U. S. FOREST SERVICE NOTES

C. A. Chartrand of Racine, Mich., has been employed in the supervisor's office in East Tawas to fill the vacancy caused by the resignation of Miss Charlotte Heinemann. Mr. Chartrand received his training at the Ferris Institute and for the past three years has been employed by the Richardson-Avery Co. at Racine, Mich. Miss Heinemann left Tuesday evening for Flint, where she will spend a few days visiting relatives, after which she will return to her home at St. Clair, Mich.

Forest Ranger Dayharsh, in charge of the Mio district, returned Sunday after a week's visit at the Michigan Agricultural college and his home in Hart, Mich. While at M. A. C. Ranger Dayharsh made provisions for taking some advanced work in forestry to enable him to obtain a degree from the college.

Ranger Groesbeck spent Saturday and Sunday in Bay City.

Supervisor R. G. Schreck left Tuesday evening for Lansing to interview President Friday and Professor Chittenden of the Forestry school, relative to the exchange of lands between the government and the Michigan Agricultural college.

The construction work on the new ranger station to be built at Mio has been postponed until the next fall season because of the very disagreeable weather that is being experienced at this time.

Ranger Groesbeck is changing the road leading through the Silver Creek ranger station grounds so that it will be approximately 100 feet north of the building. This is being done to eliminate the very heavy travel passing so close to the ranger station dwelling. Mr. Groesbeck is graveling those portions containing deep sand and hopes to have this new road ready for use by the end of the month.

Due to the termination of the fire season, Forest Guards Guy and Roy Wood, Victor Johnson and Joseph Routhier have been relieved from duty for this year.

Ranger Fred Woleben of the Marquette district talked to the students of the public schools of Sault Ste. Marie last week. Mr. Woleben dwelt on the work of a forest ranger, and forestry and its relation to biology.

Ranger R. H. Johnson has completed his fall planting operations and approximately 600 acres have been planted to Norway and white pine. The area planted was in the vicinity of Gordon Creek. It is interesting to note that the land planted was formerly farmed and then abandoned after it was proven that the land was not fit for agricultural purposes. Mr. Johnson has also completed the sowing of 31 beds of Norway and white pine in the Bear nursery. Hedges, trees and fences are being removed so that the capacity of the nursery may be increased. The new overhead watering system has now been installed for the entire main nursery.

Rangers Dayharsh and Woleben are rushing their field work to completion on their various districts so as to leave for the Superior National Forest in Minnesota during the latter part of this month, where these forest officers will assist on the large timber reconnaissance project which is under way on that forest.

At a recent meeting of road boosters at Rose City, at which were present State Highway Commissioner Rogers, Engineer DeGlopper and Forest Supervisor Shreck, the much talked of Mio-Rose City road was assured and

the field survey will be made this fall. The Forest Service will assist in financing that part of the road passing through the Mio district of the national forest. This road will do much toward giving the people of Mio and vicinity an outlet to Rose City and the Tawas, and at the same time will make accessible a most important playground in the Michigan National Forest. Up to this time, due to almost impassable roads, the Mio district which contains some very beautiful small lakes where good fishing is to be had, has been inaccessible.

NEWSPAPERS CAN'T TELL EVERYTHING

An exchange has the following to say which contains more truth than poetry: "The average newspaper man finds out a lot of naughty doings no matter how secretly they are planned and kept. If the papers would publish half of the stuff they hear there would be ten divorces where there is one now. There would be shotgun matinees, lynching parties, hatchet bees, gore, imprisonment, dissolution and misery. Many people find fault continually with the newspapers when, as a matter of fact they owe their standing in the community to editorial waste basket."

More Cooking—Less Fuel

THE Hot-All-Over Top—a special feature of the Tappan-Joy Range—makes possible more cooking with less fuel.

The heat is forced to circulate evenly under all six lids—is all cooking heat—none is wasted.

The sliding Damper gives absolute control of the oven temperature. It enables you to regulate the flow of heat around the big, roomy oven, conserving fuel and insuring perfect baking results.

Another economical feature of the Tappan-Joy Range is its smooth finish—either porcelain enamel or plain. Easy to keep clean, it saves the cook's time.

We will be glad to demonstrate to you exactly how the Tappan-Joy features will shorten your hours in the kitchen.

ESKIMO CARVING

All of the Eskimo carving today is done with steel tools, but there is work in existence that dates back to the stone age. The older Eskimos say that their ancestors used tools of flint and it is known they have been carving ivory for many generations. Some of the very poorest of them and those that live in the most out of the way places are noted for their work of this kind. They seem to do it for

pastime and make many toys and dolls for their children. They have a way of softening the bone, horn or ivory before they work it and to make the carving more distinct etch line on the surface with a black paint made of a mixture of gunpowder and blood. This, when put on the freshly cut bone, makes a permanent stain.

Announcing The Good MAXWELL Club Coupe

Representing an advance in vehicles of its class which everyone can instantly recognize, the Club Coupe presents a contrast so striking that it is bound to take precedence in a market waiting for quality leadership.

A car whose greater value the public can grasp at a glance. There can be no question that in sheer beauty it is entitled to and will receive precedence from the buyer—in blunt words, that it is the handsomest two-passenger coupe on the market.

Note in particular the unusual quarter side windows, which can be lowered and raised; the larger window at the rear, with curtain; the advanced type of windshield; the visor, windshield wiper and rear vision mirror; the exceptional hardware; the leather upholstery; the devices for raising and lowering all windows; the comfort of the driving position; the ample leg-room and roominess of the seating arrangement; the convenient package compartment back of the seat, and the unusually large rear-deck compartment. Heater, disc steel wheels and cord tires are standard equipment. In view of these superiorities, mark the price. Prices F. O. B. Detroit. Revenue Tax to be added: Touring, \$885; Roadster, \$885; Club Coupe, \$985; Sedan, \$1335; Four-Passenger Coupe, \$1235.
