#### WILSON-BARTLETT

An unusually beautiful home wedding was solemnized at the home of Mr. and Mrs. Burley Wilson on Wednesday afternoon, June 15, when their niece, Frances Ethel, became the bride of Earl Royce Bartlett, son of Mr. and Mrs. Ralph Bartlett of Brooklyn, Mich. The service was read by Rev. Homer W. Grimes in the presence of the immediate relatives and intimate friends of the bride and groom.

The bride descended the stairs on the arm of her uncle, groomed in boron net satin trimmed with Irish point lace and seed pearls. Her short veil of tulle was held in place with swansonia and white rose buds. In her arm she carried a marvelous creation of flowers consisting of huge white roses and swansonia with long streamers of white satin ribbon prettily decorated with flowers. Miss Freda Hydorn in white organza acted as flower girl and led the procession to the altar. Master Lewis Hydorn in a white sailor suit drove little Joan Tobin, a picture in white tulle, with the ring basket. Miss Ellen Hydorn, cousin of the bride, was maid of honor and wore a gown of gold lace over blue taffeta. Misses Lela Kerr of Port Huron and Mable Pelham of Brooklyn acted as bridesmaids and wore gowns of white net over metal cloth with large azure blue girdles. Mr. Kenneth Warner of Hillsdale supported the groom. Miss Gwendolyn Wilson, cousin of the bride, played Mendelssohn's "Wedding March."

The ceremony was performed before an altar of ferns and roses with tall tapers burning in bronze candlesticks. The house was a profusion of ferns and Alpine roses and the dining room was artistically decorated with blue and white satin ribbon streamers—the chosen colors of the bride. A huge bell adorned with ferns covered with moss roses hung over the bridal table. Immediately after the ceremony a four course dinner was served to about fifty guests. The Wilson orchestra of Marlette very ably furnished the music for the occasion.

Out of town guests were: Mrs. Sarah Weaver and Mrs. John Briggs of Melvin; Mrs. James Tobin and little daughter, Joan, of Valley Center; Mrs. Thos. Wilson, Mrs. Jay Wilson, Lee Wilson, Rex Wilson, Misses Gwendolyn and Angelina Wilson, and Roy McDonald of Marlette; Miss Lela Kerr of Port Huron; Mr. and Mrs. Lewis Hydorn, Mr. Bill Hydorn, Misses Ellen and Freda Hydorn, Master Lewis Hydorn and Artemis Wilson of Bay City; Kenneth Warner of Hillsdale; Mr. and Mrs. Ralph Bartlett, Erwin Bartlett and Miss Mable Pelham of Brooklyn; Miss Ethel Bartlett of Fairhope, Alabama; Mr. and Mrs. Charles Anderson of Glennie.

The bride was the recipient of many beautiful presents.

The happy couple left on the evening train for a short lake trip, after which Mr. and Mrs. Bartlett will be at home to their friends at Brooklyn, Mich.

The bride has a host of friends in the Tawas whose best wishes go with her to her new home.

**LONG LAKE CLUB FINISHES YEAR'S WORK**

The "Current Events" club of Long Lake held its last meeting of the year at the home of Mrs. O. S. Nicholls.

An exceedingly interesting as well as instructive program was enjoyed by all—especially the paper on "Snap" read by Mrs. Morgret.

After the business and literary meeting a delicious three course luncheon was served by the hostess.

The first Wednesday in October the club will meet again and resume work.

### RAILROADS PLAN TO FURNISH PURE BRED STOCK TO FARMERS

A year ago W. H. Hill, agricultural agent for the New York Central lines west of Buffalo, and formerly assistant secretary of the Northeastern Michigan development bureau, suggested a plan for the Michigan Central to cooperate with the farmers and dairy-men in a plan to eliminate the scrub bull from the herds of Northeastern Michigan farmers. The plan was for the railroad company to bring a carload or more of registered Holstein bulls into the district and to trade them for the scrub bulls, sending the latter to the stockyards for slaughter. The proposition was not carried out last year, but this year the Michigan Central and the Grand Rapids & Indiana roads will co-operate in putting it into effect throughout northern Michigan.

In August a "pure bred sire" special train will start out from Rochester, Mich., on the Michigan Central, run to Mackinac and down the west side of the state on the Grand Rapids & Indiana, carrying a certain number of pure bred Holstein bulls. At each stopping place the farmers of the vicinity will be given an opportunity to exchange these bulls, payment being made in scrub stock for which a liberal price per pound will be allowed by the railroads.

Under this plan a farmer or a group of farmers may select the best registered animal in the lot, or any other which suits them and pay for him by gathering up the scrubs in the community which are worthless or worse than worthless for breeding purposes.

E. J. Leenhouts, formerly with Mr. Hill in the agricultural department of the New York Central, and Mr. Bladock of the dairy extension division of the Michigan Agricultural college are working out the details with the assistance of the county agricultural agents and business men of the district and the officers of the Northeastern Michigan development bureau are taking a keen interest in the plan and express the hope that every county in the district visited by the train will take advantage of the opportunity offered.

#### Almost!

With the game on ice the first half of the ninth, Tawas City's defense cracked the last half and allowed East Tawas to score three runs, winning the game.

Boldt singled to start the half. Dillon then fouled out to Zink. Whitman hit to Lanski on the hit and run and Frank threw late to force Bolen, both men being safe. J. Johnson walked, filling the bases. Halligan hit to Nelem, who fumbled, Bolen scoring and the bases still filled. Klenow hit to Lanski who threw so close to J. Johnson that Nelem lost the ball. Whitman scoring the tying run. McMurray then dumped a low pop on the third base line that no one tried to get and Whitman scored the winning run.

It was a hectic finish to a hectic ball game.

In the first inning Musolf was safe on first when Johnson was caught between bases for the second out. He then stole. Buchholz struck out, but Klenow let the ball get away from him, while Musolf took third and Buchholz first. Buchholz stole. Then Art Zink slammed one against the left field fence, scoring the two runs, but only reaching second. Lanski fanned.

In the second C. Moeller reached first on Whitman's fumble and stole second. He took third when W. Moeller went out Ollie to McMurray. Siefel then singled him home. Art took second when E. Moeller went out short to first and reached third when O. Johnson's throw to catch him off second got away from Whitman, but he died on third when Jack Johnson grounded out Halligan to McMurray.

In the third Musolf reached second when Ollie threw wide to first and scored when Ollie let Nelem's drive get away from him. In the last half of the third Bolen singled to start and reached second on C. Moeller's low throw to first, from where he scored on Dillon's double that was misjudged by Jack Johnson. Dillon tried to stretch it to a triple, but was retired. Johnson to Musolf to Nelem. After Whitman popped out J. Johnson singled and stole second and third and came home when Jack Johnson dropped Halligan's fly.

In the fifth Nelem caught one of Johnson's curves just right and lifted it over the right field wall for the circuit. It was our boys' last run.

In the sixth J. Johnson got a free ticket to first and took second on Zink's wild throw to catch him off. He stole third and scored on Ollie's single. That was all until the hectic ninth the story of which is told above.

It was a hard game to lose, but our boys know now that it is possible for them to put up a good game and no doubt they will give a good account of themselves. If they get a good bunch of real rooters back of them they will be able to give a good account of themselves in the remaining games.

Alabaster comes up next Sunday to play at the fair grounds. Everybody come out and be a real rooster, the kind that pulls the game our way by will power and noise. Try it. 2:30 Sunday. The box score:

### THE NORTHEASTERN MICHIGAN FIELD MEET

The Northeastern Michigan field meet held at the Iosco county fair grounds last Friday was one of the most successful affairs of the kind ever pulled off here. At an early hour the crowd began to gather and before noon there was nearly as large a crowd on the grounds as is seen on fair days.

A good representation from schools outside the county was present and many of the events in the track meet were won by athletes from the Alpena and Standish schools.

The East Tawas band furnished music for the occasion and Prof. Masselink of Big Rapids delivered the address to the eighth grade students whose graduation exercises were held in connection with the meet.

The John Brown contests were the first to be pulled off and the following is the official report of the contests in these classes. Ribbons were awarded to first place only.

## LIBRARIES.

THE forerunner of the modern libraries were the collections of manuscripts and clay tablets which the ancients made. The literary library of Ashurbanipal at Nineveh dates back to 688-626 B. C. Other libraries and collections of Archives have been discovered at Nippur, Babylon, Larsa, Eveh, and other lost cities. Some of these seem to date back to almost 2000 B. C.

## Iodine Dangerous Drug.

Fumes of Iodine have recently been urged as a method of administering that drug preferable to the usual tincture. It has been shown by experiments that fumes are absorbed through the skin, and when inhaled are absorbed by the lungs, but it was shown also that inhalation is very dangerous even in small quantities, especially when there is any disease of the respiratory passages.

# Farm Bureau Wool Pool for 1921

- ¶ This is the year to pool your wool.
- ¶ A more satisfactory and economical plan is being used than in 1920.
- ¶ All wool will be weighed and graded directly from the grower's wagon.
- ¶ You will get your receipts and cash in advance of fifty per cent of the value of your wool immediately upon delivery. In many cases this cash advance is nearly equal to the entire price paid by the local dealers.
- ¶ Grading teams from the Farm Bureau will visit at least two points in the county to receive and grade the wool. Dates and places of assembling will be announced later.
- ¶ The Grange Elevator Association has charge of the assembling this year. Help yourself and your organization by pooling your wool.
- ¶ For full particulars apply to

**"RODEOS" FULL OF INTEREST**

Exceedingly Interesting Annual Exhibitions That Are Held North of the Arctic Circle.

In the vicinity of the Kobuk river, Alaska, 50 miles north of the Arctic circle, there are held annual "rodeos," which for picturesqueness, skill of exhibitions, and in popularity are comparable to the "roundups" of the western part of the United States—yet there is not a single horse or steer or saddle or "six-gun" within hundreds of miles of the scene.

These rodeos are conducted under the auspices of the United States bureau of education for natives of Alaska, for the advancement of the reindeer industry. There are 150,000 reindeer in the territory, according to Popular Mechanics Magazine.

At the fair all matters pertaining to reindeers are discussed, and the herders come to an understanding regarding grazing ground rights and similar matters. Government representatives give talks on reindeer breeding and offer scientific guidance for the development of an improved stock. Recently serious consideration has been given to a means of exporting the growing thousands of surplus deer to the United States.

Within the next year or two, it is anticipated, a market for distributing the meat will be established in the United States. It costs less than \$3 per head to raise deer, which will dress 150 pounds of choicest meat.

**Men Dodge Age Proposition.**  
Service of women citizens on the registration boards leads to interesting personal revelations about their neighbors.

A man who holds a position in the city government had always given his real age, now 48, before women sat on the boards. When his wife went in to register for the first time one of the women on the board said to her:

"Oh, Mrs. Blank, isn't your husband an old codger?"  
"Why, no," said Mrs. Blank, "I don't think 41 is so very old."

"But he registered as 47."  
Silence fell and Mrs. Blank entered the booth to fill out her enrollment ballot.

Next year, when the husband entered the registration place and was asked by a man on the board his age, he replied, "42."

The woman whose undue interest had evidently caused a family Bible meeting looked at him and her look said volumes. But he stared her down, and so the record stands.—New York Evening Post.

**HEROISM SHOWN BY AMERICAN WORKERS OF NEAR EAST RELIEF**

Cables Reveal Appalling Armenian Need—Hundreds of Thousands Starving.

By CHARLES V. VICKREY  
General Secretary, Near East Relief

Approximately 500 American men and women are standing loyally and heroically at their posts in Armenia, Turkey and the Near East. Many of them during the long winter of isolation are undergoing what we in America call "hardship." But these, our fellow citizens in the Near East, are volunteers serving with a high purpose, and they do not recognize hardship when they meet it.

They have had their opportunity to withdraw with honor from the field of famine and desolation. They have refused to leave, because they know that their departure would mean death for tens of thousands of women and children whom their efforts have kept alive and whom they are determined to save for a better future.

A dozen cables are on my desk from various centers in Armenia, Anatolia, Cilicia and Syria pleading piteously for the lives of hundreds of thousands who are homeless: "Sixty-five thousand refugees Constantinople alone;" "Refugees flocking into Aleppo;" "Twenty thousand refugees at Ismid;" "One hundred thousand people at Alexandropol will starve unless relief is provided;" "Refugees arriving from Caucasus, escaping persecution, naked, destitute! Urgent need to save most of them from death;" "Two hundred thousand starving between Kars and Alexandropol! Severe winter adding to distress."

Above all towers the mute appeal of the more than 100,000 little children, orphaned, homeless, whom these American relief workers have saved and whom we here at home must sustain not only through the winter and spring, but through the summer and autumn as well. If we do not provide, they perish! And with them dies the hope of a New Near East.

The Easter season is here—the season that commemorates the Great Sacrifice for mankind. America is known as a Christian nation. She is also the wealthiest nation that history has ever known.

Can we really enjoy our wealth and claim the name of Christian if we turn a deaf ear to the appeal which General Leonard Wood, in behalf of the Near East Relief, has sent forth broadcast for a Lenten Sacrifice Offering to save these little children in Bible Lands?

**VARIED SHOW AT 72ND STATE FAIR**

PROGRAM TO BE HAPPY MINGLING OF FARM AND CITY FEATURES

FUN AND ENTERTAINMENT ALONG WITH INSTRUCTION

Since Gov. Epaphroditus Ransom established in Michigan 72 years ago the first state fair held west of the Allegheny mountains, the citizens of this commonwealth have witnessed annually an exhibition designed to mirror the industries and activities of the two peninsulas.

In founding the Michigan State Fair, Gov. Ransom and the farmer-statesmen associated with him demonstrated a progressiveness and enterprise which has been characteristic of the state's whole scheme of public education.

It is well to recall at this time that the fair was founded by them with earnest educational ideals; that it was the first attempt at agricultural education in the west; and that from its beginnings sprang also the first agricultural college in the world—the Michigan Agricultural College at East Lansing.

Since those historic days Michigan has undergone great changes. It has evolved from a forest into thousands of fertile farms, and from the farms into a magnificently balanced empire of agriculture, manufacture and commerce.

In our fair this year we shall, therefore, attempt to show the whole varied collection of Michigan's activities—its farms, its factories, its fisheries, and its homes and inhabitants.

We shall show a bit of Detroit, the wonder city of the nation; we shall show the motor industry which in the last decade and a half has transformed the whole state; we shall show the first aid to motors—Good Roads. We shall show how health is maintained in cities, the art and beauty that may be put in homes, the finer arts of urban civilization. But in so doing we shall not forget that the fair must devote itself conscientiously to encourage the agricultural interests of the state and to stimulate them forward to new efficiency and prosperity.

And thus in our coming seventy-second fair, we shall hope to mingle in happy proportions a program which will show the best of farm life to the city man and the most modern of city conveniences to the man who feeds the world.

With it all will be fun and entertainment, clean in every particular and of the highest type known to fair managements anywhere.

To this pot-pourri of instruction and industry, health and happiness, fun and farming, the Michigan State Fair cordially invites the public of Michigan, hoping that the ten days and nights of activity will leave behind them memories of royal good times and a feeling that something of real usefulness has been accomplished.

GEORGE W. DICKINSON,  
Secretary-Manager.

G. W. Dickinson, Secretary-Manager Michigan State Fair

In connection with the taking over by the state of the Michigan State Fair, which will hold its seventy-second annual exhibition in Detroit next September 2 to 11, the services of G. W. Dickinson as secretary-manager of the fair have been retained by the board of managers. In the eight years Mr. Dickinson has acted in this capacity the Michigan State Fair has grown from a small, money-losing venture, to the greatest fair in America, with splendid grounds and buildings of its own at the northerly limits of Detroit, and a series of premiums and prize awards for exhibitors which are the most attractive anywhere. In addition, the fair's financial success has assured still further growth from its present dimensions.

### ALL WELCOME IN LUXEMBURG

Little Sta's Cosmopolitan in the Ex-  
treme, but Second to None in  
Patriotic Spirit.

We live at the crossroads of the  
nations, remarks the Luxemburg Zel-  
tung. We are of all the peoples of  
the world those most cosmopolitan in  
spirit. On July 14 there was a French  
evening on the parade grounds, and  
everyone was enthusiastic for France.  
On July 20 we had a Belgian evening  
in the same place and again everyone  
was inspired with enthusiasm. Should  
there be an American, Italian, Czecho-  
Slovak or Polish evening any pleasant  
summer night, the throng would greet  
it with the same enthusiasm. We like  
to have people of other nations as  
our guests. We wish them to feel at  
home in our midst.

A stranger who does not know us—  
and many who have lived among us  
fall to know us—might fancy that we  
lack national sentiment.

But precisely the reverse is true.  
Our national sentiment is so deep  
that we are like a tree whose trunk  
stands unshaken when its crown is  
tossed by the wind of sympathy for  
other countries.

Last Wednesday, after our French  
and Belgian evenings, we had a Luxem-  
burg evening. The parade ground was  
too small and the firmament was too  
low to contain the enthusiasm of the  
multitude. We were at home among  
ourselves. The leader had provided  
a program of old, modern, and very  
recent Luxemburg music. During the  
choruses the thousands surrounding  
the platform stood as reverently as  
if they were in church. When ap-  
plause was called for it was so thun-  
derous as to be almost intimidating.

The depth and sincerity of a na-  
tion's patriotism is not measured by  
the area of its territory.

### FEAR EPIDEMIC OF TYPHUS

British Authority Tells of Danger to  
the World Because of Bad Condi-  
tions in Russia.

Dr. L. Haden Guest of London, who  
has been investigating conditions in  
Russia, reports to the Lancet (London)  
that the whole of that country  
has been swept by typhus and relapsing  
fever, and that all indications point  
unmistakably to a formidable epidem-  
ic in the coming winter. Cholera also  
has made its appearance and small-  
pox is widely prevalent.

The Lancet warns the world at  
large that unless immediate and ef-  
fective steps be taken these frightful  
diseases will spread through the bor-  
der states to other countries, and be-  
fore long will appear all over the  
world. "The council of the League of  
Nations has thoroughly studied the  
situation, with the aid of some of the  
best-known epidemiologists in the  
world; they have a reasonable and  
economical program, and have appoint-  
ed commissioners, but the actual  
work cannot proceed until they have  
obtained money guarantees from the  
different nations, which so far have  
not materialized, except in the case  
of a few countries, including Great  
Britain and Canada. The future of  
the matter may well prove, in the  
parlance of the day, an 'acid test' of  
the reality of the league as a family  
of nations, ready to act for the common  
good and to protect members of the  
family who are threatened by disaster."

### Modern Lover Practical.

"Harry," exclaimed the blushing  
maiden, "this declaration of love is so  
sudden that I hardly know what to  
say. I was unprepared for it. It un-  
nerves me."

"I was afraid it might," said the  
young chemist, rising with alacrity  
from his knees, "and I brought with  
me a bottle of my unrivaled nerve ton-  
ic. This preparation, my darling," he  
added, soothingly, as he took the bot-  
tle from his pocket, quickly extracted  
the cork and poured a quantity of the  
medicine into a spoon he had also  
brought with him, "will allay any un-  
due excitement, quiet the nerves, aid  
digestion and restore lost appetite. I  
sell it at 50 cents a bottle. This is a  
dose for an adult. Take it, dearest."

### "Floating Fair" From Holland.

A company has been organized at  
The Hague for the purpose of sending  
a "floating fair" as it is called, but  
practically a ship loaded with sam-  
ple products and commercial agents to  
sell them, to various parts of the  
world, particularly the United States.  
The concern is organized somewhat  
on a co-operative basis and proposes  
to send the Messageries Maritimes ves-  
sel, the Macedonia, of 6,100 tons bur-  
den, to the United States and Central  
and South America for the purpose of  
introducing Netherlands products and  
enabling Netherlands commercial  
houses to establish import and export  
connections in the countries visited.—  
Scientific American.

### Ice to Hold Stored Water.

Because the water supply of the  
small city of Ashland, Ore., is be-  
coming inadequate in the summer, and  
increasing the storage facilities would  
cost \$100,000, the local engineers are  
trying an experiment as ingenious as  
it is simple. High up the side of  
Mount Ashland, at the headwaters of  
the supply, a system of piping and  
sprays is being installed, through  
which the surplus water of the win-  
ter will be directed and allowed to  
freeze. The damming action of the  
ice walls thus formed, and the gradu-  
al thawing of the ice itself, are ex-  
pected to provide enough water for  
all the needs of summer.—Popular Me-  
chanics Magazine.

### AIDED ITS BLIND COMPANION

Australian Stockman Tells of Bullock  
That Took Care of Another Which  
Was Sightless.

Peter S. Mitchell, a stock raiser from  
Melbourne, Australia, says that the cat-  
tle business is at present the best in  
the history of Australia. He says that  
his people are hard at work restoring  
the country to normal and that they  
are very anxious to get the world trade  
back to pre-war conditions.

"My father was first to bring the  
Black Poll cattle into Australia 40  
years ago," said Mr. Mitchell at New  
York, "and they have developed to be  
the best for our section. They are  
hardly flourish on ferns, tree leaves  
and bark, where other cattle would  
starve, and they grow to great size,  
with weight evenly distributed, and  
the fat running in hair lines through  
the rump steaks even. There is a  
quick market for anything on the hoof  
that is fairly fat, and prices are very  
good.

"We discovered a blind bullock in  
one of the herds that came in, and an-  
other bullock had adopted it and  
fathered it all the time. It was found  
to be blind only when we noticed that  
its companion signaled to it constantly  
and led it to water, through gates and  
narrow runs. If at any time it got lost  
its friend would never rest until he had  
located it.

"None of the other bullocks paid any  
attention to the blind one and the pro-  
tection the foster parent gave to the  
unfortunate bullock was a never end-  
ing source of comment and specu-  
lation. When both, fattened after  
18 months on our place, were driven to  
the shipping station 60 miles distant  
the blind one was led through the dif-  
ficult places by his friend and generally  
cared for day and night."

### WANT LANGUAGE UP TO DATE

Common Sense Behind "Literary Revo-  
lution" That Is Now Prevail-  
ing in China.

What is termed the literary revolu-  
tion in China aims at a reform of the  
language used in books, magazines,  
newspapers and public discussion. The  
outsider will jump to the conclusion  
that this means an attempt to encour-  
age a phonetic substitute for Ideo-  
graphic characters. Not at all. There  
is a movement to supplement Ideo-  
graphs with phonetic signs to show  
their pronunciation, the aim being  
quite as much to standardize pronun-  
ciation as make it easier to learn to  
read. But this movement arouses no  
such interest and excitement as the lit-  
erary revolution.

The latter is an attempt to make the  
spoken language the standard lan-  
guage for print. Literary Chinese is as  
far away from the vernacular as Latin  
is from English, perhaps further. It is  
a speech of 2,000 years ago, adorned  
and frozen. To learn it is to learn  
another language. The reformers were  
actuated by the practical impossibility  
of making education really universal  
when in addition to the difficulties of  
mastering the Ideographs, children in  
the elementary schools are compelled  
to get their education in terms of a  
foreign language.

They are actuated even more by the  
belief that it was not possible to de-  
velop a literature which shall express  
the life of today unless the spoken lan-  
guage, the language of the people, is  
used. Apart from the employing and  
enriching of the vulgar tongue, it is  
not possible to develop general discus-  
sion of the issues of today, social,  
moral, economic.—New Republic.

### To Develop Wild Pears.

The world's largest stock of pear  
seedlings of a wild, blight-resisting var-  
iety found in Manchuria, is located on  
the Loma Rica ranch near Grass Val-  
ley, Cal. The young trees are from  
seeds brought directly from China and  
number about 100,000.

Three pomological experts from the  
United States Department of Agricul-  
ture, Professors Allison, Wright and  
Kingsman, recently inspected the stock  
and approved the experimental work.

The original trees, known as the  
Pyrus usuriensis, are found growing  
in the ancient burying ground of the  
kings of the Manchurian dynasty, and  
it is only since the overthrow of the  
dynasty that the seeds became avail-  
able. The tract is said to be vast  
and to be grown to trees of immense  
size.

By grafting the commercial var-  
ieties of pears upon this stock good re-  
sults are expected to be obtained.

### Pyrenees Put to Work.

Efforts to harness the water power  
going to waste in the Pyrenees and  
transform it into electricity are being  
intensified.

Engineers have surveyed entire  
mountain ranges and have succeeded  
already in controlling many tor-  
rents and making them furnish power.  
Altogether 200,000 horsepower now is  
furnished and capital amounting to  
300,000,000 pesetas have been invested.

Every day sees additions to the  
amount of power available, and en-  
gineers employed in the work estimate  
that in a few years Catalonia will be  
able to do without coal.

### A Change of Calling.

"You are going to have some sad  
disillusionments," said the mysterious  
Egyptian.

"I've already had one," said the cit-  
zen.

"How is that?"

"When this carnival company came  
through here last year you were sell-  
ing 'hot dogs' and pink lemonade."—  
Birmingham Age-Herald.
