WINS WILD GAME FROM SCHUST TEAM

Tawas City defeated the Schust Baking Company team, which is reputed to have held second place in a Saginaw league, last Sunday at the local field by a score of 14 to 8.

The game was a wild affair throughout. In one inning, the fourth, Tawas City scored five runs without a hit. The Schusts started the scoring in the first with one run. Tawas City scored three in the second, but the bakers came back in the fourth and tied the score. Tawas City finished up the fourth with five runs, and duplicated in the fifth, while Schust failed to score. In the sixth neither team scored. The seventh netted the Schusts four runs to Tawas City's one. The bakers again scored a run in the ninth.

While these wild maneuvers were going on, managers were busy changing pitchers. McCordle started out for Tawas, but was relieved in the fifth by Johnson, who, in turn, was replaced by Boulder in the seventh. The Schusts also used three pitchers, Brown, Perry and Pierson. Brown, after hitting five men in four innings, was replaced by Perry. Perry lasted but one inning and Pierson finished the game in fine shape.

Schusts slightly outthrew the locals, getting 14 hits to Tawas City's 12. Tawas City, however, outfielded the visitors, who had five errors.

RED CROSS TAKES CHARGE OF RELIEF IN HURRICANE ZONE

The American Red Cross has taken charge of relief activities in the zone swept by the terrific hurricane during the past few days. F. F. Taylor, secretary of Iosco county chapter, received the following communication from the mid-western branch headquarters:

You have read in the press of the terrific hurricane that is now sweeping the West Indies. In Porto Rico and other islands thousands of homes have been destroyed and crops devastated. There is an immediate need for food, shelter, medical supplies and emergency relief. At the request of President Coolidge the Red Cross has taken charge of relief activities.

There is an imperative need for a large fund. Your chapter should take immediate steps to notify the public that you will receive and forward contributions to National Headquarters, giving the widest possible publicity to this appeal. The American National Red Cross has made an initial donation from national funds of \$50,000.

Henry M. Baker, National Director of Disaster Relief, is now on his way to Porto Rico accompanied by a trained disaster staff and will be in charge of relief activities.

I shall appreciate it greatly if in acknowledging this letter you will indicate the steps which have been taken to place this matter before the citizens of your community.

Wm. M. Baxter, Jr., Manager.

A telegram was received Wednesday stating that Iosco county's quota in the relief fund would be \$50.00, but Mr. Taylor had immediately, upon receipt of the above letter, sent \$50.00 to headquarters for this work. Under the guidance of the officers, and especially through the efforts of Mr. Taylor and the loyalty of the people of the county, the Iosco Chapter has continued to be a live and going organization since its inception, ready to meet any emergency. While many counties, where active work had been dropped for some time, are reorganizing and getting the machinery ready for a drive to meet their quota, Iosco county was prepared to meet the emergency at once.

Remember this when you are asked to renew your membership at the Annual Roll Call from Armistice to Thanksgiving.

Week after week and month after month the Bigger and Better Chevrolet has swept on to greater and greater heights of popularity—until today it stands acknowledged everywhere as first choice of the nation for 1928!

Never has any Chevrolet enjoyed such overwhelming public acceptance—for never has any low-priced car provided such an outstanding combination of distinctive beauty, thrilling performance and amazing economy!

Its beautiful bodies by Fisher—long, low and racy, and finished in colors that reveal to-day's mode for smartness and individuality—are far in advance of accepted standards in the field of low-priced cars. Inside

and out they prove anew that Fisher craftsmanship is a thing apart.

But Chevrolet performance is no less impressive than Chevrolet beauty and style. Never before was a low-priced car so easy to handle—for the steering mechanism is fitted with ball bearings throughout... the clutch and gear-shift lever respond to the slightest touch... and big non-locking 4-wheel brakes give a measure of braking control that is more than equal to every occasion.

Come in and see the car that has won the approval of more than three-quarters of a million buyers since January 1st. Learn for yourself why it is scoring the greatest success of this great automotive year!

Named for Discoverer

The island of Juan Fernandez bears the name of its discoverer. The Spanish navigator came upon the deserted island in the year 1563. He took possession of it and made a settlement there of 60 Indians and tried to establish a fishing station. He soon failed and returned to the mainland, leaving on the island a few goats, whose descendants have been its principal inhabitants ever since.

The new Buick is the new Style

More than handsome... more than luxurious... a wonderful new type of motor car beauty... a thrilling turning point in body design

It will be imitated, of course! The new, the fine and the beautiful always inspire emulation. But so great is the cost of building the magnificent new Fisher bodies for the Silver Anniversary Buick that imitation will be possible only to much costlier cars, and even these will find difficulty in following where Buick leads!

\$1,500,000 has been expended in manufacturing the dies alone for the new Buick bodies; and the gracefully curving side panels which form one of their distinguishing characteristics represent the most expensive steel paneling work employed on any automobile in the world!

But it is not in the matchless grace and beauty of exterior design alone that the Silver Anniversary Buick eclipses other cars. In fleet, powerful performance too, the world holds no equal for the Silver Anniversary Buick with Masterpiece Bodies by Fisher. And the motor-public, buying in such tremendous volume as to force the great Buick factories to work day and night to supply the demand, is elevating it to the prominence of a vogue!

A message to the editor of this paper from GENERAL MOTORS

JUST about a year ago we published, in your advertising columns, a message in which we sought to give you and your readers an idea of what General Motors is and what it is trying to accomplish. At that time the public was purchasing our cars at the rate of about one in every three; and our Frigidaire automatic refrigerator and Delco-Light electric plants were leading in popular preference in their respective fields.

Since then each of our car divisions has introduced new, further improved models and public patronage has reached the point where almost one out of two automobiles purchased is a General Motors car. Frigidaire and Delco-Light products have showed comparable increases in sales.

The reason for this is two-fold. First, the public wants value for its automobile dollar and recognizes value when it is given. Second, General Motors is seeking so to conduct its operations as to deserve the goodwill of the public.

We are particularly impressed with the number of letters which have come to us from editors of small city newspapers during recent months. These editors, who are in a position to reflect local sentiment, speak of the goodwill which attaches to General Motors in their communities

and express an obviously sincere appreciation of the character of General Motors' advertising in their publications.

For our advertising has been as much concerned with giving your readers facts of helpfulness to them in the purchase of automobiles as with the merits of our own products. Our messages have set forth the principles of trade-in transactions and used car allowances. They have dealt with time payments and the change in the public's attitude toward the used car. Other messages have told of the policies of General Motors and of how our resources are being employed to effect them.

That General Motors enjoys the goodwill of the people in the small cities and on the farms of America gives us an especial satisfaction and confidence in the future. It is in the country sections of the United States that half our population lives. It is there that the whole industry must look in increasing measure for maintenance of the production volume upon which high values and low prices depend. And it is there that General Motors is paying particular attention to its facilities for sales and service.

To our friends in your community we express our thanks.
