

THE TAWAS HERALD

TAWAS CITY, MICHIGAN, FRIDAY, MAY 30, 1930

NUMBER 22

TAWAS CITY

Capt. W. C. Davidson left Monday for a few days' visit at Detroit. Born to Mr. and Mrs. George Bowen, Tuesday morning, May 27, an 8 1/2 pound daughter. She has been named Donna May.

Rev. M. A. Sommerfield was called to Saginaw by the death of his brother-in-law, John Wolkendorf.

The new postoffice building was practically inclosed at the time of going to press.

Chas. Dixon spent several days at Niles this week.

Michael Coyle, who is attending Notre Dame college, came home on Thursday for the summer vacation.

Mr. and Mrs. Irving Steinhurst of Elkton were week end visitors in the city at the home of the former's father, A. Steinhurst.

Baseball! East Tawas vs. Tawas City, at Tawas City Athletic Field, Sunday, June 1, at 2:30.

Mr. and Mrs. W. C. Davidson and Mrs. Agnes Kelly spent Sunday with Mr. and Mrs. Herbert McLean at Hale.

Zella M. Mullenburg, chiropractor, will be at Iosco Hotel, Tawas City, on Thursday, Friday and Saturday of each week.

Roxie Roach made two excellent trout catches in the AuSable river during the past few days. One of the trout measured 26 inches.

J. A. Brugger is remodeling and decorating the interior of his grocery store and meat market. The improvement gives the store a very pleasing appearance.

Place your order now for wreaths, potted plants, gladioli bulbs, and perennials. Hanson's Flower Garden.

Mr. and Mrs. Fred Hansen and sons, Gerald and Richard, of Gaylord are guests at the home of their parents, Mr. and Mrs. Jos. Watts.

Mrs. Ray Tuttle entertained the teachers and officers of the P. T. A. at bridge at her home on Tuesday evening. John Forsten won first prize, Miss Morel second and Miss Crosby low.

Mr. and Mrs. Ray Smith spent Sunday in Mikado with the latter's parents.

Louis Callahan and Howard Hatton spent Tuesday in Bay City. Mr. and Mrs. Miles Main of Harrisville visited in the city Wednesday.

Mr. and Mrs. Fred Schriber and family of Detroit came Thursday to spend the remainder of the week with Mr. and Mrs. Ernest Schriber and Mr. and Mrs. Frank Moore.

Mr. and Mrs. Clarence Moore and mother, Mrs. Thos. Moore, came on Thursday to spend Memorial Day in the city. Mrs. Thos. Moore will remain for the summer.

Mr. and Mrs. Ronald Curry spent Friday in Alpena.

Mr. and Mrs. Burley Wilson left Thursday noon for Marquette, where they will visit relatives.

Misses Elsie and Leota Marzinski and John Kilcoyne of Detroit spent the week end with Mr. and Mrs. Edw. Marzinski.

Miss Helen Gates of Detroit came Thursday to spend Memorial Day with her parents.

Mr. and Mrs. John Forsten are spending Memorial Day and the week end with relatives in Owosso. Jas. F. Mark is attending Grand Lodge, F. & A. M., at Jackson this week.

Jas. Leslie and Wm. Hatton were business visitors in Detroit on Tuesday.

Mrs. Chas. McLean was called to Marshall this week on account of the illness of her mother, Mrs. Rudick.

Sugar, \$5.25 per 100 lbs.; scratch feed, \$2.19 per 100 lbs.; pineapple for canning next week. A. & P., East Tawas.

Sheriff Chas. Curry was a business visitor Tuesday in Alpena.

Mr. and Mrs. Thos. Scarlett and daughter, Lola, are spending the week end in the city with Mr. and Mrs. C. W. Cox and Mr. and Mrs. A. Mallon.

Mrs. L. H. Braddock and daughter, Miss Patricia, returned Monday from Flint, where they were called by the death of Bayard Brown. Little Lee Gilbert Abbey, son of Mr. and Mrs. Leon Abbey of Flint, accompanied them home for a short visit.

Mr. and Mrs. Wm. Hinman of Hastings came Thursday to spend Memorial Day with their daughter, Mrs. M. C. Musolf, and family.

Friends of Miss Elsie Musolf will be interested to learn of her departure this week for a three months' tour in Europe. She will visit England, France, Germany, Norway and Denmark.

Merchandise prices are lower. See C. L. McLean & Co. adv.

Miss Norma Jean Musolf entertained ten little friends at a five o'clock dinner Wednesday evening in honor of her 9th birthday.

Miss Annette Laidlaw of Detroit came Thursday to spend the remainder of the week with her sister, Mrs. Robert Murray, and father, George Laidlaw.

Mr. and Mrs. Paul Misner are visiting the latter's parents, Mr. and Mrs. M. H. Barnes, over the week end.

Mr. and Mrs. Theo. Anderson and son, Teddy, of Alpena spent Saturday and Sunday in the city with relatives.

WILL EXAMINE PRE-SCHOOL AGE CHILDREN

An examination of pre-school children from Tawas City will be conducted in the court room of the county court house on June 6th. This work is being sponsored by the Tawas City Parent-Teacher Association with Mrs. Mae Dease acting as chairman. Examinations will be given by Dr. F. T. Zieske, of the Children's Fund Consolidated Unit No. 2, assisted by Miss Myrtle Cowgill, the Iosco county nurse.

The children may be vaccinated against small pox at the same time if the parents wish, and early vaccination is most advisable, for children as well as adults need the protection, and small children suffer very little from the vaccination "take."

For some years the parent-teachers have felt that the child should start to school free from physical handicaps—poor eyes, poor teeth, diseased tonsils, poor nutrition, or other defects. To help seek out these difficulties and urge correction, the national organization has urged an annual round-up of children who are to start to school. It is our desire, however, to include not only the children who will start to school next year, but all under school age.

It is planned later in the summer to have clinics for giving toxin-anti-toxin to protect them against diphtheria, so that by September our children may start to school protected against two of our most dreaded diseases. Over 850 school children have had toxin-anti-toxin in Iosco county this spring, but it is even more important that the pre-school children be immunized because they are more susceptible to the disease than the older children.

TWO PURE BREDS SOLD BY SERRADELLA FARM

The following two bulls were recently sold: Serradella Belle Mink Hengerveld 598106 and Serradella Belle Mink Colantha. These two bulls are grandsons of the Gold Medal sire, Sir Dutiland Colantha Denver, 296983, by a son of Eco Snyr Belle Pietje.

On the maternal side both of these calves are grandsons of Queen Pietertje Mink DeKok. Old Queen is now 18 years old. She has the second highest milk record and the fourth highest butter record for cows over 13 years of age.

Serradella Belle Mink Hengerveld is from an 802 lb. dam. He went to Ives Certified Dairy, Ojus, Fla.

Serradella Belle Mink Colantha's new home is with W. S. Adrian, Standish, Mich. Mr. Adrian had another Serradella bull before he purchased this one.

SCHOOL NOTES

High School

The picture, selected by the class of 1930, will be presented to the high school at the Commencement exercises which will be held June 12 at the State Theatre.

The banquet which the Juniors are giving to the Seniors will take place on Friday, June 6th, at the Masonic temple. The members of the high school faculty, the members of the board of education and their wives have been invited.

Thirty-two teachers from surrounding towns gathered at the Lakeside Tavern on Friday evening of last week. A short program, a bountiful dinner, and an address were the features of the occasion. The address was given by E. E. Gallup, Supervisor of Agricultural Education of Michigan. It proved to be inspiring. All of the Tawas City high school faculty, with the exception of one, were there.

Last Friday the Tawas City high school ball team won a baseball game from Whittemore high school by the score of 12 to 3.

Work on the tennis court has been practically completed. Backstops have been erected at both ends of the court.

Seventh and Eighth Grades
The eighth graders have received their Palmer Method certificates. The eighth grade grammar class had a debate this week. The topic debated upon was, "Resolved: that the swindler is more dangerous to society than the murderer."

Fifth and Sixth Grades
Patricia Braddock has returned to school after a week's absence.

The sixth grade hygiene class has been making charts to show how many hours each pupil should sleep.

Bobby Mark, George Laidlaw, Vera Herman had perfect spelling lessons last week.

Third and Fourth Grades
We are very sorry to lose two of our pupils. Phyllis Marshall was called back to Detroit and Grace Hill is attending the St. Joseph school.

Primary
Lloyd Marshall has transferred to Detroit.

Mrs. Heldberg visited our room Wednesday afternoon.

Memorial Day

(Copyright, W. N. U.)

TO THE VOTERS OF IOSCO COUNTY

I desire to announce that I will be a candidate for the nomination to the office of sheriff at the coming primary election on the Republican ticket. I want to thank my friends for their support in the past and I assure all that if nominated and elected to this important office, I will continue my work the same as heretofore, with fairness, and impartiality to all persons, and with the desire to honestly enforce the law.

Charles W. Curry.

LETTER CARRIERS MEET HERE SATURDAY

Members and their wives of the Northeastern Michigan Letter Carriers Association met Saturday evening at the Lakeside Tavern. About 25 were present.

This was the annual meeting of the association. A fine program was given. The Hale orchestra furnished music for the occasion. Guy W. Landon, president of the Michigan Letter Carriers Association, was the principal speaker.

At this meeting Charles E. Beardslee of this city and Carroll E. Martin of West Branch were elected delegates to the state convention which will be held at Holland.

The national convention of letter carriers will be held at Detroit in August.

5th GRADE COMMENCEMENT TO BE HELD NEXT FRIDAY

County eighth grade commencement will be held at the Community Building in East Tawas on Friday, June 6, beginning at 1:30. Central Standard time. C. A. Rinehart, of the State Department of Public Instruction will give the address. All eighth grade pupils who pass the state examination will receive their diplomas at this time. Everyone is invited to attend.

County Achievement Day for the boys' and girls' clubs in the county will be a part of the program. Sewing work and manual training work will be on exhibition the entire day. This work is well worth seeing and we hope that just as many parents, teachers and friends come to see it as possibly can. The boys and girls have done some splendid work in both, and it will be worth your time to come and see what they have really accomplished.

Miss Wixson, from Michigan State College at Lansing, will be present to judge the sewing and to announce the club winners and county champions at the beginning of the afternoon program. There will also be a style show at which time the girls will wear the dresses they have made and a county champion will be chosen from the group. Remember the date, June 6, and come to see what the boys and girls of Iosco county have done this year.

THANK YOU!

It is with genuine pleasure that I express my thanks to the people of Tawas and vicinity for their patronage in the past several years. I regret very much that I was unable to accommodate my many customers and friends with permanent waves on my last visit, but will endeavor to take advance dates in the future as I have in the past several years. Sincerely,

Mrs. K. J. VonSmuda.

NOTICE

The parties taking police pup Wednesday night, May 21, will be prosecuted if the dog is not returned within five days. Disposing of dog otherwise will not stop suit.

Mrs. C. Siewert.

BAY SHORE ROUND TABLE HOLDS SESSION AT LAKESIDE TAVERN

The Bay Shore Round Table, an organization of teachers in this and the surrounding towns, held the last session of the year at the Lakeside Tavern last Friday evening. A short entertainment furnished by students of the local high school, a splendid banquet, and an address by E. E. Gallup, State Supervisor of Agricultural Education, made up the evening's program.

Both the Whittemore and the Harrisville schools held their Commencement exercises on this evening, and so the number of teachers present was not as large as it otherwise would have been. The faculties of Alabaster, East Tawas and Tawas City were represented, thirty-two in all.

The speaker of the evening, E. E. Gallup of Lansing, gave an excellent talk with the invigorating title, "What's Right with the Schools." He spoke briefly of the present day teacher, the present day building and the present day student. The talk was largely constructive rather than destructive, and so seemed quite different from the usual educational speech. It will be recalled that Mr. Gallup gave the Commencement address in Tawas City last June, and all who heard him at that time know that the address last Friday evening must have been O. K.

Miss Morse tells her health stories under the name Princess Watasia, meaning "Bearer of Happiness." She is a graduate of Michigan State College, where she majored in nutrition work. Her appearance locally was made possible through funds secured by the Michigan Tuberculosis Association in the sale of tuberculosis Christmas seals.

The next meeting of the organization will be held when school resumes in the fall.

FRIEDRIECHSEN—FINA

Miss Eva Friedrichsen, daughter of Mr. and Mrs. John Friedrichsen of Tawas City, was united in marriage to Michael Fina, son of Dr. Fina of Pittsburgh, on Sunday, May 18th.

The bride was attired in a dress of satin, with veil to match, and carried a bouquet of roses. She was attended by Miss Mary Fina as maid of honor. Misses Dorothy Fina and Annabell Freund were the flower girls.

The groom was attended by John Friedrichsen, brother of the bride. After the wedding ceremony, Mr. and Mrs. Fina left on a motor trip to Niagara Falls, New York, Atlantic City, New Jersey, Gettysburg, Philadelphia and Pittsburgh. On their return they will make their home in Dearborn, Mich.

BAPTIST CHURCH

10:00 a. m.—Morning Worship.
11:15 a. m.—Bible school.
6:45 p. m.—B. Y. P. U. meets.
7:30 p. m.—Gospel Service.
Hemlock Road.
2:00 p. m.—Bible School.
3:00 p. m.—Preaching Service.
Frank Metcalf, Pastor.

CARD OF THANKS

We wish to thank the neighbors and friends who have so kindly assisted us since we lost our home by fire, and during the illness of our little daughter, Louise, following so closely the loss of our home. The kindness and sympathy shown have helped us so much during our trouble.

Mr. and Mrs. Chas. Bills.

Don't miss the baseball game between East Tawas and Tawas City at the Tawas City Athletic Field Sunday, June 1.

W. M. TAYLOR WILL SEEK SHERIFFSHIP

W. M. Taylor of this city announced his candidacy for the nomination for sheriff on the Republican ticket. Mr. Taylor has been a resident of this city for the past 21 years and is well known throughout the county.

GIVES HEALTH PROGRAM AT LOCAL HIGH SCHOOL

A health program based upon Indian folk lore was presented in the Tawas City public school on Thursday afternoon by Miss Gladys Morse, a member of the child health education department of the Michigan Tuberculosis Association. Dressed in native buckskin costume, Miss Morse related a group of Indian legends, comparing the struggles of the heroic red men against their foes with the fight that must be waged today against the forces of ill health and disease.

She urged plenty of fresh air, good food with milk, fruits and vegetables predominating, exercise, and long hours of sleep as important aids to health. Good living habits were emphasized in the program as the best preventives against tuberculosis.

Miss Morse tells her health stories under the name Princess Watasia, meaning "Bearer of Happiness." She is a graduate of Michigan State College, where she majored in nutrition work. Her appearance locally was made possible through funds secured by the Michigan Tuberculosis Association in the sale of tuberculosis Christmas seals.

11 WILL GRADUATE FROM T. C. H. S. THIS YEAR

Eleven students will comprise the graduating class this year. The graduation exercises and presentation of diplomas will be made on Thursday evening, June 12.

The following is the class of 1930: Harold J. Hartmann, Martin W. Mueller.

Myrna Lou Sommerfield, Dorothy Jeanne Bigelow, Herbert E. Wendt, Doris B. Kasischek, Charles A. Robinson, Stewart Roach, Elvora E. Kasischek, Ferris I. Brown, Irvin C. Burtzloff.

ALPENA BOYS BROUGHT BEFORE LOCAL JUSTICE

May 15, the D. & M. Lurch, owned by N. Pappas, was entered and a quantity of candy and other merchandise taken. After investigation, Sheriff Charles W. Curry found the guilty parties and they were taken Wednesday before Justice W. C. Davidson. They were, John Gannon, Woody Anderson, Emil Schmeltz and John Baker, all Alpena boys. The boys were charged with petty larceny. They paid for the articles stolen and court costs.

L. D. S. CHURCH

10:00 a. m.—Unified service, consisting of Sacrament Service and Sunday School.
7:30 p. m.—Preaching by the pastor.
7:30 p. m. Wednesday—Prayer Service.
M. A. Sommerfield, Pastor.

NOTICE
The Board of Review of Tawas township will be in session at the township hall on Tuesday, June 3, and on Monday and Tuesday, June 9 and 10.

Henry Anschuetz, Supervisor.

Ladies' Coats now on sale at C. L. McLean & Co. adv

TAWAS CITY WINS OPENER FROM GLENNIE

Tawas City opened the baseball season last Sunday with a game against Glennie at the local athletic field. Glennie, which had established a record of four straight victories previously this season, was the unfortunate victim in the contest, receiving the small end of a 12 to 3 score.

Glennie started the ball rolling by tallying one run in the first frame. With the lead see-sawing from one team to the other, it was nobody's game until the seventh inning, when, with the count 3-all, the locals went on a rampage and before the inning ended had added three runs to their total. This "lucky seventh" was followed by a still luckier eighth, when the local boys continued their hitting spree for six more runs, making the final score 12 to 3.

"Doc" Smith, a new member on the local pitching staff, performed very well on the mound. He allowed the visiting squad but three scattered hits during the first five innings of play, when he was relieved by W. Moeller, veteran Tawas City hurler, who continued the good work by allowing but two hits in the remaining four frames. Lane, Glennie pitcher, held the Tawas City boys well in hand for the first six innings, and had collected a total of nine strikeouts before the locals went on their hitting rampage.

Considering the fine start made by the local nine last Sunday, they deserve the co-operation of local fans in helping them win more games. Next Sunday, June 1, Tawas City will play East Tawas at the local athletic field. Old rivals on the field, this contest will be a fight to the finish, and will be worth coming a distance to see. Don't miss it!

Box score of Sunday's game—

Tawas City	AB	R	H	O	A	E
Boldf, 3b	4	2	1	5	2	0
Laidlaw, c	5	2	3	2	0	0
Swartz, lf	5	0	1	1	1	1
Musolf, 1b	5	0	2	9	1	1
Libka, cf	5	1	2	2	1	0
Davidson, rf	5	2	3	0	0	1
Beebe, ss	4	0	1	2	0	0
Smith, p	2	0	1	2	1	0
Kasischek, 2b	3	3	1	4	5	1
Moeller, p	2	2	1	0	1	0
Totals	40	12	15	27	16	4

Glennie

Glennie	AB	R	H	O	A	E
Carter, c	4	1	0	11	2	0
D. Ford, lf	3	1	0	1	0	0
Lane, p	4	0	0	2	0	0
Gray, 3b	4	0	2	1	2	0
Railer, cf	4	0	1	0	0	0
K. Ford, rf	3	1	0	0	0	0
Wagerly, 1b	4	0	1	8	0	3
Mattis, ss	4	0	0	1	1	1
Horton, 2b	4	0	0	3	0	0
Totals	34	3	5	24	7	4

Summary: 2-base hits—Musolf, Libka, Davidson. Sacrifice hit—Railer. Double plays—Boldt to Musolf; Libka to Moeller to Laidlaw. Stolen bases—Boldt, Laidlaw, Beebe 2, Smith, Kasischek, D. Ford, Gray. Bases on balls—off Smith, 1; off Moeller, 1; off Lane, 1. Hit by pitcher—by Lane, Kasischek. Hits—off Smith, 3 in 6 innings; off Moeller, 2 in 4 innings; off Lane, 15 in 8 innings. Umpires—E. Benson and A. Bigelow.

"THE LOVE PARADE" IS MODERN IN THOUGHT

Although "The Love Parade," the talking screen's first original musical romance, coming to the Family Theatre, East Tawas, Saturday and Sunday, is a costume production, it is as modern as tomorrow's newspaper, according to Ernst Lubitsch, who directed it.

The story deals with the love of a queen for a prince, but she is a modern queen and he is a very modern young man. The fact made the problem of costuming a difficult one.

This problem was solved by the Paramount designers by basing all the costumes on fashion trends that are indicated for the coming season, elaborating here, modifying there, and lending to all a richness ordinarily lacking.

Maurice Chevalier is starred in "The Love Parade," which features a large cast of musical comedy and screen favorites including Jeanette MacDonald, Lupino Lane, Lillian Roth and Eugene Palette.

Hear and see this on our screen Saturday or Sunday, May 31 and June 1.

A Mystery Drama

Evelyn Brent, called the "queen of melodramas" because she has always been identified with dramatic, serious roles, plays another thrilling character in her latest, all-talking picture, "Darkened Rooms," which will show at the Family Theatre on Monday and Tuesday. The picture is based on a new novel of the same name by Sir Philip Gibbs and, in it, Miss Brent has her first starring role, with Neil Hamilton.

Our tone-o-graph is a great success. Don't miss our programs.

Baseball! East Tawas vs. Tawas City, at Tawas City Athletic Field, Sunday, June 1, at 2:30.

Baseball! East Tawas vs. Tawas City, at Tawas City Athletic Field, Sunday, June 1, at 2:30.

EAST TAWAS NEWS

Leonard and Donald Ingalls of Detroit spent the week end in the city with relatives.

Misses Janice Bigelow and Margaret Holbeck spent Saturday at Bay City.

Harry Hagstrom of Detroit came Saturday to spend a few days with his sisters, Mrs. John Anderson and Miss Selma Hagstrom.

John Johnson of Detroit is in the city for a few days.

Mr. and Mrs. Arthur Dillon are rejoicing over the arrival of a baby daughter on Friday, May 23.

Mrs. Ernest Gregory of Midland is visiting with her daughter, Mrs. Herbert Phelps, in Wilber.

James Larkins, who has been visiting in Detroit for a week, returned home.

Place your order now for wreaths, potted plants, gladioli bulbs, and perennials. Hanson's Flower Garden.

Mr. and Mrs. Robert Lynd and daughters of Birmingham spent Saturday and Sunday in the city.

Mrs. Chas. Dimmick and son, Joseph, spent Saturday in Bay City.

Aaron Barkman, who is attending school at Bay City, spent the week end in the city with his parents.

Dr. R. C. Pochert is entertaining his brother, Darwin, of Detroit over the week end.

Mr. and Mrs. D. St. Martin of Bay City spent Sunday in the city with their father, P. St. Martin.

Mrs. B.

Indian Rioters Being Clubbed by Policemen

This picture, taken at Girgsum, India, shows native policemen charging a mob of riotous followers of Mahatma Gandhi and dispersing the crowd by free use of their clubs.

What the Well Dressed Dartmouth Boys Wear

Here is an array of Dartmouth students showing how shorts may be adapted for wear on every occasion. The revolt against the conventional trousers is sponsored by the college paper. Many college athletes, including the football hero, Al Marsters, have come out "for the freedom of the knees." These students are showing how shorts may be worn for school, for afternoon wear, for study, for formal occasions, "pour le sport," for semiformal attire and for the campus.

Joan of Arc Ceremony in Orleans

With surplises and cassocks fluttering in the breeze and being dampened by a drizzle, high churchmen participated in a religious procession through the streets of the ancient town of Orleans, France, to commemorate the immortal Joan of Arc. In the background may be seen the historic cathedral of Orleans where the Maid is said to have paused for prayer.

AROUND THE WORLD

An old Roman theater, erected after the conquest of Carthage, has been uncovered in Sabratha, Libya, by Italian archeologists. This was once an important grain shipping point.

According to the Bucharest newspaper, Universul, nine persons were killed, fifty-nine seriously injured and several hundred slightly hurt during the last municipal elections held simultaneously in all towns and cities in Rumania.

Aix-les-Bains, France, is famous for its healing waters. It is said that Caesar went there to cure himself of rheumatism.

Ever since the first United States census was taken there have been more men than women in the United States.

Queen Mary, in opening a clinic for the treatment of rheumatism, released a valve controlling the flow of water into a treatment pool formerly used as the baptismal pool of a Baptist chapel.

MORROW'S OPPONENT

Franklin W. Fort of East Orange, N. J., who is opposing Dwight W. Morrow for the Republican nomination for United States senator from New Jersey for the term beginning next March.

NEW CABINET AIDE

An especially posed portrait of Col. Frederick Huff Payne, newly appointed assistant secretary of war.

WHAT BRIDESMAIDS WILL WEAR; CHIC PRINT JACKET COSTUMES

WITH such a wealth of entrancing materials as the fabric field offers for the fashioning of frocks for the bridesmaid this season, fancy is given free range to choose "the one you love best," tuning your selection, of course, to the wedding scene from a pictorial viewpoint.

There are, however, certain fabric trends which it is well to keep in mind, before making a final decision in regard to media for the gowns—beautiful which the fair attendants of the bride will wear. An outstanding choice, this season, is lace, another is

silhouette of bouffant skirt and short-waisted fitted bodice.

Jacket Costumes Popular. The jacket costume has become a staple so far as the wardrobe of the fashionable woman is concerned. The interesting feature about these practical wearable ensembles is the materials of which they are made. The fact that most of the newer weaves are washable is almost unbelievable, considering the handsomeness of their appearance.

Here's some of the stunning weaves which go to make up the swanky

Typical Bridesmaids' Costumes.

organdie and if we may venture to suggest a third it is printed cotton net. Not that taffeta, silk crepe or satin, chiffon, tulle, moire and a continued list of lovely weaves have become obsolete. No, indeed! But notwithstanding the lure of these materials, many stylists are turning to organdie, net and lace as being "different" from the usual choices.

Now that the entire fashion world is in the throes of an acute lace-consciousness it follows in natural sequence that many of the maids attending June brides will be lace-clad. Thus it is that lace fine as cobweb and patterned with intriguing all over florals, reflecting also every lovely tone and tint, is, at this time, providing a new theme for the creator of wedding party frocks.

The charm of lace is accentuated in the beguiling gown pictured above to left. The long single streamer of self-lace offers endless possibilities in the way of graceful gesture as the cortege keeps step to the joyous strains of the wedding march. Then too, the several gowns, being in orchid, blue, rose, perhaps also maize and pale green, play a most effective color

Jacket costumes which "everybody's wearing" these days—pique in brown, black, or navy, shantung in dark-suit colorings, allover embroidered effects on linen or pique and in printed design, shantung patterned in vivid motifs, embroidered crepe, also silk-embroidered pique and legions of printed crepes.

Designers are in a mood to "make it snappy" when it comes to color for these now-so-chic jacket costumes. They emphasize color in two ways, either through the sprightliness of the print itself or by adding accessories which splash color in "spots" from head to foot. A jacket and skirt of brown linen, per example, with a blouse of orange handkerchief linen, a hat also in tones of orange, adding a pocketbook and scarf of orange, egg shell and brown print fabric, is sure to present a most striking color study.

Then again the message of color is carried through the print of the fabric in a manner as convincing as the picture herewith reveals. In this instance every item from dress to hat, blouse and scarf is highly colorful. As to just how colorful one's costume is, depends largely upon the

Jacket Costume in Colorful Print.

symphony. The diaphanous beauty of the ensemble is accentuated by draped wide-brim capelines of transparent hair braid, the trimming of these chapeaux tuning in to the general color scheme.

Designers are all enthusiastic in regard to organdie this season, especially for bridesmaid wear. The quaint gown in the picture to the right has hand-painted clusters of flowers painted on the organdie, the piping about the scallop being variously keyed to the general color scheme. The poke bonnet is of filmy lace, and its quaintness is supplemented with puff sleeves, a prim bouquet and a

print of which it is fashioned. For instance, some of the smartest town suits for summer are made of dark washable printed fabrics which space little figures in gay lines over navy red, black, brown, or perhaps dark green backgrounds.

With these clever jackets and skirts of handsome print, the blouse is playing a most sensational role. Dotted swiss, handkerchief linen, pique de soie, organdie, embroidered batiste are but a few of the weaves of which smart blouses (especially tuck-ins) are made.

Dr. J. D. KELLOGG'S REMEDY

Two Mysteries of the Plains

By ELMO SCOTT WATSON

OUT in Kansas plans are under way to erect a marker where once stood Fort Aubrey and to preserve its site as a memorial to a thrilling chapter in the history of the Sunflower state. Fort Aubrey was named in honor of Col. F. X. Aubrey, who found several springs of fresh water there and suggested it as a good place for a fort. Although the outpost which once bore his name has long since passed away, the fame of Felix Xavier Aubrey, French-Canadian by birth but an American hunter, trapper and trader by occupation, has endured because he was the hero of one of the greatest long distance rides in history—from Santa Fe, N. M., to Independence, Mo., a distance of more than 800 miles, in five days and sixteen hours.

Early in the morning of September 12, 1846, Aubrey rode out of Santa Fe for the start of this classic of the plains. From the morning of the start until Independence was reached he stopped neither to eat or sleep, and on at least three occasions during his ride narrowly escaped capture and death at the hands of Indians. He ate while riding, and after the second morning out he tied himself into the saddle and snatched bits of sleep at times.

Late at night on September 17, five days and sixteen hours after leaving Santa Fe, Aubrey rode up to the old Nolan House in Independence. He had traversed 800 miles by horseback in that length of time by 136 hours of continuous riding and traveling 140 miles each 24 hours.

Fort Aubrey was established in September, 1856, about four miles east of the present city of Syracuse, Kan. During its brief career it was an important post on the historic Santa Fe Trail, for it was the only refuge for wagon trains, harassed by Indian attack, in the 150-mile stretch between Fort Dodge, Kan., and Fort Lyon, Colo. It was garrisoned by United States troops for a time and then, the necessity for its being there having apparently passed away, it was abandoned. At least it passed out of the army records about 1858 or 1859.

Interesting as Fort Aubrey was as a haven for those who traversed the Santa Fe Trail by stage coach, covered wagon or pack train when the savage tribesmen swooped down, it is even more interesting because it is the scene of a tragedy of the plains which is still one of the unsolved mysteries of the Old West. For here one day in December, 1863, a party of 22 Missouri militiamen froze to death in a fierce blizzard which swept over western Kansas. What their names were and just how they met their death no one knows. Local tradition has preserved part of the story and the military records throw some light on the tragedy, but there is still enough left untold to make it a true "mystery of the plains."

The local tradition part of it has been preserved by a Syracuse merchant, H. Helfrich, a pioneer homesteader and the Socialist candidate for governor of Kansas in 1926, whose hobby is the history of his county. He got the story from R. T. Goans, who was a member of the party caught in the blizzard and who assisted in the burial of the dead.

Mr. Goans told Mr. Helfrich three companies of cavalry, an escort of Governor Goodwin of Arizona, left Fort Leavenworth in the fall of 1863 to accompany the governor to Fort Union, N. M. He said they arrived safely at their destination, but were separated on their way back and that, while camping in the ruins of Fort Aubrey, 22 men of Company I froze to death.

Records of Fort Leavenworth and the Arizona Historical society show Governor Goodwin, the first governor of Arizona, left Fort Leavenworth September 25, 1863, escorted by Companies A and H of the regular cavalry, and Company I of the Fourth Missouri militia. The expedition was in charge of Maj. James A. Phillips of Kansas, with Lieut. Peter F. Clark, Capt. John H. Butcher and Capt. Daniel Rice in command of the companies. They arrived at Fort Union, N. M., November 9 and left November 11. They reached Fort Lyons, Colo., November 23, in a snowstorm. On this part of the trip they lost several horses and some of the men were frostbitten. The party remained at Fort Lyons eight days and from that time there are no more records of Company I.

Mr. Helfrich believes that a disagreement among the soldiers at Fort Lyons caused Company I to split from the rest of the command. Companies A and B reported at Fort Riley on December 23, having lost one by freezing. They also reported much suffering from the heavy storms which they encountered.

As for the fate of Company I, ac-

Relics of a Tragedy

The Last Stand

According to the Goans story, these militiamen reached the site of Fort Aubrey about December 1 and camped in the old dugouts of the fort. While there the blizzard swept down upon them. Huddling together in an effort to keep warm and burning their wagons they tried in vain to fight off the deadening cold. But it was no use. When morning came 22 of them were dead. According to Goans, they were all Frenchmen, naturalized citizens of the United States, without near relatives in this country, but if there ever existed any record of their names that record has not yet been discovered.

From up in North Dakota comes the story of another and similar tragedy. What is believed to be the first printed account of it appeared recently in the Geauga Republican-Record at Chardon, Ohio, written by its editor, Arthur E. Towne. As a small boy, Mr. Towne went to the Dakotas with his parents in the eighties and this story is one of several told to him by old timers in that country, which he has written under the title of "Highlights from Old Days in the West" for the Republican-Record. His story of the mystery surrounding the death of a whole platoon of United States cavalry reads as follows:

"In the fall of '62 the first venturesome settlers penetrated into Dickey county in what is now North Dakota, one of the most beautiful pieces of prairie country in the James river valley. Two chance land hunters whose names may now be lost, unless they can be dug out of the old files of newspapers published at that time in Aberdeen, were prospecting in that region.

"One evening as they were heading towards the river in search of a good camping place, they passed a grass-grown buffalo wallow. Here there burst upon them a sight which they probably never forgot. The circumference of the wallow was literally lined with bones of men and horses, other skeletons lay within the circle.

"Although the bones had been scattered some, investigation indicated that the horses had been used for defense in place of earthworks. United States army buttons and brass belt buckles were found, also badly rusted barrels of muzzle loading guns of the old army musket type, with their stocks rotted away or burned away by prairie fires. Rusted bits, iron stirrups, canteens and other metal parts of soldiers' equipment were also found here—all of which went to show that this was a troop of United States cavalry.

"Reports made at the time stated that the skeletons of 28 men and a like number of horses were found, but nothing was discovered that showed to what regiment or company this troop belonged. If this was the result of a battle, it is probable that the Indians carried away anything of the soldiers' equipment that struck their fancy. This would account for nothing remaining that would identify the troop.

"The bones looked as if they had been bleaching in the sun for years and years. Inquiry was made, some time after, of various members of Drifting Goose's band of Sioux, located on the reservation west of the Missouri. These Indians once claimed the territory in what is now Spink county and vicinity. They had their main village on Armdale island in the James

river some sixty miles to the south of this tragic spot. The Indians could throw no light on the subject, and it may be that this fight occurred before their advent here.

Among the theories advanced to account for the wiping out of this cavalry troop is one to the effect that these men perished in a blizzard. What gave rise to this idea was the fact that no broken bones or perforated skulls, showing the effects of gunfire, were found. From this the idea was gathered that these men and their mounts did not perish in battle. The story went around that these men were a part of a cavalry regiment stationed at some post along the Missouri, about the time of the outbreak of the Civil war. That they were either recruited from the South or were with the South in their sympathies, that they had deserted sometime in March of '61, and headed for the James river with the view of working their way down into the Confederate states by that route.

"The theory was that this was the safer route, as the army trails generally followed the Missouri, and there would be much greater danger of pursuit and capture, if they traveled that way. That on their way to the James they were overtaken by a blizzard and, being lost and bewildered in the driving snow, and in imminent danger of freezing, they had, on stumbling on this buffalo wallow, buried themselves in the snow, which would be deeper there in the hope of preserving their lives until the storm abated, but because of the intense cold, they perished to a man. Not so far away was the river, with high banks which would have afforded some shelter, and there was plenty of wood for fires, so that they might have escaped had they traveled a little farther with their backs against the storm.

"However, old army officers who had spent most of their lives on the plains, say that they never heard of desertion on any such a wholesale scale. Neither had they ever heard of a cavalry troop riding out into the vastness of the plains and vanishing so completely, and for so long a time, that even the circumstances of its departure and the mystery of its utter disappearance were forgotten.

"That this was a United States cavalry troop, however, is practically certain from the odd pieces of equipment found. The fact that the bones were lying on the prairie just where the troopers gave up their lives, indicates that this detachment was never located by the command of which it was a part, since the United States army always buries its dead.

"Whether this troop belonged to General Sully's army, which fought in the Little Crow war, or a scouting party of Minnesota troops which participated in the same conflict, is a matter of conjecture.

"This unknown battle of the buffalo wallow may have been one of the many fights which occurred along between the late sixties and the Custer massacre in 1876, when the plains Indians were making their last desperate attempt to retain the prairies for themselves. But who these men were, or whether they perished in conflict with the red warriors of the Sioux nation, or with the white armies of King Winter is still, so far as we know, one of the unsolved mysteries of the plains.

THEIR ELOPEMENT PROVED A FAILURE

(By D. J. Walsh.)

MARY ELLEN was running away with her father's best friend. She felt warm and excited in her new blue suit and she gazed demurely straight ahead at the road that was unwinding before them.

"Happy, Mary Ellen?" her companion queried, smiling fatuously at her. He was florid and somewhat stocky and his eyes held a too bright gleam.

"Yes, Mr. West," Mary Ellen agreed respectfully.

"But you promised not to call me—Mr. West, little Honeybunch," he chided her.

"Oh! yes," Mary Ellen sighed. "But you see I've called you that all my life. It—it doesn't seem exactly respectful to call you—John."

Mr. West laughed loudly.

"You'll get over all that when you're my wife and mistress of a farm—you'll be mistress of two farms when your old man cashes in."

Mary Ellen was silent, a vague hurt creeping beneath her ribs. She didn't exactly like Mr. West to talk about her father like that.

She wondered if she would like being married. It had been rather fun lately to have Mr. West bring her boxes of candy and smile at her as if she were chocolate cake or peach ice cream. It would be fun, too, to play with his children. Jack was just a year older than herself. It had been lonely at her home with her folks so strict and not letting boys come to see her. Father had laughed and mother had smiled at Mr. West's boxes of candy. She wondered what they would say when they knew she was really married.

"Only ten miles farther to this here town where we're going to get hitched up," Mr. West orated, sending his fluster forward with a little burst of speed.

Mary Ellen jumped. She had been looking at the pretty houses they were passing. She was sorry the ride was almost over.

Mr. West somehow did not appear as much a man of the world in the city as he had up on the farm. He didn't know in which direction the city hall was, and when he inquired of a traffic cop he winked at him and tried to be funny.

At the city hall an old-maidish looking woman surveyed them keenly and asked a lot of senseless questions.

"How old are you?" she queried of Mary Ellen.

"Eighteen, come last June," Mary Ellen replied promptly.

The woman yanked the sheet out of her typewriter with a jerk.

"I can't issue you a license—you're too young. Have to be twenty-one."

Mary Ellen thought that the woman's eyes rested upon her rather pityingly. It wasn't as if she were sorry about her not getting married, but as if she were sorry about something else.

A man whispered something to Mr. West as they went out.

"Go over the border. The age over there's eighteen."

Mary Ellen sighed. She was getting tired, and she had thought that what the woman said would settle the matter and she wouldn't have to get married.

After all marriage might not be as pleasant as people hinted by laughs and winks.

They scuttled along over bumpy roads, and after asking the way several times located an ivy-covered court house.

Another couple were there ahead of them. The girl was just a little older than Mary Ellen, but the boy was very different from Mr. West. He was tall and straight and sun-tanned, and when his blue eyes rested on the girl they lighted up like church windows.

Mary Ellen suddenly noticed how very red Mr. West's cheeks were and how his eyes were imbedded in little puffs of fat. His coat sagged where the boy's shoulders held his nice and straight.

she read her initial best seller a month ago.

"Tell them we came to dinner in town and had tire trouble," she improvised. "And—and you might as well get me the dinner, for I'm hungry."

She was all of a sudden gloriously happy that she was not getting married and could still look for a hero like the blond bridegroom at the court house.

Mr. West, reflected Mary Ellen, tired and got peaked-looking easily. Probably he'd better look for a heavier woman to run his farm and handle his young 'uns.

Plane Far Outclassed by Feathered Marvels

In flying efficiency the bird is far superior to the most modern plane, though the bird wastes considerable energy in its aerial journeys, while the plane wastes none.

The bird's forward motion of the wing after the downward stroke is an uneconomical way of applying power, because the stroke is wasted, and the air friction increased. As a result, speed is retarded. On the other hand, the propeller of a plane has no lost motion.

Yet less than two ounces of fuel in the form of fat is sufficient to carry a small bird at a high rate of speed over a course of 2,400 miles, according to scientists. A thousand-pound plane, if as economical of fuel, would consume only a pint of gasoline in a 20-mile flight instead of many gallons.

A vulture or crane, after a few preliminary wing beats, is able to accomplish something beyond any plane yet invented. Setting its wings, it is able to mount in sweeping circles to a great height, overcoming gravity without exertion. Both the soaring and sailing birds are proficient in the use of several factors in the art of flying that have not been mastered in principle or practice by the most skillful aviators.

The size of the wings seems to make no difference in the migratory flight. Though the Carolina rail has small, short wings, apparently ill adapted to long journeys, it crosses the Caribbean sea with ease. The hummingbird, whose wings move so fast they cannot be seen, crosses the Gulf of Mexico, a distance of 500 miles, in a single night. In fact, birds with small wings, with the exception of the rail, are invariably faster than their long-winged consorts.

The hummingbird is capable of a trick that probably never will be met by the plane. When extracting the nectar from flowers, it finds it necessary to fly backwards. Nature still maintains her supremacy in the air over man.

First to Use Coal Oil

The first to introduce the use of coal oil, or "kerosene," in the United States and Canada was Dr. Abraham Gesner, a distinguished Canadian geologist. Doctor Gesner, after long experimentation, discovered how to produce oil that could be used in lamps for illuminating purposes, from bituminous shale and canal coal. Though he gave the name "kerosene" to his discovery it was popularly called coal oil.

Following the discovery of petroleum in Pennsylvania in 1859, and later in many other sections of North America, kerosene became the principal product of the distillation of the crude oil. Like most inventors, Doctor Gesner reaped little financial benefit from his discovery, which was destined to be the foundation of scores of immense fortunes.

Tobacco in History

The tobacco plant was taken to Europe in 1558 by Francisco Fernandes, who had been sent by Philip the Second of Spain to investigate the products of Mexico, Jean Nicot, the French ambassador to Portugal, sent seeds of the plant to the queen. The services rendered by Nicot in spreading a knowledge of the herb have been commemorated in the scientific name of the genus Nicotiana. While the plant came to Europe through Spain, its use for smoking purposes spread to the continent from England. Ralph Lane, first governor of Virginia, and Sir Walter Raleigh, who first used it as smoking tobacco, introducing it into England.

Might Be Trained to Return

A new dollar bill was recently put into circulation to find out how much work a dollar does. Attached to the bill was a note asking each successive holder to write down the transaction for which he used the money. In 14 days the dollar changed hands 26 times as follows: Five times each for salary, tobacco and cigarettes; three times for candy, two times for men's furnishings and shaves, and one each for automobile accessories, bacon, garters and tooth paste.—Wall Street Journal.

Made Shad Roe Popular

Sixty years ago, customers of New York restaurants considered shad a delicacy but there was little demand for the roe. This state of affairs was changed, however, when a chef went to market one day, saw the roe tossed aside, bought some and prepared them with green peas and a neatly potato as a special dish, which sold for 25 cents. The dish took the fancy of the customers and became a Friday feature.—Detroit News.

Count Assets in Billions

The estimated total assets of the 45 largest life insurance companies of America at the close of business, December 31, 1928, were over \$12,000,000,000.

Gets No Credit for World Record

Jack Barstow, twenty-four, first-class glider pilot and gliding instructor (left), being congratulated by Clyde Freeman, vice president of the Bowlus Sailplane company, after Barstow had exceeded all world official and unofficial endurance glider flights by remaining aloft over Point Loma, Calif., in a Bowlus sailplane for 15 hours and 13 minutes. Absence of a barograph in Barstow's craft deprives him of official recognition for his flight.

WEST POINT OF AIR DEDICATED IN JUNE Randolph Field in Texas Huge Flying School.

San Antonio, Texas.—An outstanding event in the history of aviation will take place June 20 and 21 when Randolph field, the world's largest flying school, will be dedicated. Located seventeen miles northeast of San Antonio on the Old Spanish Trail, "the West Point of the air" covers 2,300 acres and will cost millions of dollars. \$11,000,000 of which has been appropriated by congress and is now available.

Eventually the government expects to spend between \$30,000,000 and \$40,000,000 on the project. Operating at an annual cost of over \$10,000,000, this training center will be the most complete and modern in the world.

Elaborate plans are being made in San Antonio for the dedication of the field. The dedication ceremonies will take place at 10 o'clock on the morning of the 20th. Over 200 military planes from Brooks and Kelly fields, Fort Crockett and Fort Sill will be in the air at one time, flying in formation and performing various maneuvers.

On the morning of the 21st the June class will be graduated from Kelly field and special maneuvers are being planned for the members of the class. One hundred planes will take part in the exhibit.

Unique Design of Field.

The design of the field is unique in that the building area is located in the exact center of the field. The flying area, surrounding on all four sides the almost square building section, is crossed by only one road, that being the wide entrance driveway that leads from the Old Spanish trail to the building areas.

The flying area, comprising 1,625 acres, will provide from 3,000 to 10,000 feet of landing field for ships landing or taking-off from any side of the field against wind from any direction. An extensive study has been made of the wind currents, and the runways will be built in accordance with the prevailing breezes, which come from the southeast during eight months of the year.

The only tall building, the administration building, is located in the center of the circle at the entrance to the building area.

The artery for traffic will enter the building area at the center of its northwest boundary and divide at the small entrance circle, forming a large circle 2,500 feet in diameter around the center of the post. The officers' clubhouse, located in the exact center of the circle, will serve as a hub, and the officers' quarters will radiate from the center as spokes of this gigantic wheel.

The remainder of the buildings in the area are located in the square which surrounds the circle. The entire building area includes 475 acres. Diagonal roads from the center to the outside give a spider-web effect to the layout.

Tribute to Texas Flyer.

Randolph field is a tribute to Capt. William M. Randolph, adjutant of Kelly field. He met his death in a crash September 17, 1928, while on a cross-country flight. He was born in Austin, Texas, September 9, 1893, and had served in the army from before the World war until the time of his death.

Aeronautical instruction now in progress at the primary flying schools Brooks and March fields will be brought together at this field along with the advanced training now being given at Kelly field. The personnel to be stationed at Randolph field will consist of 350 officers, 500 flying cadets and 2,000 enlisted men. Inclusive of the families of the married men on the field the post will contain 5,000 people.

Huge Hangar

Not a post or pillar breaks the 7,800 square yards of floor surface in the Munich municipal airplane hangar at Oberwiesenthal. The building can be opened completely on three sides and can accommodate airplanes of any size.

Aerobus Service Given to Paris Hotel Guests

Paris.—The hotel aerobus has come. A famous Paris hostelry has acquired two planes for the convenience of its patrons.

The machines start at any hour. The larger will fetch patrons with their baggage from the boat at Cherbourg or convey them to London, Berlin, or Madrid. The smaller is available for short journeys for golfing or gambling at such resorts as Deauville or Le Touquet.

MAGYAR PLANS HOP ACROSS THE OCEAN

Will Try Nonstop Flight, Detroit to Budapest.

East St. Louis, Ill.—Lieut. Alexander Magyar, wartime Austrian bombardment pilot who intends to fly nonstop from Detroit to Budapest in a Lockheed Sirius monoplane in June, has been doing his preparatory work at Parks Air college here. He spent several hours in the air daily familiarizing himself with controls after almost four years of aerial inactivity, and did intensive work in navigation under the direction of Ensign Norman Anderson, U. S. N. R.

Lieutenant Magyar will be accompanied by Lieut. George Endres, Austrian commercial pilot and wartime pursuit flyer. The Lockheed in which they will make the trip is identical with the ship in which Colonel Lindbergh established a new transcontinental speed record recently.

Magyar's flight is sponsored by Hungarian-American societies in Detroit, Toledo and other American cities as well as by similar organizations in Canada. It is designed to draw attention to the dismembered state of Hungary which lost more than two-thirds of its total area through the Treaty of Trianon after the World war.

Magyar intends to take off from Detroit with a comparatively light gasoline load about June 15. He intends to refuel in the air at St. Johns, Newfoundland, and from that point will continue across the ocean. If necessary he will refuel again in Ireland but under normal conditions his ship is capable of a nonstop flight from St. Johns to Budapest with a comfortable margin of safety. The distance from Detroit to Budapest is 4,500 miles.

Navy Obtains Fastest Bomber in the World

Washington.—Accomplishing a feat which never has been attempted before, a bomber built for the navy by a Baltimore company made a vertical dive of 6,000 feet with a full load including a 1,000-pound bomb, levelled off without releasing the missile and then was put through a series of stunts by the pilot to demonstrate its strength and fighting ability.

The new plane gives the United States navy the fastest bombing plane in the world and when placed in production will give the navy the most powerful bombing fleet of any nation. The planes will be able to hurtle out of the clouds, drop their bombs squarely on the decks of the enemy ships and return to a safe level in but a few seconds, it is said, the release of the bomb enabling the bombers to climb even more rapidly than present-day attack planes.

Carrying machine guns and standard fighting plane equipment, the bomber, after it has released its missile, may enter the aerial battle as an attack plane or return to its base for another bomb. The plane already has been accepted by the Navy department.

Minimum Age for Mechanics

Washington.—The minimum age requirement for airplane mechanics has been placed at eighteen and no licenses will be issued to mechanics who have not attained that age, according to an announcement by Clarence M. Young, assistant secretary of commerce for aeronautics.

The commencement exercises were held last Friday night with a class of 16 receiving their diplomas from the twelfth grade. Mr. Bush, assistant Superintendent of Public Instruction, was the speaker.
The Junior class of our high school entertained the Sophomore class with a May morning breakfast at the Jacques cottage at Sand Lake Monday morning at 6:30 o'clock.

Origin of Dominoes

Dominoes was invented by two French monks, who amused themselves with square flat stones, marked with spots. The winner declared his victory by reciting the first line of the Vesper service, "Dixit Dominus Domino Meo." When, later, the game became the recreation of the whole convent, the Vesper line was abbreviated into "Domino," and the stones themselves received the name of "Dominoes."

For Some People

"De sunrise is sho' beautiful," said Uncle Eben, "but de trouble is dat it allus starts too early in de mornin'."—Washington Star.

HALE

S. F. Boyer of Library, Pa., spent the week end visiting at the home of his daughter, Mrs. John Webb. Boyer, who had been here for two weeks, returned home with her husband on Monday.
Announcements have been received by Hale friends of the birth of a baby girl o Thursday, May 22, to Mr. and Mrs. Paul Labian of Flint.
Mrs. Alice T. Sabin is reported very low at this writing. She has been in a serious condition for the past week.

Mr. and Mrs. O. Hayner and Mr. and Mrs. Hetka, all of Lansing, were week end guests of Mr. and Mrs. Chas. Taulker.
Mr. and Mrs. Guy Tift of Sand Lake spent Sunday with Mr. and Mrs. Jesse Shellenbarger.
A boy was born to Mr. and Mrs. H. Johnson on Wednesday, May 21, who has been named Nelson Edwin.
David Bernard, W. M. of Hale Lodge No. 518, F. & A. M., is representing his lodge at the Grand Lodge sessions held in Jackson this week.

American Invention

Rev. Jonathan Goble, an American Baptist missionary, invented the jirikisha in 1871. He was in Yokohama at the time and devised it as a vehicle in which his invalid wife might take the air.

MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage made by John Soloduha and Mary Soloduha, his wife, of Baldwin township, Iosco county, Mich., to Ealy, McKay and Co., dated the 10th day of April, A. D. 1923, and recorded in the office of Register of Deeds for the county of Iosco, and State of Michigan, on the first day of May, A. D. 1923, in Liber 27 of Mortgages on page 21. Said mortgage was duly assigned on April 30, 1925, to First National Bank of Bay City, Michigan, said assignment being recorded May 4th, A. D. 1925 in the office of the Register of Deeds for Iosco county in Liber 26 of Mortgages on page 302, on which mortgage there is claimed to be due at the date of this notice, for principal and interest, the sum of Two Thousand Nine Hundred Ninety-one and 21/100 Dollars, and an attorney's fee of twenty-five (\$25) dollars, as provided for in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage, or any part thereof, NOTICE IS HEREBY GIVEN, that by virtue of the power of sale contained in said mortgage, and the statute in such case made and provided, on Saturday, the second day of August, A. D. 1930, at 10 o'clock in the forenoon, the undersigned will, at the Court House in the city of Tawas City, that being the place where the Circuit Court for the county of Iosco is held, sell at public auction, to the highest bidder, the premises described in said mortgage, or so much thereof as may be necessary to pay the amount so as aforesaid due on said mortgage, with seven per cent interest, and all legal costs, together with said Attorney's fee, to-wit: The Northeast quarter of the Southeast quarter, excepting highway, in section eleven (11), and part of the Southwest quarter of the Southwest quarter of section twelve (12), both in Township twenty-two (22) North, Range seven (7) East, described as commencing at the intersection of the highway, and West section line of said Section Twelve (12), thence south on the highway to the southwest corner of said section, thence east along the south section line to the highway known as the Baldwin road, thence northwest along said highway, to the place of beginning, excepting one acre of land deeded to School District No. three (3) of Baldwin, according to deed recorded in Iosco county Register of Deeds' office in Liber 55, page 355, containing fifty-eight (58) acres of land, more or less.
Dated May 7, 1930.
First National Bank of Bay City, ASSIGNEE.

It Puts the "Brakes" On His Expenses . . .

Speaking about the values of a checking account, one of our friends told us through the window the other day that his checking account saves him considerable money. "I notice it puts the brakes on my spending," he said. And we thought that was a pretty good way to express it.

You know how it is. When you have a pocket full of loose change or a roll "on your hip," it slips away before you realize it. With a check book, however, it's different. You hesitate quite a little while before you write a check. We'd like very much to open a checking account with you, because we know you'll like the system.

THE NEW Maytag

The New Maytag Aluminum Washer is the crowning achievement of The Maytag Company. It embodies the skill, the resources and the best ideas of the Maytag organization. It exemplifies the highest development of a domestic washing machine for the home. No other washer so completely fills the need of the housewife. The New Maytag is the result of patient and painstaking engineering skill developed along the lines that would serve the user best. It is impossible here, with mere words, to do the New Maytag justice. The power of description falls short in its effort to give you a graphic picture of this greatest of all washers, to outline its higher qualities and points of greater superiority.

Mr. and Mrs. Chas. Katterman called on Mr. and Mrs. Seafert on Wednesday.

Ernest Crego was a business visitor at Tawas Friday.

Mrs. A. Waters, son, John, and daughter, Elsie, visited her sister, Mrs. David Cooper, and family at East Tawas Sunday.

Mr. and Mrs. Josiah Robinson and son, Lyle, spent Friday evening with Mr. and Mrs. Bentley.

Mrs. Harry Latter and daughter, Marion, went to Detroit Monday in response to a message that Miss Clara Latter was very ill.

Mr. and Mrs. Chester Smith, Mr. and Mrs. Zimmerman of Flint, were Sunday visitors here. Mr. Smith and Mr. and Mrs. Zimmerman returned Sunday, Mrs. Smith remaining for a week's visit at the parental home.

Mr. and Mrs. Will White moved into their new house last week.

Northern Islands

The following islands are among those farthest north: Axel-Heiberg I, Alexandra land, Hooker island, McClintock island, Siam island, Franz Josef land and Leninland. These islands are either partially or entirely within the unexplored portion of the Arctic circle.

How They Change

Time was when an unmarried woman kept very quiet about her state. Now she proclaims it aloud and aloft. —Woman's Home Companion.

Long Name Shortened

Cape Ann was first named Cape Tragabigzanda on Capt. John Smith's map of New England in memory of a woman who befriended him while he was held a slave by the Turks in his youth.

NOTICE OF MORTGAGE SALE

DEFAULT having been made in the performance and payment of a certain mortgage dated April 11, 1924, made and executed by Fielden T. White and Alida E. White, his wife, of Prairie Depot, Ohio, to Linus W. Oviatt of Bay City, Michigan, which mortgage was recorded in the Iosco County Register of Deeds' office on the 5th day of May, 1924, in Liber 22 of Mortgages on page 459, and assigned by an assignment dated May 6th, 1924, to the Bay County Savings Bank of Bay City, Michigan, which assignment was recorded in the Iosco County Register of Deeds' office on May 7th, 1924, in Liber 2 of Mortgages Assignments on page 309; and the sums of \$2380.00 as principal, \$226.88 as taxes, \$30.03 as insurance, and \$343.02 as interest on principal, taxes and insurance, being now due, to which is added an attorney fee of \$25.00 as provided by the terms of the mortgage, and as no suit or proceedings have been instituted at law to recover the debt now claimed to be due on said mortgage, said mortgage, by virtue of the power of sale therein contained, will be foreclosed by the sale of the premises therein described at public auction at the front door of the court house in the city of Tawas City, County of Iosco, State of Michigan (that being the place where the Circuit Court for the County of Iosco is held) on the seventh day of June, 1930, at ten o'clock in the forenoon, Eastern Standard time, which premises are described as follows: All that certain piece or parcel of land situated in the Township of Plainfield, in the County of Iosco and State of Michigan, and described as follows, to-wit: The North one-half (N 1/2) of Northwest one-fourth (NW 1/4) of Section Fourteen (14), Town Twenty-three (23) North and of Range Five East (5E), containing 80 acres more or less, according to the government survey thereof.

COUNCIL PROCEEDINGS

Regular meeting of the Common Council held May 5, 1930. Meeting called to order by Mayor Braddock. Present Aldermen: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. The minutes of the last regular meeting were read and approved. Finance committee report—

We, the undersigned committee on finance, hereby recommend that the following sums be raised by taxation upon the tax rolls of the city of Tawas City for the year A. D. 1930: Contingent Fund, \$4000.00; Electric Light, \$1500.00; City Indebtedness, one per cent; General Street, \$1250.00; Cemetery, \$300.00; Interest and Sinking, 2 1/2 mills.

(Signed)
William Wendt,
Julius Musolf,
Edward A. Trudell, Com.

Moved by Schriber and seconded by Britting that the report of the finance committee be accepted and adopted. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried.

Ordinance No. 84

An ordinance to be termed the Annual Appropriation Bill, making provisions for and appropriating the several amounts required to defray the expenditures and liabilities of the city of Tawas City for the ensuing year.

The City of Tawas City ordains—

Sec. I. That there shall be raised upon the taxable property of the City of Tawas City the following sums: The sum of \$4000.00, which amount so raised will be placed in and constitute the Contingent Fund; the sum of \$1250.00, which amount so raised will be placed in and constitute the General Street Fund; the sum of \$1500.00, which amount so raised will be placed in and constitute the Electric Light Fund; the sum of \$300.00, which amount so raised will be placed in and constitute the Cemetery Fund; the sum of one per cent upon each dollar of assessed valuation, which amount so raised will be placed in and constitute the Indebtedness Fund; the sum of two and one-half mills upon each dollar of assessed valuation, which amount so raised will be placed in and constitute the Interest and Sinking Fund.

Sec. II. The foregoing appropriation and provisions are made and required to defray the expenditures and liabilities of the Corporation of the City of Tawas City for the ensuing fiscal year, payable from the several funds heretofore mentioned and set forth, and it is hereby determined that the above amounts are necessary to be raised by levy and to be assessed upon the tax rolls of the said City of Tawas City for the year A. D. 1930, and to be paid into the several funds, the objects and purpose of each of the general funds.

This ordinance is in conformance with Section 30 of the compiled laws of the year A. D. 1915.

Sec. III. This ordinance is enacted and is ordered to take immediate effect.

Moved by Leslie and seconded by Trudell that Ordinance No. 84 be read by title and passed to its first reading. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried. Ordinance No. 84 read by title.

Moved by Trudell and seconded by Wendt that Ordinance No. 84 be read by sections and passed to its second reading. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried. Ordinance No. 84 read by sections.

Moved by Britting and seconded by Schriber, that Ordinance No. 84 be read in full and passed to its third reading. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried. Ordinance No. 84 read in full.

Moved by Musolf and seconded by Leslie that Ordinance No. 84 be passed. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried.

Mayor Braddock made the following appointments:
President pro tem. Ernest Schriber; Health Officer, Dr. C. F. Smith; Chief of Fire Dept., M. C. Musolf; Member Cemetery Board, Cecil Cox; City Attorney, N. C. Harting; Marshall, Street Commissioner, Frank Mueller; Board of Public Works, Eugene Bing.

City Committees—
Ways, Means, Finance—Aldermen Wendt, Trudell, Musolf; Licenses and Purchasing—Wendt, Trudell, Schriber; Streets and Sidewalks—Schriber, Leslie, Britting; Taxes—Wendt, Trudell, Musolf; Fire Department—Schriber, Wendt, Trudell; Nuisances—Leslie, Britting, Musolf; Electric Lights—Schriber, Leslie, Britting.

Moved by Trudell and seconded by Wendt, that the appointments be confirmed. Moved by Schriber and seconded by Musolf, as an amendment, the appointments be confirmed except that of City Attorney. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie and Britting. Nays: Trudell. Carried. Roll call—original motion. Yeas: Wendt, Britting, Trudell. Nays: Schriber, Musolf, Leslie.

The committee on claims and accounts presented the following:
James Robinson, 8 gallons of red gas \$ 1.84
John A. Lanski, firemen's pay roll, Gus. Blust and Barney Long fires 76.00

Moved by Britting and seconded by Leslie, that bills be allowed as read and orders drawn for same. Roll call. Yeas: Schriber, Musolf, Wendt, Leslie, Britting and Trudell. Nays: none. Carried.

Moved and seconded that meeting adjourn. Carried.

W. C. Davidson, Clerk.

Healthy "Good Night"

Parents should not lightly estimate the value of "good night" for the child, as properly said, it brings with it a comforting assurance of security and love, both essential factors to the best health.—Woman's Home Companion.

TRUE TALES OF THE TELEPHONE

A Clinic for Ailing Poles

TELEPHONE poles have their maladies, just as human beings do. Pine and chestnut timber fall prey to fungus, despite the most thorough preventive measures. Specimens of wood suspected of infection are sent to the Bell Telephone Laboratories for microscopic examination and diagnosis, as if to a hospital clinic.

An exceedingly delicate slicing apparatus, the microtome, cuts off thin sections of wood, usually from .0002 to .0006 of an inch in thickness, which are mounted on glass slides. The microscope then reveals the most minute details of wood structure, the depth and direction of penetration of creosote used as a preservative and the identity and life history of the fungus within the cells. Usually microphotographs are taken in order to facilitate further study and for record purposes. Data obtained in many separate examinations form the basis of a comprehensive study of the protection of poles against decay and deterioration. The study of wood preservation is an illustration of the Bell System's never-ending search for scientific knowledge that may be transformed into more dependable service.

Infant Imagination

Little Muriel was gazing from her bedroom window up into the sky and asking mother innumerable questions about the heavens. Suddenly a shooting star flashed across the firmament. With a gasp of astonishment Muriel turned round and exclaimed, "Oh, Mummy, look! God's striking matches!"

Old College Regulation

Educational regulations have changed in Texas since the catalogue for 1874-75 of Add-Ran college at Fort Worth contained this rule: "It is required of all students that they neither keep in their possession or use any firearms, a dirk, a bowie knife, nor any kind of deadly weapon."

Rural Girls Are Fine Housekeepers

Washington.—Girls on the more than 6,000,000 farm homes of the United States are showing a keen interest in the arts of home making and in many instances are telling their mothers how to obtain the best results from meager incomes, according to Miss Mary Rokahr, home management specialist of the Agriculture department.

Returning from a trip which carried her through most of the eastern and central states, where she talked with hundreds of farm housewives and their daughters, Miss Rokahr said the modern girl on the farm probably in many cases will be a better housewife than her mother.

"Everywhere I went I found the woman on the farm eager to learn how she might improve her home and obtain a better mode of living on the slight means at her disposal. Most of the girls, however, were better informed than their mothers and many showed marked talent in restoring furniture, making clothes, cooking, and the manifold tasks of a housewife."

One of the first questions asked by most housewives she met, Miss Rokahr said, was what labor saving equipment she ought to purchase. Proper methods of buying what the farm home needs was second in questions asked. Then the farm wife wanted to know how she most efficiently might divide the housework among the family.

"I do not wish to make odious comparisons," Miss Rokahr added, "but it is my impression that the average farm housewife has succeeded better than most city mothers in creating the true spirit of a home. It is on the farm, especially in the West, that we still find the pioneer spirit."

The average amount of cash received by the farmer for his salable products is \$600 annually, Miss Ro-

kahr said, while the average farm housewife desired at least \$1,200 to properly maintain her home. This would be the equivalent of about \$1,800 in the city if allowance is made for the many farm products used by the family which must be bought in town.

In the year since Miss Rokahr assumed her duties as an expert adviser to the farm housewives of the nation, 12 pamphlets have been published outlining model budgets for different states. Miss Rokahr emphasized that it is not possible to recommend a standard budget for the farm home because of varying crop, climate and other conditions in different sections. It is planned to have a budget adapted to each section.

Living conditions on many farm homes are still extremely primitive despite the inroads of machinery to lighten the farmer's burdens. Only 10 per cent of the farm homes visited were found to have running water, and only seven per cent had electricity. Despite this lack of modern conveniences, however, Miss Rokahr expressed the view that the farm housewife in most cases is keeping step with her city sister in providing a real home.

Ancient Thousand-Year Lease

Oshkosh, Wis.—Publicity about the maturing of some 999-year leases in England has brought to light here a 1,000-year lease drawn May 1, 1813, in England. It is owned by Mrs. Anne E. Reed of this city.

The instrument is an original and has been retained in Mrs. Reed's family since 1813. It was brought to America in 1886 when her grandfather migrated here.

Although the document was drawn

for the simple purpose of leasing an apartment described as "Skinner's Tenement," with certain provisos, the script covers a piece of heavy parchment paper two feet by three.

The parties to it are John Perkin and William Prover, and Adam K. Baynes and William Symons. It says that Perkin, as owner of certain property in the community of Week St. Mary in the County of Cornwall, and Prover, his son-in-law, agree to construct a tenement for Baynes and Symons. Perkin is called a "yeoman," Prover a "carpenter" and Baynes a "gentleman."

Upon the deaths of the contracting parties, it says, heirs and assigns of Baynes and Symons and Perkin and Prover were to continue the contract

for an uninterrupted period of 1,000 years.

A comparatively high fee was paid for the execution of the indenture, as is indicated by the £10 shilling stamp affixed by the government.

Although Mrs. Reed can trace her relationship to William Prover, little effort has been made by her to settle the long term contract. She believes the expense involved would more than offset profits which have accrued.

Treaty Pen Stolen

Paris.—The golden pen with which the Locarno agreements were signed has disappeared from The Hague peace exhibition. Police attributed the theft to a souvenir hunter.

The Schools and Good Manners

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

They have organized a campaign recently at the Princeton (New Jersey) high school for the development of good manners, so the newspapers tell us. I had supposed that training in manners and courtesy had its seat in the home. It was once so at least, but very likely I am wrong. Mother taught us to take off our hats

when speaking to ladies, to show respect for old people, to rise when anyone came into the room, to keep quiet when visitors were talking, and to say "please excuse me" when walking in front of anyone. I suppose it isn't done that way now. The schools must take care of manners as they are now responsible for morals and for the general education of young people. It is heartening, however, to know that some one has recognized the fact that good manners among young people are decadent and that a revival of interest in courtesy is in order.

Now as to taking off the hat, I see every day hundreds of young men from the best families of the country, or at least so these young fellows admit. They walk through the halls of college buildings with their hats on their heads cocked at every variety of angle. They stop to talk to young ladies with no remote conception that it would be better manners if they took off their hats. You see them in college offices sitting with their hats on—in their own houses, every where in fact. The fact that young women are present makes no difference; the hats are still on. Possibly the reason many do not wear hats at all is that it is too much trouble to take them off.

I don't know why we have lost an interest in the refinements and the courtesies of life as we undoubtedly have. Are we more selfishly looking after our own pleasures and interests than we once did, or has the hurry and bustle of the age left us too little time to be polite? I was out driving yesterday on a somewhat congested highway. It was interesting to me to see how little consideration the majority of drivers gave to the comfort or safety of others. They splashed my car with mud as they went by; they cut in when there was scarcely time or space for the maneuver. They all seemed in a mad hurry to get somewhere regardless of other people's rights or safety. If the schools are to give training in good manners there is a wide and uncultivated field open in the matter of automobile manners.

Even if one is selfishly looking out for his own interests good manners furnish a most direct road to the accomplishment of one's purposes. Every one is well disposed toward the good mannered man. It is a good field for the schools to work in, but it is after all a burden which should not rest there. If young people are ill-mannered the difficulty and the solution really lie at home. Our children are ill-mannered most likely because we ourselves are. The schools will have a hard time unless the home becomes different.

Uncover Historic Irish Spot

Dublin.—The long-sought golgotha of King Conaire, one of the greatest Irish kings, who was killed 100 years before Christ, has been discovered only an hour's walk from the center of Dublin.

The discovery of the charnel house,

where the king and his soldiers were massacred while at a great banquet, and where their bones, treasures and drinking goblets have lain undisturbed for 2,000 years, rivals the discovery of the tomb of King Tut-Ankh-Amen in Egypt.

American capital will be heavily invested in bringing to light all the matters connected with the excavation to be shortly instituted, according to Assistant Keeper Grogan of the National museum, who has been placed in charge of the work.

King Conaire, who attained his lofty role through his father and his own prowess, was killed by men whose own death sentence he had remitted, being opposed to capital punishment, history records.

The careers of Conaire and his father, King Edrisceal, Circa 50 B. C., were intimately bound up with the fate of the Ernean people, a Munster folk of militaristic character who had overrun the central plain of Ireland and extended their dominion to the north coast.

After being driven from Ulster by the Clan Rudraige, they still dominated Dal Riada and there were indications that even Ulster accepted their suzerainty.

King Edrisceal fell in battle against the south Leinstermen, and Conaire avenged his father, driving the foe back and annexing Ossory.

As king, Conaire rounded up various bands of brigands who had been condemned to death by their own fa-

thers and deported them to England. But the brigands returned to Ireland, and one night succeeded in waylaying King Conaire while he passed the night with his retinue of warriors at the great hotel Da Dearga at Glenn An Smoil, near Dublin. Here the king and his followers were massacred and the famous hotel Da Dearga, which once was a shrine, was burned. Until two months ago, its location remained a mystery even to scholars.

The Eyewitness

Chemists Aid in Erosion Battle

Experts Trying to Ascertain Most Susceptible Soils.

(Prepared by the United States Department of Agriculture.)

Chemists of the United States Department of Agriculture are assisting in the nationwide fight against soil erosion by determining just what properties of soils cause them to wash away readily and form gullies. They have estimated that erosion takes from the soil annually twenty times as much of the elements of fertility as is removed by all the crops grown on the land.

Every farmer knows that certain of his soils will run away with heavy rains or form gullies more readily than others. Soil scientists are measuring the amounts of soil carried away by erosion from the fields of the experiment stations which are being established by the government for the study of this menace of erosion, but in the past there have been no laboratory studies which have shown any relations between the readiness of soils to erode and their chemical and physical characteristics.

Soils Influence Erosion.

Such a laboratory study was recently completed in the bureau of chemistry and soils of the Department of Agriculture, and the results have been described by Dr. H. E. Middleton of that bureau in the recently published technical bulletin 178-T, entitled: "Properties of Soils Which Influence Soil Erosion." The bulletin tells how the determination in the laboratory of certain chemical and physical properties of a number of different soils has made it possible to classify soils as to the ease or the difficulty with which they erode.

Not Easily Washed Away.

"A soil cannot easily wash away," says Doctor Middleton, "unless the soil particles are picked up by water and held in suspension. The particles of certain soils can be readily suspended in water; those of certain others cannot. Then, again, if the soil readily soaks up a large amount of water before it becomes saturated it is less liable to erosion because it is the water which falls on a soil after it is saturated that runs off and causes the damage. By measuring these properties of soils we can measure roughly their ability to withstand erosion."

As the experimental work of the erosion-prevention field stations of the Department of Agriculture progresses in measuring the susceptibility of various kinds of soils to erosion, the findings of the soil chemists in the department's laboratories at Washington are expected to prove valuable in the movement to conserve America's soil resources.

Copies of the bulletin, 178-T, can be obtained, as long as there is a supply available for free distribution, by writing to the United States Department of Agriculture, Washington, D. C.

Poison Potato Bugs

Soon as They Appear

Potato bugs, when present, should be poisoned without delay. Paris green may be used as a dust when diluted with about 30 parts of hydrated lime. Dry arsenate of lime is likewise satisfactory and may be diluted with about 10 parts of hydrated lime.

Dusts are applied easily by placing in coarse meshed sacks which may be shaken over the plants. Applications made to dew covered, plants adhere readily.

Two poison applications will often be necessary. Egg deposits on the plants should be watched and when young bugs begin to appear the second poison dust should be used. The bugs are controlled easily in this stage before they have been able to do much damage.

Poisons can also be applied as liquid sprays. For this method, from two to three pounds of dry arsenate of lead should be used to 50 gallons of water. Only eight ounces of paris green will be required for the same amount of water but from two to three pounds of lime should be added to prevent possible burning of foliage.

Agricultural Notes

No weed should ever be allowed to go to seed in the garden.

A gardener's skill is reflected largely in the ability to mature vegetables early in the season.

Clean up the garden thoroughly before you get ready to plant. Bugs will harbor in old vegetation from last year.

Give carrots a fairly dry situation this year. They make better roots if not oversupplied with moisture, but they don't want drought.

Among the garden crops which can be planted in late July and early August are endive, kale, kohlrabi, lettuce, radishes, spinach, and late turnips. Keep the garden working for the family larder.

Weeds in the garden and field crops are very thirsty during hot days. If allowed to remain they will get more than their share of the moisture in the soil. They will have a more beneficial influence if pulled out and left to lie on the ground.

Makes Life Sweeter

Next time a coated tongue, fetid breath, or acrid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

MILL WORKER BENEFITED

Picked Up After Taking Lydia E. Pinkham's Vegetable Compound

Towanda, Pa.—"I was working in a silk mill and got so tired and rundown that I weighed only 89 pounds. I was not well enough to do my work. As soon as I began to take Lydia E. Pinkham's Vegetable Compound, I began to pick up. After being married for thirteen years, I had a baby boy and the next year I had another boy who now weighs 37 pounds and is healthy as a bear. The Vegetable Compound has helped me in a dozen ways and I hope others will try it too."
—Mrs. C. B. JOHNSON, Webb Street, R. D. #6, Towanda, Pennsylvania.

Black Sheep's Gold

CHAPTER VII—Continued

"Go easy," I told her. "We're going to have a real picnic trip down the river—no hurry, everything pleasant. There's nothing to cry about and nothing to get in a paddy about. I'm going to talk to the carriers; take any rags you want out of my swag while I'm away."

I left her alone, sitting there a forlorn slim figure, in the new sun of the day that was to have begun my march to victory. All the great bush was awake and getting to its business of the day—it didn't care that my ambitions were wrecked and my plans, of years, thrown into the Romilly river.

I had never questioned for an instant the necessity laid upon me to take Jinny safely back to civilization, save her from the consequences of her folly, at any cost. But I could not pretend to myself—however much I might pretend to her—that I was glad. It meant the using up of my stores, the going back to Daru to refit. Losing the carriers was possible; they might desert as soon as they saw the sea, and I should have to recruit over again. Weeks of delay, months maybe, and all the time—

All the time—! I thought struck me, hard. I was repacking some of the boys' loads, when this idea came to me. "All the time—!" I said to myself. "All the time—somebody else would be getting away. I think I can agree with Jinny in calling him a swine."

I found her waiting by the baggage. She had taken a shirt and a pair of trousers out of my swag and dressed herself in them, throwing away her rags. She had smoothed her hair with my comb, and washed her face with what I inferred to be the last of our drinking water.

No matter; I could send a boy or two to fetch more from the bottom of the gorge; what was time, now? The queerest mixture of kindness and anger filled my heart, when I looked at her. After all, if what I suspected was true, she was scarce at all to blame. After all, she had risked her life, was ready to go on risking it, just for the doubtful blessing of my society. Was it a crime? No, by all the gods—no matter what it had cost me. Yet—

The way to the Romilly river was easier than it had been coming up. We got there in two days and camped to make rags, since no canoes were now available. And on the first of the nights of our camp, Jinny and I came to an explanation.

CHAPTER VIII

We were seated upon the platform of Jinny's tent-fly, which had been mine (I slept with the carriers now). She sat with her legs crossed, playing an improvised "banjo," and mimicking the sound with closed lips, very cleverly—if one had felt disposed for such cleverness. I was not so disposed, feeling, indeed, a good deal more like going down to the Romilly and drowning myself in it, than listening to reveille tricks—but I respected the pluck that set the improvised banjo to a seeming twanging.

Somehow she influenced me, drove the dark mood away. Somehow, by and by she had me laughing. And the great dark about us pressed less heavily; the world narrowed, suddenly, to a cosy small tent with a lantern and a pretty girl lighting it up almost equally. . . . We had had little talk on the way down from the hills. But now, with a day or two of waiting before us, while rags were made, it seemed to me that I owed her something. She thought me hard, unkind. I didn't want to be a churl.

"What's it about, Jinny?" I asked her, as she ended her play. "What's the snoring for? Want me to go out and buy you a pair of silk stockings?" She laughed; stretched out her shapely dancer's leg, disguised in my khaki trousers.

"I don't want anything of you," she said, suddenly grave. "At least, not anything you'd want to give me this side of the grave. . . . I've made up my mind to tell you all about everything—all about my comin' along after you, I mean—Well, the beginning of it was that day when you talked to me on Thursday island, and said no woman couldn't go exploring; that put me in a bit of a paddy, because of course I didn't believe it and I don't either—"

"We'll let that go," I cut in, a trifle wearily. I knew I should never succeed in making Jinny see the truth.

"Well, I was feeling pretty bad about it after you went. And it just came into my head, I dono how, that I'd get a boat and run over to the other side, and see, like, how things were going on with you and your trip. Of course, Sir Richard Fanshew, he was meanin' to go and get whatever it was, before you, and Spicer, he was backing him up; I'd got that much out of the old boy, while we was friends, because of course he wanted to make love to me, and I wouldn't, and that's when they will tell you . . . And then I found that you weren't there at all, at Da—What was the place?"

"Daru." "Yes. Seems you'd gone to Port Moresby after all. . . . Phil, wasn't that fair awful about Sir Richard gettin' drowned? Did no one ever find out anything? . . . Well, you know," and she ran on, without waiting for an answer, "when I heard you'd gone there, I was—I was—Phil, I was that

perfect technique, while Beethoven and Schubert lived all their lives in comparative poverty because of their innate perversity and their lack of practicality in those matters which would have brought them a competency. Opera composers more frequently made a trade of composition, but even these have often been orchestral players, or conductors, or have made a living by teaching and writing about music.

Oppression Not Peace I am a man of peace. God knows how I love peace; but I hope I shall never be such a coward as to mistake oppression for peace.—Kossuth

World Slow to Reward Men of Musical Genius Musical composition is one of the very worst paid jobs in the world unless the composer happens to hit the popular fancy of his own time, which only a few composers have managed to do. Consequently most of the composers have done something else for a living, though generally something connected with music. J. S. Bach was a church organist, Handel was an organist and conductor, Mozart was in his day a famous pianist, as were also Mendelssohn and Brahms, Spohr was a great violinist, Gounod and Franck, organists. Robert Schumann was only prevented from making his living as a pianist by an accident to his hand caused by his enthusiasm to obtain a

snake-headed I could've bit you. I'm tellin' you all the truth, Phil—I didn't want you to go, because I knew she would be there, and I thought, let her get safe married to Sir Richard, and it'll be all right, because she's the milk-and-water kind that won't ever think of another man again; that's what I thought. So when I heard you'd gone there—and he was dead—Are you going to marry her?"

It burst forth like a cry. If I had been angry with her for her slighting words about Pia, I was not angered now.

"Jinny, my dear child—who do you think would have me for their daughter? I'm as likely to marry Miss Laurier as you are to marry one of the king's sons," I answered her.

She went straight to the heart of that sophistry.

"Yes, but if you was to find something up at Tatatata, that was worth fortunes and millions—"

"I am quite sure, if I had a million tomorrow, Mrs. Laurier would not like me any the better." (Yes, but I thought to myself, she would let me marry her daughter; she hates the type I represent—all wise women hate

it; it's anti-social—still, if I were a Bolshevik from Leningrad, with a million in my pocket, she'd swallow her hatred, hand over the girl—Curse her, and all like her!)

This went through my mind in a second, while Jinny was going on—"I hadn't anywhere to stay at Daru. Mrs. Maidstone, she give me a bed. Spicer, he was there. I know Spicer; he used to be on the balls, years ago, but he wasn't any good at that, so he got a job as gentleman's gentleman to Sir Richard. Well, Spicer, he said to me—'Why don't you up and after him, when he starts? He'll be back here to get his boys which is waiting for him,' says he, 'and then he'll be off by the Romilly river, and if you take a canoe along the coast,' says he, 'I'll put you up to all the tricks,' he says, 'and you'll catch him up before he can get out of the bush country, where he'll have to cut his way,' he says, 'and you'll show him,' he says—'what you can do after all. And who knows,' he says—Now I've told you everything, Phil Amory, and more than you want to know, so if you'll kindly leave my little wooden hut to me, I'll go bye-bye."

"You'll leave my little wooden hut for me," she parodied, shrilly. The black forest about us sounded by her high singing.

I had thanked her, and left her, and I was alone—alone with myself, and the knowledge of my wrecked ambitions. Things, on the whole, looked worse than I had supposed them to be. Jinny did not know everything. So far as she was aware, Spicer had been the moving spirit in the plot to stop me and bring me back; but I guessed the hand of Sir Richard Fanshew in the matter. If the plan were his, it was a good plan, fully organized, and one might expect developments from it yet. It was as certain as anything could reasonably be, that a rival expedition was even now on its way. One hope only I had. My road was not the road of the dead miner, Grace;

I was alone—alone with myself, and the knowledge of my wrecked ambitions. Things, on the whole, looked worse than I had supposed them to be. Jinny did not know everything. So far as she was aware, Spicer had been the moving spirit in the plot to stop me and bring me back; but I guessed the hand of Sir Richard Fanshew in the matter. If the plan were his, it was a good plan, fully organized, and one might expect developments from it yet. It was as certain as anything could reasonably be, that a rival expedition was even now on its way. One hope only I had. My road was not the road of the dead miner, Grace;

Now that I had passed the trading station again, ascended the river, no Sherlock Holmes was needed to tell me how the secret had got out. That story was contained in one sentence—Grace had written to his girl. He had no doubt hoped to get better, get back to her. He had done exactly as I had done with Pia, as Sir Richard Fanshew had done with Jinny. Told his girl his secrets. . . .

And Grace's girl had gone out, in an influenza epidemic, not long after. But before that, she had, in her turn, told some one who was, probably, her lover; might have been her lover all along—Fanshew.

World Slow to Reward Men of Musical Genius

perfect technique, while Beethoven and Schubert lived all their lives in comparative poverty because of their innate perversity and their lack of practicality in those matters which would have brought them a competency. Opera composers more frequently made a trade of composition, but even these have often been orchestral players, or conductors, or have made a living by teaching and writing about music.

Oppression Not Peace I am a man of peace. God knows how I love peace; but I hope I shall never be such a coward as to mistake oppression for peace.—Kossuth

World Slow to Reward Men of Musical Genius

The DAIRY

GENTLE BULL IS BIG FARM MENACE

Vicious Animal Is Usually Watched Very Closely.

"Bulls with bad reputations must be watched closely, and it is the so-called gentle bull, not the vicious one, that most certainly kills his victim," says Prof. H. A. Hopper of the New York Agricultural college at Ithaca.

"In spite of the fact that men must know they are no match for a bull, they continue to take unnecessary chances."

Very few bulls are kept long enough in service. They must be seven years old before their daughter's records will be in sufficient numbers to indicate his true worth. At least half of the causes given for the hasty removal of bulls could be prevented by providing proper equipment for handling them.

To get a normal increase in the size of herds, service must be dependable. When this is not the case, much time is lost between lactations, and the breeding efficiency of the herd is low.

Every herd sire should have an open yard, strongly fenced, and a sanitary stall, according to Professor Hopper. As it is both costly and dangerous to give mature bulls the necessary exercise on the staff, many are trained to work in a tread power. The younger bulls, when turned out together, will furnish exercise for each other.

Young bulls should be trained to behave on a staff and may be safely handled thus for a short time. As they reach maturity, they should be confined to a well-balanced pen and yard.

The use of gates, narrow passages, and doors controlled by ropes or cables allows the caretaker to do all the work about a bull without coming in contact with him. The use of a breeding rack, when properly installed, contributes to safety and good results.

The keeping of bulls can easily be made less hazardous. With a safety bull pen, all dangers can be entirely eliminated, said Professor Hopper.

Poor Time Now to Grow Unpromising Dairy Calf This year is about the poorest time the world has known to rear an unpromising calf, warns H. A. Hopper of Cornell University. Stunted calves are difficult to bring to full sized cows, and anything short of that will be discriminated against by critical buyers, he says.

If the calf is well bred and has been brought to the weaning period successfully, a relatively small amount of consistent attention will finish the job satisfactorily. The cheapest gains are put on at an early age. That means to feed plenty of hay and grain well up to the heifer's capacity from the start.

Heifers should be fed for growth rather than to become unduly fat. In addition to legume hay and four of five pounds of silage, two to three pounds of a grain mixture should be fed daily. The following grain mixture is satisfactory for growing heifers: 300 pounds of corn and barley, 300 pounds of oats, 300 pounds of bran, and 100 pounds of oil meal.

No Trouble From Bloat Pasturing Sweet Clover In pasturing sweet clover there should be no trouble from bloat if cows are well filled on dry hay before turning out the first time. Then keep them on sweet clover, rain or shine.

If by any chance the dairy cows become very hungry before turning out they should again be filled on dry hay. A straw stack in a sweet clover pasture is a good insurance against bloat. If cows do not care for grain due to being too well filled on pasture their grazing time should be restricted. Rotation of pastures to keep the growth down, but not to kill out, adds to the protein content of the pasture and to the good the dairy cow can receive from a given piece of ground.

Feeding Cows Grain In feeding grain to cows on abundant pasture the grain mixture can be made up of relatively small amounts of high-protein concentrates. The following grain mixtures have proved satisfactory: Mixture No. 1—100 pounds cornmeal, 100 pounds wheat bran, and 25 pounds cottonseed meal. Mixture No. 2—400 pounds cornmeal, 100 pounds cotton seed meal, 100 pounds ground oats, and 100 pounds wheat bran. Mixture No. 3—100 pounds wheat bran, 100 pounds ground oats, and 50 pounds cornmeal.

Craving for Salt The craving of dairy cattle for common salt is based upon a real need of the body. The dairy cow uses salt in proportion to the feed consumed; in other words, the high producer will need more than the low producer. The most common plan of supplying salt is to keep it before the animals at all times, in the form of ordinary stock salt. Other dairymen prefer to mix it with the grain, usually at the rate of one pound per 100 pounds of grain mixture.

Horticultural News

CURCULIO SERIOUS PEST IN ORCHARD

Combined With Brown Rot Does Immense Damage.

Curculio, an insect, and brown rot, a fungous disease, make a combination that is responsible for tremendous losses every year in crops of peaches, plums, and cherries.

Brown rot often enters one of these fruits through a puncture made by a curculio. It is important, therefore, to kill the insect if the disease is to be controlled, announces Arthur J. Farley, extension pomologist of the New Jersey agricultural experiment station. Furthermore, he points out, curculio causes many of the young fruits to become wormy and fall to the ground before they are mature.

In order to control the insect, growers should spray peaches as soon as the husks split enough to expose the small fruits; cherries and plums should be sprayed when the petals fall, and again when the fruits develop to the size of a small green pea. In order to control brown rot, growers should follow these applications with others.

The material recommended by the experiment station for the control of this destructive combination of insect and disease is New Jersey Dry Mix, twelve and one-half pounds, and powdered lead arsenate, one pound to fifty gallons of water. The amount of lead arsenate may be increased to one and one-half pounds for plums and cherries, but should not be increased on peaches. It is also recommended that four pounds of high calcium lime be added to every twelve and one-half pounds of dry-mix used on peaches in combination with lead arsenate.

Set Strawberry Plants at Suitable Depth It is important that strawberry plants be set at the right depth. If set too deep the crown may be exposed. Set them the same depth as they stood in the nursery and be sure to firm the soil around them, so as to leave no hollow spots or air spaces around the roots. Plant only young plants with light-colored roots. Plants with black or dark brown roots are usually worthless for planting. If the roots are heavy prune them back somewhat and leave about two healthy young leaves on the top. Keep all fruit stems and blossoms removed during the first season except that everbearing varieties can be allowed to blossom after the third month. A cloudy day following a shower is a good time to plant strawberries.

Apple Scab Is Serious on Certain Varieties Like all fungous diseases, apple scab is more serious on some varieties than upon others. All varieties of apples, however, are subject to the disease and may be damaged materially. Certain varieties, however, are notorious for their susceptibility and these should be grown by the growers, as it is necessary to give such sorts more particular attention as regards to spraying than the more or less resistant varieties. Moreover, there are unaccountable variations or differences in the susceptibility of different varieties of apples in different parts of the country.

Horticultural Hints The ground for berry bushes should be well fertilized with manure, to be plowed or spaded under before the plants are set.

No fruit is more generally liked than the strawberry. Yet how few really grow nearly enough of this luscious fruit even for the home table.

Fall planting is often successful with some fruits but it is more risky than spring planting. Plant early in the spring is especially important with cherry trees.

Gooseberries generally are stripped from the bush, leaves and all, the pickers wearing leather gloves to protect their hands. The leaves may be removed by running the fruit through a small fanning mill.

In pruning currant bushes cut out oldest wood and thin out the weak, young canes. Leave a few strong, one-year-old shoots every year and try and cut out all of the wood which is more than four years old.

One of the most important essentials in spraying is thoroughness of application.

A spray application of lime sulphur and lead arsenate should be applied to cherry trees when the blossoms shatter or as soon thereafter as the weather permits.

Storage scald on apples can be practically eliminated by using one and a half pounds of shredded oil paper, containing 18 per cent by weight of mineral oil, for each barrel.

The Pony Express

AS LONG AGO as the pioneer days of the "Pony Express," and for many years before, the best families were using Monarch Foods. The grandchildren of many of these people are following their example today.

The mothers of America know they can rely upon the Monarch Lion Head Trade Mark as a safe guide to purity, cleanliness, wholesomeness, flavor, appearance—for all that goes to make fine quality in the meals served in their homes.

Take sweet corn as an example. You get corn at its best under the Monarch label—fresh, clean, sweet, tender, creamy—free from cob, free from husk, free from silk—full-bodied kernels, sun-ripened and delicious in flavor. —And it is not expensive.

More than 250 Monarch Quality Foods, including: Monarch Canned Fruits (all varieties), Monarch Canned Vegetables (all varieties), Baking Powder, Sweet Pickles, Soda Pickles, Miso Pickles, Jellys, Catsup, Chili Sauce, Preserves, Toffees, Peanut Butter, Canned Fish, Canned Meats, Evaporated Fruits, Grape Juice, Cooked Spaghetti, etc.

Shoes Made Like Autos

Factory methods used in mass production of automobiles are being introduced into a leading shoe factory of Erfurt, Germany. The footwear is fabricated as it is transported on trays through the factory. The inventor claims the method will reduce costs and increase production.

FAMILY DOCTOR LEARNED THIS ABOUT CONSTIPATION

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish.

It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. All drug stores today have Dr. Caldwell's Syrup Pepsin in bottles.

Wait thirty minutes and you will get over wanting to fall out with anyone in an argument.

Ugly Pimples? Nature's warning—help nature clear your complexion and prevent red noses in your pale, sallow cheeks. Truly wonderful results follow through colon cleansing. Take NATURE'S REMEDY to regulate and strengthen your eliminative organs. Watch the transformation. Try NR instead of mere laxatives.

Safeguard Their Tender Skins by Daily Use of Cuticura Soap and Ointment Never too young to start using Cuticura

LONG LAKE

Mr. and Mrs. Fuller of Detroit were dinner guests of Mr. and Mrs. Elmer Streeter Friday night.

Mr. and Mrs. Samuel Mills of Birmingham have arrived at their cottage to spend the summer.

Grace Pratt and Harry Short were married Wednesday at the home of Rev. Fox at Hale.

Mr. and Mrs. Rogers of Flint spent a few days at their cottage.

Roy Curtis of Hale was a business caller on Saturday.

Mr. and Mrs. Carl Schaborn of Cleveland, who have spent their honeymoon camping at the lake, returned home Friday.

Joe McNickle was called to Flint Saturday by the death of his wife.

Mr. and Mrs. Hill of East Tawas were Sunday guests of Mr. and Mrs. Elmer Streeter.

Mrs. M. L. Barber and daughters left last week for Newberry, where Mr. Barber is working.

Fred Kruse drove to Flint on Saturday.

Chas. Curry of Bay City is at the lake for a few days.

Mr. and Mrs. Helms left Saturday for Flint to attend the funeral of Mrs. Joe McNickle.

George Meitser of Toledo is at his cottage for a few days.

Mrs. Honeywell and Mrs. Fred Kruse were in Bay City Tuesday.

Rev. George Smith of Whittemore was in town Wednesday.

Walter List is staying at Kokosing Resort.

Many Have Same Thought

One often hears the saying, "The sin is not in the sinning but in the being found out." "Scandal is the greatest part of the offense," recites Dryden, the poet, and Moliere says "The harm is only the noise that one makes." A popular eleventh commandment is, "Thou shalt not be found out." The French put the following twist on it: "Guard yourself from being found out so that you may be at fault freely."—Boston Globe.

Uplift Society

The Russell Sage foundation was established in 1907 by Mrs. Russell Sage in memory of her husband. Its purpose is "the improvement of social and living conditions in the United States." Charitable organizations have received considerable support from it, and it has financed numerous social surveys and industrial studies.

Delight in Occupation

One of the desirable conditions in any walk of life is lots to do. That paraphrase of the name of Lief the Lucky, into Loaf the Lucky, isn't so. There's no luck in idleness.—St. Louis Globe-Democrat.

Home Hunting

Prospective home buyers usually find a perfect small home, but the people who own it always seem to like it, too.—The Country Home.

HEMLOCK

Cecil McGirr of Hale has been here on business this week.

Mrs. C. A. Curry spent Wednesday with Mrs. John C. Burt.

Hazen Warner of Twining is visiting with his sister, Mrs. Edgar Bradford.

The school board met at the school house Tuesday night.

Mrs. Gerald Bellan and daughter, Onlea, returned to their home at Flint after visiting with her parents, Mr. and Mrs. A. Smith.

Mrs. Fred Pfahl was in Tawas on Thursday having dental work done.

Word was received that Harold Latham of Detroit and Miss Ruth Little of Saginaw were united in marriage on May 19th. The young people were formerly of this place, and their many friends here wish them much happiness.

Mrs. Nelson and family of Tawas spent Sunday with her parents, Mr. and Mrs. Louis Binder.

The Bible class met, with Mrs. Charles Brown on Thursday. The next meeting will be held on the regular date, the last Thursday in June. There being a number of birthdays of members in June, it was decided to hold the meeting at Sand Lake on the afternoon of June 26th.

Henry Durant and Charles Bamberger left on Tuesday for Black River, where they are employed by the telephone company.

Ervin Wakefield of Flint is visiting his mother, Mrs. L. D. Watts.

On Thursday evening, Mrs. Edgar Bradford gave a birthday party in honor of her sister, Miss Alta Warner. A good time was reported.

Mr. and Mrs. Jas. Carlson of Flint spent the week end here with Mr. and Mrs. L. D. Watts.

Mr. and Mrs. Chester Smith spent the week end here. Mr. Smith returned to Flint on Sunday, Mrs. Smith remaining for a visit with her parents in Reno.

Entertain Campfire Group

The Misses Lois Chambers and Floreen Miller entertained the Nat-sih Campfire group with a four-course 7 o'clock dinner at Miller's cottage, Sand Lake, Wednesday evening.

Covers were laid for twelve. The table was beautifully decorated with candles and a center piece of sweet peas, with one for each guest. Later the bouquet was sent to an invalid friend. Each member's place at the table was designated by a place card bearing her Indian name. The favors were little baskets of mints, decorated with pine cones, and signifying the name of the group. The dining room was very much dressed up with trimmings of pine, green and white streamers, and cut flowers, the roses being a special gift to the hostesses.

The evening was enjoyably spent with games, stunts and singing. It might be well to state that the affair was not merely for entertainment, but also instruction in etiquette—how to serve and be served properly at a dinner. All went well until the fifth course arrived. Then what to do nobody knew, as all the forks and spoons had been used. Finally some kind soul who had had previous instructions saved the day. Who can guess what it was? Some thought it was a drink.

Much credit is due Lois and Floreen for their original ideas and the grace and ease displayed in carrying out their plans. They will be awarded special credit in social craft according to Campfire honors.

Human Vocal Cords

The length of the vocal cords of men is estimated at seven-twelfths of an inch. This is a factor in the pitch of voices. It is highly probable that a slight difference also exists between bass and tenor, and between contralto and soprano, but it is difficult to measure with sufficient accuracy.

Beards in History

Evidence as to any possible relation between beards and national or racial power is conflicting. The Greeks loved beards. The Romans did not. "Barbarian" suggests the bearded; the wild shaggy, unkempt, violent, reckless. The greatest beard celebrated in history was that of Johann Mayo, "John the Bearded," a painter in Germany, whose beard fell to the ground, except, when as he usually did, he tucked it in his girdle.—Boston Herald.

Enemy of Plant Lice

Of the wasps there are some who pack away moths, some who use flies, some who capture leaf hoppers and some who hunt aphids, says Nature Magazine. The aphid hunters are the most numerous. They are the Pemphredon wasps, assiduous collectors of plant lice.

Land Without Forests

There are no forests in Egypt. The date palm and sycamore are the principal trees. Many other trees, principally fruit trees, have been introduced and flourish when sufficient moisture is furnished.

Old Crochet Work

Bands of crochet work made in Peru earlier than 200 A. D. are among the rare textiles owned by the Metropolitan Museum of Art, of New York.

Operator's Uncanny Gift

If there is no such thing as telepathy, how does the long-distance operator know just when you are in the bathtub?—Vincennes (Ind.) Sun.

Reward for Good Act

Let us never forget that an act of goodness is of itself an act of happiness. No reward coming after the event can compare with the sweet reward that went with it.
