An Allied Uniform.

In a vaudeville theater at one of the French ports there was a comedian who had an act which he called "Le Nouvel Uniforme." He wore a French steel helmet topped with the cock feathers of the Italians. His coat and breeches were of khaki. About his waist was slung a Scotch sporran. He wore golf stockings. The top of one was the pattern of the French flag and the other of the American flag. And he sang a song about the beach at Waikiki-a Frenchman's interpretation of an American idea of Hawaiian harmony! Certainly nothing could have been raore allied .- Roy S. Good Way to Clean Pipe.

The following is one of the simplest methods of cleaning a tobacco pipe: Cut one-half inch from the end of an ordinary cork and fit it tightly into the bowl of the pipe. Then with a knife cut a hole through the cork wide enough to admit the nozzle of a water tap with a little pressure; turn on the water gently until the flow through the stem is sufficiently strong, and let it run until the pipe is cleaned.

Work more— Produce more— Save more—

But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output beyond the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity.

Without railroad expansion-more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing-and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities - and so increase production there must be public confidence in the future earning power of railroads.

The nation's business can grow only as fast as the railroads grow.
