TAWAS HERALD NOT MUCH MONEY IN POETRY SOME OF THE WINNERS IN LAST TUESDAY'S ELECTION Prices Paid to Writers Have Not Greatly Advanced With Its In-

In this day of revival of poetry there may be a natural curiosity to know whether prices for poetry have gone up in proportion to the apparent popularity. I am afraid not, remarks a writer in the Buffalo Express. Masters did not get a cent for the magazine publication of the Spoon river poems, but he will get a few hundred dollars' Henry R. MacGillis, the defeated royalty from the book, and since its candidate for circuit judge, in a circu- success I understand he has been paid lar letter dated Nov. 4, 1916, and as much as \$100 for a single poem by mailed to the voters of Iosco county, a New York weekly. The usual price is \$1 a line, or \$25 for a very short poem. And the "Spoon River Anthology" is the most talked about book in Herald for libel in connection with America today, either poetry or fiction. our article of last week regarding his The London Times paid Kipling \$500 campaign. To date he has not full- for the "Recessional," and the same

creasing Popularity.

Walt Mason apparently is making that he has not the slightest grounds more money out of poetry than any other man in America today. He writes a poem every day in the year for a newspaper syndicate, and in a recent interview he says he is paid Widdis did not authorize, furnish nor a year. Mason says the most he ever

the really big prices for poetry, in the days when the public gave the honors to long, storylike volumes, such as New York Ledger paid Longfellow \$5,000 for "The Hanging of the Crane."

Some Facts About Toads. The toad lives from ten to forty

years and it can lay over a thousand

eggs a year. It has lived two years

without food, but cannot live long

under water. It never takes dead or

motionless food. It captures and de-

vours wasps, spiders, snails, bugs,

grasshoppers, crickets, wevils, cater-

pillars, moths, etc. In 24 hours

the tead consumes enough food to fill

its stomach four times. A single toad

will in three months devour over ten

thousand insects. If every ten of

these would have done one per cent

damage, the toad has saved ten dol-

lars. Evidently the toad is a val-

uable friend to the farmer, gardener

and fruit grower, and can be made es-

pecially useful in the green house,

garden and berry patch.—Our Dumb

SUPPLY OF RUNNING .

Pedal Attachment for Washstands !s the Latest Contrivance to Insure Purity of Liquid.

Hot or cold water flows from the same spigot and the handles on the washstand faucet have been rendered obsolete by a new arrangement, which provides a foot control for the flow of water. Sanitary cleanliness is the prime object of the new arrangement, but convenience is also an important

consideration. In the state of Illinois it is compulsory to supply running water in factories and such places, and simi- All forms of legal business and conlar measures have been enacted or are under consideration in other states, the object being to prevent the contamination which is likely to occur when the washstand is used in common. The pedal attachment is placed under the washstand a few inches inside of the front line and to one side, preferably the right side, and connections are made with two valves located under the washstand. The location of the pedal is convenient to the foot and the pressure exerted in the center of the pedal causes a mixture to issue from the spigot, while if the foot is shifted to the right or left the temperature is made hotter or colder as desired.

WORK FOR WOUNDED SOLDIER

Scotch Professor Suggests That They Might Be Employed in the Extermination of Rats.

An Edinburgh (Scotland) professor in a recent letter to a newspaper suggests new work for wounded soldiers. Apropos of the suggested tax on cats, he says: In place of taxing cats, I would urge the government to organize, not after the war, but now, a fully equipped and efficient department for the extermination of rats, and employ wounded soldiers to do the mechanical part of it. The systematic breeding, collecting and distributing of types of cats known to be superior ratters would comprise an important section of the work, but, to make a clean sweep of the most destructive animal pest from which the country groans, much light labor and personal supervision, and a good deal of simple laboratory work under scientific expert guidance would be necessary. By this means many men whom the country will be in duty bound to support, might find congenial employment, not to mention the saving to the country of an enormous sum of taxable wealth.

Pushing Electrical Devices. A New York, electrical firm has recently opened a school for housewives which has greatly augmented its sale of domestic appliances. The school is equipped with electric lamps, percolators, chafing dishes, toasters and almost every known electrical cooking device. The students are taught to use them all! A meter in full view among the different articles cooked, and is proved to be less than gas under ordinary conditions, Vacuum cleaners, sweepers, washers and motors for running the sewing machine are also being demonstrated as a means of creating greater interest in electrical appliances.

Annulated.

There had been a wreck on the Monon at Sheridan. The agent had noted the fact on the board in the waiting

Two paper carrier boys, who had not been notified of the annulment, were waiting for the train to bring their papers, when one of the lads entered the waiting room and noticed the board "Train annulled."

He hurried out to his companion, exclaiming: "Why, Herman, all the trains have been 'manulated'!"

"Say, Herman, you 'do not mean 'manulated,' you mean 'annulated.'"-Indianapolis News.

(Continued next week).

A USEFUL EYEWASH.

If the eyelids are red or gritty, or the eyes burn and sting as if filled with dust and are, wash them with a cold solution of boric acid. If the eyes ache and they are dull and heavy-looking, wash them three times a day with the lotion. After being exposed to strong sunlight, or after driving in a cutting wind the lotion will soothe and relieve every hit of the distressed feel. The The more interest a man takes in his business, the more "interest" he's likely to take out.

When a widow takes a second husband for better or for worse she always knows that he will be worse. Every day we meet those famous characters, despair and hope. Poor, old de spair looks no better than he did the day we first saw him.

P. A. puts new joy into the sport of smoking!

YOU may live to be 110 and never feel old enough to vote, but it's certain-sure you'll not know the joy and contentment of a friendly old jimmy pipe or a hand rolled

cigarette unless you get on talking-terms with Prince Albert tobacco!

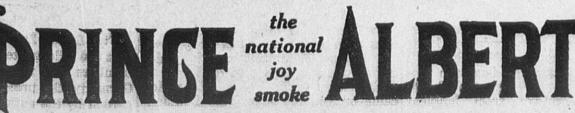

P.A. comes to you with a real reason for all the goodness and satisfaction it offers. It is made by a patented process that removes bite and parch! You can smoke it long and hard without a comeback! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Prince Albert affords the keenest pipe and cigarette enjoyment! And that flavor and fragrance and coolness is as good as that sounds. P.A. just answers the universal demand for tobacco without bite, parch or kick-back!

Prince Albert is sold everywhere tins, 10c; handsome pound and half-pound tin humidors—and—that clever crystal-glass pound humidor with sponge-moistener top that keeps the tobacco in such splendid condition.

CRIMP GUI ONG BURNING PIPE AND CIGARETTE TOBACCO

Introduction to Prince Albert isn't any harder than to walk into the nearest place that sells tobacco and ask for "a supply of P. A." You pay out a little change, to be sure, but it's the cheerfullest investment you ever made!

Ca

Cuts the Fuel Bill in For Soft Coal, Lignite or Hard Coal

22222EE222222222222

As you know fully one-half the carbon available for heat in soft coal is gas, the entire gas supply used for fuel and illumination in many cities and towns being; made from common soft coal. The ordinary stove in burning soft coal allows this gas half of the fuel to pass up the chimney unburned, thus wasting it as a heat producer.

Cole's Original Hot Blast Stove, by means of the patented Hot Blast draft and other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal, thus burning all the coal. This is why

Your old stove and imitation Hot Blast are not air tight, do not save the escaping gases and do not give you a warm house at night. You cannot afford to say to yourself "My old stove will have to do this winter." The old stove is eating up the price of a new stove every year. Not only that, but on top of the cost is the unsatisfactory result it gives. It is always out the coldest morning

Even Heat Day and Night-Fire Never Out

Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the fuel put in the night before. No other stove does this. Fire, therefore, never goes out, and the rooms are kept at an even temperature all the time.

---OUR GUARANTEE-

I-We guarantee a saving of one-third in fuel over any lower draft stove of the same size, with soft coal or slack.
2-We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with same heating surface.
3-We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
4-We guarantee that the stove will hold fire with soft coal 36 hours without attention.
5-We guarantee a uniform heat day and night, with soft coal, hard coal or lignite. same size, with soft coal or slack.

6-We guarantee every stove to remain absolutely air tight as long as used.
7-We guarantee the feed door to be smoke and dust proof.
The above guarantee is made with the understanding that the stove be operated according to directions, and set up with a good flue. For Hard Coal—Saves Half

The perfect control over the drafts, the slow economical combustion and the large positive radiating surface make Cole's Original Hot Blast the most economical and the best

Hard Coal stove made. Cole's Hot Blast is the modern heater and will save its

Would You Lose \$50.00 in Fuel to Save \$1.00 on the Cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made imitation stove. Like all successful inventions, Cole's Original Hot Blast has many inferior imitations, avoid them. They all lack the patented features and careful construction, which make the Original Hot Blast a great success. They do not stay tight and soon open seams and cracks which render them voorthless as fire keepers. See the name "Cole's Hot Blast from Chicago" on the feed door. None genuine wit acut it.
