A Few Thoughts For The Farmer

Unquestionably the farmer is face to face with a serious labor shortage. The world is crying for food. Scarcity of farm hands means decreased production.

In order to make up for this shortage and at the same time put produce on the market, the farmer and the farmer's wife and the farmer's children are working sixteen hours a day - and working hard. This is too much. No wonder sons and daughters are attracted by the short hours and high wages and modern conveniences of the city. No wonder the farmer's wife breaks down, becomes old before her time. No wonder the farmer is dissatisfied.

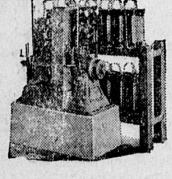

But All This Need Not Be

your farm attractive by supplying you with sufficient electric current to light your home from cellar to attic, your barn and all farm buildings you wish illuminated. It will keep your family happy and con-tented by making possible suitable reading lamps, modern bathrooms, electric sewing machines, washing

The Litscher Lite plant will make machines, vacuum cleaners, fans, irons, percolators, toasters - in short, the modern conveniences of the city. It will help keep farm hands. Even moving pictures can be shown in your home with the Litscher Lite. But more than this it lightens labor by supplying belt power to various machinery. It cuts down the work of many men

The Litscher Lite is a stationary engine power plant which stores electric current while operating farm machinery. It operates satisfactorily, without attention, on a small amount of kerosene fuel, and is guaranteed to give perfect service.
