Officers of the league were elected as follows: President, A. J. Noel, East Tawas; vice-president, R. D. Brown, Hale; secretary, H. N. Butler, East Tawas; treasurer, M. C. Musolf, Tawas City.

A regular schedule of games will be arranged for the coming season.

NORTHEASTERN MICHIGAN

Montmorency county farmers are taking pride in the fact that their county ranked first in 1920 in the yield per acre of corn, hay, oats and buckwheat, in a group of 10 counties in Northeastern Michigan.

The county ranked third in barley, fourth in clover seed, fifth in potatoes, sixth in winter wheat, ninth in rye and tenth in beans.

Some interesting pictures of summer camp life, fishing scenes, etc., in Northeastern Michigan appear in a road map of Michigan recently issued by the Clason Map Co. of Chicago.

The pictures, together with considerable information regarding this section of the state which appears in the booklet, were furnished by the Northeastern Michigan Development bureau.

NON-ADVERTISERS ARE THE FAILURES

Eighty-four per cent of the business failures of the past year occurred among firms which did not advertise, says an authority.

This is the assertion made by Bradstreet's Commercial Agency, which is an unbiased authority as can be found in the business world today.

Bradstreet's compiled its information from statistics, not guess work.

The importance of advertising as a business element must have been regarded as vital by this great commercial agency, else it would not have wasted the time of hundreds of trained men throughout the nation collecting and tabulating this information.

Bradstreet's thus points the way to one of the elements of business success. The lesson to be learned from the statistics regarding the advertising merchant is obvious.

ALUMINUM PRODUCTION

The value of primary aluminum produced in the United States in 1920, according to reports received by the U. S. Geological Survey, department of the interior, was \$41,875,000, as compared with \$38,568,000 in 1919. This increase of approximately 7 per cent shows a return to more normal operations and indicates what may be expected in the future.

The market prices throughout the year have been nearly constant, ranging from 32 to 33 cents a pound.

During 1921 the aluminum industry will no doubt continue to grow, for the South American deposits of bauxite, the ore of aluminum, are now yielding a regular output, the domestic deposits are being worked more advantageously, and the aluminum plants in North Carolina and Tennessee are producing more metal from year to year.

TEACHERS' EXAMINATION

The regular teachers' examination will be held April 28, 29 and 30. A part of the questions for all grades will be based on the State Teachers' Reading Circle books. Questions will also be based on bulletins No. 4, "The Teaching of Reading," No. 10, "Word Study and Spelling," and No. 30, "Language Lessons."

CONTRACT POTATOES

L. J. Uplan & Co. are again putting out contract potatoes in this vicinity. A limited amount of seed to be put out, and first come first served. Call or phone. J. Samuelson.

SEED PRICES TUMBLE ON OATS AND BARLEY

A lowered price on registered seed oats and barley has just been announced by A. L. Robbins, secretary of the Michigan Crop Improvement association. The improvement association and the seed department of the state farm bureau, cooperating, have agreed upon a scale of prices for certified seed which is said to be the lowest in the history of the association.

Low market conditions on barley and oats, and the fine seed of these grains on hand in the Improvement association led to the reductions, which leave registered oats seed selling at an average price of \$1.00 per bushel and barley at an average of \$1.40.

TWENTIETH CENTURY CLUB

The Twentieth Century club met last Saturday at the home of Mrs. Jas. E. Ballard.

Action was taken on plans to beautify the city. A committee was appointed to select flowers and shrubbery for the court house grounds and other public places. Other public service papers were discussed.

A paper on "The Prevention of Tuberculosis" was read by Miss Frances Osborne.

Results of the recent county health survey were used by Miss Ina Bradley, County School Commissioner, who made a convincing talk on "The Value of a County Nurse." The alarming number of mouth-breathers between six and twenty years old were cited as an example of inefficiency in our school system.

These handicapped children cannot compete in school work with normal children and require more terms to complete their courses. The expense of each extra term would pay many times for the medical attention necessary to relieve the child and fit it for a more efficient future.

A piano solo by Miss Ruth Peterson concluded the program.

Ice cream, coffee and cake were served.

WHAT YOU CAN DO

Many very estimable people of this town are sincerely desirous of doing their bit to boost our home community.

"But what can I do?" they ask. There is much they can do, and the best place to begin is at home.

They can keep their houses and fences in repair.

They can keep their lawns well seeded and mown.

They can plant shrubbery and grow flowers and add to the beauty of their neighborhood.

They can clean up their back yards and get rid of the unsightly rubbish and weeds in the alley.

They can keep their walks in repair and their shade trees properly pruned and create a general appearance of cleanliness and thrift on every hand.

Then when a public meeting is called for the purpose of inaugurating civic improvements they can attend the meeting and raise their voices in behalf of that which is good for the town and against anything that is not good.

All of these things operate to make a clean and attractive town, and such a town advertises itself by its own appearance.

Every citizen can be a booster if he or she so desires. But, like charity, it should begin at home.—Ex.

FARMER HAS PLAN TO SOLVE TROUBLE IN RURAL PLACES

Some local interested party, we do not know who, has mailed us the following copy of a Denver, Col., press report which seems to have solved(?) the farm labor problem. It is worth publishing at any rate, and is as follows:

Denver, Dec. 31.—A farmer, who signs his name as Geo. Smith, wrote to Governor O. H. Shoup today advocating a law permitting farmers to have two wives as a solution to the farm labor problem. Here is his letter:

"Governor O. H. Shoup, I am a farmer seven miles south of Denver. You are a good state governor or the people would not have elected you by such a large majority the second time. You should originate some good help for farmers and I offer you something to help the farmers, and you could lead all the other governors if you can get it made a law.

"It is: Let city men have one wife and farmers have two wives. You see, one could help the other and a farmer could more surely raise boys to work the farm and not need to hire at high wages. Then the farmers could sell cheap crops and make money and living in cities would be cheaper, and many young men would leave cities to be on a farm and have two wives.

"I tell you this argument about farmers to be organized is all bosh. A farmer needs no theories. It am certain a farmer can't get any help unless it is born and raised on a farm.

"You would be a greater man than Lincoln if you can get the United States to let all farmers have two wives. You see the farmer would be independent of hired help in a few years, both on the farm and in the house work. A farmer could often marry two sisters or good pals."

LONG LAKE BREEZES

Martha Hicks spent Sunday at Hale. John Graff was a Tawas caller last week.

Otto Bates and E. Becker are out of town this week.

Clarence Kohn returned to Flint Monday morning.

Mr. Richardson of Grayling is employed on the Long Lake ranch.

Mr. McNichols returned home Monday after spending a few days at Flint.

J. D. Pilmore of Bay City visited a few days the past week at his farm here.

John Graff has sold his farm to a party from Flint. They expect to move here soon.

Misses Bessie Daley and Vivian L. Borge spent Saturday and Sunday at Tawas City.

F. C. Holbrook returned Monday to Bay City after spending a few days on his farm here.

Mrs. M. Bloomfield left Monday for an extended visit with friends and relatives in Flint and Detroit.

Everett Wood has returned to his home in Bay City after spending a few days with his aunt, Mrs. Trask.

The Ladies' Aid met at the home of Mrs. O. Bates last Wednesday. Next meeting at the home of Mrs. B. Dyer.

Mm. McLeod has returned to his home in Flint after spending several days with his brother, Geo. McLeod.

A miscellaneous shower for Rev. Hughes and wife was held last Monday at the home of A. Ross. The evening was spent in games and ice cream and cake were served.

SOME CENSUS STATISTICS

The bulletin of the fourteenth census of the United States, recently issued, shows some interesting figures regarding the population of the United States and the state of Michigan.

The percentage of increase in the United States at large since the census of 1910 is 14.9% in Michigan the increase has been 30.5% for the same period. Thirty-five counties in the state show an increase, while 48 show a decrease. This is due in great measure to the centralization of industries in the larger cities and the consequent trend of the people from the smaller communities toward these cities, where work is plentiful and wages high.

The percentage of decrease in the 48 counties ranges from 1.1% in Cass county to 34.7% in Benzie county. The decrease in Iosco county was 15.9%, which is just about the average for the 48 counties.

Of the 15 townships and cities in Iosco county, seven made a small gain, while eight lost in varying degrees. The population of the county as a whole decreased from 9,753 in 1910 to 8,199 in 1920.

Of the incorporated cities in the county only one, Whittemore, showed a gain in the ten year period. AuSable city dropped from 648 to 171, East Tawas from 1,452 to 1,398, Tawas City from 1,061 to 1,018. Whittemore increased from 218 to 232, a net gain of 14 for that city.

M. E. CHURCH

Rev. John Bayner Lomas has been advised by a throat specialist to take a rest and refrain from preaching or lecturing for three months.

Of late years after colds he has trouble with his throat and advanced years and strenuous, continuous work for 48 years in active ministerial work now begin to tell on him.

For 34 years he preached and lectured under the auspices of the Wesleyan Methodist church, England, and for three years he was reporter for one of the English daily papers during the time of the Fenian troubles.

In the English Methodist Forward movement he took an active part in the initiatory work in some of the largest cities. As an evangelist he was very successful and his services were in great demand.

Among the fruits of his ministry are 17 ministers, his youngest son being one of them.

In this country his credentials secured for him immediate openings in the largest churches of different denominations, notably Port Huron. The building of three successful churches during a period of 31 years is to his credit, all paid for within a period of 12 months. He was successful in the raising of money. A liberal give himself, he holds and preaches that the truest and richest blessing of worship of God is in giving.

"God Loves a Cheerful Giver" is the subject of one of his famous lectures.

For nearly eleven years he has held pastorates in this country in the M. E. church. He did strenuous work during the war as a four minute man. Every day calls were made upon him almost for service. A souvenir signed by Ex-President Wilson commends his services. He frequently gave his services in aid of the Red Cross.

His lecture on the war from nine angles was successful in aid of the Red Cross funds. In St. Clair and other counties all the time that he could devote he freely gave in the state wet and dry fight. He took an active part in organizing and getting Billy Sunday to Port Huron. The result of that speech very largely turned that city on the dry side.

He is author of articles on various subjects in English magazines.

Rev. Lomas did not preach last Sunday. Last week he visited Owosso and other towns to obtain a substitute for his pulpit in this city, but failed as preachers at this time are scarce.

His first wife died in February, 1920, ripe in years and rich in Christian experience. He married recently Mrs. M. E. Watts, an estimable lady, to share with him their joys and sorrows of advanced years. They both have grown up families, doing well and enriched by Christian parentage on both sides. Rev. and Mrs. Lomas contemplate a change to a drier climate in a western state. To regain as far as possible his voice he intends to act upon the advice given him by the throat specialist and for a time he intends to take absolute rest. He will not occupy the M. E. pulpit in this city any longer.

ADOPT PLANS FOR SPREADING FAME OF N.E. MICHIGAN

The executive committee of the Northeastern Michigan Development bureau met at Bay City last Thursday and discussed general plans for carrying on the work of the bureau for the year.

Secretary Marston in a report to the committee said that greater interest in the work of the bureau was manifest than ever before and the increased co-operation of the people of the district was a most valuable aid.

The secretary was authorized to have printed an edition of 20,000 copies of "The Last Good Land at a Low Price," a booklet that has been used successfully to advertise the agricultural possibilities of the district. In this new edition a feature not heretofore used will be that each county will have the privilege of using one page in which to set forth its own particular advantages.

Publicity of the district's great variety of attractions for the summer vacationist is to be secured through the use of advertising space in some of the national magazines and through some other plans outlined by the secretary.

The bureau will again conduct one or more farmers' automobile tours through the district, similar to the one which proved so successful last year, and it was also planned to have a summer meeting of the bureau at which the subject of development and conservation will be discussed by speakers who are authorities on those topics, for advertising the farm lands of the district under the name of the bureau.

During the past year the bureau has had numerous inquiries regarding the feasibility of holding conventions at points in the district where delegates could make a summer outing of their trip, with camping out features, as a substitute for the usual convention held in some city. These inquiries indicate that such gatherings are going to be popular, especially with the smaller organizations, and plans will be made for supplying accommodations in the way of tents, cots, etc., for use at such conventions and the bureau will also have listed a large number of places suitable for convention camp sites.

Numerous other plans were discussed, including the publication of a booklet in Danish, telling of the attractions of the district and to be circulated in Denmark, and plans for advertising the farm lands of the district under the name of the bureau.

HEMLOCK SLIVERS

Burt Farrand left Wednesday for Saginaw.

DRINK A PINT OF MILK A DAY

"Drink a pint of milk a day" is a slogan that the Michigan Anti-Tuberculosis association is trying to popularize throughout the state. The slogan is not meant for the tuberculous alone, in fact it is not primarily for them, but for all the people of the state, young and old.

The association would like to make the slogan as popular as "Safety First."

In a good many schools of the state the "pint of milk a day" idea has taken hold in the form of milk lunches served to the pupils during the forenoon, and in some cases in the afternoon also. It has been found that a very large percentage of the children of school age are undernourished—children from well-to-do families as well as from poor homes. In one city clinic it was found that 114 children out of 115 examined were underweight. While this is an extreme case, it is estimated that about fifty per cent of the children in the schools are underweight.

To overcome this menace to the health of school children, the movement to have each child drink a bottle of milk in the forenoon, usually a half a pint, has been introduced. The system has shown good results in many of the cities where it has been tried out. The movement is spreading throughout the state.

But adults need milk also, the association points out, and hence the proposed slogan, "Drink a pint of milk a day." The great majority of people do not drink nearly enough milk, it is asserted. Milk is the best food there is, and about the only food that can sustain life without the help of other foods.

If milk were made a greater article of diet for both young and old, it would do much toward building up the vigor and vitality of the people of the state, and hence would play a great part in preventing tuberculosis.

The movement to get children to drink more milk is a good one, but the same thing is also good for adults. Even at the present high prices, milk is considered one of the cheapest foods in existence in proportion to its food value.

L. D. S. CHURCH

Jesus has worked out our salvation in the sense that he has made it possible for us. He made the sacrifice. He lived the perfect life. He presents the divine plan. It is ours to accept and obey. But while he saves us out of love when it comes to the question of reward, we must work that out. We will get that for which we work. This is made very clear in the following:

For other foundation can no man lay than that is laid which is Jesus Christ. Now if any man build upon this foundation gold, silver, precious stones, wood, hay, stubble; every man's work shall be made manifest; for the day shall declare it, because it shall be revealed by fire; and the fire shall try every man's work of what sort it is.

If any man's work abide which he hath built thereupon, he shall receive a reward. If any man's work shall be burned, he shall suffer loss; but he himself shall be saved; yet so as by fire.—1 Corinthians 3:11-15.

It becomes of the utmost importance then that we shall begin now to build wisely and well that our works may stand the test and receive the highest reward. Jesus said, Whosoever heareth these sayings of mine and doeth them, I will liken him unto a wise man that built his house upon a rock—Matthew 7:24. In my father's house are many mansions; if it were not so I would have told you. I go to prepare a place for you—John 14:2.

GOOD THAT LUNCHES DO.

The ideal accompaniment to health education in the schools, and the discovery of underweight, is the school lunch, says School Life. In every case in which school lunches have been made available, and the teaching of food values has gone on, too, the children have made wonderful progress in weight. Improvement in physical condition is accompanied by improved school standing. It has been stated by authorities that the school lunch without health education does little. Boys and girls who are taught what to eat, and then have the opportunity to eat it, learn the taste of unaccustomed foods and carry a practical lesson right home, and this lesson is easily repeated there. Many children have been found playing school at home and teaching the value of various foods to their younger brothers and sisters. When the parents notice and come to school to find out from the teacher what it all means, the most valuable link in the chain of health for the school child is forged. There are hundreds of ways of pointing out to school children the value of health habits, and teachers and scholars themselves, acting on the impulse of the moment, can achieve great things.

In spite of the fact of declining rural population, we see a crop in 1920 which, while not the largest we ever had, exceeds that of many previous years when the farm population was much greater. This reveals that machinery and better cultural methods are averting the threatened evil of loss of farm labor, and that we may have been overconcerned and too fearful of the future, says St. Louis Globe Democrat. Economic conditions have the world-old habit of adjusting themselves. We live in a world of constant change, of new devices to meet new conditions. The world was never so sure of its ability to produce and distribute an abundance of food as it is today. We may be sure that the resourceful American people will find ways to overcome the menace of agricultural insufficiency.

It is estimated, on a basis of a questionnaire study made by the children's bureau of the United States Department of Labor, that 175,000 children were brought before the courts in the United States in a year. Of these, 50,000 came before courts not adapted to handling children's cases. Although every state, except one, had laws providing for juvenile probation, according to investigations of the bureau, less than half of the courts hearing children's cases actually had probation service. The majority of the courts failed to make adequate investigation of the child's home and family circumstances, his physical and mental condition and his personal tendencies.

H. G. Wells hasn't a very romantic vision of "the glory that was Greece." He says in his "Outlines of History" that if we could be plumped down in the Athens of Pericles we should find it rather a tawdry music-hall sort of place. Perhaps H. G. is right, says Boston Transcript. Personally we have always discounted those stories of ancient grandeur and greatness, and we venture to assert, by way of example, that if "the topless towers of Ilium" could be set down among our modern skyscrapers, they would make a mighty ridiculous showing.

A marriage permit in Chicago costs \$1.50 and a dog license \$4.50, and the county clerk wants the price of marriage licenses raised to a level with the permit to keep a dog. But he forgets that a dog license lasts a year and marriage licenses—well, you know how Chicago divorce is.

An official of the immigration bureau says that the difficulty attending entry into the United States is turning many Europeans to South America. Not being able to get in under the Constitution they take the Monroe doctrine for the next best thing.

Theoretically, all the vessels taking part in maneuvers of the Pacific fleet were sunk six times in one day. Happily there is a vast distinction between the theory and practice of naval warfare.

THE WOODS

BY DOUGLAS MALLOCH

MARCH.

IN what a travell is our Springtime born!
Mid laden skies and garmenture of bloom.
Wild waves of cloud the drifting stars consume.
And shipless seas of heaven greet the morn.

The forest trees stand sad and tempest-torn;
Memorials of Summer's ended bloom;
For unto March, the sister most forlorn,
No roses come her pathway to illum.

Yet 'tis the month the Winter northward flies
With one last trumpeting of savage might.
Now stirs the earth of green that undertles
This other earth enwrapped in garb of white.
And while poor March, grown weary, droops and dies
The little Springtime opens wide its eyes.

Do you remember when hard coal cost \$5.50 a ton and it was a job to get money enough ahead to pay the winter's fuel bill all at once?

So many people connected with the coal industry are so busy making explanations that they have little time left to produce and distribute coal.

Those frequent monarchist plots in Germany are always exposed in advance by some inconsiderate outsider, but it seems that nobody is ever punished.

The suggestion that the soviets are seeking diplomatic recognition takes no account of the fact that the soviets most of all just now are seeking a chance to rest.

It may be true, as unofficial statisticians assert, that there is a falling off in divorces with the fall in prices, but that will have to wait until the public recovers.

Biennial Spring Election and Annual City Election
To the Qualified Electors of the City of Tawas City, State of Michigan
Notice is hereby given that the next annual biennial spring election and annual city election will be held on Monday, April 4, A. D. 1921
At the places in the several wards or precincts as indicated below, viz: At City Hall, Tawas City, Mich, such being the central polling place for the entire city, at which election the following officers are to be voted for, viz:
State—Two Justices of the Supreme Court, full term; one Justice of the Supreme Court to fill vacancy (term expiring Dec. 31, 1923); two Regents of the University; one Superintendent of Public Instruction; one Member of State Board of Education; two members State Board of Agriculture; one State Highway Commissioner.
City of Tawas City—One Mayor; one City Clerk; one City Treasurer; one Alderman and Supervisor for each ward.

AGREEMENT

This Agreement, Made and entered into this 7th day of January, 1921, by and between the City of Detroit, represented by J. O. Stutsman, Superintendent of the Detroit House of Correction, duly authorized Agent for and in behalf of said City, party of the first part; and the County of Iosco, Michigan, represented by the Board of Supervisors, duly authorized Agent for and in behalf of said County, party of the second part.
Witnesseth, Whereas, the party of the first part, for and in consideration hereafter mentioned, agrees to receive into the Detroit House of Correction, safely keep, board, clothe and care for, any and all persons who may be sentenced to confinement in the said Detroit House of Correction, by any Court or Magistrate in the County of Iosco, Michigan, to-wit: For all persons sentenced for any period not less than sixty days, One Dollar and Twenty-five Cents per day each, or any part of day. It is hereby agreed by and between the parties hereto, that this agreement does not cover any person or persons who may be sentenced to confinement in said County for any term less than sixty days, and such person or persons so sentenced shall not be committed to, confined, received or kept in the said Detroit House of Correction under the terms of this agreement. Provided that all persons sentenced and delivered as aforesaid, upon being discharged, may, in the discretion of the Superintendent of the Detroit House of Correction, be furnished with transportation to the place from whence received, or given the equivalent in money, and the amount so expended shall be repaid by the party of the second part quarterly as hereinafter specified.
The party of the second part, in consideration of the before mentioned stipulations to be performed by the party of the first part, agrees that all persons convicted in the County of Iosco, Michigan, of offenses under the Disorderly Act or of crimes not punished by imprisonment in the State Prison or Reform School, and who are sentenced by any Court or Magistrate, shall be sentenced to imprisonment in the Detroit House of Correction, and shall be forthwith conveyed to and delivered into the custody of the Superintendent thereof; and to pay all lawful drafts drawn upon the Treasurer of the County of Iosco, Michigan, for board, care, discipline and money expended for return transportation, etc., of persons so sentenced and delivered, according to the terms of this agreement, quarterly, viz. on the first day of January, April, July and October of each year of the continuance of this agreement.
The party of the second part further agrees to furnish the party of the first part an affidavit of the due publication of public notice of this agreement in some newspaper published within said County, and in case no paper is published in said County then an affidavit of the due publication of such notice in some newspaper published within the judicial district to which said County is attached for a period of not less than four weeks, and such notice shall state the period of time for which

this agreement will remain in force, as provided for in Section 2162, Mich. Compiled Laws 1897.

It is Further Agreed, by and between the parties hereto, that this agreement shall continue for one year from the 7th day of January, 1921, and shall be binding and in full force in all its points to the end. Provided, that the parties hereto, or either of them, has and have by these presents the right to annul this agreement at any time during the continuance thereof, when written notice of the intention to so annul shall have been served by one party upon the other party, at a date not less than one month in advance.

OBITUARY

Mrs. James Cataline, who has been in poor health for some time, suffered an attack of pneumonia and heart trouble recently which no earthly aid could conquer. She passed away March 14, 1921, at her home in Whittemore.

Miss Emily Jane Williams was born Feb. 3, 1852 at Vernon, Shiawassee county, Mich. At the age of 19 she was united in marriage to James L. Cataline of Uby, Huron county. To this union five children were born, four of whom with her husband and three brothers, are left to mourn her demise. They are Durrant of the Soo; Martin of Fibre, U. P.; Mrs. Jesse Chase of Whittemore; Mrs. Geo. Jackson of Lansing Messrs. Martin and Sanborn Williams of Flint and Ross Williams of Reno. The youngest son, Herbert, died at the age of 4 years.

Mrs. Cataline had a cheerful disposition which endeared her to her many friends, and was a kind and loving wife and mother. Her influence will long be remembered.
The funeral was held at the M. E. church in Whittemore on Wednesday afternoon, Rev. McMichael officiating. Those who came from a distance to attend the funeral, besides the immediate family, were: Martin Williams and Mr. and Mrs. Sanborn Williams and daughter, Mrs. Scott of Port Huron, and Mr. and Mrs. Griswold of Lansing.

Interment was made in Reno cemetery.
Mr. and Mrs. Cataline have been residents of Reno and Whittemore for the past 28 years and have a host of friends, who extend their sympathy to the bereaved ones.

ADVANTAGE NOW WITH WOMEN

Modern Feminine Garments Such That They No Longer Need "Take All Day to Dress."

No longer does it "take her all day to dress."
Quietly and steadily woman has got rid of many checks upon rapidity of dressing; has consolidated garments, abolished buttons, done away with hooks and eyes, abandoned very often even corsets and the "fixing" of her hair, while man is quite as slow a dresser now as when Uncle C. Depew repented his first story.

Not, of course, if woman garbs herself for purposes strictly social. This means one-tenth dressing and nine-tenths preparation of an ornament that no stupid League of Nations would ever hope to curb. Very different is the morning method of feminine executives, of girls intent on business, study or art, of stumpy-speaking ladies when in transit.

Brother dazed himself with speed when first he fastened trousers with a belt, though buttons still remain for the "weskit" and the coat and that weary round of pearl and gold buttons for the shirt. But sister takes her one-piece suit at a single hurdle and snaps a single "snapper" at the waist.

Long ago man hopped into his congress gaiters. Now he ties his oxford. His wife, however, steps into her pumps.
"Making her hair" once impeded mother's toilet. Fathers having hair to part must part it still. But daughter, being "bobbed," gives her hair one shake to "do" it.

"Nowadays" says an expert, "a girl can easily dress in ten minutes. Then she adds 20 for making up her face."

SILVER CARTWHEELS ON THE WAY

The coinage of silver dollars is being resumed at the Philadelphia mint, the first that have been put into circulation since 1905. In 1918 the Pitman act fixed \$1 an ounce as the price at which the purchases of silver should be made. The price of silver in the open market is now about sixty cents an ounce. Treasury officials state that about 350,000,000 silver dollars will be coined—enough so that everybody will have some of them.

More Power, Less Weight= Economy!

HERE is the most economical tractor—the one that furnishes the greatest traction power with the lightest tractor weight and smallest fuel consumption. It pulls three 14" plows, turns an acre an hour, and is light enough to work on plowed ground without packing it down.

It uses little more fuel than many two plow tractors—does half more work in the same time and saves labor cost; does half more work every mile it travels and saves maintenance, repairs and depreciation.

Just as the three-horse team is the right animal unit for heavy work on farms of all sizes, the Huber Light Four is the right power unit.

It plows, harrows, pulls the binder, hay loader and manure spreader economically and will run the small thresher, silo filler, hay baler, etc. So simple that a woman or boy can operate.

Makes better crops possible by getting work done at the right time. Often pays for itself in a single season.

Let us show you the Huber and tell you what it will do for you.
