

### FEEDING THE UNDERNOURISHED CHILD

Children require a foundation of good health, made by adequate nourishment, but many of them in this country are not laying this foundation. The United States Department of Agriculture is assisting the various agencies working to correct this condition. Undernourished is not confined to the slums. Many a little Tony or Pietro, with his bowl of thick soup and hunk of dry bread, topped off with an apple or an orange, is better fed than numbers of children in well-to-do families. The latter are too often allowed to choose what they will or will not eat, and to select food badly suited to a child's stomach or that is lacking in nourishment. When this happens they are being starved just as much as if their parents, because of poverty, were obliged to give them too scanty a ration. Soggy breads, fried meats, fried potatoes, and heavy pie are responsible for many underfed children. Milk is absolutely necessary to keep the growing child in health. It contains growth-producing substances not found in any food. The Dairy Division of the Department of Agriculture is endeavoring to drive this lesson home to the people in every State by means of charts, lectures, and exhibits. The home demonstration agents, supervised by the Department of Agriculture and State colleges, are also teaching the value of milk in a child's diet and how to select a proper meal for a growing boy or girl. Children who have been given even 1 pint of milk every school day for two months have made remarkable gains in every instance.

### GIANT "BEANS" ARE SAID TO BE FRAUD

East Lansing, Mich., Oct. 14.—That the so-called "Giant Beans" which have been grown extensively in Michigan during the last two years, particularly by city gardeners, are not beans at all, being in reality gourds, is the startling information sent out by the Botany Department of the Michigan Agricultural College. "Some of these "beans" have been produced in Detroit that are more than a yard long and weigh 20 pounds," declares Dr. E. A. Bessey of M. A. C. "Growers all over the State are vying with each other to see who can produce the largest specimens, and apparently they think that they are turning out record beans. "There are hundreds of types of gourds, some round and some long. The latter are often called snake gourds. Some enterprising seedsmen with a large supply of gourd seed of this latter type on hand conceived the idea of disposing of it at a handsome profit. Accordingly the papers were flooded last spring, as well as in 1918, with advertisements of "Giant Butter Bean," "New Guinea Butter Bean," etc. This is a fraud, since these are not beans at all, but gourds, closely related to pumpkin, squash, etc. "When full grown the large fruits are practically valueless in this country. When young, they are edible and taste much like summer squash. It is questionable, however, whether it pays one to grow these things except as curiosities."

### COUNCIL PROCEEDINGS

Regular meeting of the common council of the city of Tawas City, Oct. 3, 1919.  
Meeting called to order by Mayor Myles.  
Roll call.  
Present—Ald. Grueber, Wade, Lanski, Preston, Miller, Rouillier. Quorum present.  
Minutes of meeting read and approved.  
Moved by Ald. Wade, seconded by Ald. Rouillier, that communication from C. H. Supten & Son be received and read. Motion carried.  
Columbus, Ohio, Sept. 22, 1919  
Mr. H. Allen,  
Tawas City, Mich.  
Dear Mr. Allen:—  
In regard to your letter of Sept. 20th, in which you are asking for some performance test guaranteed, I wish to say that the gentleman who formulated the proposal was very little acquainted with a motor pump ing fire engine and water pressures necessary. In order to pump through 1250 ft. of fire hose 2 streams with 1" nozzle at 150 lbs. pressure it would take a pump of capacity of 400 gallons per minute, but I do wish to add that our engine will fulfill your request with 2 1/2" tips and will run any length of time you wish, you all knowing the Ford motor as well as us, carry 1000 ft. of hose and 68 men and run 25 miles per hour, your streets permitting.  
This letter I am writing in the absence of my father, but I do know that no such proposition as this was ever made, as there is a limit to all things.  
I am enclosing to you a schedule properly marked and if you will turn to the discharge column and pull out the insert until 50 lbs. pressure coincides with the 1" tip, you will note that you have a flow or discharge of 120 gallons per minute. This is for 1-1/2" stream. Double this for 2-1/2" streams. The capacity of our pump is 200 gallons per minute that is it will throw one (1) stream according to this scale, but as to performance, will throw 1" 3/8 stream at 120 lbs. pressure or 2 good 3/4" streams at 120 pounds.

Last week in Michigan, I sold one of our Chemical Cars like you purchased from us to Coleman, Michigan, and one to Webberville, Michigan, also one of our pumping cars like you purchased to the city of Monroe, Michigan.  
Gentlemen:—If you will really consider a mechanical construction of our car and its appearance in comparison with any other outfit made, you cannot help but to see the clean cut construction of our pump attachments and other mechanical features. I take it from the tone of your letter that the members of the council who were not present at the purchase have ideas of their own, not having met my father and had our apparatus explained to them a little bit at sea as to what they are getting. I am enclosing you a cut of our pump unit. Compare this with any other pumper and you will find nothing like it on the market. There has been a great deal of money expended in the perfection of this pump and it is for your advantage over any other apparatus in Michigan, and as your contract calls for satisfaction in the test which I will conduct myself, I am sure that these gentlemen will be satisfied. The extent of our apparatus in Michigan will guarantee this and you need have no fear as to the competency of our company.  
As a good reference I refer to Harbor Beach. I just delivered them a Fire Alarm system, a combination truck and hose. A town was never more satisfied and you people will be likewise.  
Trusting that you will classify the trouble makers of other companies, if there is any building this kind of apparatus as hard losers, I beg to remain.  
Yours very truly,  
C. H. Supten & Son.  
Committee on claims and accounts presented the following accounts:

Ordinance No. 68  
An Ordinance to be termed the Annual Appropriation Bill, making provision for and appropriating the several amounts required to defray the expenditures and liabilities of the City of Tawas City for the ensuing fiscal year.  
The City of Tawas City Ordains:  
Sec. I. That there be raised upon the taxable property of the City of Tawas City the following sums:  
The sum of Two Thousand Dollars (\$2,000.00) which amount so raised shall be placed in and constitute the Contingent Fund.  
Also the sum of Two Thousand Dollars (\$2,000.00) which amount so raised shall be placed in and constitute the General Street Fund.  
Also the sum of Seven Hundred Fifty Dollars (\$750.00) which amount so raised shall be placed in and constitute the Special Bridge Fund.  
Sec. II. The foregoing appropriations and provisions are made and required to defray the expenditures and liabilities of the Corporation of Tawas City, Michigan, for the ensuing fiscal year, payable from the several funds heretofore mentioned and set forth, and it is hereby determined that the above amounts are necessary to be raised by levy and to be assessed upon the tax rolls of said city for the year 1919, and to be paid into the several general funds, the object and purpose of which is heretofore specified and set forth, together with the amounts appropriated for the object or purpose of each of the General Funds.  
This Ordinance is in conformance with Chapter XXX of the Compiled Laws of 1915.  
Sec. III. This Ordinance is enacted and ordered to take immediate effect.  
Moved by Ald. Lanski, seconded by Ald. Rouillier, that ordinance No. 68 be read by title and passed to its first reading.  
Yeas—Ald. Rouillier, Miller, Preston, Lanski, Wade, Grueber—6. Nays none. Motion carried.

### TRUSTWORTHY

It is a good thing to have a publication in the house that you can trust. You never have to think whether you can safely leave the Youth's Companion on the table. When you begin a Companion story you know you are not bound on a slumping expedition. You are being led up into the sunshine of the everlasting hills. The folks in the Companion stories are everyday folks. They are like your own townspeople: stumbling, falling, picking themselves up, trying some defeats and some difficulties to attain to their high ideals. 1920 will be a year of great stories for Youth's Companion readers. There are more than 250 of them in the year. Subscribe before Christmas and get the opening chapters of Charles B. Hawes' 10-chapter story, "The Son of a Gentleman Born," and all the extras of the following offers:  
New subscribers for 1920 will receive:  
1. The Youth's Companion—52 issues in 1920.  
2. All remaining weekly 1919 issues.  
3. The Companion Home Calendar for 1920.  
4. All the above for \$2.50.  
5. McCall's Magazine for 1920, \$1.00—the monthly fashion authority. Both publications for only \$2.95.

**1,353,792 Babies Born in 1917**  
Government Figures Reveal 14,394 Pairs of Twins, 155 Sets of Triplets  
Complete statistics for 1917 show 1,353,792 babies were born in the states comprising the birth registration area. The birth rate exceeded the death rate by 74.4 per cent, the United States public health reports show.  
Data published in the report shows: Mortality rate among infants under one year 93.8 per cent a thousand, a total of 9.38 per cent of the total born. Total death rate for 1917 (all ages and all causes), 13.7 among white, 22.5 among negroes. Twins born in 1917, 14,394 pairs. Triplets born same periods, 155 trios.  
The report says that courts are strictly upholding local ordinances governing health and sanitation. Included in the report are health hints warning the public against a recurrence of the "flu" epidemics which swept the country last winter, and which may, in many cases, be forestalled by vaccination. The danger of smallpox is also pointed out.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be removed and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

**How Sharp Soft Pine Stick May Be Used for Lettering**  
A storekeeper, who wished to make some large signs with heavy letters, whittled one end of a soft-pine stick down to a sharp, broad edge, and used it to letter the cards. A tool made of this kind of wood works equally well with ink or paint and, in the hands of an amateur, will make a much cleaner letter than a brush. The whittled end resembles the chisel edge on a red-lead lettering brush, so that the ordinary motions are made in using it; but, being more rigid, it demands less skill on the part of the workman.

St. Olav's Grammar school, once worth \$150, is now valued at \$25,000, but the rent is still a bunch of roses. The ancient city of Chichester must provide a string for the king's "cross bow," while the lord of Brynston, in Dorset, must provide a boy with a stringless bow and unfeathered arrow, whenever the king makes war on Wales. The tenant at Bradly, Great Wood, near Glimshy, must pay the mayor of Glimshy a wild boar, or its equivalent in cash, yearly.—London Times.
