### Another Win.

Tawas City hammered Robinson of Alabaster for 17 hits and a total of 26 bases last Sunday, and won by a score of 11 to 2. Alabaster got seven safeties off of Moeller, including two doubles. A heavy rain fell during part of the game, and caused a recess of about 20 minutes. Charles Moeller had a lot to do with winning his own game by poling out two doubles and a triple. Tomorrow (Saturday) afternoon, Aug. 1st, the boys travel to Alpena to cross bats with the team of that city in a return game next Sunday. Tawas City won the first game. Following is the score:

### AN UNDESIRABLE SHOW

**Wyoming Bill's Circus Accompanied by Grafters and Gamblers.**

A traveling circus known as Wyoming Bill's Wild West and Rough Riders of the World is scheduled to exhibit in East Tawas next Wednesday, August 5. According to all reports from towns where this show has exhibited, it is one of the most undesirable kind, and we wish to warn our readers of this fact that they may avoid being fleeced.

The Herald is not bragging about installing some old, second-hand typesetting machine, which has been thrown out of a first-class printing office, but we do pride ourselves on the fact that the columns of this paper are free from all deceptive and objectionable advertising. Some publishers are so greedy for the almighty dollar that they will accept anything in the line of advertising, regardless of whether it is legitimate or not and not caring how their subscribers may be deceived. The Herald is not of this class, for we make a point of investigating any matter which we think suspicious before allowing the same to appear in our columns. We have the cut and contract for the advertising of this infamous show in our possession now, but have excluded same from the columns of the Herald for the reasons above stated.

We append herewith some of the comments made on the Wyoming Bill show by newspapers in the towns where they exhibited:

"Wyoming Bill's Wild West show was in Midland Friday. The show lacked most of the attractions advertised, the performance was rather ordinary, and the elimination of several alleged features would be a decided improvement. The smaller number of entertainments of this class that visit Midland the better it will be for our town."—Midland Sun.

"Wyoming Bill's Wild West show exhibited here yesterday, and at each performance the tent was filled. Together with their crew and performers there seemed to be a well organized gang of gamblers and confidence men, and this morning there are many stories in circulation of how a number of people were fleeced out of their money. At least one store was broken into and the contents of the cash register confiscated. It will probably never be known just how much damage such shows do to a community. For the show itself we have yet to hear the first commendatory remark."—Crawford Avalanche.

"The Wyoming Bill's Wild West show has come and gone, leaving a bad taste with most of its patrons. Some of the show acts were first class, but everything was spoiled by the management allowing gambling games, short change grafting and obscene dancing in their side show. They even had the gall to operate the old pea and shell game, one of the most ancient ways of getting money from easy marks known to the gambling profession. Stranger to say several people bit on it. Some day, perhaps, people will find that it is absolutely impossible to play the other man's game and win. Some day, too, perhaps, all circus managements will learn that they must conduct their shows on the square in order to build up a permanent business. The best known shows today never permit anything but clean entertainments on their grounds."—Arenac Independent.

### Had Fine Canoe Trip.

That a canoe trip is one of the most delightful outings to be had will be vouched for by Everell and Everett Moffet, twin sons of Rev. O. E. Moffet, who returned Monday from a canoe trip to Saginaw.

The boys started from home last Wednesday in company with Ernest Meskey and Louis Kruzen, the two boys mentioned in the Herald some weeks ago. They took five days to make the trip, covering somewhere between 125 and 150 miles, and arrived at Saginaw Sunday evening.

The boys report a fine trip with no unpleasant experiences, except a strong head wind, which made paddling somewhat difficult. They were eager to make the return trip by the same route, but their parents did not think it best, so they returned by train and will go after their canoe in a launch.

The boys are members of the Tawas City troop of Boy Scouts.

### ARMY WORMS IN MICHIGAN

**Pest Has Appeared Again and Is Doing Untold Damage.**

For the first time in 18 years the farmers of Michigan are compelled to wage war on that worst of pests, the army worm. Nearly all the counties in the southern and central portion of the state are affected to a greater or less degree, and in many localities the farmers have been obliged to harvest their crops prematurely in order to save them from being completely devoured by the worms.

The worms were first reported near and in the city of Lansing last week, where they devastated many of the beautiful lawns in that city and ruined hundreds of gardens. Later the pest was reported in several other localities, Wayne, Huron, Saginaw, Shiawassee, Bay and Arenac counties being among those worst affected. The Prescott News of last week reported that large fields of oats and corn in the vicinity of Iwining were being destroyed by the worms, and Iosco county has suffered somewhat from their ravages, the farms of John White and John Robinson in Alabaster township having been invaded last week.

Many people carry the idea that the army worm is similar to the caterpillar, but that is not so. The worm is gray in color and resembles the cabbage worm to a great extent, except that they are smaller. The worms can crawl over the ground at an almost incredible speed, some reporting that their speed exceeds that of the fastest snake. This fact makes the pest harder to cope with, for a field will be invaded almost in the twinkling of an eye, and when they are once lodged it is well nigh impossible to exterminate them.

The Michigan Agricultural College has issued instructions that where the worms have not invaded a field their entry may be prevented by plowing two or three furrows across their line of travel. The worms will fall into these furrows and may then be destroyed, wholesale, by dragging a log through the furrow. Where the worms are already in the field or have invaded a lawn, the following is recommended to check their advance:

One pound of paris green.  
Twenty pounds of bran.  
One-half gallon of molasses with a little water added to moisten it and three oranges ground up fine, peeling and all.  
This mixture, which is sufficient for five acres of land, can be spread by broadcasting. The worms eat it and die.

The pests can also be diverted or confined to a single field by tarred boards or strips around the edges of the field, the worms having an aversion to the tar.

Authorities who are familiar with the army worm state that their presence in large numbers this year is due to the cold, wet spring which killed off the natural enemies of the worms. In ordinary seasons these enemies in the form of certain parasitic insects, destroy the larvae of the worms and prevent their appearance in any large number.

A number of the worms have been on exhibition in the window at the C. H. Prescott & Sons' hardware store the past week and have attracted considerable attention from passers-by.

LATER—Since writing the above we have learned of several other parts of Iosco county being invaded by the worms, but the damage here is nowhere near so great as is reported from other portions of the state.

### AUSTRIA WARS ON SERBIA

**Quarrel May Embroil Europe in General Conflict.**

As a result of the assassination of the Archduke Francis Ferdinand, heir to the throne of Austria, and his morganatic wife by members of a Servian propaganda, and its subsequent complications, Austria has formally declared war against Servia. There has long been bad feeling between the two countries and only a matter of this kind was necessary to precipitate a conflict.

The great fear of those countries who deplore war is that the trouble will not be confined to Austria and Servia, but that nearly all the powers of Europe will become embroiled in the combat.

Efforts have been made to have the differences between the two countries submitted to arbitration, but thus far such efforts have been unavailing. If a crisis comes and the conflict becomes general, the countries of Europe will probably take sides as follows: Germany, Italy and Belgium with Austria. Russia, France and England with Servia. England is striving to avert the possibility of mixing up in the row, but her efforts will probably be in vain.

Dispatches on Thursday stated that Austria had crossed the border and captured Belgrade, the capital of Servia. In this engagement Servia is reported to have lost 200 men and Austria 20.

### When Light Hurts.

Healthy people that live out of doors rarely complain of the light. But any one who has tried photography knows that out-door daylight is many times brighter than artificial light, indoors or out. When people suffer from artificial lights it is something besides the strength of the light. It is contrast that makes artificial lights unpleasant. One who lives most of the time in poorly lighted rooms finds it unpleasant to go suddenly into bright daylight. The more sudden the change the greater the contrast, the more disagreeable the feeling.

Artificial lights seen at night in sharp contrast with the darkness around them, are always unpleasant to face. A light that varies greatly from instant to instant, now dim, now bright, is very disagreeable and harmful to the eyes.

When light hurts the eyes the first impulse is to exclude it. But thought about the matter will commonly show some kind of contrast that might be avoided. Have the rooms indoors lighted as well as possible. In going out pause a little on the threshold to become accustomed to the brighter illumination.

Do not face bright artificial lights with a dark background. Do not admit a streak of bright sunlight into a room that is otherwise shaded, but rather keep the windows wide open. Use as steady a source of light as possible, and avoid all sudden changes of illumination. If dark glasses are worn it should not be all the time, but only when the eyes are exposed to the brightest light, so that the contrast between this and the feeble light may be diminished. Have a good light on what you look at, but do not let the source of light shine directly into your eyes.

When light hurts the eyes, in spite of the care to avoid strong contrasts, it is likely that the eyes are strained, or irritated, or inflamed, and the cause of the trouble should be sought out and removed. Persistent trouble of this kind generally has a persistent cause, like strain of the eyes, and it is useless to treat the effect while the cause continues to keep up the trouble.—Ex.

### A Little Auto Law.

The following extracts taken from the Michigan Motor Vehicle law should be read by every auto owner:

Sec. 1.—The term "chauffeur" shall mean any person operating a motor vehicle for hire, or as the employee of the owner thereof.

Sec. 7. Sub. 1.—No person shall operate a motor vehicle upon a public highway at a rate of speed greater than is reasonable and proper, having regard to the traffic and use of the highway, or as to endanger the life or limb of any person or the safety of any property, and shall not in any event while upon any highway run at a higher rate of speed than 25 miles an hour, and within the corporate limits of all cities and villages the rate of speed shall not be greater than 10 miles an hour in the business portions of any such city or village, and not greater than 15 miles an hour in all other portions thereof, subject, however, to the other provisions of this act. Upon approaching an intersecting highway, a bridge, dam, curve or descent, and also in traversing such intersecting highway, bridge, dam, curve or descent, a person operating a motor vehicle shall have it under control and operate it at such speed as is reasonable and proper, having regard to the traffic then on such highway and the safety of the public.

Sec. 8. Sub. 1.—Every person hereafter desiring to operate a motor vehicle as a chauffeur shall file in the office of the secretary of state, upon the payment of a registration fee of two dollars, a verified application for registration on a blank to be furnished by the secretary of state for that purpose, containing:

1. The name and residence address of applicant and that he is competent to operate a motor vehicle and is over 18 years of age.
2. Whether or not the applicant has been previously convicted of a violation of any of the provisions of this or any other motor vehicle law or ordinance, giving the date and place of such conviction. Provided, that all licenses issued after August 1 in any registration year a fee of one-half the rate provided in this section shall be paid.
3. Sub. 4.—The secretary of state shall forthwith upon registering such chauffeur and without other fee, issue and deliver to him a badge of aluminum, or other suitable metal, which shall be in shape as the secretary of state may determine, and upon which shall be stamped the words, "Registered Chauffeur," with the number and date of expiration inserted thereon. This badge shall thereafter be worn by such chauffeur pinned upon his clothing in a conspicuous place at all times while he is operating a motor vehicle upon the public highways of this state.

### Representation of AuSable City on Board Reduced.

Prosecuting Attorney Albert W. Black presented an order to our circuit judge, Maine J. Connine, this week, which was signed and issued by the court, among other things providing that from and after this date AuSable city instead of having a representation of four members on the board of supervisors for Iosco county it will have but one representative, and that representative will be the mayor of the city.

This is a matter that has demanded attention for some time, especially so since the fire which wiped out the major portion of AuSable city, and is a very satisfactory adjustment of the representation on the board.

TAWAS CITY, MICH., JULY 31, 1914

One of the best proofs of the religious tolerance which seems to be fast gaining ground in this country is the article by Dr. Washington Gladden, a Congregationalist minister, entitled, "The Anti-Papal Panic," which appeared in a recent number of Harper's Weekly, and which we reproduce elsewhere in this paper. People of all classes are beginning to realize that religious hatred is not in accordance with the Divine Plan, and are according to others the right to believe as they like without being thought enemies of society or the nation. May the day soon come when this idea will be universal and men of different religions will live together in peace and harmony.

War is always to be deplored, but the disturbance in Europe will react greatly to the benefit of this country if a general war really materializes. The rumors already heard have caused a sharp advance in the price of wheat, and other commodities which we export to Europe will soon follow suit. Extensive military operations on the continent of Europe would mean untold destruction of crops of all kinds and a corresponding demand for the products raised in this country. And the bumper crops promised for this year will enable the farmers to realize a big profit for their year's work.

Politics are warming up somewhat, and with the primary election only a little over three weeks away the candidates will do some hustling during that time. There is plenty of material in view for county offices and the voters should have no trouble in nominating good men to fill the various positions.

Isn't it fortunate for the yellow journals that just as the Mexican question is about settled, war should break out in Europe? Otherwise they might have fallen into innocuous desuetude.

Andy Carnegie's dove of peace doesn't seem to be having much influence on the nations of Europe just at the present time. Maybe the bird has the pip.

**Stops Neuralgia—Kills Pain.**  
Sloan's Liniment gives instant relief from neuralgia or sciatica. It goes straight to the painful part—soothes the nerves and stops the pain. It is also good for rheumatism, sore throat, chest pains and sprains. You don't need to rub—it penetrates. Mr. J. R. Swinger, Louisville, Ky., writes: "I suffered with quite a severe neuralgic headache for four months without any relief. I used Sloan's Liniment for two or three nights and I haven't suffered with my head since." Get a bottle today. Keep in the house all the time for pains and all hurts—25c, 50c and \$1. Recommended by J. M. Wuggazer & Co. and Jas. E. Dillon. adv

**Huron Shore Foresters Excursion**

Games and sports, bathing, boating, base ball game. Dancing in fine pavilion. The best and most convenient picnic grounds in northern Michigan. Good hotel service. Bring your families and lunch baskets and enjoy a comfortable outing. See hand bills or any Forester. adv-31

Three candidates have announced themselves in the race for the progressive nomination for Isosco county treasurer. They are Mount, Sullivan and Dobson. Of the three Dobson seems to be doing the most hustling, and as he is a clean-cut politician and has made a good business record, his chances of winning are very good. adv

## OUR SCRAP BASKET

### The Week In History.

Monday, July 27—Atlantic cable laid, 1866.  
Tuesday, 28—Hot wave in 1901—temperature reached, 116.  
Wednesday, 29—King of Italy assassinated, 1900.  
Thursday, 30—William Penn dies in 1718.  
Friday, 31—Hydraulic canal started, 1894.  
Saturday, August 1—Nelson's victory over French, 1798.

### On the Beach.

A maid and a man  
With a little of sand,  
For most any girlie  
Is perfectly grand.  
And, putting it terse,  
She asks which is worse,  
The sand without man, or  
The man without sand?

### Facts Worth Knowing.

#### AIDS TO WEATHER CONJECTURE.

Rainbows.—A morning rainbow is regarded as a sign of rain—an evening rainbow of fair weather.

Halo (Sun Dogs).—The large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates rain.

Sky Color.—A deep blue color of the sky, even when seen through clouds, indicates fair weather—a growing whiteness, an approaching storm.

Corona.—The small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain—growing larger, indicates fair weather.

Sunset Colors.—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

### Wise and Otherwise.

The heart is most sensitive to neglect when it is very old or very young. Unfortunately some mothers-in-law forget that they were once daughters-in-law.

The real sensible people we know are those whose opinions agree with our own.

There seems to be nothing new in vacation advice this year, merely the same old admonitions to look out for the drinking water, and not to spend more than you can afford, neither of which anybody has the slightest intention of heeding.

### Kitchen Kinks.

To make pies brown and crisp looking, brush top crust with milk.  
Plunge tomatoes in very hot water, then into cold. The skin will come off easily, and they will remain firm.

To clean a pan in which syrup or candy has been cooked, put cold water in it, place cover tightly over, and set on stove to boil. The steam will dissolve the sugar.

Into the boiling water used for poaching eggs, put one teaspoonful of vinegar. Stir the water with circular motion, drop in eggs, and you will find they are round in shape and look inviting, as well, when taken out.

### Of Interest to Women.

An apron made with a bib of table oil cloth is a great saver when washing dishes.

It is a good plan to pepper a carpet thickly just where any heavy piece of furniture has to rest on it, as this helps to keep moths, etc., away.

Gilt frames and mountings soon lose their luster. They should not be rubbed. If very dirty wipe gently with a little borax water and dry carefully.

To remove soil from marble take finely powdered pumice and vinegar. Wash entire surface with mixture, and leave it for six hours, brush hard, and wash in clear water. When dry rub with whiting and chamolis.

### Union Sunday School Excursion.

### Hagenbeck-Wallace Shows.

The Carl Hagenbeck and Great Wallace shows, combined, will visit Bay City on Saturday, August 8.

For more than a quarter of a century the Great Wallace circus was the best in all the land. Several years ago the big circus was consolidated with Carl Hagenbeck's trained wild animal exhibition, Carl Hagenbeck before his death was the "animal king," and the combination of the two shows for a single price of admission makes it something unheard of in the amusement world. With few exceptions great arena acts originate in Europe. They are invariably introduced into America by the Hagenbeck-Wallace shows, who maintain agencies in Europe and Asia for the purpose of keeping in touch with the latest achievements.

Today the circus has reached a size that is giving the railroads much concern. If the three trains were any longer they could not handle them. All of the equipment throughout this season is new. It cost the owner, Mr. Wallace, \$3,000,000. The parade alone represents a cash outlay of \$1,000,000. The menagerie is worth half as much. The best circus artists in the world have been engaged for this season. There are 387 of them.

Doors to the big show will be opened at 1 and 7 p. m. Performance will begin an hour later. The parade leaves the grounds at 10 o'clock. adv

### For State Senator.

I desire at this time to make formal announcement of my candidacy for the republican nomination for state senator from the 28th senatorial district. The 28th district is primarily a farming community, and I believe it fitting that a farmer should represent it in the state senate. For some 40 years I have lived in this district and have contributed my best efforts toward converting the forest wilderness into cultivated farm lands. During these years of development I have had considerable experience in business life and the lumbering industry. For some years past I have been actively engaged in farming and stock raising in Arenac county, own my own lands, live on my farm and work at my job.  
I realize the importance of the position which I seek, and wish to state that if nominated and elected I shall endeavor to represent all sections of the district with utmost impartiality. The best interests of the entire district will guide me in all matters, without regard to factionalism or sectionalism.  
I respectfully solicit your support at the primary election, Tuesday, August 25, 1914.

## FREDERICK C. MARTINDALE

Candidate for Nomination for Governor on the Republican Ticket

RECORD—His official record is one of service. As a member of the House and Senate he worked and voted for:

- 1—Equal Taxation Measures
- 2—Direct Primaries
- 3—Prison Binder Twine Plant
- 4—Two-cent Parks
- 5—Farmer's Institutes
- 6—Traveling Libraries
- 7—Better Schools
- 8—Better Factory Conditions

In fact every law before the Legislature for bettering the conditions of the common people and the improvement and the development of the state.

The equal taxation measure, putting railroads, telegraphs and express companies on the same basis as other property, has alone saved the owners of farms, homes and other property over \$2,000,000 annually. The prison binder twine plant has reduced the cost of twine to Michigan farmers nearly one-half, thereby saving them, yearly, hundreds of thousands of dollars.

Next week the Citizens' Committee in charge of filling this space will print in tabulated form the reasons given by more than 200 of Michigan's leading farmers, mechanics, business and professional men for supporting Martindale.

## AUGUST

August is the month when men sweat and women perspire. Women keep from really sweating by dobbing their pores full of cosmetics. The little that does ooze through is then called perspiration. It really is, of course, old-fashioned, odoriferous sweat that has lost its distinctive qualities by being strained through an inch of scented enamel.

August is a hard month on kids and dogs. The barefoot kid has a hard time finding a place on either the ground or sidewalk that will not blister his feet, and every dog must be careful to not let his tongue be seen, for a dog with a tongue in August is a sure enough "mad dog," reeking with hydrophobia germs, and a bullet is coming his way. Then there are the August Chautauqs, too. Nearly every town has a Chautauqua in August. The Chautauqua has had a record much like that of the newspaper—when the first one was started everybody said the United States would not support two. Well, they are not supported as they should be, but every hamlet now has a newspaper, and if it doesn't have an annual Chautauqua the inhabitants are wondering how they can get one. If all of the oratory that breaks loose on Chautauqua platforms this month could be bound into one book it probably would represent a collection of the world's worst literature.

The heated rays of August's sun will keep the ice men on the run. It gives a blush to orchard peach, but more to those upon the beach—to these it gives a darker pink that keeps our eyelids on the blink, and while we have the orchard brand we love the ones out on the sand.

### The Anti-Papal Panic.

Dr. Washington Gladden, in Harper's Weekly.

It is evident that we are in for another fierce anti-Catholic crusade. These visitations are periodic, the term has not perhaps been calculated, but we shall be able one of these days to give the formula. The period is probably a little longer than that of the 17-year locusts.

What we are going to see during the next few months is something like this: The great mass of the Protestant Christians of this country arrayed against the great mass of the Roman Catholic Christians—each party thinking and saying hard and bitter and violent things about the other, each party cherishing the worst suspicions about the motives and purposes of the other, each party believing that the other is plotting to take away its liberties and perhaps to exterminate it by assassination or carnage. Not all the Protestants and not all the Roman Catholics will give room in their hearts to such dark thoughts and fears and enmities, but most of them will, and the mob-mind, which always dominates these epidemics, will reduce to silence the majority of those who know that this is mainly insanity.

The first mutterings of this eruption of mud and slime are audible already. Those of us who have passed through this misery two or three times know what to expect. It is being whispered now in Protestant circles that the Catholics are meeting by stealth, from night to night, in the basements of their churches, to drill for the impending insurrection. If the church has no basement it matters not, the story is just as freely told and just as readily believed.

Rumors will be heard of consignments of arms being delivered by night to Roman Catholics. They are apt to come in coffins—that adds a shudder to the tale and makes it more enticing.

Forged documents of various sorts will be printed and privately circulated—documents purporting to have been issued by the Roman Catholic hierarchy, giving instructions to the faithful, in which they are authorized and instigated to commit various crimes against their Protestant employers and neighbors, and intimating that the Mother Church will absolve them from the guilt of all such offenses.

Old bulls and decretals of the dark ages will be dug up and exploited, and it will be insinuated, or perhaps boldly asserted, that the policy indicated in them is still ruling the Roman Catholic church.

The fact is that we have got to learn to live together in this country—Protestants and Catholics. If either party should undertake to exterminate the other the process would be somewhat difficult. The only question is whether we shall live together in peace or enmity. If we are to have peace we must study the things that make for peace, each party must be ready to see the good side of the other—must learn to put the best and not the worst construction on the words and deeds of the other, must avoid all bitter and uncharitable judgments, must put away all thoughts of domination. We must be friends, Protestants and Catholics. No other relation is conceivable. And there is no worse enemy of Christ or of his country than the man who seeks to inflame and poison the minds of either Protestants or Catholics with suspicions and fears and resentments and enmities toward the other.

This conflagration of hate is already well started, and it will probably sweep over the land. No argument could extinguish it. There are millions of Protestants who are incapable of believing anything but evil of Roman Catholics. Traditional rancor colors all their vision wherever the name of the pope is mentioned. But there are a good many other Protestants, I trust, who are capable of reason and justice,

and to them I venture to make two or three suggestions:

1. Whenever you hear any of these harrowing tales about the sinister and sanguinary plots of the Roman Catholics never let one go unchallenged. Insist that the narrator give his authorities and furnish his evidence. See that the matter is thoroughly investigated, and publish the facts with the names of those who have reported the charges.

2. Take every opportunity you can get to talk with your Roman Catholic neighbors and friends about the relations of the churches. Don't shun them or cast suspicious glances on them when you meet them, don't treat them as if they were spies or emissaries of some malignant power. Shake hands with them—get acquainted with them, and talk over the whole situation in a friendly way. We may have some difficult problems to settle in our relation with them, but let us meet them not as enemies but as friends.

3. Instead of listening to horrible tales what the Catholics are doing in distant places sit down and make out a list of all the Catholic men and women you know in business, in professional life, in the philanthropies, in society, in the shops and factories, in the kitchens. Put down their names and think them over, and see whether you will be able to convince yourselves that these men and women are capable of doing the kind of things which these tales attribute to them. How many of these people, do you think, are plotting to rob you of your liberties, or to murder you in your beds? These are Roman Catholics, the Roman Catholics not of the Dark Ages of the 16th century, but the Roman Catholics of today. And whenever you talk about Roman Catholics, in public or private, remember that these are the people that you are talking about.

4. It might be well for people who are capable of putting two and two together to remember that the danger of the clerical domination of this country, whether by Congregationalists or Catholics, is not imminent. The last Roman Catholic paper I opened alleged that there are 75,000,000 of non-Catholics in the United States. That would mean that there can be no more than twenty or twenty-five millions of Catholics. In any attempt to impose clerical rule the Protestant forces would find themselves strongly supported by the great majority of the secret orders, and by the entire socialistic contingent of our population.

There does not appear to be any adequate reason why 75,000,000 should be shuddering with fear that 20,000,000 are about to subjugate or exterminate them. The mood which yields to such a panic is the reverse of heroic.

5. It is worth while, also, to reflect upon the fact that clerical domination has been steadily losing its grip in Europe. Italy and Spain are pointed to as countries under priestly rule. But the priestly rule is broken in both Spain and Italy. Even Austria, long the champion of the church, is no longer its vassal. There never was a day when the clerical influence was so weak in European politics as it is today. I believe, for my own part, that the Roman Catholic church will be the gainer by this loss. It will see, by and by, that the weapons of its warfare are not carnal. But at any rate it is simply puerile fear that America is in danger of being bound by the chains that Italy and Spain and Austria have broken.

Rev. Dan Bradley of Cleveland joins his Congregational brother, Dr. Gladden, in an appeal for neighborliness between Protestants and Catholics. In an address at Grand Rapids recently he flayed anti-Catholic newspapers, and added:

"Let us realize that while our own views seem to us right and true, other men look at truth from different angles, and God seems to allow them to do it. He must be willing to fulfill Himself in many ways. Let us be glad of our liberty—our freedom to think—and let us come into closer relations with all our brethren. The federation of churches has pointed the way of getting people together who differ tremendously, yet who are in unison for a Christian faith and decent morals. The time ought to come when such a federation will include Catholic churches—and thus we shall learn to work together for religion and morals and the benefit of all the people. We sing Catholic hymns, we go to see the Catholic passion play, we admire Catholic architecture and Catholic pictures. Let us be plain. Especially, let us love our Catholic neighbors, see the good qualities they have, live happily and kindly with them, and so hasten the time when all Christians shall be one in the Kingdom of Jesus Christ."

### High School Course of Study Is to Be Revised.

The high schools of Michigan are each year increasing in importance. The last five years have seen a remarkable movement of rural students to the high school. There has also been a

marked effort on the part of high school authorities to make the high school teach the things that will be of most use to the boys and girls.

For the purpose of aiding in this problem the department of Public Instruction will publish in August a suggestive Course of Study for Michigan high schools. It will indicate work along four distinct lines—college preparatory, agriculture, domestic arts and commercial. The work will be outlined, so that pupils may begin to choose the line they wish to pursue in the seventh grade instead of the ninth, as at present.

This will make the division between the elementary school and high school come with the seventh grade. It is believed the large number of children who now leave school in the seventh and eighth grades will be held in school by giving them work which meets especially with their needs. This organization will also enable schools to teach all grades above the sixth by the departmental plan, that is by having a special teacher for each subject. Moreover the pupil will advance by passing subjects instead of grades.

Present conditions in Michigan schools are such that the proposed plan can be adopted easily. Several cities of the state have already tried the plan. In other states also the plan is meeting with favor wherever tried. Because it divides the school course into two parts, each covering six years, the proposed organization is commonly called the Six and Six plan.

## TO ALL ENGAGED IN DAIRY BUSINESS

Making butter on the farm is rapidly becoming a thing of the past. Any housewife knows what it means of drudgery to make good butter, and what difficulties she encounters in her attempt to find a satisfactory market for her product. Her outlet is limited. The creamery has every large city on the continent within its reach. The creamery is plugging every day for the interests of the dairy farmer as well as for its own.

We are now in the midst of our third season and business is humming. Prices are good and the outlook fine. We are making nearly four times as much butter as we did in 1912. That also means that we are able to handle your cream to the very best advantage for you. Come and see us or ship us a can. We know we can please you.

We are selling the "Diabolo," a separator of the Highest Merit, at prices that you would pay for mail-order and other inferior machines.

**Tip to Parsons.**

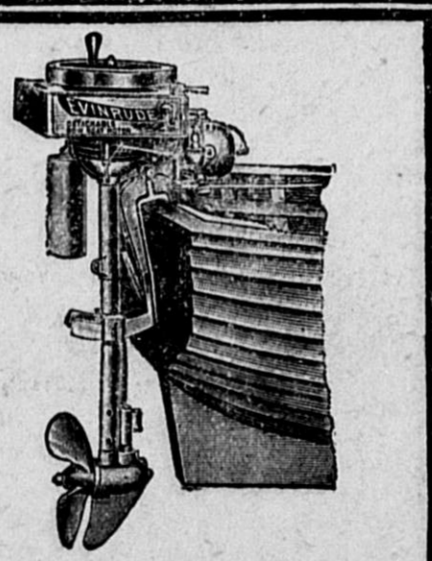

Could one but find their confessions, one is pretty certain that many of our old persons had little aptitude for the making of sermons, and the Book of Homilies was found very useful. On entering his pulpit one Sunday one person fumbled considerably at the edge of a crack in the woodwork, then straightened himself as though making the best of a bad job. "Friends, the sermons is gone down the girke, but I'll read a chapter of Job worth the pair of them."—"From "Old Yarns of English Lakeland."

**Trivial Detail.**

Hostess to young fiancée—"And so you are really going to be married next month, my dear. Well, I think your future husband seems a charming man. By the way, what does he do?"—"Oh—er—well—er—d'you know, I really haven't had time to ask him; but I expect papa could tell you, if you particularly want to know."—"Punch."

**Our Daughters.**

"I say, dad, I've just accepted Charlie Brown—he's in the drawing-room—and if you've a minute you might pop in and see him and talk it over; but please be quick, we've got to rush out and see about the banns."—"London Opinion."
