"To tell how many pieces of macaroni on your plate" says Clark McCormick, "count the ends and divide by two."

One of our farmer friends asked us why we did not have Will Heeney conduct a funeral for the bean market. surely is dead all right and there don't seem to be much to encourage any emprovement. The buyers of beans do not fancy when the contain over 17 per cent moisture. If you

will bring in a sam-

ple of your beans,

we will be pleased to test them for you and remember, we are paying top prices and want to buy your beans when your'e ready to sell.

We are still selling our Wonder Dairy feed at \$2.50 per 100 lbs. One of

the best dairy feeds. The minister called at the Jones home one Sunday afternoon, and little Willie answered the

"Pa ain't home," he announced. "He went over to the golf club."

The minister's brow darkened, and Willie hastened to explain.

"Oh, he ain't gonna play any golf. Not on Sunday. He

just went over for a few highballs and a little stud poker."

"An undertaker was run over by an auto and died." "He didn't make

much on that funeral did he? "No. In fact he went in the hole."

The ladies of this community don't call it luck any more when they get a

good baking of bread. They call it Sweet Cream Flour.

Note this actual test. It proves something of interest to every home builder or buyer.

A box is divided in half by a layer of Celotex Insulating Lumber.

The right half of the box is heated by an electric lamp, to 179°.

At the end of an hour, the left half is only 77°-

HOW CELOTEX STOPS HEAT

Interesting test shows results of building with insulating lumber

TN the roof and walls of a house, Celotex does the same thing 1 as in the test above. It keeps out the hot rays of the beating sun in summer. And keeps in precious furnace heat in winter.

Results: a cozy warmth in the bitterest winter weather, a refreshing coolness throughout a hot summer . . . one-third less fuel cost . . . greater security . . . longer life . . . less

This remarkable insulating lumber is one of the greatest contributions ever made to home comfort and economy.

Celotex is made from the tough fibres of cane. It comes in stock sizes: 4' wide, 8' to 12' long, 7/16" thick. It weighs about 60 lbs. per 100 sq. ft.

Look ahead! By all means let us give you all the facts before you build or buy. Celotex advantages cost little or nothing more than ordinary, heat-leaking construction.
