Conclusions regarding the character of people are quickly formed. The higher one is by profession and position, the more critically is the public eye fixed upon him and the more pronounced are opinions of him.

Local business men are best known in their immediate community. The Governor is the state man and becomes known. Ford is building cars at full speed. And, according to an official statement from the factory at Detroit, the demand for Ford cars and trucks still exceeds the output, despite the fact that a new high level of production has been reached.

By the first of May the figures representing daily production were about 4,000 a day, so the May schedule was set at 101,125 cars and trucks, not including the output of the Ford Canadian plant or any of the foreign assembling plants. The output mounted daily; May 12th brought forth 4092, the greatest number that have produced in one day so far this year. Since the month has 25 working days, presnt indications point a new high record.

A comparison of Ford production figures for 1920 and 1921 discloses the fact that for April, 1921 the output was greater by 34,515 than for the corresponding month of a year ago. The output for May 1921 will probably overshadow May 1920 by between fifteen and twenty thousand cars and trucks.

Approximately 43,000 men are at work in the Detroit plant of the Ford Motor Company. The factory is operating on full time, six days a week and three shifts a day.

"We were never in better condition than we are right now," said Mr. Ford recently.

#### Curing by Suggestion.

There is nothing new in the attempt to cure disease by means of the mind. Many a shrewd physician of a hundred years ago cured patients with bread pills, and kept his secret. There were probably mental heaters in Babylon and Assyria. They are known to have existed in Expt. Greece and Rome, while the American Indian medicine man was unquestionably an adept in the art of suggestion.
