Salvador's \$12,000,000 Road to the Sea

Fred Lavis, president of the new railroad, laying the last rail in the road from the republic of Salvador, to the International Railways of Central America, bringing the country into direct communication with the Atlantic ocean.

Cremating 500 "Dead" Taxis in Philadelphia

Scene in Philadelphia when a cab company burned up 500 out-of-date taxis to make room for as many new ones to be put into the city service.

Flames in Capitol Building Damage Art Works

Valuable art works, including the model of the Capitol, were badly damaged by the mysterious fire that broke out in the west wing of the building. The photograph shows workmen clearing up the debris.

Queen's Photograph of Her Family

This exclusive intimate family photograph of the king of the Belgians, with the crown prince, the latter's wife and the little Princess Josephine Charlotte, was taken in the gardens of the royal Laeken-Lez-Brussels palace by the queen of the Belgians herself.

GOALIE IS CLEVER

Nathan Hawks, goalie of the Dartmouth hockey team, whose wonderful defense work is aiding his team in their winter ice campaigns.

INDIAN NATIONALIST

President Jawaharlal Nehru, young leader of the Indian Nationalist congress, who in a fiery speech before 50,000 delegates demanded complete freedom from England.

Al, Cal and Julius Distribute a Fund

Left to right: Alfred E. Smith, Calvin Coolidge and Julius Rosenwald, as they met as a committee to decide on the distribution of a \$6,000,000 charity fund left by the late Conrad Hubert, founder of the Bond Electric Corporation of New Jersey and originator of the flashlight.

LAWMAKER INDICTED

Representative Stanley H. Kunz of Chicago, who has been indicted by a grand jury, together with his son, on charges of conspiracy to commit bribery, and obtaining money under false pretenses, in connection with an appointment to the Chicago police force.

Monument to a Confederate Hero

A drawing of the projected monument to Richard "Dick" Kirkland, Confederate soldier who, in the face of Union fire, leaped over Confederate breastworks to aid wounded Union soldiers, following a desperate charge on the battlefield of Fredericksburg, Va., during the Civil war.

ENJOYING BREAKFAST

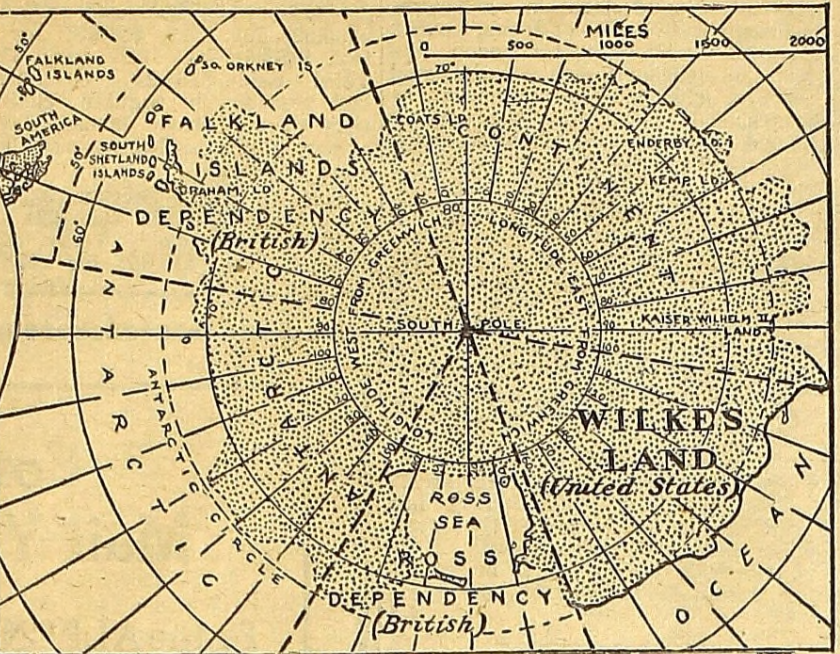

One of the huge black bears that are common in Rainier National park burrowing for his breakfast. These bears are quite tame and frequent the camps and hotels for whatever food is available.

Umberto and Marie on a Medal

This medal, commemorating the marriage of Crown Prince Umberto of Italy and Princess Marie Jose of Belgium, was designed by the famous Belgian sculptor, G. Devreese, and bears the portraits of the couple.

Who Owns Antarctica?

By ELMO SCOTT WATSON

ships, the sloops Vincennes and Peacock, the storehip Relief, the brig Porpoise and the tenders Sea Gull and Flying Fish, he set sail from Hampton Roads, Va., for the polar regions on August 18, 1838.

Wilkes' discoveries. It is true that Wilkes did make some mistakes in his locations, because he could not land his instruments and check his locations magnetically so that they would be free from error due to the attraction of his instruments by the metal on board his ship. But, for all such errors, he cannot in justice be denied his right to having discovered and described the Antarctic continent, thereby giving his country a claim to it by right of "discovery."

AND when Commander Richard E. Byrd of the United States navy in his giant three-motored airplane, the NX4542, flew over the South pole on November 29, 1929, his feat did more than merely add to a brilliant record the achievement of being the first man to reach the South pole by air, and the first to fly over both the North and South poles.

During his history-making flight he discovered 40,000 square miles of ice-blanketed lands never before seen by man and claimed them in the name of the United States. And thereby hangs the tale of a dispute between nations as to who owns Antarctica, a dispute which would seem to the casual observer to be a silly one. For, as he would naturally think, what difference does it make who "owns" that 40,000 square miles of ice and snow, so far as practical value to the possessor is concerned? But what if it should be discovered that that vast territory contains vast stores of oil, gold and other mineral wealth? that would be something else again!

While the dispute so far has not reached anything approaching a critical stage, it is, nevertheless, one which offers some interesting possibilities. For Uncle Sam and John Bull are the two would-be "owners" of Antarctica. When it became known that Commander Byrd was planning an Antarctic expedition, the British government filed with the State department of this country a communication offering to lend any assistance possible while Byrd was "in British territory" and defining that territory by quoting a resolution of the imperial conference in 1926, promulgated at the request of Australia.

This note was received by the State department on November 17, 1928, but the department did not give its official answer until November, 1929, just a short time before Byrd made his epic flight. That reply, it is said unofficially, was a courteous "thank you" for England's expression of interest in Byrd's activities "in the Ross dependency and the Falkland island dependency," but was strictly noncommittal in either conceding or denying British claims to sovereignty over the areas enumerated in the British note.

British claims to sovereignty in Antarctica go back for their beginnings to an event which took place just 157 years ago. That was on January 17, 1773, when Capt. James Cook, later famous for his discovery of the Hawaiian Islands, in his ship, Resolution, accompanied by the Adventure, crossed the Antarctic circle for the first time in history. A year later he reached what was then "farthest south" (even though it was 1,318 miles from the South pole!) and discovered a land which he named the Isle of Georgia, in honor of George III, and Sandwich Land, in honor of the fourth Earl of Sandwich, first lord of the admiralty during the American Revolution.

In 1823 James Weddell of the British Royal navy discovered the sea which now bears his name and set a new "farthest south" record of 1,102 miles from the pole. Soon after that the famous whaling firm of Enderby in London became interested in Antarctic exploration and sent out several expeditions. In one of them in 1830 James Briscoe of the British navy discovered and named Kemp Land, and in 1839 John Balleny discovered and named the Balleny Islands.

By this time the United States had become interested in South polar exploration also, and in 1836 congress authorized an expedition which was to make discoveries, upon which our principal claims to ownership of land in Antarctica were to be based. Command of the expedition was given to Lieut. Charles Wilkes of the United States navy and in command of six

His long wanderings in the Antarctic regions are recorded in detail in the five-volume narrative of the expedition written by Wilkes himself, so only a brief summary of what he accomplished can be given here. Embarking from Sydney, Australia, on December 26, 1839, Wilkes made Macquarie and the first rendezvous. He had already lost the Sea Gull and all its crew in the South Pacific below South America, and within a week after leaving Sydney the Flying Fish and the Peacock dropped out of sight in the fog. Then the Porpoise disappeared but Wilkes pushed on southward in the Vincennes.

By January 16, 1840, he had reached 66 degrees south latitude and had found the Peacock and the Porpoise. They were now confronted by an ice barrier, but the crews of the remaining ships reported that appearances beyond the barrier seemed to indicate land, and in his report Wilkes sets January 16, 1840, as the date of the discovery of a new continent. For the next two weeks the ships cruised about independently and repeatedly saw "appearances of land." On January 30 the Vincennes entered an indentation of the ice-bound coast which was named Piner's Bay. "We approached within half a mile of the dark volcanic rocks which appeared on both sides of us, and saw the land gradually rising beyond the ice to the height of 3,000 feet," says Wilkes. "It could be seen distinctly extending to the east and west of our position fully sixty miles. I gave the land the name of the Antarctic Continent."

After skirting the Antarctic coast for some 1,700 miles and reaching a point 66 degrees, 1 minute, south, Wilkes turned north and set sail for Australia. He had discovered the segment of Antarctica, which now bears his name, Wilkes Land, and later explorations have proved what he believed he had discovered—a vast Antarctic continent.

In the meantime a British expedition was in the Antarctic, led by Capt. James Clark Ross of the British Royal navy. He had planned to visit the very region where Wilkes was exploring, and when he learned that the American was ahead of him, he was very much chagrined. So he changed his plans and this resulted in his discovery of Victoria land and Ross sea. While he was stopping at Hobart Town in November, 1840, he received a letter from Wilkes describing his recent voyage and enclosing a chart. There were sent with the friendliest intention of aiding a fellow explorer, but it had the unexpected result of starting a long controversy with Ross and discrediting Wilkes' discoveries in the eyes of the British.

On the chart which Wilkes sent he had set down the supposed position of land found in 1839 by Balleny, and identified it with land seen by men on one of the American vessels. He neglected to indicate that this land was not one of his own discoveries. When Ross later sailed directly over this spot, he decided that if Wilkes was wrong in this regard he was wrong in others, and Ross in his report devoted fifteen pages to discrediting

Great Britain's further claims to Antarctica are based upon explorations made under their auspices by Nares in 1874, Borchgrevink in 1900, Bruce in 1904, Scott in 1902 and 1912 (the latter date being the one in which he reached the South pole) and Shackleton in 1909 and 1915. One curious fact is that Wilkes' discovery of Wilkes land and the rightfulness of attaching his name to that territory was confirmed by a Briton in 1912. In 1911-1914 Sir Douglas Mawson landed two parties at the opposite ends of the Antarctic continent. Writing of this expedition in 1912, Dr. W. S. Bruce, the Scotch explorer and geographer, said that it had "proved, over a distance of more or less 1,200 miles, the existence of Wilkes land, which has been disputed during the past seventy-two years."

But Great Britain and the United States are not the only nations which have claims, based upon discovery and exploration, in Antarctica. There is Russia which took a hand in the game as far back as 1819, when Czar Alexander I fitted out an expedition under Fabian von Bellinghousen, who discovered Traverse Islands in December, 1819, and two years later found two other islands which he named after Peter I and Alexander I. There is France which sent out the Dumont d'Urville expedition, which in 1840 when Wilkes and Ross were sailing the south polar seas, discovered land which was called Adelle Land, and a high ice barrier which was called Clarie Coast. There is Norway, which sent out a series of expeditions from 1892 to 1895, including the expedition of Captain Christensen, who on January 23, 1895, landed on the Antarctic continent near Cape Adare, the first human beings to set foot on that land. And, of course, it was a Norwegian, Capt. Roald Amundsen who first reached the South pole on December 14, 1911. And even Argentina comes into the picture by declaring that she has the best right to Antarctica, not by "exploration" or "discovery," but geographically—because, she asserts the Antarctic continent is simply an extension of the Falkland Archipelago, which by right belong to her, even though she has been deprived of them by British occupation, and by right of peaceful and continuous occupation of lands nearest to the polar territories.

Colonel Lindbergh's New Plane

This is the new low wing monoplane built in Los Angeles for Col. Charles A. Lindbergh. It behaved well in all test flights and is capable of a speed of about 200 miles an hour.

GAINS IN AVIATION CITED BY COMMITTEE

United States Leads World in Many Ways.

Washington.—The fifteenth annual report of the national advisory committee for aeronautics for the year 1929, which President Hoover submitted to congress, contains many items of general interest, and among them one which appears to present an opinion of these experts very much at variance with that of the postmaster general in regard to what the government's policy should be toward the air mail.

President Hoover, in presenting the report, stressed especially references to the position of the United States in aeronautics relative to that of other nations. We lead the world, the report holds, in the use of the plane for commercial purposes; in the private ownership and operation of planes; in the extent and lighting of airways; in the provision of weather report service; in the number of airports and intermediate landing fields; in the development of radio communication and directional finding facilities; in the transport of mail by air; in crop dusting and forest patrol by air; in aerial photography and mapping; in the development of cowling for air-cooled engines and engine starters; in the development of catapult launching and deck arresting devices, and in the development of parachutes.

Other Points of Merit. In addition to this impressive list here are some more items in which, according to the committee, we are abreast of the rest of the world: In the development of military types of airplanes; in the airship development program; in the use of metal construction, and in the development of air-cooled and fuel-injected engines.

Work of Only Medical School of Aviation. San Antonio, Texas.—The only school of aviation medicine in the United States is intensifying its training of doctors whose job is to restrict army aviators to men who are in extra-perfect physical condition.

Special Plane Built for the Lindberghs. Los Angeles.—A specially designed plane of unusual speed and cruising range has been constructed here for the personal use of Col. and Mrs. Charles A. Lindbergh.

Buffalo Women Have Formed Glider Club. Buffalo, N. Y.—Glider makers of Buffalo's future feminine aviators feel at home in the wide-open spaces above the earth.

Stop that COLD... before it stops you! COMMON head colds often "settle" in throat and chest where they may become dangerous—rub Musterole on these parts at the first sniffle—it will relieve congestion by stimulating blood circulation.

Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

MAKERS CONSIDER INSTALLMENT PLAN

May Dispose of Planes by Time Payments.

Chicago.—Airplane manufacturers, faced with the most difficult selling problem that has arisen since the establishment of aviation as an industry, are looking to the time payment plan of selling as a possible solution.

Work of Only Medical School of Aviation. San Antonio, Texas.—The only school of aviation medicine in the United States is intensifying its training of doctors whose job is to restrict army aviators to men who are in extra-perfect physical condition.

There's a Reason. Kind Old Lady—My goodness, but you must love that baby to death. I see you forming in line to kiss it.

No, Regardless. Office Boy—Sorry, but the editor won't even read your article.

Embryo Writer—But did you tell him that if he read it he would surely accept it? Office Boy—Yes; that's why he won't read it.—London Tit-Bits.

Needless Pain!

Nowadays, people take Bayer Aspirin for many little aches and pains, and as often as they encounter any pain.

Why not? It is a proven antidote for pain. It works! And Bayer Aspirin tablets are utterly harmless. You have the medical profession's word for that; they do not depress the heart.

So, don't let a cold "run its course." Don't wait for a headache to "wear off." Or regard neuralgia, neuritis, or even rheumatism as something you must endure. Only a physician can cope with the cause of such pain, but

you can always turn to Bayer Aspirin for relief. Bayer Aspirin is always available, and it always helps. Familiarize yourself with its many uses, and avoid a lot of needless suffering.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monocetiacidester of Salicylicacid

Made Shoes Last. When a woman recently applied to the authorities of Cardigan, Wales, for a new pair of shoes, she declared that the one she was wearing had lasted 27 years.

Worth Remembering. Scratches can be removed from patent leather by applying a mixture of olive oil and jet black ink with a fine brush and repeating several times if necessary.

Home Has More Danger Than Savages of Brazil

JOHN J. WHITEHEAD, explorer and lecturer, has just returned from eight months in the jungles of South America, where he was searching for traces of the lost Colonel Fawcett and his son.

Dangerous as he found the jungle, he encountered a worse danger at home. But let him tell it.

"One of the great problems of a trip of this kind is keeping in healthy condition. When we started, some of the members of the party had laxatives with them, but made wise by experience I carried Nujol. All too quickly my stock ran out. Soon I was in bad shape—what with a diet of rice and beans, lacking vitamins and green vegetables.

John J. Whitehead, explorer and lecturer, with a Jungle Warrior

"When we finally got back to civilization, entertained first in Brazil and later in the United States, I became positively ill. Severe stomach pains and poor elimination made me realize that Nujol would again prove the reliable, trusty keeper of health. Sure enough, with the first bottle the trouble disappeared.

sweeps away, easily and normally, those internal bodily poisons (we all have them) that make us feel dull and headachy and sick. Nujol cannot hurt even a little baby; it forms no habit; it contains not one single drug. Doctors and nurses use it themselves and tell you to use it, if you want to be well.

Don't think Nujol is a medicine. It is as tasteless and colorless as clear water. It brings you, however, what your body needs like any other machine—lubrication. Just as a good bath washes our bodies clean, Nujol

Take Nujol every night for two weeks and prove to yourself how happy and bright and full of pep you can be, if your body is internally clean. Get a bottle today at any drug store. It costs but a few cents, and makes you feel like a million dollars. Start traveling the health-road to success and happiness—this very day!

First Urchin—Sure, why wouldn't we? The baby has just got through eating an all-day sucker.—Detroit News.

Office Boy—Yes; that's why he won't read it.—London Tit-Bits.

Stop that COLD... before it stops you!

COMMON head colds often "settle" in throat and chest where they may become dangerous—rub Musterole on these parts at the first sniffle—it will relieve congestion by stimulating blood circulation.

blend of oil of mustard, camphor, menthol and other helpful ingredients bring relief naturally. It penetrates and stimulates blood circulation and helps to draw out infection and pain. Used by millions for 20 years. Recommended by many doctors and nurses.

But don't be satisfied with the noticeable relief you should experience from the first Musterole rub—apply it every hour for five hours and you'll be amazed at the result! Working like the trained hands of a masseur, this famous

Keep Musterole handy—jars and tubes. All druggists. To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

WHITEMORE

Miss Ruth Schuster spent Saturday in Bay City.

Hugh Vahey has purchased the pool room from Mr. Clop and took possession Tuesday.

John O'Farrell took possession of the telephone office Thursday. Mr. and Mrs. Barlow moved into the John O'Farrell home.

Mrs. Fred Mills rented her house to Mr. Riley of Standish and moved into the rooms by the telephone office on main street.

Mrs. Eli Barnum was in Bay City on Monday.

Duncan Valley and Joseph Goupil were in Ann Arbor last week, where they accompanied Harry Ruckle for medical treatment. Last reports were Harry was just about the same.

Mr. and Mrs. Joseph Norris, Mr. and Mrs. Earl Kannell, Mr. and Mrs. Harold Goodrich and Mr. and Mrs. Robt. Hamilton of Turner, and Mr. and Mrs. H. Hunt of Twining were callers at the Charters' home Sunday. Mr. and Mrs. Roy Charters joined them when they autored to Hale, where they were guests of Dr. and Mrs. Hull at a birthday dinner.

Our basketball team autored to Alabaster last Friday night, where our girls defeated Alabaster by a 50 to 5 score. Our boys were defeated by a 19 to 12 score.

Irma, Ralph and Bobby Hamilton of Turner spent Sunday at the Charters' home.

It is further ordered that within forty-five days from the date of this order, Plaintiff cause a copy thereof to be published in the Tawas Herald, a newspaper printed and published and circulated in Iosco County, for six successive weeks, once in each week; or that Plaintiff cause a copy of this order to be served personally upon said defendants, at least twenty days before the time above stated for their appearance, and cause a copy of this order to be mailed to each such absent, concealed or non-resident defendant (except such unknown heirs and defendants) at his or her last known post-office address, by registered mail.

This suit is brought to quiet title to—
"A piece of land in Lot 5, Section 3, Town 23 North, Range 9 East, Iosco County, Michigan, bounded as follows: Commencing at a stake 162 feet south from the north line of said Lot 5, on the west side of said lot, thence south 528 feet to centre of bridge over AuSable river; thence south 132 feet to a stake; thence east parallel with north line of Lot 5 to Lake Huron; thence north to a stake set 162 feet from said north line of Lot 5, being the 1/4 line of said Section 3; thence west to point of beginning."

Dated November 30th, 1929.
Herman Dehnke,
Circuit Judge.

HEMLOCK

Mrs. Herbert Herriman left Tuesday last for Philadelphia to visit her daughter, Mrs. Alice O'Connor, who is in very poor health.

Mr. and Mrs. Charles Katterman were Sunday visitors in Reno.

John Katterman spent Monday evening with Austin Allen.

Paul and Charles Brown are cutting a hundred cords of wood for Nelson Miller.

Miss Elizabeth DeGrow visited Sunday in Tawas.

Mrs. John McArdle visited with relatives in Bay City a few days last week.

L. S. Little of Saginaw is spending some time at his cottage at Sand Lake while having his ice put up.

On Saturday evening forty-five neighbors and friends gathered at the home of Mr. and Mrs. Louis Binder and pleasantly surprised them. The evening was spent in playing progressive pedro. Mrs. Louise McArdle winning first prize and Mrs. Lester Biggs house prize.

A delicious lunch was served. Mr. and Mrs. Binder were presented with a beautiful rayon bed spread.

Mr. and Mrs. Austin Allen spent Friday evening with Mr. and Mrs. John Katterman.

Mr. and Mrs. Frank Schneider of Melvo; spent Sunday with Mr. and Mrs. John Burt.

Mr. and Mrs. Clarence Thornsby of Detroit and Elsie Skoog were callers at the home of Mr. and Mrs. J. L. Fraser last week.

A box social will be held at the Grant town hall on Saturday evening, January 25th. Everyone bring well filled boxes. A good time is expected.

A birthday surprise party was held at John Burt's on Monday evening in honor of Miss Hazel Burt. About forty were present. Miss Burt received some very beautiful gifts. A lunch was served and a good time enjoyed by all.

Cards were received this week from Sam Bamberger in Florence, Alabama. Sam is with the Consumers' Power company there.

AGREEMENT

This Agreement, made and entered into this seventh day of January, 1930, by and between the City of Detroit, represented by Edw. Denniston, Superintendent of the Detroit House of Correction, duly authorized agent for and in behalf of said city, party of the first part; and the county of Iosco, Michigan, represented by Ernest Crego, Chairman of Board of Supervisors, and Frank E. Dease, County Clerk, duly authorized agents for and in behalf of said county, party of the second part.

Witnesseth, Whereas, the party of the first part, for and in considera-

tion hereafter mentioned, agrees to receive into the Detroit House of Correction, safely keep, board, clothe and care for, any and all persons who may be sentenced to confinement in the said Detroit House of Correction, by any Court or Magistrate in the County of Iosco, Michigan, to-wit: For all persons sentenced for any period not less than sixty days nor more than one year for offenses punishable by imprisonment in a county jail, One Dollar and twenty-five cents (\$1.25) per day each, or any part of day. It is hereby agreed by and between the parties hereto, that this agreement does not cover any person or persons who may be sentenced to confinement by any Court or Magistrate in said County for any term less than sixty days nor more than one year, as above mentioned, and such person or persons so sentenced shall not be committed to, confined, received or kept in the said Detroit House of Correction under the terms of this agreement. Provided that all persons sentenced and delivered as aforesaid, upon being discharged, may, in the discretion of the Superintendent of the Detroit House of Correction, be furnished with transportation to the place from whence received, or given the equivalent in money, and the amount so expended shall be repaid by the party of the second part monthly as hereinafter specified.

The party of the second part, in consideration of the before mentioned stipulations to be performed to the party of the first part, agrees that all persons convicted in the County of Iosco, Michigan, of offenses, under the Disorderly Act or of crimes not punished by imprisonment in the State Prison or Reform School, and who are sentenced by any Court or Magistrate, shall be sentenced to imprisonment in the Detroit House of Correction, and shall be forthwith conveyed to and delivered into the custody of the Superintendent thereof; and to pay all lawful drafts drawn upon the Treasurer of the County of Iosco, Michigan, for board, care, discipline and money expended for return transportation, etc. of persons so sentenced and delivered, according to the terms of this agreement, monthly, viz: on the first day of each month of each year of the continuance of this agreement.

The party of the second part further agrees at their own expense to furnish the party of the first part an affidavit of the due publication of public notice of this agreement in some newspaper published within said County and in case no paper is published in said County, then an affidavit of the due publication of such notice in some newspaper published within the judicial district to which said County is attached for a period of not less than four weeks, and such notice shall state the period of time for which this agreement will remain in force, as provided for in Section 2162, Mich. Compiled Laws 1897.

It is Further Agreed, by and between the parties hereto, that this agreement shall continue for one year from the Second day of January, 1930, and shall be binding and in full force in all its points to the end. PROVIDED that the parties hereto, or either of them, have and has by these presents the right to annul this agreement at any time during the continuance thereof, when written notice of the intention to do so shall have been served by one party upon the other party, at a date not less than one month previous.

In Witness Whereof, We have affixed hereto our hands on the day and year first above mentioned.

THE CITY OF DETROIT,
By Edw. Denniston, Superintendent of the Detroit House of Correction at Detroit, State of Michigan
THE BOARD OF SUPERVISORS
By Ernest Crego, Chairman,
By Frank E. Dease, Clerk,
Iosco County, at City of Tawas City State of Michigan.

EVERY modern improvement in this superb SCREEN GRID console!

New Low Prices!

UNTIL you have seen and heard this new Crosley 42-S, you'll have no idea of what modern radio can mean. Examine it thoroughly, test it critically—compare prices. Only then you will realize all its wonderful qualities.

A handsome piece of furniture, first of all. Finished in satiny walnut veneer and rare matched woods, it takes its place among the finest of furnishings.

And Screen Grid, of course—with a genuine Neutrodyne circuit, a feature of all Crosley models. Every other modern feature, too, such as Power Detection, phonograph pick-up connection and built-in Dynacoil speaker.

Arrange for a free trial of Crosley 42-S in your home. There's no obligation!

Crosley 42-S
\$126
(without tubes)

AN EIGHT TUBE SET
Crosley 41-S embodies the famous Crosley Unitrad Screen Grid chassis, shown above. It utilizes: THREE 224 Screen Grid tubes in R. F. stages; one 227 tube as a power detector; one 227 as first audio tube, resistance coupled; two 245 output tubes, connected push-pull; one 280 rectifier tube—eight in all. Beautiful metal case finished in hurl walnut and decorated with white metal trim. Only \$65.85 (without tubes).

TONE TESTED BY WORLD-FAMOUS ARTISTS

Under the guidance of America's foremost musical artists—Efrim Zim-eliet, Edith Mason, Alma Gluck, Jose Mojica, George Gershwin, and others—the tone quality of Crosley Radio is developed to please you as no other radio has ever done. With Crosley sets in their homes, these artists "listen in," comment, advise . . . give Crosley engineers the invaluable benefit of their opinion.

MOLLY SPENDS HER "MAD MONEY"

ALTHOUGH the family Bible recorded Molly Burke's middle name as Imogene, it might better have been Independent. For Molly believed most firmly in being the captain of her soul, and if a little money in reserve would protect her head from being bloody as well as unbowed Molly would be right there with the reserve.

Never had Molly gone to a dance without taxi fare tucked away. Yet, oddly enough, Molly had always returned to her home in company with the same escort with whom she left.

So it wasn't exactly that Molly was cynical that prompted her to say nothing to Norman about the fact she hadn't spent all her savings on her trousseau. It was just that Molly had seen enough unhappy marriages to make her want to know that in case her own didn't pan out well, she wouldn't be trapped into drifting along, unable to make her escape, because she hadn't the price of her own living expenses until she should get back into step in the business world.

Molly wasn't going to be domestic from a sense of duty, inspired by the need of support—not if Molly knew anything about it. Molly was going to be domestic just as long as she stayed in love with Norman, and statistics being what they are, Molly felt that \$600 salted away stood about even chances of being used for financing an escape scene, or of being left in trust to mature for her old-age use.

Two years, three years, four, five, six—still the "mad money" remained intact, while the interest accumulated to the tune of 7 per cent.

The year after the twins were born Molly very nearly spent a generous portion of her reserve—not on escape from domesticity, but on a session in a sanitarium. But she resolutely remembered her vow to never let current expenses decrease her capital, and instead of departing for a sanitarium she took a rest cure at home, cancelling all social engagements, napping when the twins napped, and digging in the garden while the twins took their airing on the side porch.

"The seventh year is the hardest," so some cynics say. Certain it is that the seventh year Molly and Norman were married proved to be decidedly strained. For one thing Norman was shifted from a straight salary to straight commission. For another Norman and Molly disagreed intensely in the matter of schooling for the twins, Molly pulling strongly for sending the youngsters to a private school, Norman advocating that boys belonged in a public school.

The third influence came in the form of a letter from the firm for which Molly had worked previous to her marriage. It seems that Molly's successor was leaving to be married and Molly's old place was open in case she cared to play the modern and go back to salaried work.

Norman's attitude toward the proposal that Molly resign from the role of housewife and resume the role of business woman made Molly herself literally speechless with resentful anger. For Molly, though she honestly loved home life, was not blind to the unpleasant details of that same life—the scurrying of carrots, for instance, and the making of laundry lists. As for her feelings toward Norman—probably they were much the same as are cherished by the average wife who for nearly seven years had heard her husband sing off key in his bath, had cleaned up his pipe ashes from her best bureau covers and had listened to him expound political views with which she was heartily in discord.

As for Norman's feelings toward Molly—he still kissed her whenever he left her—even in a crowded bus, a practice which puzzled Molly, making her feel motherly toward him. And he nearly smothered her with wraps whenever he took her for a drive.

"He really wants to take care of me," admitted Molly to herself, "even though he doesn't seem able to support me in the style to which he thinks I should be accustomed."

"But sentiment doesn't pay dividends," reflected Molly the morning after Norman had announced that if Molly went back to work it would mean the end of everything as far as his life with her was concerned.

"And \$60 a week is \$60," she continued. Resolutely she went about the process of cashing in on what had been a \$600 investment seven years earlier.

"A cool thousand," she exclaimed delightedly. "Plenty to pay for a term for the twins in that lovely special study school, hire a maid, and get me a new outfit of clothes for business. Then on sixty a week I can manage beautifully."

As for Norman—he didn't figure in her plans. Norman didn't want a business-woman-wife—very well. Norman should be relieved of her without further ado.

"I haven't," decided Molly, "a housemaid's soul. Work is work, time is time, and working time might just as well pay a profit."

At the sound of Norman's whistle from the front path, Molly hastily tucked the precious bank draft into a drawer in her desk, and hurried toward the kitchen. Norman was home earlier than usual—dinner wasn't nearly ready—and Molly, as long as she was on the job as housewife, proposed to be efficient about it.

"Why, what's the trouble!" ex-

claimed Molly as she caught sight of Norman's face.

"Ned Brooks played the market, lost everything and has cleared out for parts unknown. The house he and Laura were living in is for sale—Laura has gone home to her people."

"Oh! The poor thing," cried Molly.

"Her people have plenty of money—she'll be all right," said Norman, "but maybe I don't wish I had enough for a down payment on that house—it's not new, but it's wonderfully built."

"And the garden," interrupted Molly, "isn't the garden glorious?"

"Silently Norman nodded, then said, "If only I weren't such a dabbler I would have made enough by now to buy the place, but I've got exactly \$500 and the bank won't take a cent less than fifteen hundred. The house not being new, it's next to impossible to finance it without plenty of cash."

Suddenly Molly smiled—the sort of smile that had been rare that seventh year. Norman's eyes were anxious—eager. Darting into the living room Molly flung open her desk, caught up a scrap of paper and hurried back to the kitchen.

"See," she said, triumphantly, "with your five hundred we can have the house."

"But—" faltered Norman. "It's up to a man to provide shelter for his family."

"Applesauce," cheerfully responded Molly. "Don't I have to live in your house for the rest of my life? So why shouldn't I turn in my old age fund toward purchasing my—case?"

"Oh, my dear," exclaimed Norman, which, as any seven-years-married wife will tell you, was a perfectly satisfactory remark for a husband to make, especially when accompanied by the sort of worshipful look that Norman gave Molly, as, stumbling over the twins' muddy arcades, he stepped from the back hall into the kitchen, and caught her close in his arms.

Ingenious Methods of Keeping Track of Time

Many and strange have been the methods adopted by primitive man for measuring time. His earliest method, says a writer in the New York Times magazine, was to decide the time by the length and position of the sun's shadows—a principle later worked out in the sundial. The phases of the moon divided periods and seasons.

The cave man, with awakening intelligence, developed an ingenious method of time telling through ropes of grass in which knots were tied at equal distances. He set fire to one end of the ropes and crudely measured the time required in burning from one knot to another. The grass rope was a prehistoric ancestor of the "time candle," with its notches cut at regular intervals or with alternate black-and-white stripes.

When the time candle burned to the third notch it was time to feed the baby; at the fifth notch or stripe, the housewife put on the potatoes to boil for the evening meal; at the last notch the family went to bed—the most natural thing to do when the light failed.

In the thirteenth century there was invented the nearest approach to present-day clocks. The word "clock" is a derivation of "glocken" or "cloches"—bells, which struck the hours.

In 1504 a young locksmith in Nuremberg, while serving a term in prison, made the first watch. It was as big as a saucer and was manufactured of iron. Its accuracy, however, could not be relied on, for it lost an hour daily; but when the lost hour was an established fact, the owner could estimate time quite exactly. The night watchmen carried these huge watches, and it was for this reason that they were given their name.

The next important invention in the progress toward the modern watch was a hairspring, so called because it was fashioned out of a pig's bristle. The hairspring in modern watches is made of steel wire, so fine that it resembles a spider's web.

Compare the "insides" of a pig's bristle watch with the delicate mechanism of the Twentieth-century product, which, in a lady's watch, has screws so infinitesimal that a thimble will hold 20,000. For one pound avoirdupois, 583,333 of these screws are required. But each has a beveled gear, a slot and a spiral thread. Its weight is twelve one-thousandths of a grain.

Enough Said

A soft answer, besides turning away wrath, frequently causes it. Teddy Brown, on arriving home after a long business journey, was in no mood to submit to the inevitable catechism of his loquacious spouse.

"Have you thought about me while you have been away?" she asked.

"Yes," said Brown, with a groan.

"Sure?" persisted Mrs. B.

"Yes, of course!" repeated the weary carpet-bagger.

"How have you shown it?" was the next query.

Teddy drew a long breath, then softly replied: "Well, my love, I lodged at the Nag's Head."

Then the hair flew.—London Weekly Telegraph.

No Mystery

"I've been watching that mechanic for the last 15 minutes. There's a man who knows his business. He didn't spill a drop of oil on the ground. He put down the hood gently, fastened it securely, and left no fingerprints on it. He wiped his hands on clean waste before opening the door, spread a clean cloth over the upholstery, meshed the gears noiselessly and then drove slowly into the street."

"Yeah, that's his own car."—Skelly News.

FELT HATS WITH "PINKED" EDGES; NEW SILHOUETTE IN PRINT SILK

NOW comes the midseason time of the year when most women feel the urge for a new hat just to "bridge over" until the arrival of the first robin of spring. What's new? A question to which the group of perforated and eyelet-embroidered felts in the picture should prove a most convincing answer.

In some instances the cutout designs that elaborate, Paris designers refer

it is really not to be thought of, wearing a last season's dress and expecting to "get by with it." Not but what it has been possible in preceding years, for there were seasons and seasons when the silhouette varied but slightly. But this season! Well, there is no doubt about it we are due for a decided change. The new silhouette seems to have won the battle that has been raging ever since "lines" which

New Hats From Paris.

to the decorative openwork bands and insets as "felt lace." The model photographed in the oval is one of the simpler types. This petite cloche has been slashed across the crown in a fern-leaf design, the openings revealing a lining of faille silk in a contrasting color.

Sometimes the fanciful cutouts are worked directly in the hat itself as shown in the pen-and-ink sketch at the top to the right in this group. Then again motifs of the openwork felt are inset as shown in the hat sketched next below.

While the simple cutout work which perforates the felt designfully is more generally adopted, in some instances

are different were thrust upon us by the regime which controls the destinies of fashion.

So here we are contemplating, for one thing, print silk frocks like the one pictured below which is new, decidedly new, in the patterning of the silk of which it is made, in the length of the hemline, and in its silhouette in general. It carries out effectively the idea of combining silk which prints dark on a light background with silk in twin patterning which prints light on dark. Its princess cut and the draped neckline are two outstanding style features.

Ever so many of the new silks have dark backgrounds, black, navy, brown,

Print Silk Frock.

deep reds and greens. Tiny motifs in vivid color contrast are spaced very regularly, whether the weave be crepe de chine, tafeta or foulard.

Leaf and small fruit motifs are numerous such as cherries and leaves or strawberries with tiny blossoms on dark backgrounds. A crepe printed with groups of leaves in green and white over a darker green background speaks a spirit of newness. Pastel designs on dark grounds are featured among advance silks such as Vionnet pink and sky blue on black.

An interesting variation in prints is that of flat flowers, that is the little blossoms are not sharply defined with an outline, color making the distinction.

As to printed chiffons, some of them accent an intensified coloring, achieving a vivid beauty. Some of the print chiffons adopt a technique which simulates handpainting. Large tulips on a light background carried out with brush-and-paint effect, achieve brilliant splashes of color most effectively. Huge floral designs are a characteristic trend of many of the imported chiffons.

Fashions at the winter resorts always foretell coming summer modes. Already southern palms are making a fitting setting for picturesque chiffon frocks gaily flowered. Naturally these gowns call for hats with large brims—all of which is the story in advance for summer.

The cunningest silk prints ever, have been devised for children, certain types of which show quaint little figures frolicking in flower gardens or other scenes equally as typical of childhood.

State of Pennsylvania.

Tinkering

THERE are some automobile owners who are forever pulling their machines apart and putting them together again. Evidently they do this under an inflated idea of their mechanical ingenuity, thus hoping to improve upon factory adjustments. As a general rule it is this type of person who is always complaining about his car's poor performance.

This tinkering business is bad enough for motor cars, but it is vastly worse for human bodies. The most that can happen to the automobile is that it will be ruined. And money buys another one. Human beings, on the other hand, are not factory products. When injured by tinkering they either remain that way, or pass out of the picture entirely and forever.

Yet, in spite of this well-known fact, it is positively remarkable how many tinkers there are in the United States today. They divide themselves roughly into two classes. Those who show an undue affection for the home remedy and quack product, and those who permit that old huzuboo worry to influence their imagination to distressing proportions.

It is not at all surprising that with so many of these people around that at least 4 per cent (and this is a very conservative estimate) of those who visit doctors have nothing whatsoever wrong with them. Little wonder that advertised cure-alls are so potent! Nor is it any puzzle to understand how so many unfortunates make themselves physically and mentally ill through the power of a vivid imagination.

If people would only realize that to self-diagnose a real or supposed case of disease and then swallow a self-administered dose from a beautifully labeled bottle, represents about the worst type of tinkering on earth, there would be fewer deaths at the wrong time.

If for any reason, however, you conclude that you are ill, don't brood over it. Seek advice. If the physician pronounces you sound, let that be that. If actually sick, then follow the doctor's orders. Under no circumstances tinker.

"Breaking" the Kitchen

A FAVORITE sport of the two weeks' vacation sojourner is to attempt to "break" the hotel kitchen. On the theory that the eat-what-you-please plan is an invitation to exhaust the food supply many guests, if actions may be interpreted, are quite convinced that their capacities are equal to the challenge.

Vacation stomachs consequently are anything else but stomachs on vacation. In reality they are afflicted with gross abuse every time their owners are at table.

Admittedly, eating can be raised to the status of a high-class pleasure. But there is no "class" at all in turning this natural body function into a low sport. Which is exactly what happens when fat dowagers, corpulent men and even average people consistently attempt to embarrass the food stock of a resort hotel.

And what is true of these dining room indiscretionists also applies to others who, while temperate at the hotel, commit a similar crime by stuffing themselves and their children between meals with all sorts of edibles and drinkables.

Most certainly one does not want to be disciplined too much when on the annual pilgrimage. And there really is no need for it. Even luxuries have their place. Palatably cooked food has its right to reasonable attention, also. But to make eating the main joy of an outing is to overlook the real advantages of fresh air, rest and mental change.

Therefore, eat reasonably. Enjoy what you eat to the full. But don't try to "break" the hotel kitchen. You can't do it. Moreover, conceivably you may break yourself in the attempt.

Nature's Long Process in Slate Production

Slate, so geologists tell us, was originally sediment deposited on the ocean bed or lake floor by tidal current and mountain stream. After years of gradual accumulation this deposit was subjected to tremendous heat and pressure by some convolution of the earth's surface. A metamorphosis took place. Clay turned to silica and loose silt was compressed into fine-grained rock, so fine-grained, indeed, that even when completely immersed in water for 48 hours it absorbs less than one-half of 1 per cent of its weight.

Here, then, is the raw material for an ideal roofing. Being close-grained natural rock it is breproof, waterproof and so nearly weatherproof that the phrase "eternal rock" is a common synonym for everlasting. Yet had nature stopped her manufacturing processes at this point we would never have had any slate roofs. One more characteristic was needed to change that sedimentary rock into slate. So nature again applied tremendous pressure and produced cleav-

ORCHARD GLEANINGS

PHONY DISEASE IS CAUSE OF DAMAGE

Trouble Traced to Virus Found in Tree Roots.

(Prepared by the United States Department of Agriculture.)

Recent investigations of phony peach, a disease which threatens to do great damage to the peach industry of Georgia, show that this trouble is caused by a virus that resides in the roots of the trees. The virus does not enter the branches, buds, scions, or seeds and the disease is communicable only by grafting roots from diseased trees to roots of healthy trees, or by making piece-root grafts in which phony roots are used.

The first symptoms of phony disease do not appear in commercial plantings until the latter part of the second growing season, according to specialists of the United States Department of Agriculture who are conducting the investigations. From this time on the trees may come down with the disease at any age.

When attacked by this disease a tree develops shortened internodes, a large number of lateral twigs, and large, flattened dark-green leaves, giving the appearance of dense growth with healthy foliage. Especially in young trees, a decided dwarfing results. The number of fruits and their size is greatly reduced. Fruit from phony trees is apt to be distinctly poorer in flavor than normal fruit, though slightly better in color.

This disease was first observed about 50 years ago by Samuel H. Rumph, a peach grower of Marshallville, Ga. He called the affected trees "ponies" because of their smaller size. Various causes were assigned to this behavior, and finally it came to be regarded as a disease. The term "phony disease" is now generally used to describe this condition.

A vigorous campaign is now being conducted for the eradication of the phony trees. This is regarded as the only sure method of controlling the disease in the territory where it has already spread. In the meantime numerous experiments are under way at present in an effort to find a stock that is resistant to the disease.

"Please make Father change his smoking tobacco"

MEN go to their graves ignorant of the suffering an over-strong pipe has caused others. But now, we trust, Father will lose no time in discovering Sir Walter Raleigh, whose mild, fragrant blend is as popular with the smoked-at, as it is delightful to the smoker. This blend of choice Burleys has plenty of body and a very special fragrance. Yet it's so mild you can smoke it all day long, with only the sensation of increasing enjoyment.

How to Take Care of Your Pipe
(Hint No. 1) Don't swiuch tobaccos when you break in a new pipe. Stick to the same brand for 30 or more pipefuls. Mixing tobaccos makes a pipe either strong or flat. Send for our free booklet, "How to Take Care of Your Pipe," Dept. 63, The Brown & Williamson Tobacco Corporation, Louisville, Ky.

Taking It Merrily

Manville McC. Rossiter, the New England mill magnate, said on his return from England: "English business is in a bad way, and it keeps getting worse instead of better; but the English business man is full of grit. He takes his hard luck philosophically. "He can even take it merrily. An English manufacturer the other day got a wire from a customer: "Cancel our order at once." "The manufacturer wired back: "Your order can't be canceled at once. You must take your turn."

Raking Leaves Controls Scab of Apple Trees

Raking up all dead leaves in the orchard and burning them, followed by a systematic spray program the next spring, was instrumental in producing a superior crop of apples in a Morrow county (Ohio) orchard last year. The owner, upon recommendation of Prof. Wendell Paddock of Ohio State university, gathered the leaves at a cost of about \$100. The previous year the trees, now about twenty years old, had been seriously infected with scab, but last year the orchard produced more than 4,000 bushels of first-class fruit. The owner through advertising in local papers has been able to sell a major portion of the crop at the farm.

Spring Mulching

Generally, when we speak of mulching strawberries, we think of applying same in late fall or early winter for winter protection, but some of the greatest benefits come from having the mulch on the strawberry bed in the spring, also at harvest time. To obtain these benefits the mulch should be applied any time before the ground thaws out in the spring, applying four or five inches of loose straw, rye preferred, wheat next, free from weed, grass, or grain seed.

A Sour Stomach

In the same time it takes a dose of soda to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has acidity completely checked, and the digestive organs all tranquilized. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just as good for children, too. Use it whenever coated tongue or fetid breath signals need of a sweetener. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitations do not act the same!

PHILLIPS Milk of Magnesia

W. N. U., DETROIT, NO. 3-1930.

Miserable With Backache?
Too Often It Warns of Disordered Kidneys.

A CONSTANT backache, with kidney irregularities, and a stiff, achy, worn-out feeling all too often warn of disordered kidneys. Don't take chances! Help your kidneys with **Doan's Pills**. Recommended the world over. Sold by dealers everywhere.

tor. She is too have every attention. You understand?"

The Irishman gave him a saturnine glare.

"Aye, and 'tis more than ye do, Captain, God forgive ye! There, now, alanna, come along with Aloysius."

Westward drove the Centurian, top masts whipping from the fids, lee rigging slack; but so keenly did Fellowes watch her that she never carried away a spar, despite the press of sail he kept her under. There was no more grumbling as they neared their goal. The sea lawyers of the fo'c's'le had discovered that the sinking of an enemy's sloop of war must be rewarded by a handsome grant from congress—"Didn't the Constitution's crew git fifty thousan' dollars for the Guerriere?"

Gradually, the Centurian's company came to understand the practical reason for her unusual armament. All sea-faring men knew the Yankee frigates were heavier built, heavier

armed. They could out sail their enemies, and their batteries could out range any craft below a line-o'-battle ship. And precisely so, the Centurian could out sail and out range the Badger.

Her Face Was Tragic; There Was No Scorn in Her Voice When She Replied.

Next to the Long Tom, which he had named the "Big Serpent," Cuffee worshiped Cara Ingplein. "Him pity 'll missus" was the one person aboard, except Fellowes, who was tolerated about when the negro was swabbing and wiping his pet.

Not the least of Fellowes' worries during this latter stage of the voyage was Cara's health. After his refusal to abandon the quest of the Badger, she remained secluded in her cabin for three days, and he knew, from Ben Ingplein's furious looks as well as O'Shaughnessy's resentful reports, that she was a sick woman—"on the bare edge of brain fever, Captain, and no fault o' yours, if I save her from that same." At O'Shaughnessy's urgency, she was fetched on deck as soon as the fever abated, and the air and sunshine put new strength in her; but there was a shadow on her face that worried Fellowes' heart, and the circles beneath her eyes were gouged deeper with every week the Centurian bore on into the west.

He was beginning to grow moody, plagued by a dread lest the Badger had succumbed to the winter's storms or been transferred to another station, and as they neared the American coast he consulted frequently with Tom and Cuffee, refurbishing his memory of Collishawe's cruising beat, deriving satisfaction from their matter-of-fact assurance of success.

Reached Enemy's Heart Through His Stomach

Mrs. Laura Fraser, the original Becky Thatcher of Mark Twain's stories, related shortly before her death at Hannibal, Mo., how she had once gone through an experience as thrilling as any that Twain had created for his fiction. During the Civil war Mrs. Fraser's husband was a strong southern sympathizer and as he was a doctor he defied federal authorities in treating wounded Confederate soldiers. He finally was put in prison about the time that Gen. John McNeill came to Hannibal to suppress the southern sympathy and camped in Mr. Fraser's front yard while he picked out ten prisoners of Confederate leanings to be "converted" by a firing squad. Mrs. Fraser, fearing the inclusion of her husband, invited the

general to a specially prepared dinner and he was so overcome with culinary delights that he ordered Fraser's release. But he reconsidered the next day and had him re-arrested, though he spared his life.—Detroit News

Ancient Scissors Found

Behind old paneling in the house known as Queen Elizabeth's lodge, in Epping forest, England, a pair of scissors believed to be 250 years old were recently found. They were covered with rust, but when this was removed it was found by the mark stamped on the blade that they had been made in the Seventeenth century. They have been placed in the Guildhall museum in London.

Altitude Needed

"Bill is going to take up aviation." "I didn't know he was air-minded." "He isn't—just flighty."

To Be Avoided

Rallery is a mode of speaking in favor of one's wit at the expense of one's better nature.—Monesquieu.

Kitten Made Trouble

A hungry kitten caused a turnout of a detail of Philadelphia police when Charles Rosenblum was alarmed by mysterious sounds in his butter and egg store after closing time. With drawn pistols the detachment of police searched the store and found the only intruder a strange cat out for a meal. The police withdrew when the store owner provided his uninvited guest with a saucer of cream.

Lower Forms of Life

Sacred to Egyptians

Nearly 100 different mammals, birds, reptiles and fish were regarded as sacred to various gods in ancient Egypt, and their bodies were mummified by thousands. Prof. Roy L. Moodie has found while investigating this subject for the Field Museum of Chicago. The cost of this religious procedure was enormous. More than 200 yards of fine linen cloth, a half yard wide, was needed for the wrapping of a single bull. As bulls were held in extreme veneration by the ancient Egyptians, great numbers of them were preserved. Expensive sarcophagi, carvings and statuary show the further care of the African bull. Birds of the hawk and falcon type were also abundantly preserved, as was the Egyptian kite, a small scavenger seen today perched on houseposts and in trees near villages. Packages contain as many as forty birds, each mummified and dipped in pitch before wrapping.

Prodding Commissioner

Miss Ida Lathers of New York city has found it necessary to equip herself with an electric lantern which has a red bulb when she dares traffic to catch a Broadway surface car at night, and writes to Grover A. Whalen police commissioner, to explain the maneuver and to suggest that he devote a single evening to getting on and off street cars.

Highways and Horse Sense

An economist makes an impassioned plea for common sense in road building. It would be fine to have common sense all along the line—even to those who drive on the roads that common sense has built.—Los Angeles Times.

Solves Problem of Good Bread Making

Mrs. Maggie Wilcox, Sacramento, Cal.

Mrs. Wilcox Puts Gold Medal "Kitchen-tested" Flour To The Test. Wins Blue Ribbon For Home Baking At California State Fair

"I feel that I put Gold Medal 'Kitchen-tested' Flour to the test," says Mrs. Wilcox, "when I entered my bread at the recent California State Fair and won 1st Blue Ribbon Prize. Since good flour is essential to successful baking I use only 'Gold Medal' for baking bread, cakes or pie crust."

Thousands Of Women Now Use Only This New-Type Flour

They have learned there is no "guess work" about perfect results—every time they get "Blue Ribbon" cakes and pastries, bread and biscuits.

They use a new-type flour for all baking purposes—GOLD MEDAL "Kitchen-tested" Flour—that simplifies baking remarkably and banishes the cause of most baking failures.

Failures, experts found, were mostly due to the fact that two

sacks of the same flour often acted differently, even with the same recipe. . . it was not uniform in oven action.

So now all GOLD MEDAL Flour is "Kitchen-tested" before it comes to you. As each batch comes through the mill it is tested by

actual baking—bread, cakes, biscuits, pastries—in an oven just like yours. Only flour which acts the same perfect way every time is allowed to go out to you. Thus you know in advance exactly what your results will be.

Special "Kitchen-tested" Recipes In Every Sack
(Changed every three months)

Please accept (free of charge) simplified recipes for 12 of Betty Crocker's most delicious baking creations. Recipes for daintiest cakes, the finest cookies, the most popular pastries known. Each one is "simplified" until it is remarkably easy, too.

All 12 of these simplified "Kitchen-tested" recipes are inside every sack of GOLD MEDAL "Kitchen-tested" Flour. You can get a full set today—simply ask your grocer for GOLD MEDAL "Kitchen-tested" Flour.

WASHBURN CROSBY COMPANY

GOLD MEDAL FLOUR

"Kitchen-tested"

Always sold in trade-marked sack—never in bulk

FAMILY DOCTOR LEARNED THIS ABOUT CONSTIPATION

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. All drugstores today have Dr. Caldwell's Syrup Pepsin in bottles.

Ancient Baby Carriage

Augusta, Maine, claims one of the most interesting baby carriages in the state. It is sixty-five years old and only recently was removed from attic treasures. The wooden-ribbed wheels are large, and the seat will accommodate a seven-year-old child. The top, which tilts, has fringed edges.

"Nervous, Weak, My Back Bothered Me"

Detroit, Mich.—"Thru overwork I got in a rundown and weakened state of health. I was very nervous and weak, my back bothered me, and I had bearing pains thru my sides and functional disturbances so that I would not be able to do anything for several days—I would be all dragged out and weak. I took Dr. Pierce's Favorite Prescription and it restored my nerves, corrected my distress and put me in good physical condition. I think it is the best tonic and nerve any woman can take."—Mrs. Herman King, 1228 Calumet St., Dealers: Fluid or tablets. Send 10c for trial pkg. tablets to Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

Highways and Horse Sense

An economist makes an impassioned plea for common sense in road building. It would be fine to have common sense all along the line—even to those who drive on the roads that common sense has built.—Los Angeles Times.

When Babies FRET

There are times when a baby is so fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's no time when any baby can't have the quick comfort of Castoria! A few drops, and your little one is soon at ease—back to sleep almost before you can slip away.

Remember this harmless, pure vegetable preparation when children are ailing. Don't stop its use when Baby has been brought safely through the age of colic, diarrhea, and other infantile ills. Give good old Castoria until your children are in their teens! Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness that needs no stronger medicines to relieve. Castoria is pleasant-tasting; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

No. 1 Continued from the First Page

Once he had been so harmless,
But then he grew to be
An outlaw of Texas,

Hunted on land and sea.
Once he met with Mac Nelly,
A Ranger chief was he;
He signed the papers of a Ranger,
Anything to go free.
In the town of Little Wood,
Cheseldine had his gang;
He hired every man he could,

Do Responsibilities End with Life

The right-thinking man believes not. Looking into the future he gives small thought to himself. The welfare of his wife, his children, occupy his mind. He must make provision for them after he has gone as well as while he is here. He must take no chances. Whatever may happen to him, he must see that they are safeguarded. Can this be done? It can, with absolute certainty.

The Whole Life Policy of the Metropolitan Life Insurance Company is the ideal one for the protection of wife and family. This policy will be explained in detail by

ELDER HORSE SALES, Prop.

D. F. COOK, Auctioneer G. N. SHATTUCK, Clerk

But the "Texas Ranger" got his man.

Ward School

Marion Musolf and Billy Brown returned to school Monday after an absence of several months due to illness.

Betty Rapp was absent several days during the week.

We were pleased to have Mrs. Swartz visit us Wednesday morning.

Lucille Bowen and Arnold Rollin were absent Wednesday.

Our perfect spellers last week were: Victor Girard and Arnold Rollin in the third grade; Ellen Malcolm, Norma Malcolm and Myrtle Bowen in the second grade.

Heavenly Chinese

The "Celestial empire," the popular name for the Chinese empire, originated from the name "Tien-Chao" or "Heavenly Dynasty," which was a Chinese conception of their fatherland.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Paul Potter and Elizabeth B. Potter, his wife, of Cleveland, Ohio, to Frank Paulin, of the same place, dated the 6th day of April, A. D. 1926, and recorded in the office of the Register of Deeds for the county of Iosco and State of Michigan, on the 7th day of April, A. D. 1926, in Liber 22 of mortgages, on page 529, on which mortgage there is claimed to be due at the date of this notice, for principal and interest, the sum of Eight Thousand Five Hundred Fifteen and 50/100 Dollars (\$8515.50), and an attorney's fee of Thirty-five (\$35.00) Dollars, as provided for in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage, or any part thereof.

Notice is hereby given, that by virtue of the power of sale contained in said mortgage, and the statute in such case made and provided, on Saturday, the 15th day of February, A. D. 1930, at 10 o'clock in the forenoon, the undersigned will, at the Court House in the City of Tawas City, that being the place where the Circuit Court for the county of Iosco is held, sell at public auction, to the highest bidder, the premises described in said mortgage, or so much thereof as may be necessary to pay the amount so as aforesaid due on said mortgage, with six (6) per cent interest, and all legal costs, together with said attorney's fee, to-wit: Lots Numbered Six hundred ten to Six hundred sixteen, inclusive, Lots Six hundred three, Six hundred four, Six hundred five, Six hundred seven and Six hundred eight, Lots Seven, Nine, Ten, Twenty-eight, Thirty-one, Thirty-five, Thirty-seven, Forty-eight, Forty-nine, Sixty-three, Ninety-six, Ninety-seven, Ninety-eight, One hundred two, One hundred nine, One hundred ten, One hundred eleven, One hundred twelve, One hundred fourteen, One hundred fifteen, One hundred sixteen, One hundred seventeen, One hundred nineteen, and One hundred twenty, Lots One hundred twenty-eight, One hundred thirty-seven, One hundred thirty-eight, One hundred forty-three, One hundred forty-six, One hundred forty-seven, One hundred forty-nine, One hundred fifty, One hundred fifty-three, One hundred fifty-four, Lots One hundred sixty-six to One hundred eighty-three, inclusive, Lot One hundred eighty-five, and Lots One hundred eighty-nine to Two hundred twenty-nine, inclusive, of Christian Outing Grounds, Association Plat of Kokosing, as recorded in Recorder's office in Iosco county, Michigan.

Frank Paulin, Mortgagee.
John A. Stewart,
Attorney for Mortgagee,
Business Address: Tawas City, Michigan.
Dated November 15, 1929. 12-45

SHERMAN

Albert Draeger was at Whittemore Saturday.

Frank Schneider purchased a new Ford car last week.

Earl and Albie Jordan were at Flint a couple of days last week.

Mrs. James Brigham was taken to the hospital at Omer last week, where she was operated on for appendicitis. She is getting along as well as can be expected.

Joe Smith had his wrist badly sprained last Saturday while cranking his car.

Mr. and Mrs. Matt Jordan were at Whittemore on business Saturday.

Geo. Kohn finished moving his house last Saturday.

STATE OF MICHIGAN

The Probate Court for the County of Iosco.

At a session of said Court, held

at the Probate Office in the city of Tawas City, in said county, on the 9th day of January, A. D. 1930.

Present: Hon. David Davison, Judge of Probate.

In the matter of the Estate of Mrs. Mary Curry, deceased.

Theodore A. Gobel having filed in said court his petition praying that the administration of said estate be granted to Ferdinand J. Miller, or to some other suitable person,

It is ordered, that the 31st day of January, A. D. 1930, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;

It is further ordered, that public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in The Tawas Herald, a newspaper printed and circulated in said county.

DAVID DAVISON,
Judge of Probate.
