BAPTIST CHURCH

A certain man used acetylene in his summer house for a year or more before he learned from a friend that he was probably violating the terms of his insurance policy. He read the document and discovered that if his house burned down it would be a total loss; he had no insurance protection at all. He promptly paid for special permission to use acetylene and thenceforth his policy was good.

Now the Bible is a far better protection, safeguard and resource than any insurance policy, but it is no safeguard unless one reads it carefully to see what it allows and what it forbids, and promptly conforms his life to its injunctions. There is no other safety than that. You may have fifty Bibles in the house, but they will do you no good if you deliberately cherish sin in your soul.

Read your Bible and attend the sacred place where it is taught. Make your Sundays profitable this summer by giving your soul the hour of meditation it needs.

Our services do not run "overtime." Morning service, 10:00; subject: "Christian Efficiency." Sunday school, 11:15. Evening service, 8:00; subject: "A Summer Scene." Midweek service discontinued during July.

Homer W. Grimes, Pastor.

NEW LAW ON ENLISTMENTS

The army recruiting station at Alpena, Mich., has received instructions that, in accordance with the Act of June 4, 1920, original enlistments in the regular army shall be for a period of one or three years, and re-enlistments shall be for a three year period. Men enlisted after April 1, 1917, in the regular army, national army or the national guard are eligible for one year enlistments. Men with previous military service may have special assignments to any organization within the continental limits of the United States. Every soldier who enlists or re-enlists for three years will receive a bonus of \$90.

BINDER TWINE PLENTIFUL AND CHEAPER

The wheat grower need have no apprehensions as to the supply of binder twine—this season. Reports coming to the bureau of plant industry of the United States department of agriculture indicate that there will be a plentiful supply of this commodity available for the American farmer. Not only will it be plentiful, but it is likely to be cheaper this year than for some years past.

Yucatan—the chief and cheapest source of henequen, from which the twine is made—produced a large crop this year; which, coupled with the termination of control of prices by the Commission Reguladora, was responsible for a drop in the price of fiber from 15 to 10 cents a pound in March. The price is now reported to be 8 cents a pound. This reduction should be reflected in the price of twine this season.

Thus far the recent revolution in Mexico has not affected the henequen industry of Yucatan and Campeche, the two important fiber-growing states of that country. It is too late now for any disruption of this industry to affect seriously the supplies of twine for this year's harvest, as practically all the fiber necessary for the present needs has already been imported to the United States.

Although there is no danger for this year's twine supply, officials of the department of agriculture are somewhat apprehensive over the effect that the low prices for fiber now prevailing will have upon the production of henequen during the next few years. Low prices, according to reports to the department, are leading the growers in Yucatan to reduce their planting, with the result that a real shortage of the fiber five or six years hence is a very likely possibility.

DEALERS REPORT BEAN STOCK LOW IN STATE

That the available supply of Michigan beans on hand at present is lower than it has been for a number of years is indicated by reports from prominent members of the Michigan bean trade. Indications point to practically a cleaning out of a hold-over in the Michigan market when this year's crop is marketed in the fall and winter.

A report issued to Michigan bean jobbers on June 10 by Frank B. Dreese, secretary of the Michigan Bean Jobbers association, stated that 159 Michigan elevators show a total of only 260 cars of beans, including picking stock, or only about one and two-third cars per elevator. According to Mr. Madson of H. E. Chatterton & Sons, one of the state's largest jobbing firms, the stocks on hand are lower than they have been for the past 10 years.

"The bean grower has apparently excellent chances of marketing his crop under good conditions," says Prof. J. F. Cox, head of the farm crops department at M. A. C., "and an increase of the Michigan acreage seems warranted.

"There is yet time for growers in Michigan bean districts to increase their plantings. Beans planted as late as June 25 will make a crop under average conditions; and with a good fall, beans may be planted as late as July first with a fair assurance of a crop.

NEW SLOGAN ON CHRISTMAS SEALS

The age-old slogan "Happy New Year" will be transformed into "Healthy New Year" in 1921 so far as the anti-tuberculosis forces of the state can do so. The new Christmas seal that has just been designed by National Tuberculosis association has that phrase for its motto—"Healthy New Year." Since it is expected to sell thirty million of these seals in Michigan the coming autumn—ten seals for each citizen—the people of the state will become fairly familiar with the new phrase.

The new seal which has just come from the hands of the artist is on a blue background studded with stars. On it appears a picture of a jolly Santa Claus in red and white carrying on his back a no less jolly young boy dressed in green—the boy symbolizing the new year. The boy holds in his right hand the double red cross, the symbol of the anti-tuberculosis fight the world over. On the starry background the words appear, "Merry Christmas 1920."

This is the first time that the double red cross replaces the red cross on the seal. The Christmas seal campaign has been divorced from the Red Cross, although the Red Cross organization is wholly in sympathy with the movement. The double Red Cross is going on its own this year.

HOW TO CHECK GRASSHOPPERS

By C. P. Milham. Grand Haven, Mich., July 3, 1920

Dear Sir:— Having learned that the grasshopper pest is gaining a foothold in Iosco county this year, thought I would write advising methods of checking them and incidentally in saving thousands of dollars worth of food products for man and animals and lessening the danger another year.

The best method we have found is as follows:

Into six or eight quarts of water dissolve a pound and a half of tricalcium-arsenate paste, one-half pound of salt (no more) and one-half pound of molasses. Stir the solution into a bushel of screened sawdust. Scatter this about a bushel to three acres along roadsides, fence-rows, pasture lots, oat fields, and around wooded or heavily sodded waste places.

The tri-calcium-arsenate can be secured in 25 pound pails at 10c a pound from the Michigan Smelting Company at Houghton, Mich. Most of the Boards of Supervisors on the west side of the state have appropriated money for this material. It will pay Iosco county to go after this thing hard. It is a serious pest and is growing worse.

C. P. Milham, Agricultural Agent.

MANY VARIETIES OF BIRDS IN IOSCO COUNTY

(Editor's Note—This article was furnished the Herald some three weeks ago by the Forest Supervisor, East Tawas, but has been held up on account of press of other matter.)

Professor Walter G. Barrows, head of the department of zoology and geology at the Michigan Agricultural College, and Professor W. Morton Barrows, assistant professor of zoology at the Ohio State University, recently visited East Tawas and vicinity. They were anxious to locate specimens of the rare bird known as Kirtland's warbler, and were successful in not only locating several pairs of this bird at two different locations near Silver Creek ranger station, but also located a nest of this species. This bird has previously been found in but three places in Michigan and was not previously thought to nest in this state.

A partial list of the birds noted by Professor Barrows in this vicinity include the following:

Robin, bluebird, bluejay, crow, cowbird, scarlet tanager, catbird, flicker, purple martin, nighthawk, whip-poor-will, cedarbird, kingbird, phoebe, wood pewee, song sparrow, chipping sparrow, vesper sparrow, field sparrow, chickadee, junco, kingfisher, ovenbird, hermit thrush, partridge, black throated green warbler, meadow lark, red eyed vireo, great blue heron, black and white warbler, mourning dove, cuckoo, black bill, gold finch, killdeer, chickadee, Maryland yellow throat, red start, red tailed hawk, crested fly catcher, yellow warbler, Kirtland's warbler, hairy woodpecker, red breasted grosbeak, white throated sparrow, northern water thrush, tree swallow, sand piper, spruce hen, sparrow hawk, chimney swift, humming bird, bobolink, red winged blackbird, English sparrow, barn swallow, northern shrike, brown thrasher, house wren, red shouldered hawk, and bronze grackle.

NOTICE TO AUTOMOBILE DRIVERS AND BICYCLISTS

Notice is hereby given that all automobile drivers in the city of Tawas City must have their dim lights on when car is left standing on the street at night. Also dim lights must be on when driving, even when spot light is used. No cars may be turned on Lake St. between the corners of Matthew St. and Whittemore St. All cars must be parked on right hand side of street, as headed, and at an angle of 45 degrees with the curb. This rule applies between Matthew St. and First St.

The ordinance regarding bicycle riding on the sidewalk on Lake St. will be strictly enforced hereafter.

DEATH OF GEORGE WESTCOTT

George Westcott, sr. of Baldwin township died at his home last Saturday, July 3, following a stroke of paralysis which he suffered on the Thursday preceding. Mr. Westcott had been in ill health since February, but his death was unexpected.

Mr. Westcott was one of the early pioneers of Iosco county, coming here with his parents when but a lad of 11, and has lived in Baldwin township all his life since with the exception of a short time that he lived in Tawas City when working in the mills here. In his death Iosco county loses a splendid citizen.

George Westcott was born at Limestone, Ontario, Canada, on May 11, 1858. His mother was visiting in Canada at the time, the family home being in New York state. At the age of 11 his parents moved from New York to Michigan, living in Bay City for a short time and then coming to Baldwin township, where he has since resided.

In 1875 Mr. Westcott was married to Sarah Catherine Dilworth. To this union fourteen children were born, eight of whom with the bereaved widow survive to mourn the loss of a loving husband and father. They are: Arthur, of Bryan, Ohio; Mrs. Anna Schuster of Reading, Mich.; George, jr., and John, of Baldwin township; Mrs. Lily Wood, who is at present living at the ranger station; Harry of Bay City; Charles and Orville at home.

The funeral was held at the home on Tuesday, July 6, Elder M. A. Summerfield of the L. D. S. church officiating, and the remains were laid to rest in the East Tawas cemetery.

MAN'S DISCONTENT.
 When a man is poor his ambition is
 to become rich. When he becomes
 rich he longs to be richer. When, in
 the comparatively rare cases, a man
 feels that he is now rich enough, he
 wants power and reaches out eagerly
 for that. When he attains much
 power his appetite for more is still in-
 satiate and, even if he becomes the
 most powerful man of his generation,
 he still is tortured by ambition; his
 passion is to go down into history as
 the greatest man of his times and, so
 strange and contradictory and blind is
 human nature, he will do small things
 to win that elusive end. No man ex-
 cept the brother of the ox is ever con-
 tented, and, therefore, no man, with
 that one exception, is ever happy for
 very long at a time. No matter how
 successful a man with any stuff in
 him may be, the lure of still greater
 successes still beckons him on, to the
 disturbance of his peace of mind and
 the disquiet of his soul. In other
 words, the pursuit of happiness is vain,
 so far as ever catching the quarry is
 concerned, says Ohio State Journal.
 We have observed the rich and the
 powerful with careful attention as op-
 portunity has offered and always have
 found them, if our judgment is not at
 fault, less happy than the average run
 of men. This is doubtless because
 their capacity for attainment is larger
 than other men's and their correspond-
 ing capacity for disappointment over
 what is denied them is proportionately
 still greater.

The revival of the industry of glass
 and china in England opens up the
 subject of an old-time practice of com-
 memorating a great event or a well-
 known character in porcelain figures.
 In the Royal Porcelain works at Wor-
 cester many of these productions are
 preserved. Wilkes and Liberty was a
 popular ornament, and Wesley in
 several forms is still to be met with in
 nearly every old curiosity shop. Why
 cannot the present age rejoice in china
 portraits of its great men? The very
 idea suggests the most appalling pro-
 ductions seen on country market stalls
 and cottage mantel-pieces. But it
 need not, if only those whom it con-
 cerns would cater for good taste, and
 so produce it.

Universal military training seems to
 be a live wire which the legislators are
 afraid to handle. Anything favoring
 of militarism has little popular charm
 these days, says Baltimore American.
 Memories of training camps and vac-
 ant homes must become less sharp-
 ened before such measures appeal to
 the mass of the people.

Some of the ex-kings of Europe
 are cherishing hopes of coming back.
 So far from such hopes being realized,
 it is evident from the impetus given
 to democracy by the war that those
 remaining on thrones after the great
 cataclysm is over, will have to exert
 all their efforts to holding on.

A medieval painting of the "ugliest
 woman," Margaret, duchess of Carin-
 thia and Tyrol, has sold for \$4,415.
 The question now arises, if a paint-
 ing of the ugliest woman has brought
 that amount, what price ought a paint-
 ing of the most beautiful woman com-
 mand?

We are informed that the ladies this
 season will wear tight-fitting turbans
 with queues depending from them,
 somewhat after the fashion of the Chi-
 nese laundryman of the late eighties,
 but we don't know what anyone can
 do about it, except feel sorry.

An inventor claims an appliance that
 makes it impossible for a thief to steal
 one's automobile. There have been a
 lot of those affairs gotten up, but it
 seemed always that when a thief
 didn't steal the automobile, somebody
 else did.

Oxford university's new statute for

 degrees to women will encourage the
 Blue Stocking trade. No commercial
 experiment is being neglected by Great
 Britain.

If it is true that Great Britain has
 a tremendous over-production of men's
 clothing, let us cheer up. We can
 save quite a sum by taking a run
 across the water to buy our summer

FALSE STANDARD OF VALUES
 World Too Much Given Up to Worship
 of Material Prosperity, De-
 clares Writer.

Wherever we turn we find that pos-
 sessions are too often the standard by
 which men are measured. A man's in-
 come and position bulk much more
 largely in the mind of most than what
 he is or what he does, and a nation's
 wealth is still instinctively spoken of
 in terms of finance, or territorial pos-
 sessions, even by those who, on plat-
 forms, glibly say "true wealth con-
 sists in a healthy and contented peo-
 ple."

It is this false and pernicious view
 which is responsible for much of the
 evil at the present day. The little
 child who learns to pray by its moth-
 er's knee, when it rises is urged to "get
 on in the world," to make money, to
 achieve fame. No harm in this, some
 may say. Man cannot serve two mas-
 ters, and if we examine closely we
 shall find that it's just this effort for
 each to do the best possible for him-
 or herself that is responsible for the
 evil in the world.

The great need of the world is that
 we shall change the values. There is
 only one thing of supreme value, and
 that is humanity. This makes the mil-
 lionaire and the homeless tramp equal.
 When the world has learned the les-
 son that man does not live by bread
 alone, then will be laid the foundation
 upon which a regenerated world can
 be built.

Writ of Injunction Almost as Old as
 the Institution of Trial
 by Jury.

Use of the injunction is a feature
 of the law almost as old as the insti-
 tution of trial by jury. It was first
 used in 1382, when the king of Eng-
 land empowered the chancellor to issue
 writs restraining the barons from over-
 riding the common law courts. The
 principle of injunction dates back fur-
 ther still to Roman law: "It is clas-
 sified in the law as one of the 'ex-
 traordinary writs.' Its essential pur-
 pose is to prevent the doing of a wrong
 whose effects, if consummated, would
 be irreparable. In other words, in-
 stead of waiting for a threatened
 wrong to work its damage, which a
 law court might redress by punishment
 or the assessment of damages, the
 equity court steps in with its 'extraor-
 dinary writ' of injunction to prevent
 the damage being done. Its twin is
 mandamus, which commands perfor-
 mance of certain rights and duties, while
 the province of injunction is to forbid
 performance of certain acts which
 might interfere with rights or result
 in wrongs."

Fetiches of Riksha Pullers.
 Although the diffusion of education
 among the Zulus and other natives of
 Natal is removing many fetich customs
 from their social life, some practices
 are held tenaciously by the children
 of bigoted natives. At one curio es-
 tablishment in Durban, Natal, it is said
 that on rare occasions natives ask
 for Jokekosi "muti," or magic medi-
 cine made from the flesh of native
 children. This "muti" (which it is be-
 lieved, was once used by the warriors
 of Tshaka and Dingaan), is supposed
 to convey the virtues of youth and
 strength. It is occasionally asked for
 in Natal by ricksha pullers. The rik-
 sha pullers have a firm faith in the fat
 of lions, tigers, crocodiles and hip-
 pos. These are stored in jars for sale
 to Kafir clients. Snake muti is also
 a favorite delectation for those desiring
 cunning. "A good deal of the fat for
 these medicines is imported by us,"
 said a well-known curio dealer, "from
 Central Africa; and we are supplied
 by firms in Livingstone."

Olive-Growing Centers.
 Of all the olive-growing lands Spain
 is the most important in the total
 yield of oil, and is by nature one of
 those best fitted to fill its own large
 demands and furnish an increasing
 supply for export. Italy, the second
 olive-oil producing country in Europe,
 has an area planted in olives about a
 third greater than Spain has, but its
 yield in normal years is smaller. The
 French area under cultivation is con-
 fined to the Mediterranean coast, and
 is reported to be decreasing, since
 greater profits are obtained from vit-
 culture. It is asserted that in recent
 years 20,000 hectares of olive groves
 have been turned into vineyards in
 France. Tunis and Algeria are de-
 clared to offer better prospects for
 olive raising than does French terri-
 tory in Europe.

First Telephone Inventor.
 The earliest form of telephone is
 probably that in which the sounds of
 the voices are transmitted over a
 stretched string or wire and this form
 is said to have been used by the Chi-
 nese ages ago, it being impossible to
 give the name of the inventor. Alexander
 Graham Bell, born in Edinburgh,
 Scotland, but then resident in the
 United States, invented the electric
 telephone at Boston about the same
 time as Elisha Gray in Chicago, but
 Bell was granted priority.

Other Men's Affairs.
 "Every man should mind his own
 business," remarked the severely in-
 dustrious citizen.
 "But what are you going to do," pro-
 tested Senator Sorghum, "when you've
 got a whole lot of constituents, every
 one of whom thinks his business is
 your business?"

Trail Pointer.
 You can't make your face. Perhaps,
 if you could, you would make it dif-
 ferent; perhaps not. But you can
 make your voice. You can make it
 gentle or harsh, you can make it pleas-
 ant or quarrelsome, you can make it
 common or refined, you can make it
 appealing or repelling. Many a job
 has been refused because of an un-
 pleasant voice, many a friendship re-
 buffed because of tones that grate
 harshly on the ear. A "common" voice
 slams tight shut the door of many so-
 cial and business opportunities.—In-

ZINC STENCILS FOUND BEST

Material Has Many Advantages Over Any Other Used in the Making of Those Articles.

Zinc is being introduced and made rather extensive use of at the present time in the manufacture of stencils, as a substitute for other metals and paper. Not only is zinc the only material that does not stretch and buckle in continuous use, but it has several other important advantages.

The cutting and making of paper stencils involves the same skilled work as a stencil made of zinc, and a zinc stencil will reproduce ten thousand copies. Zinc retains its flat shape indefinitely. Another feature that recommends zinc's use is the low cost of producing the finished stencil, the metal possessing qualities that permit stamping as many as one thousand stencils in one operation.

When the manufacturer realizes the economy and value of zinc stencils as compared with others it will mean vastly increased demand for that metal. Stencils form the background of almost every manufactured article from laces to showcases.

Negotiations now are being carried on to supply Japanese producers with zinc stencils for use in stamping silk designs to replace the slower and more expensive hand methods now in vogue.

New British Wheats.

Sir Daniel Morris stated at the last meeting of the British association that as a result of the recent plant-breeding work done by Biffen, at Cambridge, new wheats have been grown over extensive areas in eastern England, yielding crops at the rate of 50 to 60 bushels per acre, and even 77 bushels in the case of one area of 27 acres. The average yield in England is 32 bushels per acre. Besides being more productive, the new wheats are less liable to disease and make better flour than the ordinary English wheats. In India, the Pusa wheats, developed by the Howards, will soon be grown over an area of 5,000,000 acres, and are expected to increase the value of the wheat crop in India to the extent of \$25,000,000 annually. —Scientific American.

Optimistic Thought.

It is not titles that reflect honor of men, but men on their titles.

An Apt Illustration.

The teacher was quoting wise words to the class and getting their opinion about them. She said: "A discerning silence is better than the truth spoken without charity." Can any boy give a practical interpretation of that maxim? Somewhat to her consternation, a freckle-faced lad made this homely application: "If you see a cockroach on the table, don't say anything about it."—From the Outlook.

Japanese Women and Literature.

It is to the Japanese women that the Japanese language owes much of the progress it has made during the last century. She was of old forbidden to study the Chinese language, which was considered the exclusive monopoly of men. The Japanese women took hold of their native tongue and were soon at the head of the literary movement of their country.

State Game, Fish and Forest Fire Department of the PUBLIC DOMAIN COMMISSION

Order Fixing the Time and Place for Public Hearing

STATE OF MICHIGAN ss.

County of Ingham

Petitions having been filed with this department, signed by a majority of the members of the Boards of Supervisors of the Counties of Iosco, Alcona, Benzie, Leelanau, Montmorency, Alpena and Presque Isle, Michigan, asking that a time and place be fixed for a public hearing to determine the advisability of suspending, abridging or otherwise regulating the open season now fixed by law on the following animals, to-wit: Deer, because of the threatened depletion or extermination of such animals, in said Counties.

Therefore, I, John Baird, State Game, Fish and Forest Fire Commissioner of the Public Domain Commission of Michigan, do hereby designate and fix the said time and place for the said public hearing as follows, to-wit: The said hearing will be held in the city of Alpena on the Seventeenth day of August, 1920, at two o'clock in the afternoon, which hearing may be continued or adjourned for such time as may be deemed advisable by the said Commissioner to afford all persons interested an opportunity to be heard in regard to the petition to suspend, abridge or regulate the open season on said game animals.

Given under my hand and seal this Sixth day of July, 1920.

[Seal] JOHN BAIRD, State Game, Fish and Forest Fire Commissioner of the Public Domain Commission. 31

NOTICE OF LETTING OF DRAIN CONTRACT

Notice is hereby given, That we, Robert C. Arn and James P. Baikie, County Drain Commissioners of the Counties of Iosco and Arenac, State of Michigan, will, on the 20th day of July, A. D. 1920, at the residence of Amos Hittle in the Township of Sherman, in said County of Iosco, at 9:00 o'clock in the forenoon of that day, proceed to receive bids for the construction of a certain drain known and designated as "County Line Drain," located and established in the Township of Sherman, Iosco County.

Said drain is divided into convenient sections as follows, each section having the average depth and width as set forth: All stations are 80 rods apart.

Section No. 1 beginning at station number 0 at the lower end of said drain and extending to station number 10, a distance of 1320 feet, and having an average depth of 2.17 feet, and a width of bottom of 3 feet, estimated 549 cu. yds.

Section number 2 beginning at station number 10 and extending to station number 20, a distance of 1320 feet, having an average depth of 1.21 feet and a width of bottom of 3 feet, estimated 249 cu. yds.

Section number 3 beginning at station number 20 and extending to station number 30, a distance of 1320 feet, having an average depth of 1.08 feet and a width of bottom of 3 feet, estimated 200 cu. yds.

Section number 4 beginning at station number 30 and extending to station number 40, a distance of 1320 feet, having an average depth of 1.14 feet, and a width of bottom of 3 feet, estimated 231 cu. yds.

Section number 5 beginning at station number 40 and extending to station number 50, a distance of 1320 feet, having an average depth of 1.53 feet and a width of bottom of 3 feet, estimated 339 cu. yds.

Section number 6 beginning at station number 50 and extending to station number 60, a distance of 1320 feet, having an average depth of 2.17 feet and a width of bottom of 3 feet, estimated 549 cu. yds.

Section number 7 beginning at station number 60 and extending to station number 71, a distance of 1452 feet having an average depth of 1.59 feet and a width of bottom of 3 feet, estimated 391 cu. yds.

If it becomes necessary to change the center line from the hubs, the change will become part of these specifications and the right is reserved to make any such changes.

Station stakes and grade hubs shall remain in their original positions during the cleaning of said drain, and shall not be moved nor covered with excavations.

All loose stumps, timber, brushwood, logs and driftwood shall be removed from the entire width and berm of said drain and shall not be covered with excavations.

All water courses, either natural or artificial, entering said drain shall be left open and unobstructed for the free passage of water into same when the work of cleaning said drain is completed.

The said work of cleaning is divided into sections as follows: No. 1. from the Au Gres river to the section line between sections 32 and 33, distance 123 rods; No. 2. from said section line to the north and south 1/4 line of section 32, distance 160 rods; No. 3. from said 1/4 line to the west 1/4 line of section 32, distance 80 rods; No. 4. from said 1/4 line to the section line between sections 31 and 32, distance 80 rods; No. 5. from the south boundary of section 31 to the terminal boundary of section 31 to the distance 125 rods. Total distance of the 5 sections, 568 rods.

The slope of each bank of said drain is 1 foot vertical to 1 foot horizontal, the excavations to obtain slope and the required width, except as to the cut in the bottom, should be taken from the north side as much as possible, leaving the south side intact for highway.

All excavations of said clean out shall be deposited on the highway on the south side of said drain and shall be spread on said highway, and all wash outs on said highway shall be filled with such excavations wherever practicable and be levelled up.

Bridges will be constructed where required by law.

The width of the bottom of said drain is 4 feet. The width of the top will be twice the depth added to the width of the bottom.

Said job will be let by sections. The section at the outlet of said drain will be let first, and the remaining sections in their order up stream, in accordance with the diagram now on file with the other papers pertaining to said drain, in the office of the County Drain Commissioners of the Counties of Arenac and Iosco, to which reference may be had by all parties interested, and bids will be made and received accordingly. Contracts will be made with the lowest responsible bidder giving adequate security for the performance of the work, in the sum then and there to be fixed by me, reserving to myself the right to reject any and all bids. The date for the completion of such contract, and the terms of payment therefor, shall and will be announced at the time and place of letting.

Notice is further hereby given, That at the time and place of said letting, or at such other time and place thereafter, to which we, the County Drain Commissioners aforesaid, may adjourn the same, the assessments for benefits and the lands comprised within the "County Line Drain Special Assessment District," and the apportionments thereof, will be announced by us and will be subject to review for one day, from nine o'clock in the forenoon until five o'clock in the afternoon.

The following is a description of the several tracts or parcels of land constituting the Special Assessment District of said drain, viz: West half of fractional section two (2); entire section three (3); east half of fractional section four (4); east half of southwest quarter of section four (4); northeast quarter of section nine (9); north half of section ten (10); northwest quarter of section eleven (11); and all subdivisions therein contained, all in Town Twenty (20) north, Range six (6) east, Township of Turner, County of Arenac State of Michigan, and Town 21 N., R. 6 East, Iosco County, State of Michigan.

gan: W 1/2 of SW 1/4, Sec. 31; E 1/2 of SW 1/4, Sec. 31; W 1/2 of SE 1/4, Sec. 31; E 1/2 of SE 1/4, Sec. 31; W 1/2 of SW 1/4, Sec. 32; E 1/2 of SW 1/4, Sec. 32; W 1/2 of SE 1/4, Sec. 32; E 1/2 of SE 1/4, Sec. 32; W 1/2 of SW 1/4, Sec. 33; E 1/2 of SW 1/4, Sec. 33.

Now, Therefore, All unknown and non-resident persons, owners and persons interested in the above described lands, and you, Albert L. Townsend, Supervisor of the Township of Turner, Wm. White, Highway Commissioner of the Township of Turner, George Koehn, Henry Schroeder, Charles Cottrell, Wm. Stabler, B. V. Bertrand, Charles Newcomer, C. Blair, Mrs. Thomas Douglas, Wm. ALL THE COMFORTS OF TOWN

One Solution of the Farm Labor Problem

LITSCHER LITE

ONE way to keep help on the farm is to beat the city at its own game. Farm help means increased production and greater revenues. High wages and the modern comforts and conveniences of the city are luring the farm hand away from the soil. This must stop if production is to continue.

A Litscher Lite Plant Will Stop It in Two Ways

In the first place, a Litscher Lite plant on your farm means unlimited electric current for incandescent lights in the barns and home. It means modern electrical appliances such as electric washing machines, irons, fans, vacuum sweepers, modern baths, percolators, toasters—even home movies. In the second place, a Litscher Lite plant also offers you stationary engine power for the operation of belt machinery. Cream separators, fanning mills, feed choppers, pumps, churns, milkers, hair clippers, are operated by the Litscher Lite plant. The Litscher Lite plant is designed to operate without attention. It requires only oil, water and kerosene fuel to keep it giving absolute satisfaction.

Satisfying the Family and the Help

A Litscher Lite will help you keep your farm hands, because it will provide them with many of the things they can get in the city. It will lighten their manual labor and keep them satisfied. Besides, with a Litscher Lite plant you can get more work done. Easy to operate, because it runs itself. Inexpensive investment, low upkeep cost. See a Litscher Lite plant in operation and your common sense will advise you to install one without delay.

We Sell Genuine International Repairs

Made For

The IHC Line

By the

INTERNATIONAL HARVESTER COMPANY

REPAIRS made for International implements and other farm equipment by the Harvester Company are the only repairs made from the original patterns. All others are copied from copies, and in this roundabout reproduction they may lose in correctness of shape, sharpness of detail, closeness in fitting, and quality of material. These repairs are made for Deering, McCormick, Milwaukee, Titan and other International-made machines.

Genuine IHC Repairs

Are Better in Quality
Fit Better and Wear Longer

The Harvester Company stands back of its machines. Be fair in the matter. Do not substitute imitation repairs for the genuine and expect best service. Repairs made by other concerns and marked "Made for" or "Will fit", are not genuine IHC repairs. They often lack weight, are not always correct in shape, are imperfectly finished, do not fit properly, or are made of inferior material. Buy Genuine International Repairs for your International Farm Equipment.
