Maccabee excursion to Bay City
on Tuesday was not very largely attended
from this place, only about a dozen
tickets being sold.

Mrs. Joshua Roberts returned Wed-
nesday from Woodstock, Ont., where
she has been for several weeks past tak-
ing care of her mother, who is ill.

Mr. and Mrs. Edward Burtzloff and
little son went to Bay City last Saturday
to visit relatives. Ed. returned Sunday,
but his wife remained for the week.

Mrs. Jas. E. Ballard leaves this morn-
ing for a three weeks visit with her
mother and other relatives at Leroy.
Mr. Ballard will accompany her as far
as Saginaw.

On account of the storm last week the
road between Grant township was post-
poned until next Tuesday, June 16.
Remember the date and everybody turn
out and help on the roads.

On account of the absence of the
pastor, Rev. Moffet, the services at the
Baptist church next Sunday will be in
charge of Rev. O. R. Thompson, a min-
ister of the Disciple church.

John A. Mark left Monday for East
Jordan, whither he was called by the
death of his brother-in-law, Jas. B.
Palmiter. Mr. Palmiter visited in Tawas
City two or three years ago and will be
remembered by many of our citizens.

Those wishing hats or having millinery
work they wish done are requested to call
before July 1, as after that date I will
close my millinery business until the
opening of the fall season. Mrs. A. W.
Colby, phone 83-L, Tawas City. adv

A great deal has been said recently in
agricultural journals and bulletins re-
garding sand vetch. Persons interested
in this new crop can see a practical
demonstration of the same in L. H.
Braddock's yard, where he has a small
crop growing.

Burley Wilson and his sisters,
Mesdames Duffey and Julian, and his
nieces, Misses Frances, Hazel and
Lorene Wilson, left Tuesday evening
for Marquette, where they were called by
the death of Charles Wilson, a brother
of Mr. Wilson and the ladies and the
father of the girls.

A novel and interesting way of un-
loading heavy machinery from flat cars
was witnessed here Wednesday. A. J.
Rodman received a new bean thresher,
and instead of using block and tackle,
as is usual, he built an inclined platform
from the ground to the end of the car,
run his big oil tractor far enough up to
hitch onto the thresher, and pulled it off
the car with the engine.

A. W. Black, fire insurance. adv
Services at Christ church next Sunday:
Evening prayer, 7:00.

Rugs, Rugs. Beautiful line of Rugs
at King's furniture store. adv

Mrs. Henry Kane and Miss Lucy B.
Louch were at Bay City Saturday.

Commissioner John A. Campbell was
at Whittemore on business Tuesday.

Will Laidlaw leaves this morning for
Omaha, after a weeks visit at his home
here.

Chas. Brown of the Townline went to
Bay City Tuesday for a visit with his
son, Chancy, and family.

Buy your wall paper, rugs and furni-
ture at Sempliner's department store,
East Tawas, and save money. adv

J. E. Laidlaw returned Wednesday
to his home at Gladstone, after a weeks
visit at the home of his brother, George.

June is the month of weddings and
graduations. See us before making
your purchases for presents. L. L.
Johnson, adv

Every tooth in your head should give
you service. If it doesn't there is some-
thing wrong and you should see Dr. Car-
son at once. Phone 44-L. adv

Mrs. Eliza Taylor returned Monday to
her home at Flint, after a two weeks
visit at the home of her daughter, Mrs.
H. N. Butler of East Tawas.

Mrs. J. W. Brown of Alabaster was
taken to Mercy hospital, Bay City, last
Friday to undergo an operation. Dr. C.
A. Wakeman accompanied her.

The citizens of Alabaster are planning
on a big Fourth of July celebration to
be held on the old school grounds.
Further particulars will be given next
week.

A letter from Detroit informs us of the
birth of a 12-pound baby boy to Mr. and
Mrs. Chas. Schroeder on Wednesday,
June 10. Mrs. Schroeder was formerly
Miss Lena Cholger.

Rev. W. R. Blachford announces that
he will go to AuSable next Sunday, a
week early, that he may be home on the
21st, the day of the high school service
in the opera house, East Tawas.

Through a typographical error last
week the dates of the Chautauqua at
the bottom of this page were made to
read June 12-16, instead of July 12-16.
The latter dates are the correct ones.

Julius Zellmer came home Tuesday
from Detroit, where he has been em-
ployed for some time. He has been in
the hospital in that city for some weeks,
having undergone an operation for ap-
pendicitis.

The hottest June day that has been
known here in many years was last Mon-
day. About the noon hour the mercury
stood around 90 in the shade. In the
afternoon the sky clouded up and the
weather became much more tolerable.
In Detroit Monday the thermometer in
the street kiosks registered 101°.

Dr. W. N. Yeager, the dentist, will
be at his office, over Wuggazer's drug
store, in this city, Tuesday, Wednesday
and Thursday, July 7th, 8th and 9th.
All kinds of dental work done and all
work guaranteed. Special attention to
crown and bridge work. Painless ex-
traction. adv

A report has come to this office that
by reason of our criticism of the admin-
istration of public affairs in Tawas City,
certain business men have threatened
not to give the Herald any more of their
printing business. As a matter of fact,
the business of these men does not
amount to \$5 per year, as they are not
advertisers and their only patronage
consists of a small job once in a while.
However, even if their business amounted
to many times what it does, it would make
no difference to us. Our criticisms have
not been animated by any personal feel-
ing, but from a sincere desire to see our
little city conducted in the best possible
manner, and the man who cannot stand
criticism of that kind without becoming
angry and retaliating as these men have
threatened to do, is not fit to hold a pub-
lic office.

Bicycles and repairing at Merschel's,
East Tawas. adv

A. W. Black was at Bay City on busi-
ness Thursday.

Miss Denesge LaBerge was at Onaway
a few days this week on business.

The June session of circuit court for
Iosco county will convene next Monday.

Mrs. John Preston left Wednesday for
a few days visit with relatives at Saginaw.

Mrs. Leo. Hoshbach left Wednesday
for a few weeks visit with relatives at
Berlin, Ont.

An elegant line of Rugs, in tapestry,
axminster, velvet, wool and fiber, etc.,
etc., just received at King's. adv

Mrs. Chas. Sorenson of Lake View
arrived for a visit with her parents, Mr.
and Mrs. T. D. Shepard of the Townline.

Mrs. John Holt of Detroit arrived last
week and will spend the summer at the
home of her cousins, Mr. and Mrs.
Parker Morley.

Watches, let us save you some
money on a good watch. Elgin, Wal-
tham, or Illinois movement, highest
grade cases. L. L. Johnson, adv

Wonder what became of the cinder
path for bicycles which was to be built
along Lake street. A few cinders were
dumped alongside the road, but no
further work has been done as yet.

If your teeth do not break up your
food before it is passed on to the stomach
your health will not be good, because
nature demands food properly prepared.
Why invite disease and poor health?
Why not see Dr. Carson now and have
your dental troubles attended to? Phone
44-L. adv

Geo. Redhead returned Saturday from
Sault Ste. Marie, where he has been em-
ployed for the past few months. He has
been ill with neuritis nearly all the time
since leaving Tawas City and has re-
turned to his home to recuperate. He
went to Bay City Thursday for medical
advice, accompanied by his daughter,
Edith.

The heavy rains on the days set for
the road here last week, forced a post-
ponement of the work until more favor-
able weather. However, during the
past week a number of gangs have been
working on bad pieces of road in various
localities and the results of their work
are to be seen in many places. Let the
good work go on.

The I. C. S. A. A.
Tawas City High won from Alabaster
Saturday in a very good game. Had
Robinson been kept in the box the
chances are that the score would have
been 5 to 2, instead of 9 to 2, in Tawas
City's favor.

BOX SCORE:

The High School Class Day.

The Star theatre was taxed to its
capacity to seat the audience which
assembled last Friday evening to hear
the class day exercises of the 1914
graduating class of the Tawas City high
school. The admission was limited to
those receiving invitations, but the seat-
ing capacity of the house is only about
250, and every seat was taken.

The decorations were very simple, be-
ing limited to great bowls of snowballs
and bachelor buttons placed along the
front of the stage.

The program as published in last
week's Herald was carried out in its
entirety, and the various numbers as
presented by the members of the class
showed that much thought and careful
study had been expended in their prepa-
ration.

The class history was an innovation on
the usual manner of presenting this
feature of the program. Instead of
having one member of the class prepare
and read the history it was given as a
dialogue between two of the boys who
were supposed to have met some years
after their graduation and sat down to ex-
change reminiscences.

The class prophecy was also presented
in an original and novel manner. Two
of the young ladies dressed as witches
and stirring the mystic caldron were dis-
covered by one of the boys, who pro-
ceeded to interrogate them as to the
future history of the various members of
the class. The prophecies were pointed
and witty and elicited much merriment.

The program was interspersed with
musical numbers. A chorus by the
school began in her usual pleasing
manner, and John J. Kobs gave a
violin solo which received a hearty en-
courage.

The commencement exercises of the
class will be held at the court house
June 26. President C. T. Grawn of the
Mt. Pleasant state normal school will
give the address on that occasion.

What They Know.
The following quotation, author un-
known, is very timely for this season of
the year and we publish it for the benefit
of our high school pupils:

"The freshman knows not and knows
not that he knows not. Avoid him.

"The sophomore knows not and knows
that he knows not. Teach him.

"The junior knows and knows not that
he knows. Cherish him.

"The senior knows and knows that he
knows. Honor him."

"Prevent Flies from Breeding."
The popular slogan now is "Safety
First." Why not apply this to the fly.
If we can "prevent the fly" this will be
accomplished. Like many other things
of this nature it can be done if every-
body will do his or her little share.
Following are the steps necessary to take
to do it:

Screen stables if possible.
Remove the manure at least twice a
week.

Keep the manure, while it is in the
stable, in a closed bin or pit.

If flies begin to breed in stored
manure they may be killed by thor-
oughly spraying with a solution of
copperas (one pound to a gallon) ap-
plied at the rate of one gallon a day
where one horse is kept. It costs about
\$1 per hundred pounds, so that the cost
of keeping flies from breeding in a one-
horse stable is about one cent a day.

Be sure that you sprinkle the cracks
and crevices of the bin or pit, as well as
the cracks between the planking of the
stall floors.

It is well to abolish old-fashioned out-
houses where possible. Where this can-
not be done a liberal amount of ashes or
lime should be used, applied in small
amounts daily. Chloride of lime is
better than slaked lime, but slaked lime
is better than none at all.

Garbage cans should be thoroughly
cleaned after emptying and the contents
should be sprinkled with crude oil, lime
or kerosene oil.

Remember, every fly killed now,
means about 90,000,000 less this sum-
mer.

JAMES W. HELME,
State Dairy and Food
Commissioner.

**BE KIND TO YOUR HORSE
and all Dumb Creatures—it
shows the Gentleman.**

Unbeaten.

Late last Saturday night a game was
fixed up between East Tawas and Tawas
City at Shien Park. Well, they came.
We saw 'em. They went away licked.

"Knock wood,"
Howard Murphy, our best mound bet,
held his opponents to three hits, while
his teammates pounded out ten safeties,
of which Mart Musolf got three right in
the right places.

There was but one earned run and it
was made by the home boys in the sec-
ond inning.

J. Mark singled and stole second on a
close play. Then along came Musolf
with his first single, scoring Mark from
second. Musolf stole, but Birney fanned
for the third out. In the sixth we got
four on a triple by Murphy, two singles,
two errors and a wild pitch. As Murphy
was first up in this inning, it is probable
that he would have scored on a put out,
but as he scored on an error it could not
be counted as earned. This inning was
enough for Schollar, who gave way for
Joe Halligan in the seventh.

Joe kept them close in the seventh,
but in the eighth he dropped a pop-fly,
hit a man and gave three singles which,
coupled with two errors, counted five
runs. Our boys batted around this
inning. But two of Tawas City's hits
were wasted, the rest counting in the
runs.

East Tawas got one in the first on a
dropped ball, a double and a wild pitch,
and another in the seventh on two errors
and a hit.

However, East Tawas thinks the score
was a gross error, and not up to their
capabilities, so they will be taken on
next Sunday at Tawas Beach. But
Tawas City has a strong team, and
coupled with their last Sunday's confi-
dence they should be able to win again.

Against Schollar, 28; against Halligan,
12. Umpires—Noel and Sullivan.

Eighth Grade Exercises.
The county eighth grade graduating
exercises will be held at the court house,
Tawas City, Monday evening, June 22.
All are cordially invited to be present.
J. A. CAMPBELL, Com.

Encouraging News.
"Packers are getting few decent
heavy calves, being unable to use many
of them at the high prices they com-
mand."

This little item in a publication de-
voted to the cattle industry is of more
than passing interest. It indicates that
there is a growing demand for calves by
men who desire to convert them into
beef. In a word, that the movement
for conservation of young cattle life and
the rehabilitation of beef-producing herds is
taking hold.

This is very good news. There has
been altogether too much slaughtering of
immature food-producing animals in this
country, and it would be well if all
calves were beyond the reach of the
packer until maturity. Putting them on
the market earlier is an economic waste.

Old papers for sale at this office, 5c a
bundle.

The Meaning of Chautauqua.

Two strangers drove into town the
other day. They were overheard in hot
debate. One contended that the Chau-
taouqua advertisements were for a medi-
cine show, the other was of the opinion
that they were announcements of a
traveling Indian baseball club. What is
a Chautauqua? Why? How did the
Chautauqua come by its peculiar name?
What was its origin? Is it Indian or
Italian? What are the peculiar features
of a Chautauqua? These and similar
questions are heard daily on our streets.

Several hot debates have arisen over the
pronunciation of the word. Through the
Central Chautauqua System we have
secured the following interesting facts:

The word is of Indian origin, applied
to a beautiful lake in western New York.
It is pronounced Shaw-taw-qua. In
1874 Bishop Vincent and several
kindred spirits selected a camp ground
on the shores of the lake to conduct a
summer school, where they proposed to
combine education, refined entertain-
ment, religious instruction and recrea-
tion. The idea was novel, original and
popular. The attractiveness of the place
and program grew and drew people from
all parts of the country. People came
from great distances, and soon there was
a growing demand for branch assemblies
at various convenient centers. Here
was the impelling motive, which has led
to the establishment of many Chau-
taouquas. It was the desire to take the
splendid features of the mother Chau-
taouqua to every man, woman and child
in the country.

The great handicap of early Chau-
taouquas was the expensive railroad fare.
Today the Chautauqua is taken to the
people. We have at our door every
essential feature of the parent institution.
The treat once reserved for those who
could afford to leave home and business
and indulge in expensive travel is now
extended to the rank and file. The cir-
cuit system is the last word in the devel-
opment of this remarkable institution.
It is a triumph of modern efficiency, or-
ganization and system.

Waste is eliminated, and by the very
bigness of the business the cost is re-
duced. Without the expenditure of a
single cent for transportation, the com-
mon people have the chance once
limited to a favored few.

The Chautauqua platform attracts the
greatest minds and most splendid per-
sonalities of our generation. The
audiences are invariably the cream of
the community. They may differ in
creeds, in politics, in social standards,
in business-relations, in ideas and ideals,
but they are almost universally open
minded. They are just that part of the
general public which is most receptive to
the big questions of current interest.

It is believed by leaders of thought
that the Chautauqua movement is yet in
its infancy. Over 3,000 programs will be
given in various centers this summer.
It is an institution destined to be a
mighty factor in the future history of our
country.

Five Rules for Borrowing Money.
Five rules designed to convince farm-
ers that there is no magic about credit
are set down in Farmers' Bulletin No.
593, "How to Use Farm Credit," which
the United States department of agricul-
ture has just published. Unless the
farmer who is thinking of borrowing
money, fully understands these rules,
and is willing to be guided by them, the
government's advice to him is—DON'T.

As it is, there are probably almost as
many farmers in this country who are
suffering from too much as from too little
credit.

Of these rules the three most impor-
tant are:

1. Make sure that the purpose for
which the borrowed money is to be used
will produce a return greater than needed
to pay the debt.

2. The length of time the debt is to
run should have a close relation to the
productive life of the improvement for
which the money is borrowed.

3. Provision should be made in long-
time loans for the gradual reduction of
the principal.

The first rule is of course the key to the
wise use of credit. Between borrowing
money to spend on one's self and bor-
rowing money to buy equipment of some
sort with which to make more money,
there is all the difference between folly
and foresight, extravagance and thrift.

If the money is borrowed for a wise pur-
pose it will produce enough to pay back
principal and interest, and leave a fair
margin of profit for the borrower into the
bargain. If it is borrowed for a foolish
purpose it will produce nothing, and con-
sequently there will be nothing with
which to repay the loan.

From this point of view it matters
comparatively little whether the interest
be high or low. It is the repayment of
the principal that is the chief difficulty.

Rules 2 and 3 deal with the most sat-
isfactory way of repayment. Under-
neath them both is the same principle:
The loan must be paid with the money
it earns itself. For example, if the money
is used to buy a machine that will last
ten years, the machine must earn enough
in that time to pay for itself or it never
will. The loan, therefore, should be
entirely repaid before the ten years are
up, or the farmer will lose money on the
transaction, paying out interest for no
benefit in return.

On the other hand, if too early a date
is set for repayment, the machine will
not have sufficient opportunity to make
the requisite money, and the borrower
may have difficulty in raising it else-
where.

Rule 3 provides for some form of
amortization, the system by which the
(Continued on page eight.)

Meeting Him Half Way.
A hundred things happen every day,
says an exchange, that the newspaper
man never hears about. He does the
best he can, keeps his eyes and ears
open, but he is only a human being, not
omnipresent, or endowed with the gift of
foreknowledge, and therefore cannot
foretell the occurrence of an event. And
yet you often wonder why this thing or
that thing was not published. An editor
always does his best to give all the news
and is always glad to publish any item
of general interest. So before you
criticize an editor be sure that you
have done your part in furnishing him
the particular items of news that you
failed to find in the paper. Either send
the news to the editor or invite him to
come where the news is.

Notice.
There came into my enclosure May 31
an aged black horse, which owner can
have by paying charges and paying for
this notice. JOHN NEWBERRY,

TAWAS CITY, MICH., JUNE 12, 1914

The lengths to which some of the dyed-in-the-wool stand-pat political organs will go to decry and malign any who are not of their political faith is disgusting to the average reader. For instance, the Onaway Outlook, in its issue of May 29, stated that President Wilson had refused to speak at the Union Memorial services, but had accepted an invitation to speak at the Confederate memorial five days later. Last week the editor reiterated this statement, disregarding the fact that Wilson DID speak at the Union Memorial, and that the fact was published in thousands of papers throughout the country, our own state papers included. Nothing is gained by publishing such bald-faced falsehoods, for now-a-days the weekly paper is not the only reading of the average man, and a few false statements like the one mentioned will bring any paper into disrepute with its readers. If a man wishes to run a partisan paper he can at least be fair and just to the other side.

The present city administration took great credit to itself just before the city election this spring, for the graveling of Lake street, the funds for which were mostly raised by private contributions. We wonder if the administration will also take the responsibility for the neglect of this same street this spring. Not a dollar of expense nor a days time has been expended to keep the street in condition, notwithstanding the fact that ruts and holes have formed in the gravel surface, and that every rain leaves big pools of water standing on the road. Had a float been used early in the spring these things might have been avoided, but now a grader will have to be used if the road is to be restored to good condition. There is little use in spending money for gravel and labor to make a decent thoroughfare if it is to be neglected and left to deteriorate for want of a little labor and a few dollars for repairs.

Some of the democratic papers which were the loudest in their praises of the democratic platform adopted at Baltimore, are now heart and soul with Wilson in his attempt to repudiate part of that platform by repealing the free tolls provision of the Panama canal act. Verily "consistency thou art a jewel." The men who are swayed by every vacillating idea of the leaders of their party are the bane of the political life of this country. What we need is men who have convictions of their own and will stick to them, regardless of the changing opinions of men who are in politics solely for their own personal aggrandizement.

Four candidates have already announced themselves in the race for the republican nomination for representative in congress from the tenth district. They are Loud and Kelton of Bay City; Glerum of Oscoda, and Currie of Midland. Of the four, Currie seems to be doing the most hustling, and as he is a clean-cut politician and has made a good record as speaker of the state house of representatives, his chances of winning out seem very good.

All the talk of fusion between the republican and progressive parties seems to be emanating from the republican ranks. Teddy's followers are too pleased with their new plaything to give it up so easily.

The Panama Canal Question.

The Isthmian waterway has been a fruitful topic of discussion in Congress, in the periodicals, and in the newspapers for a number of years, and it bids fair to continue to be one of the most important subjects of controversy for many years to come.

Up to the time of the Spanish war the cutting of an Isthmian waterway was discussed in a desultory fashion, the probability being that a canal would ultimately be built through Nicaragua. When the Oregon steamed from the Pacific coast through Magellan straits to join the Atlantic fleet, it aroused the country to the belief that a canal should be cut through the Isthmus at the earliest possible moment. From that time there was no question about a canal.

Now that we have the canal almost completed the controversy is very interesting as to how we shall manage it, whether our own ships shall be allowed to go through free, whether it is a part of our coast line, or whether it is going to be used largely for the benefit of foreign shipping. When this is finally settled there will still be an open question as to whether the canal can be used by an enemy of the United States if at war with the United States. That is a question which will not be settled until a war comes and the country which is fighting the United States seeks passage for its ships through the canal.

The probabilities are that, just as it happened that those who first talked of an inter-oceanic waterway have long since passed away, the problems arising over the control and management of that waterway will still exist long after those who constructed the canal have also passed away.

Coughs and Colds Weaken the System.

Continued coughs, colds and bronchial troubles are depressing, and weaken the system. Loss of weight and appetite generally follow. Get a 50c bottle of Dr. King's New Discovery today. It will stop your cough. The first dose helps. The best medicine for stubborn coughs, colds and all throat and lung troubles. Mr. O. H. Brown, Muscatine, Ala., writes: "My wife was sick during the hot summer months and I honestly believe Dr. King's New Discovery saved her life." Good for children—50c and \$1.00. Recommended by Jas. E. Dillon and J. M. Wuggazer & Co adv

Cathay.

Cathay is an old name for China, and is said to have been introduced into Europe by Marco Polo. It is a corruption of Khitai, derived from Khitan, the name of a people who conquered the Celestial empire at an early date.

On London.

Tourist (in London)—"It certainly took a bunch of bobbies to arrest that silk-hatted guy! What did he do?" Cobby—"W'y, that bleedin' blither hain't pinched. 'E's a hement state; man goin' to luncheon!"—Judge.

Hot Weather Tonic and Health Builder.

Are you run down—Nervous—Tired? Is everything you do an effort? You are not lazy—you are sick! Your stomach, liver, kidneys and whole system need a tonic. A tonic and health builder to drive out the waste matter—build you up and renew your strength. Nothing better than Electric Bitters. Start today. Mrs. James Duncan, Haynesville, Me., writes: "Completely cured me after several doctors gave me up." 50c and \$1.00. Recommended by J. M. Wuggazer & Co and Jas. E. Dillon. adv

Make Use of Mirror.

A large mirror placed on the log carriage of the sawmill enables the Sawyer to make a survey of both ends of the log, with the view of economy.

Can't Spare the Time.

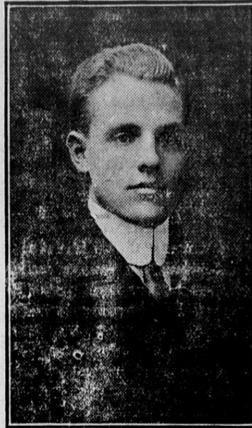

Bix—"They say that women are hardly ever stammerers." Dix—"No they have so much to say that they can't stop for it."

Camels in Queensland.

Over a thousand camels are used in Queensland as a means of transport across the arid districts, and the number is rapidly increasing.

Deafness Cannot Be Cured

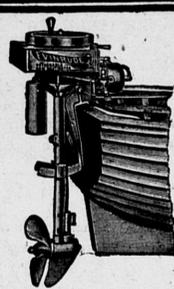

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever, nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

J. Stanley Wright

Mr. J. Stanley Wright, pianist, is a musician of considerable ability and one well qualified to fill the place allotted to him on the program. Though new to the Chautauqua platform, he has had several years of instruction and training under noted teachers and sufficient experience to insure his success in the Circuit Chautauqua field. He will accompany Mr. Morgan in all his solo work the third day.

W. B. MURRAY, Jeweler, East Tawas

Reno Rumbblings.

Tobias Londo spent Sunday at Mr. Popp's.

Mrs. Williams is improving very slowly.

Mr. Ridley is laid up with rheumatism.

Miss Grace White visited at Mr. Morrin's Sunday.

Grant Murray is a new employ at the Bently ranch.

Mr. Pierce and family visited at Mr. Bemis' Sunday.

David Londo and Joe Neltette were Reno visitors Sunday.

The board of review met at the township hall Tuesday.

Joe Robinson and wife visited at Arthur Popp's Sunday.

Mrs. Ethel Bronson visited at Mrs. Ernest Cregos' Tuesday.

Parmer Welsh returned to his home in Ionia last Friday.

Mr. and Mrs. Harsch visited at Mr. Bentley's Sunday evening.

Children's day exercises at the Baptist church Sunday evening.

Miss Richardson of West Branch is the new helper at Mr. Brindley's.

Mr. and Mrs. Buschen spent Sunday evening at the Bently ranch.

Mrs. Alvin Johnson of Flint is here visiting relatives and friends.

Mrs. Stanlack was at Taft on Saturday. She is very much improved in health.

William Glendenin and wife of Hale were visitors at Mr. Westervelt's Sunday.

Mr. and Mrs. Fawley of California are visiting Mrs. F.'s sister, Mrs. Westervelt, at Taft.

Mrs. George Crippen and daughter from Rose City are visiting Mrs. Ridley of the Buschen ranch.

Dr. Coy and wife and Mr. and Mrs. Waldrogle of Ohio are at their summer cottage on Laird lake.

Charley Schroyer and wife of Whittemore were the guests of Mr. and Mrs. Dyke Sunday evening.

Lloyd Ridley suffered an attack of blood poison in one hand, which necessitated his going to Rose City for treatment last week. He returned last Monday, his hand being much better.

There was an exciting ball game between Reno and Hemlock, June 6. The score being 47 to 4, in favor of the Reno boys. Hutchison says it would have been more fun for them to have played with a bunch of girls than to play Hemlock.

Hemlock Slivers.

A. J. Locke entertained his father from Midland over Sunday.

Percy Scarlett made a business trip to Bay City Thursday.

Rev. O. R. Thompson will preach at the Hemlock Baptist church next Sunday instead of Rev. Moffet.

A number of young people from here went trout fishing Saturday. They report a good catch and a pleasant time.

A number of new pupils were present at the S. S. last Sunday. The reds and blues are holding nearly even so far in the race.

Rev. J. B. Brown entertained his uncle, Dr. Watson, of Saginaw, and two cousins for a few days the past week at Elm Forks ranch.

Owing to the decorators being at work on the interior of the church Sunday school will be held in the Orange hall next Sunday at 2 o'clock. The Children's day program will be held at 8 in the evening.

The baseball score in last week's Herald between Sherman and Hemlock should have been 12 to 11. The return game was played at Sherman last Saturday, and the score was 21 to 9, in favor of Hemlock.

A dangerous but very successful operation was performed on a two-year-old colt, owned by John McArdle, by Veterinary Surgeon David Davison, assisted by Otto Anderson of Alabaster. The operation consisted of removing a rupture nine inches in diameter, which hung down 14 inches in length. Mr. Davison chloroformed the colt, cut the rupture open, and found the intestines down and grown to the bottom of the sack. It was a very delicate piece of surgery to remove the intestines from this growth and put them back in place, but it was successfully accomplished and the breach sewed up. The colt is on a fair way to recovery, as this operation was performed two weeks ago, and was witnessed by several citizens of Tawas City and vicinity. Too much credit cannot be given Mr. Davison as a skillful and efficient surgeon.

IN THE MATTER OF TRUTH

Little Dissertation by Southern Journal That is Liable to Raise an Argument.

A southern man related the other day that a friend was a student in a northern university, and that when one day a fellow student applied, in a casual way, the epithet of "liar" to him, the southerner promptly knocked down the youth who had been so imprudent in the use of words. The incident caused astonishment among the students who did not understand the southern notion of this particular term.

But are southerners really superior creatures? Far be it from us to say that they are not—but the important question is whether or not there be such a thing as a southern liar.

Every man holding a public office swears an oath to obey the Constitution and laws, and, if he be an executive officer, to enforce the laws. There are communities where certain laws are openly and impudently violated—directly under the eye of the officer of the law. Were the state to name one of these officers and say, "John Doe, you break your oath of office daily; you are a liar and perjurer," "John Doe" would proceed to take summary revenge on the state, and a large part of the public would applaud him. Yet that same part of the public would be perfectly well aware that "John Doe" is liar and perjurer.

Is it, after all, a worse thing to be called a liar than to be one?—Columbia State.

HAD MUCH SAME CHIMNEY

Statesman Thoroughly Understood Cottager's Situation and Was Ready With His Sympathy.

In London they tell of a certain distinguished statesman who is an optimist on all points save marriage. One afternoon this statesman was proceeding along a country road when he saw a cottager eating his supper alone in the road before his dwelling.

"Why, Henry," asked the statesman, "why are you eating out here alone?"

"Well, sir," the man stammered, "the—er—chimney smokes."

"That's too bad," said the statesman, his philanthropic sentiments at once being aroused. "I'll have it fixed for you. Let's have a look at it."

And before the cottager could say him the statesman proceeded to enter the cottage. As soon as he had opened the door a broomstick fell upon his shoulders and a woman's voice shrieked:

"Back here again, are you, you old rascal! Clear out with you, or I'll—"

The statesman retired precipitately. The cottager sat in the road shaking his head in sorrow and embarrassment. The statesman bent over him and laid his hand in kindly fashion on his arm.

"Never mind, Henry," said he, consolingly, "my chimney smokes sometimes, too."—Harper's Magazine.

WILLING TO EAT IT.

A school teacher sends this one: "My little pupils are always bringing me some present in the morning. One brings a big orange, another presents a bag of sweets, a third gives me a picture his brother drew. But the other day I had a birthday. None of my pupils knew about it but one, and he brought me a wonderful cake frosted in six different colors. I was overwhelmed; especially as he was one of the naughtiest boys in school.

"Dear child," I said, "I thank you for your remembrance. It was very sweet of you to remember my birthday, and I shall treasure this gift. But it would be a much better birthday present if you would promise me to be a good boy for the rest of the term. Won't you do that?"

"Yes, ma'am," he said seriously. "I'll promise. Shall I take the cake back and eat it myself?"

UNIVERSAL TOOL.

The modern soldier is equipped with a remarkable combination of tools, all in one. So varied is its application that it has been called the "universal tool." It is so insulated as to protect the user in cutting charged wires; it can be used as a hatchet, an adze or a spade, pliers, pipe wrench, wire cutters and wire twisters, a hammer, a file, a footrule, a screwdriver and a can opener. and it can be converted into a shield to give partial protection to a rifleman.

One of Country's Greatest Musical Attractions to Appear at the Chautauqua

SKELTON'S ALL STAR UNIVERSITY ORCHESTRA.

A special treat to all lovers of music will be the appearance at the Chautauqua of Skelton's All Star University Orchestra from Madison, Wis. This company was selected by the Central Chautauqua System following their decision to secure the best musical attraction possible. They desired something different in the musical line, something that would please in every way. That they have secured in this organization what they sought for we are sure. Never before in the history of Lyceum or Chautauqua work has there been such a group of stars banded together as in this case. There are ten members in the company, each one of whom is an artist of merit and a finished player. All of them have had years of careful training under noted teachers and experience in high class concert work, while several have taught in conservatories and have served as leaders and directors of various well known organizations. A capacity tent will surely greet this wonderful company on the fourth day of the Chautauqua.

Today.

The following poem, the author of which is unknown, is worth clipping and pasting up where you can see it often:

Sure this world is full of trouble—
I ain't said it ain't,
Lord! I've had enough and double
Reason for complaint.
Rain an' storm have come to fret me,
Skies were often gray,
Thorns an' brambles have beset me
On the road—but say!
Ain't it fine today?

What's the use of always weepin',
Makin' trouble last?
What's the use of always keepin'
Thinkin' of the past?
Each must have his tribulation,
Water with his wine—
Life! It ain't no celebration—
Trouble? I've had mine,
But today is fine.

It's today that I am livin',
Not a month ago;
Havin', losin', takin', givin',
As time will it so.
Yesterday a cloud of sorrow
Fell across the way,
It may rain again tomorrow—
It may rain—but say!
Ain't it fine today?

For Sheriff.

I desire to announce to the electors of Iosco county my candidacy for nomination as sheriff on the democratic ticket at the primary election, August, 1914, and respectfully ask for your support.

THOMAS H. HILL,
Hale, Mich.

New York Show Tells How to Save Forest Waste.

The forest products exposition, now being held in New York, presents many models and charts from the forest service, which show utilization of wood, particularly the use of by-products.

The amount of wood used and wasted is shown in a series of models depicting all stages of the lumber industry, from the tree standing in the forest to the boards and shingles in the finished dwelling. The first model of this series shows a number of trees standing in the forest. The next model shows these same trees felled, and forming a pile of logs and a heap of tops and branches. The succeeding step is a miniature sawmill, beside which are a pile of lumber, of slabs and of saw dust, all from the logs shown in the previous model. The model shows what becomes of the rough boards after they have been through the planing mill—the resultant material in several piles, one of edgings and trimmings, one of shavings and of the planed boards. Last comes a newly-finished dwelling house, around which are the odds and ends of the lumber left over from the building.

The relative amount of material used and wasted is indicated roughly in these models, but is shown according to actual scale in another part of the exposition in a series of diagrammatic charts. In the logging process 13 per cent of the standing tree is left in the stumps and tops, leaving 87 per cent to go to the sawmill. The various forms of waste shown at the sawmill constitute about 43 per cent of the original tree so that the rough boards constitute the remaining 44 per cent. Most of the sawmill waste is unavoidable, it is asserted, and due to economic conditions; the mill men say they take out all they can afford to.

Seasoning reduces this to 42 per cent. After the planing and other finishing processes the finished lumber forms only 39 per cent of the tree. The waste involved in building the house amounts to 4 per cent more, so that the proportion of the original tree which finds itself finally in the finished dwelling is not more than 35 per cent.

But all of the two-thirds need not be wasted. Some of it at least should go into by-products, according to the forest service which is studying such utilization. The bulk of the waste, such as tops, bark, slabs and edgings can be made into charcoal, turpentine, tannic acid, wood alcohol, acetate of lime, pulp and paper, and even the sawdust is made into wood alcohol and grain alcohol, and used in different forms for fuel.

Illustrations of this utilization of mill waste are shown at the exposition in a series of wall cases. One case shows the use by a knife manufacturer of the dog-wood waste of a maker of shuttle blocks. Another case shows how the waste involved in making large school furniture is converted into scrubbing brush backs for a brush factory. Other cases display shoe lasts made from discarded tenpins, the use of waste veneer cores for mine rollers and for paper pulp stock, sawdust made into floor sweeping compounds, and dowels of various sizes manufactured from cooperage waste.

Another exhibit consists of the inflammability test upon shingles treated with certain chemicals. One-half of a shingle is treated, the other half left untreated. With the best preservatives so far devised a flame which causes the untreated half to burn does not affect the treated half.

Portions of the various mechanisms for using and saving wood form an important part of the exposition. Thus a model preservation plant is shown, consisting of two small storage tanks, a pressure cylinder, a yard and track, together with photographs of one of the largest wood preservation plants in the country. This is not a complete working model, only certain forms being used to show the general scheme of the plant.

Another exhibit shows a small running model of a paper machine. This is used in explaining the process of making paper from wood. The samples of paper made at this laboratory from woods not generally used, in comparison with standard woods, illustrate the possibility of using new species and utilizing the mill waste.

The cup system of turpentine is on exhibit. This system is not as injurious to the tree as the old boxing method, reduces the fire hazard and gives greater yields. The forest service favors the use of the cup system, and the exhibit will show the two methods contrasted, both as to injury to tree and difference in yield.

Beside the main exhibition relating to forest products, there are certain exhibits relating to other branches of forestry. One of these consists of a miniature model of a Rocky Mountain national forest. This model shows a ranger station and a government tree nursery, besides a system of roads, trails, bridges, fire lookout towers and telephone lines, all built and maintained by

the government—by means of them the national forests are both protected from fire and rendered accessible to use.

Another striking model suggests the contrasted effects upon stream run-off and erosion of forested and deforested slopes. The model consists of two simulated hillsides—one of bare soil

the other clothed with vegetation. Water from above is sprinkled alike upon both hills and runs off into two pools. The pool supplied from the bare soil becomes clouded with silt washed from an unprotected surface. The other pool shows only clear water supplied from the protected hillside.

TO ALL ENGAGED IN DAIRY BUSINESS

Making butter on the farm is rapidly becoming a thing of the past. Any housewife knows what it means of drudgery to make good butter, and what difficulties she encounters in her attempt to find a satisfactory market for her product. Her outlet is limited. The creamery has every large city on the continent within its reach. The dairy farmer is plugging every day for the interests of the dairy farmer as well as for its own.

We are now in the midst of our third season and business is humming. Prices are good and the outlook fine. We are making nearly four times as much butter as we did in 1912. That also means that we are able to handle your cream to the very best advantage for you. Come and see us or ship us a can. We know we can please you.

We are selling the "Diablo," a separator of the Highest Merit, at prices that you would pay for mail-order and other inferior machines.

Notice of Road Job.
Notice is hereby given that sealed bids will be received by the Board of County Road Commissioners of Iosco county for the dressing up of sub-grade and hauling, spreading and rolling gravel on one mile (approximately) of Esmond county road. Road bed to be nine feet wide, and according to specifications of State Highway Commissioner. Said road lies in township 23, north of range 6 east. Bids to be in the hands of T. W. A. Mark, clerk of said board, not later than 10 o'clock, the 16th day of June, 1914, at 6 o'clock p. m. The board reserves the right to reject any or all bids. Dated, Tawas City, Mich., May 29, 1914.
J. W. A. MARK,
Clerk of said Board.

Order for Publication.
STATE OF MICHIGAN, the Probate Court for the County of Iosco.
At a session of said court, held at the Probate office in the city of Tawas City, in said county, on the 29th day of May, A. D. 1914.
Present: Hon. DAVID DAVISON, Judge of Probate.

In the matter of the estate of John W. Curtis, deceased, Agnes J. Curtis, administratrix, having filed in said court a petition, praying for leave to sell the interest of said estate in certain real estate therein described.

It is ordered, that the 29th day of June, A. D. 1914, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order for three successive weeks previous to said day of hearing in the Tawas Herald, a newspaper printed and circulated in said county.

DAVID DAVISON, Judge of Probate.
M. A. Crandall, Register of Probate. 25

Another fine young man arrived at Keystone Monday morning at the home of Willard Smith. Congratulations.
Five Rules for Borrowing Money.
(Continued from first page.)
principal is repaid in installments so that the amount of the loan is continually diminishing, and in consequence the interest charges also. Such a system is quite feasible when the loan is really

productive, when it returns to the borrower a definite revenue each year.
Tables showing the payments required to pay off principal and interest in varying periods of time are appended to the bulletin, and are recommended to the serious consideration of everyone who contemplates borrowing money. The bulletin also advises the farmer to secure the lowest possible interest.
At first sight this seems too obvious to be worth mentioning. Of course the interest should be as small as possible. Everybody knows that, except the lender. But if the other rules are observed, if the borrower manages his financial affairs soundly, he will be surprised to find how much easier it is to obtain favorable terms. The right kind of a lender does not want to foreclose mortgages. He wants his money back with a fair profit, like any other merchant. For money that is borrowed wisely, for money that is sure to be repaid, he charges low interest.
This, in fact, is why the government has published these rules for borrowers. It is not so much a matter of driving a shrewd bargain as it is of observing a few fundamental principles which alone can make credit a blessing and not a curse.

Forest Notes.
The New York state forest nurseries have a capacity of 28,000,000 young trees a year.
Approximately 750 acres on the Oregon national forest were planted with young trees this spring.
Cornell university recently dedicated a forestry building in connection with the state college of agriculture.
In co-operation with the weather bureau forest rangers are to measure snow depths in the western mountains.
It is said that the best time of day to see forest fires from lookout stations are just after daylight and just before sunset.
The state of Pennsylvania celebrates two arbor days each year—one for spring planting and one for fall—in April and October, respectively.
Manufacturers have found that red alder from the Pacific coast is a suitable material for clothespins. Alder makes a white, smooth, springy pin. As a result of this fact a clothespin factory, said to be the first on the Pacific coast, may be established at Portland, Oregon.
