Have You Taken Advantage of Our Special Stock Reduction Sale?

Many have! It's a money saver! Here is a good example of the possibilities of the sale.

A farmer bought one Myers' Sling Car, 66 ft. of Track and 34 Hanging Hooks, worth \$85.65, for \$29.00. He saved \$6.65. This pays the interest on \$29.00 for nine months, \$1.52 (that is to the last day

of June, 1924, about the time you usually buy your haying outfit) and a bonus of \$5.13. Buying now gives you a chance to put up your track when your barn is full of hay. That's the easiest time.

The time to buy is when some one wants to sell. We want to sell.

New Sedan

Changes featured in the new Ford Sedan make it a better looking, roomier car.

A higher radiator with a trim apron at its base lends dignity befitting a closed car. The higher hood and enlarged cowl curving gracefully to the dash give a stylish sweep to its body lines, and afford additional leg room for occupants of the front seat.

All body fittings—window regulators, door grips, door latch levers, door lock, dome light—are finished in nickel. The upholstery carries a fine dark line on a soft brown background that does not easily show dust or dirt. Silk window curtains to harmonize for the three rear windows enhance the style of the car and add to the comfort of its passengers. See the new Sedan and other new Ford body styles at our showroom.

Marble.

Marble is a product of marine sediments and volcanic fires. It is laid down on the sea bottom as shell heaps, which gradually turn into chalk. If the strata should be deeply buried in the rocks, the intense heat of the earth causes chemical elements to rearrange themselves so that they crystallize into marble. Various impurities in the chalk give the marble its various hues.

DEPENDENTS OF TUBERCULAR FATHERS GIVEN RELIEF

Dependant wives, and children of incapacitated fathers all over Michigan are beginning to benefit from the act extending the Mother's Pension o families in which the father is suffering from tuberculosis in such a stage that he cannot pursue a gainful occupation says the Michigan Tuberculosis Association, one of the sponsors of the bill.

The act, House Bill 334, was passed at the last state law provided aid for children of mothers who were widowed, divorced, unmarried, deserted, or confined to a penal institution. In cases where the father was incapacitated by tuberculosis the mother was compelled to earn the bread for the family, instead of devoting herself to the care of her husband and children and preventing the spread of the infection. Under the old scheme the father had no chance to get well and conditions favored the infection of the children.

Since August 29 applications from mothers in need of aid under the new law have been coming to the Michigan Tuberculosis Association, and its county branches, which is maintained by the Christmas Seal sale. One case, in which there were three small children, was especially deserving. The family was self-supporting up until the time when the father was stricken with tuberculosis. After two years he was sent to a sanatorium where he stayed five months. When he was sent to a sanatorium where he was forced to remain idle, and was in need of constant care. The mother is now applying for state aid to help her support the family—and the state aid will allow her to nurse her husband and to prevent the spread of tuberculosis to her three small children.

Adversity and Friendship.

Gas to Destroy Pests.

Highly poisonous hydrocyanic acid gas, which has proved efficient in destroying pests in buildings, has also been found practical for the destruction of woodchucks and other damaging rodents in their burrows.
