The work of re-shingling the Baptist church in this city was begun this week. J. M. Waterbury informs the writer that the shingles now being replaced have been on the church for 27 years, and still they do not show a sign of leak. However, the inside of the church is to be re-decorated and it was thought best not to take chances but to be sure that the roof was in first class condition before doing the work.

Samuel Ball of Bay City, representing the Eastern Michigan Power Co., was in the city Wednesday conferring with our business men regarding the installation of electric light and power from the AuSable river dams. Several consultations have been had heretofore on this subject, but the matter now seems to have taken a definite turn, and that future developments will be up to the council and citizens of Tawas City. The company has made a definite offer for the plant owned by the city, and if the council accepts the offer the matter of granting a franchise to the company will be submitted to the electors at an early date.

Since the announcement of the big mortgage tax paid to Iosco county a couple of weeks ago there has been considerable discussion as to the disposition of the plum. The general sentiment seems to be that the major portion of the amount should be devoted to the building of good roads. In talking with people in various parts of the county the consensus of opinion seems to be that about \$25,000 of the amount should be placed in the county road fund. This amount, together with the amount raised by taxes would give the county road commissioners a sum that would enable them to make a good showing in improving the roads throughout the county. It is a matter in which all the people are interested and we would be glad to publish communications from those who wish to discuss the question pro and con through the Herald.

A deal was concluded this week whereby Chas. Nelem disposed of his house and lot in Tawas City to Mrs. Maurice Tambling of the Hemlock road. Mr. Nelem and family have moved to Rogers City, where he has employment.

H. A. Granger, a former Tawas City resident and employe of the Herald, has just completed his first year as editor and publisher of the Redford Record. Those who are interested in race horses will be somewhat surprised to learn that the horse called "Richard Hunter," and known at the races at the Iosco county fair a year ago as "the milk wagon horse," was sold the other day for \$1,000. This is the horse with which A. J. Locke took first money in the free-for-all trot or pace at the 1914 fair. He offered the horse some time ago for \$250, but could not find a buyer, so he put the animal in the hands of a trainer and sent him out on the circuit of the county fairs, with the result that he secured the thousand dollar price. The horse won four firsts, two seconds and a third in the campaign this fall, his fastest time being 2:14.

DEATH OF WM. H. MURPHY.

Wm. H. Murphy, one of the oldest residents of Tawas City, died at his home here last Sunday morning, Nov. 7, at one o'clock after a lingering illness of two years. The funeral services were held at the home Tuesday afternoon at two o'clock, Rev. John Pinches officiating, and the remains were laid to rest in the Tawas City cemetery.

William Harrison Murphy was born at Shannonville, Ontario, May 14, 1845. He came to Michigan in 1864 and to Iosco county in 1871, living for a time on the farm now owned by Chas. Force, and later moving to Tawas City.

He was married June 25, 1874 to Mary A. Hogan, and to this union ten children were born, eight of whom with the bereaved wife survive him. Two sons passed away in childhood. The living children are: Mrs. Mabel Schermerhorn of Pontiac, Mich.; Mrs. Margaret Smith of Omamia, Minn.; Mrs. Zina Pratt of Ypsilanti, Mich.; Fred L. Murphy of Traverse City; Mrs. Hazel Robinson of Onaway; and Lulu, Muriel and Howard at home.

There are also six grandchildren, and his aged brother, Thomas. All the children except Mrs. Smith and Mrs. Robinson were present at the funeral. Mr. Murphy was a good citizen and took an active interest in the advancement of the city. He held a number of city offices at different times, the last being that of city treasurer which he held last year. He was a member of the Maccabee fraternity to which he had belonged for many years.

His many friends in Tawas City and elsewhere join in extending their sympathy to the bereaved family in their loss of a beloved husband and father.

POINTERS FOR HOUSEHOLDERS.

These are the days when the householder is engaged in laying in his winter supply of apples, potatoes, onions and other vegetables. The peddlers go along the streets of our large cities and offer the inducement of cheap prices per bushel but in a great number of cases the amount delivered for a bushel is several pounds shy and the housewife is not getting the bargain that she expects.

The consumer should understand first that there are two kinds of bushels. A bushel measure under the laws of Michigan contains 2150.42 cu. in. This, however, is what we call a stricken bushel. The law provides that when wheat and other grains are measured in a receptacle containing the above number of cubic inches, that the measure shall be level full. But when we come to measure potatoes and apples and other rough stuff, the law provides that they shall be sold by "heaped measure," that is, the measure containing 2150.42 cu. in. shall be heaped up "as much as possible without special design." It is only in this way that sixty pounds of potatoes can be got in one of these measures, and that is the legal weight of a bushel of potatoes in Michigan.

Unfortunately, many peddlers have all sizes of baskets and the consumer is unable to tell whether a proper amount is being given. We suggest to all consumers who buy fruits and vegetables, that they make for their own use a bushel measure. Such a measure can

THE CONSCIENCE KEEPER.

(From an address by Percy Andree, vice-president American Ass. of Foreign Language Newspapers before the International Press Congress, Panama Exposition, San Francisco, Cal.)

"I believe that the paramount function of the Press is that of Keeper of the Public Conscience. There was never a time when men as well as women were so fiercely intent upon appealing, on this or the other ground, to the public conscience, and assuming to speak in its name, as they are today. And who is to distinguish, amid this babel of tongues wagging in the name of the public conscience, which voice is truly the voice of the people and which is not? All kinds of fads and fashions of thought have had their day in this world of ours. They have swept occasionally in violent gusts over the multitude, and we have heard men, again and again, as they bent their heads to the storm, pass the warning word to each other: "Behold the mighty whirlwind of public opinion;" until another such gust has swept from the opposite direction and successfully contested the passage of the first.

"It is the incessant conflict between these contrary winds of alleged public opinion that does more lasting damage in our day than even these colossal social upheavals which occasionally result from the clashing interests of race and race. Not because the conflict of human opinions is in itself injurious, for we know that it is not, but because, when opinions, however honest, masquerade in a false guise, they are misleading, and perplex and bewilder the public conscience instead of clarifying and strengthening it.

Who, then, is better qualified than the trained and experienced newspaper editor, to point the distinction between the mere passing winds that bend and twist the public mind for a fleeting moment, and the real storm-wind that originates in the public mind itself, searching it to its uttermost depths, and giving it a new and lasting shape?"

STORE ICE THIS WINTER.

Ice is Necessary for the Production of First-class Cream on the Farm.

At this time of the year many creameries receive a considerable quantity of cream of poor quality because, for various reasons, patrons fail to cool their cream quickly and thoroughly. It would be a great aid to the creamery man if every patron could cool his cream with ice. All creamery men realize the importance of obtaining good raw material, and this is an appropriate time to call the attention of the patrons to the necessity of ice for the production of first-class cream. As the quality of cream delivered determines to a certain extent the prices paid for it, a farmer can well afford to provide sufficient ice to enable him to cool his cream properly throughout the summer.

In an article on "Cream grading," published in the Yearbook of the U. S. Agricultural department for 1910, it is shown that in New England 500 pounds of ice annually will properly cool the cream from each animal in a 20-cow dairy, but it recommends the storing of 1,000 pounds of ice for each cow to allow for shrinkage and for household uses, or 10 tons for a herd of 20 cows. Investigation has shown that the average ice house costs less than \$50, and that the cost of harvesting and storing ice rarely if ever exceeds \$1 a ton. On this basis the cost of sufficient ice to cool the cream from 20 cows would not exceed one-half a cent a pound of butter fat, or a total cost of about \$15 a year, after allowing for reasonable depreciation on the building.

Ice is harvested at a season when most dairymen have leisure time, so that the actual amount of money expended for this purpose is very small. No producer of milk or cream in sections where natural ice is produced should be without it. Farmers' Bulletin No. 623, Ice Houses and the Use of Ice on the Dairy Farm, will be sent free to any one upon request.

THE STREET CORNER SAGE.

He Beats Retreat.

"I've played a lot of checkers in my time," remarked the Sage the other afternoon as he sat watching two men moving the wooden disks across the red and black board. "I must be counted the best they wuz in this part of the country, an' I wuz jest thinkin' as I seen yew fellers making a lot of mistakes in that 'are game that I reckon I'd be purty nigh able to hold my own yet. "I recollect one feller that come tuh town one time 'at claimed to be champion checker player of the state. Nothin'd do the boys 'sept fer me to play 'im. I beat him seventeen straight games an' it made him so al-fired mad he quit. Wuzn't but one game he even got a king." A well dressed stranger who was watching the game with considerable interest glanced patronizingly at the speaker. "I used to be somewhat of a checker player myself," he said "and I've heard a lot about you old timers. I'd like to pay you a few games, Uncle, jest for the sake of getting a few pointers, and I'll guarantee you I won't get angry if you beat me." The Sage looked at his watch with a nervous expression. "I gotta go home now an' carry in the coal," he explained as he hurried toward the door.

Board called to order at 2:30 p. m. Whereas, the Michigan Children's Home Society of St. Joseph, Michigan has appealed to this board for aid in its state work of caring for dependent and orphan children and it appears to the board that during the past fifteen years children from this county have been taken care of and provided for by said home and that a number of small children and babies are now in this county adopted from said home, and that the county of Iosco is therefore interested in the maintenance of such a state institution and benefited directly and indirectly by such a good work, which might otherwise throw the burden of the support and care of such dependent and orphan children upon this county:

Resolved therefore, that the sum of One Hundred Dollars be appropriated from the contingent fund of the county as Iosco County's contribution to such Michigan Children's Home, and that an order be drawn by the county clerk upon the county treasurer for the same. Moved by Robinson, supported by Grant, that resolution be adopted.

As for me, I don't care whether a man's grand father was on the bench as a judge or a cobbler, so long as the man himself is right.

Few young men who ask for kisses ever get them. The bee does not ask the flower for its honey. He simply sips from the petals before the flower can dodge.

FATHER IS DIFFERENT MAN

Flint Girl Says Tanlac Has Made Complete Change in Condition. Indorses Medicine.

Albert West of 204 Delia street, Flint, has found that Tanlac has done him lots of good in relieving his kidney trouble. This is what his daughter said recently while buying another bottle for him:

"Tanalac gave my father relief from a bad case of kidney trouble from which he had suffered for a long time. This is the first medicine he has ever found which has done him any good. He suffered from the worst sort of darting pains in his back and side. He had had headaches and pains in the back of his head. Indigestion troubled him and he was badly run down. He lost his appetite and did not sleep very well and his condition was such as to worry us. He felt listless and run down in every way.

"It seems as if Tanlac has made him over, so great is the change in his condition. His kidney trouble has left him almost entirely. His stomach is better and now he can eat anything he wants without suffering from indigestion. He sleeps and is always refreshed on waking up. Altogether he is a different man. And he is highly enthusiastic about Tanlac."

Diamond Secrets

The secret's out!
Mother has disclosed her baking secrets. Those great golden loaves, always so white and delicious when cut, can now be equaled. Rich dark crusts are made soft and brown by brushing the loaves lightly with melted butter just before taking from the oven.

The general good results depend on the flour. Mother's choice is always Stott's Diamond Flour for bread baking.

Stott's Diamond Flour

not only makes better bread, but results in more wholesome and nutritious baking.

Add Diamond Flour to your grocery list and make bread after Mother's old reliable formula.
