

# MAKING OF HOLLAND

Dutch Damsels Talking Shop.

(Prepared by National Geographic Society, Washington, D. C.)—W.S.U. Service.

**V**EGETABLES, not fish, will be the products of the broad expanse of the Zuiderzee, which now is having a complete change of face. Drainage and filling the Zuiderzee will add more than 1,000 square miles of farm land to the Netherland's area. The work when completed, will cost the Dutch government some \$350,000,000.

Long ago the ocean said to the Hollander, "You shall have no land here." The Hollander said to the ocean, "We will have a country here"; and they have one, in spite of water, winds, and waves.

In Holland all is new—the gulfs, lakes, and islands have come into existence under man's observation. He has seen within historic times sand close a river's mouth, land converted into water, and lakes dry up and disappear.

The ordinary agencies of change—wind and wave, rain and flood, and the rise and fall of land—have here found a favoring field for their activities.

Long after the greater part of the continent of Europe had become fixed and stable, Holland began its geographic formation and is still pursuing processes intended to hold or enlarge its boundaries.

By the aid of old maps and documents we can learn what Holland was at the time it first found a place and designation on the world's charts, and following them in sequence one can note the changes that have been wrought by the action of the waters of the rivers, the waves of the sea, and the hands of man—in short, how Holland was made.

The power of the rivers one can see in the inundations; the action of the sea in the sand dunes along the coast; and the transformation by man everywhere.

Before the birth of the Rhine a great part of the Netherlands, as we now see it, was a sea, limited on the German side by a rocky coast which now shows itself in the Tuetoburger Wald hills. The uplifting of the Ardennes inclosed a sea in the interior of Germany which, shielded by the Alps on its southern coast and protected from the cold winds of the north, became full to overflowing from the melting ice. Finally the pent-up waters broke through, and in the bed thus formed the Rhine has since been flowing.

## How the Land Was Formed.

With the rush of the waters masses of rocks were hurled along until the moving force exhausted itself; smaller particles were carried farther, and when the sea was reached its resistance robbed the river of its final burden, and sand dunes formed the northern boundaries of Holland. The pebbles and grains of sand on which rests the soil of Gelderland and Overijssel and the island of Texel show that their primeval home was the basalt regions of the Rhine.

The result of the conflict between the waters of the rivers and the sea into which they seek to find an outlet is seen in the deltas of our largest streams.

Before reaching the Dutch frontier the Rhine has lost all the beauty of its banks, and flows in great, lazy curves suggestive of approaching old age. The indecision of senility is now seen in the separation of the Rhine into two parts. The main branch shamefully disavows its name and throws itself into the Meuse, a river of French origin; the other branch, insulted by the name of Dannebronn canal, after going nearly to Arnheim, separates into two parts, one emptying into the Zuiderzee; the other, retaining its early name, though qualified as the Lower Rhine, goes as far as Duurstede, where it divides for the third time.

During the reign of Louis Bonaparte a canal was opened through the dunes and the Rhine again conducted to the sea. The mouth of this canal is protected by enormous dikes and breakwaters and the sea itself is held in check by locks, or sluice-gates.

When the tide is high these locks are closed, to prevent the waters of the sea from invading the land; when the tide falls they are opened, to give passage to the waters of the Rhine which have accumulated behind them, and then 3,000 cubic feet of water a minute pass out.

## Continual Battle With the Sea.

The rivers of Holland, like all rivers whose lower reaches have but little fall, drop sediment along these lower levels, especially at their mouths. The sea has resisted this encroachment, and in retreating has continually fought to regain lost territory. It

has thrown barriers across the river channel to make the rivers themselves destroy the land of their creation; it has buried the rich alluvial soil fathoms deep under unproductive sands, and where it does not throw up sand dunes as a fortress against itself, the state must accept the challenge and wage a royal battle.

The other rivers that have contributed to the woe of Holland have been less vacillating in approaching their outlets, but equal vigilance has been needed to keep their waters from inundating the land. Dikes must be built on both banks as high and as far upstream as experience demands.

Along the North sea there are places where, owing to changing winds, the sand cannot accumulate in quantities sufficient to form protecting dunes. Here sea-dikes must be built—veritable fortifications.

They are built of earth, firmly packed on the sea-face, and partly paved with dressed Norway granite or Rhine basalt blocks.

Beginning at the top, the dimensions are as follows:

Thirty feet across the top, on which there is a double-track railroad for the transportation of materials with which to make repairs.

On the sea-face it inclines at an angle of 30 degrees for a distance of about 40 feet; then the slope is one in three. Here the stone paving begins and extends about 50 feet.

From this point for 100 feet a sod surface is maintained, but beyond that for 110 feet, where the forces of the storm-lashed waves beat hardest, the surface is faced with stone. This carries the face to a point about three feet below high tide; then a flat pavement is laid out to and beyond the low-water line.

As a precaution, three rows of piles are driven in to hold the facing in place, and two other rows of larger piles, with their tops protruding, extend along the line where the waves are most aggressive.

## Costly But Necessary.

The amount of labor required to construct such fortifications can hardly be imagined and the cost is well-nigh beyond conjecture. The piles, all of which came from other lands, cost, in place, \$4 each.

This defense is not an idle precaution. When the west winds drive the waters from the English channel to meet those deflected by Norway's unyielding shores, they fill up the North sea and seek their old course across the Netherlands.

The sluggish current of the Zuiderzee is a weak contentant with the remorseless tide of the North sea. Consequently its shifting sands threatened to close up the harbor of Amsterdam and also rendered precarious the navigation out to and around the Helder. It was therefore decided some years ago to construct a ship canal directly to the North sea.

This great work was completed in 1870, with the sea terminus at IJmuiden. The sea being higher at high tide than the water in the harbor at Amsterdam, it was necessary to have big locks at that end.

The traffic through this canal is so great that the water let through in the locking would soon become a source of danger. The harbor of Amsterdam is, therefore, shut off from the Zuiderzee by means of dikes, with a series of locks to permit ingress and egress.

## Protecting Dikes Everywhere.

It is not the sea alone that calls for the defending dikes. Every outlet into the sea must have embankments high enough to overtop the highest incoming tide, for twice every day these outlets become estuaries of the sea, and the land would be covered by the invading brackish water if it were not for the dike-like banks.

The farmers frequently build their dwelling houses under the lee of these banks, and from the deck of a passing steamboat one can literally look down the chimney, though he may hardly, as same have claimed, see what the farmer's wife is cooking for his dinner.

The Dutch word polder is a term applied to any area of land protected by an encircling dike and drained by its own system of pumps. Some of these are barely below the general level and need only a slight embankment; such are usually of firm soil, and after the removal of the water become arable fields. Others were originally ponds or lakes, or deposits of muck which have to be inclosed by more substantial embankments, and the removal of the water in the first instance as well as subsequently is a serious matter.

# VETERAN BUREAU GROWING RAPIDLY

## Billion a Year Concern, With Costs Mounting.

Washington.—Renewed agitation for the passage of legislation permitting World war veterans to borrow the remaining 50 per cent. of the value of their bonus insurance certificates served to focus attention on the tremendous growth in recent years of the funds expended by the war veterans' administration.

Testimony delivered before the house appropriations committee by Brig. Gen. Frank T. Hines, administrator of veterans' affairs, disclosed that the veterans' administration is now a billion dollars a year concern with expenditures still growing. His figures revealed that in 1933 the veterans' administrator expected to expend in excess of a billion dollars on administration of veterans' matters, payments to beneficiaries, on adjusted compensation certificates, hospitalization and other activities.

During the past twelve years the independent establishment handling veterans' matters has expanded by leaps and bounds until today it is estimated it will take 40,000 civilian employees to care for the interests of the hundreds of thousands of veterans now receiving aid from the government in one form or another. During the next fiscal year this department will utilize facilities at more than 300 hospitals and furnish beds for in excess of 63,000 patients.

## Build New Hospitals.

With the approximately billion dollar appropriation, which it now seems assured of receiving, new hospitals will be built, new beds provided, approximately a million veterans given treatment of some kind, or funds for some particular reason, loans made to other veterans on bonus certificates, compensation paid to disabled veterans and salaries paid to the army of employees.

In event legislation is passed permitting the veterans to cash the full value of their compensation certificates another two billion dollars would be added to the sum which the veterans' administration would handle in the next few years.

The big items in the veterans' administration bill as requested for 1933 by General Hines follow:

Administration, medical, hospital and domiciliary services, \$116,000,000.

Army and navy pensions, \$225,000,000.

Adjusted service certificate fund, \$150,000,000.

Military and naval service, \$110,000,000.

In his budget message President Hoover asked \$1,000,399,000 for veterans' administration affairs, approximately one-fourth of the entire federal budget.

Of this sum \$150,000,000 was for use in making loans to veterans on their bonus certificates. The house appropriations committee cut this figure to \$94,237,795. Virtually no cut was made at all inasmuch as the \$50,000,000 reduction was effected by cutting down the figure for bonus payments with the definite understanding General Hines can go to congress to get this sum, if it is needed, in a deficiency bill next December.

As of December 31, 1931, 42,225 veterans whose hospitalization was authorized by the veterans' administration were receiving treatment. Three hundred and twenty-two hospitals were utilized: 64 by the administration itself, 216 belonging to state and civil institutions, 17 to the public health service, 16 to the United States navy, 7 to the United States army, and 2 to the Department of the Interior.

On December 21, 1931, the veterans' administration was afforded domiciliary care for 17,210 additional veterans. During the 1931 year the department treated 850,469 out patients and gave 2,148,432 physical examinations.

As of December 31, 1931, 318,114 veterans were receiving compensation for disability incurred in, resulting from, or aggravated by military service during the World war. Compensation was also being paid to the dependents of 97,543 veterans whose death occurred in, or resulted from service in the World war. The amount of compensation payments, depending upon the degree of disability, ranges from \$8 per month for a temporary partial condition to \$200 per month for what is known as a double permanent and total disability.

General Hines said the number of active awards for disability compensation has increased by 135,024 since June 20, 1923.

A big increase in the number of those receiving benefits for disability resulting from other than military and naval service was recorded last year.

# CATS AND CANARIES

By THOMAS ARKLE CLARK  
Emeritus Dean of Men,  
University of Illinois.

It takes a good deal to give a young person a thrill today. They are so fed up daily upon amusement that it is only the unusual and the extreme thing which can give them a sensation of delight or interest.

Once a rag doll or a branch of a tree cut into the semblance of a horse would throw a child into an ecstasy of imagination and delight. Not so today. It requires a doll that can walk and speak French, or an electric train that lays down its own track as it rushes about the nursery to get even an ordinary rise out of a young child. The high school boy might once have been in the seventh heaven if he could own a bicycle, but he yawns today unless he can have a snappy high-powered motor car which will speed along at 75 miles an hour. It puzzles parents now to devise some new amusements for their children or to find something new and startling to give them.

Far be it from me to long for the "good old days." There were many things in our youth which were crude and inadequate, but our amusements were simple and rare enough to be appreciated when they came. There were the Fourth of July celebration in the summer, and the annual visit of the circus in the fall, and these two events were looked forward to with the keenest interest, and prepared for as well. The old buggy was washed up, and the harness greased, and the horses groomed to a high polish. We saved what little money we could get our hands on, made a date with the prettiest girl available and set out to have a glorious time. The anticipation and the two events in retrospect served us for six months at least.

In winter there were occasional parties, or dances at a neighbor's house. I noticed in the account of a recent social affair held in a nearby city that the favors presented to each guest at the dinner which followed the dance were Persian cats and canaries.

Our young people must be thrilled and amused at any cost!

## Street Ensemble

A smart street ensemble for spring is selected by Ann Harding, RKO-Radio star, in this black and white Hattie Carnegie model. The coat, of corded lightweight wool, sponsors the smart button trimming. The gown, of corded silk crepe, employs the fashionable scarf tied at the throat.

# America's Youngest Grandmother

Through a contest conducted by a food store exposition held in Washington, the youngest grandmother in the United States has been found. She is Mrs. Louise Skelton of Potomac, Va., thirty-four years old; and she is shown in this photograph with her daughter, Mrs. Colene Acheson, seventeen, and her grandson, who is one year old.

# WILDCAT BOUNTY ENRICHES TRAPPERS

## Steel Traps Click Dollar Tunes Throughout Maine.

Augusta, Maine.—Steel traps have clicked a cash register song throughout the state of Maine during the past year, reducing the number of wildcats by nearly 1,000 and enriching the trappers to the extent of nearly \$15,000.

The forest felines, wildest of the wild creatures sought by sportsmen, as elusive as shadows when stalked by the man with a gun, have suffered heavy casualties in traps because of a weakness which they share with humans—the desire for something for nothing.

When roaming the woods in search of his natural food, live game, the wildcat enjoys comparative safety, for his habitat breeds no animals capable of engaging him in combat and he is gifted with uncanny ability to sense the presence of and evade his most deadly enemy—man.

But the tawny untamable, like his

two-legged foe, usually finds the lure of "something for nothing" most difficult to resist. Thus the success of trappers on capturing the game that seems to meow in derision at rifles and shotguns. Thus the cash register song, echoing alone the traplines, a dirge for the cats, but a joyful chorus for those to whom it means "shoes for the baby."

Each time the jaws of a cat trap snap together the state parts with \$20 in bounty money. The cat, snarling in rage and pain, has his fury aggravated by the discovery that the bait—food which he had attempted to seize without earning it through the usual stalk and kill, "something for nothing"—is just beyond the reach of his paws.

## POTPOURRI

### Use of Concrete

While concrete hardens in a few hours, it does not reach its full strength until about two years after it is laid. After that time for most purposes it is more lasting than natural stone. For structural work, reinforced concrete is made of one part cement, two parts sand, four parts gravel or crushed stone, and necessary water.

## Shoe Repair Champ

The shoe repair shop of Anthony Rizzo in Painesville, Ohio, was filled with flowers the other day after the reception of a telegram from New York announcing that Anthony, or Tony, as his friends know him, had been chosen national champion shoe repairman at the fifth annual shoe repairers' and dealers' exposition. Each contestant submitted three pairs of shoes, one shoe of each pair in the original state of wear and the other repaired in the contestant's best manner. Tony comes from a cobblers' family. His grandfather had a little shop in Palermo, Italy, many years ago. Tony's father learned the trade and came to America and settled in Mount Morris, N. Y., where Tony began his apprenticeship at six.

# CHARACTER OF SOIL SHAPES MAN'S LIFE

## Due to Plant Growth Peculiar to Certain Areas.

Washington.—“The character of the soil—the few inches or few feet of ground that form the outer skin of the earth—has very largely molded the way of life of millions of people throughout the world,” says a bulletin from the National Geographic society.

“Other factors, such as moisture and temperature, are important in plant growth,” continues the bulletin, “but the fundamental factor is the soil itself, the medium in which roots can anchor themselves, and from which they can draw their food supplies.

“The great loess region of north China is a striking example of the effect of soil on customs. This light loam, deposited by the wind, is easily drained, and none too well supplied with moisture. It dictates the growth of wheat and other hardy grains instead of rice. The northern Chinese, therefore, are non-rice eating folk. Their dry soil also decreases the raising of live stock; so it is here that China has its greatest concentration of sheep and cattle.

**Flood Irrigation.**

“The lower Yangtze valley forms a marked contrast to the loess region. With its basins of rich alluvial soil, which responds well to wet culture, it is the center of China's rice production. In this region the soil condition has brought about dependence almost exclusively on rice as a vegetable food, the practice of flood irrigation, and the raising of poultry rather than large farm animals.

“In the United States the great ‘corn belt’ near the center of the country has been marked out by deep, easily-penetrated soil, although temperature and moisture conditions also are important factors in making this the greatest maize-producing region of the world. Corn is an excellent food for animals. It is largely because of its soil and temperature, therefore, that this region has become the great cattle-fattening and hog-raising section of the United States.

“Two of man's chief luxuries, tobacco and wine, are more strongly affected by soil differences than almost any other agricultural products. In the United States cigar leaf tobacco is grown best on certain soils of the Connecticut valley, New York, Pennsylvania, Ohio, and Wisconsin. The Burley types grow on the blue-grass soils of Kentucky and adjoining states to the north; and the bright tobaccos, used in cigarettes, on the light soils of the Carolinas and nearby Virginia.

“The most famous Cuban tobacco, which has at times sold as high as \$20 a pound, can be grown only on soil in about 25 square miles. Two other restricted areas produce the second and third most famous Cuban tobaccos. On special soils in Macedonia and Asia Minor are grown the celebrated Turkish tobaccos, with flavors and aromas that cannot be duplicated elsewhere.

“Each of the noted wines of France

owes its special character to the soil on which the grapes grow.

“This priceless soil layer, on which all of the world's land vegetation and land animals are dependent, is nothing more than broken up bits of rock into which the decayed remains of vegetable and animal forms have been mixed. Chemically, there are three broad types of soil: alkaline, neutral, and acid. It is in accordance with their physical characteristics, however, that soils are usually classified.

“Sand is the soil of coarsest particles. Through it water drains easily, little being imprisoned, and not much mineral matter goes into solution from its hard grains. Pure sand, therefore, does not make a satisfactory soil for growing crops.

“At the other end of the scale, physically, is clay. Its particles are so

fine that they are not found in a separate state, but stick together with water in large groups. Whereas pure sand is too ‘light’ for satisfactory crop production, pure clay is too ‘heavy.’

“Between sand and clay lies the wide range of useful soils, made up of particles smaller than those of sand and larger than those of clay; or else of varying proportions of sand and clay, with the addition in most cases of mixtures of lime, other mineral salts, and decayed vegetable matter.

“The soil, as the feeding ground of plant roots, is in truth much more than a mere group of fragments of rock and humus. It consists of soil ‘crumbs’ composed of groups of microscopic particles; the obvious spaces between the crumbs; the unseen spaces within them; the water, air, and other gases that circulate between the crumbs and are imprisoned in them; minerals in solution, and the bacteria and microscopic animal life that exist underground. It is from the mineral solutions that surround and permeate the soil crumbs that the tiny rootlets draw most of their nourishment.”

# MUSCULAR-RHEUMATIC PAINS

DRAW them out with a “counter-irritant.” Muscular lumbago, soreness and stiffness—generally respond to good old Musterole. Doctors call it a “counter-irritant” because its warming action penetrates and stimulates blood circulation and helps to draw out infection and pain. It gets action and is not just a salve. But do not stop with one application. Apply this soothing, cooling, healing ointment generously to the affected area once every hour for five hours. Used by millions for over 20 years. Recommended by many doctors and nurses. All druggists.

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

# ODD “INDUSTRIES” IN BRITISH ISLES

Almost under the shadow of Westminster cathedral is a narrow thoroughfare called Strutton ground, and here you will find an Armenian who claims to be the only outdoor repairer of timepieces in London and perhaps in England. He will mend your watch while you wait, says a writer in Pearson's Weekly.

“Bottler of smoke” is surely one of the oddest of professions, yet in the census returns we find one person who so describes himself. The smoke comes from hickory logs and no doubt is used for the curing of bacon. Less puzzling is the industry of collecting walrus whiskers, which has only one follower in the British isles. These walrus whiskers go to the East, where wealthy Chinese prize them as toothpicks.

There are two lighthouse builders in England, but only one man who sells his skin for a living. This man, formerly a mechanic, saw one day an advertisement asking for a healthy subject who would consent to sell a portion of his skin to be grafted on the face of a rich man's child who had been badly burned. He got two hundred pounds for his trouble and has since been in hospitals in various parts of the world on similar missions.

# Cold Snap Stills the Roar of Niagara

Zero weather in the wake of fierce storms along the Atlantic coast froze up Niagara falls and temporarily silenced the roar of the mighty cataract.

# New British Plane Flies at 4 Miles Per Minute

London, England.—Speeds of four miles a minute are being obtained by British test pilots with a new type of single seat fighting airplane.

The new fighter, which is known as the Jockey, is being produced by Vickers (Aviation), Ltd., and has been built to meet the demands of the air ministry for great speed and rapid climb. Machines being tested at Brooklands are showing surprising top speeds of 235 and 240 miles per hour at 20,000 feet.

The Jockey is fitted with a nine-cylinder radial air-cooled engine, supercharged to yield 530 horsepower.

# NEW YORK TAKES SURVEY OF SKYSCRAPER JUNGLE

## Assessor Finds 93 Buildings Over 30 Stories.

New York.—Old Father Knickerbocker has started his annual inventory on his great and growing skyscraper jungle—for the benefit of the tax gathering man, as usual—and the count is providing its usual quota of new wonders to the proud populace. The array, of course, is “bigger and better than ever” this year—it always is. The current roll call shows a total of nearly 500 buildings of 20 stories or more in height and with an assessed valuation running well into the billions. Ninety-three of them tower a full 30 stories or more into cloudland and their combined value is on the books for nearly \$800,000,000. They will pay at least \$21,000,000 into the city treasury this year and nobody knows yet just how much the other 400 or so may add to the amount. Certainly the figure will be a bit staggering, even to a city accustomed to think in terms of millions when the matter of taxes and public expenditures is under consideration.

Four of the 93 “tallest” and a cluster of the lesser fry have been added to the total since the tax man was around last year. Chief of these is, of course, the new Empire State building, which towers a dizzy 86 stories above the street level and becomes thereby not only the majordomo of New York skyscrapers but the last word in tall buildings the world over. Two years ago the Chrysler building, which reaches 77 stories into the empyrean blue, claimed first place on the list, while only three years back it was the 55-story Woolworth building, now—alas!—down to sixth place on the roster.

While not quite completed the new Cities Service building which towers 950 feet above Pine street down in the heart of the financial district is given third place on the taxman's 1932 roll while fourth place goes to the Manhattan company building hard by, rising 927 feet above the busy Wall Street throngs.

Each of the complete skyscrapers

is, of course, virtually a city within the greater city. Each has its governing board, comparable to the city council or board of aldermen, with a superintendent or manager officiating as “mayor,” a “police” force consisting of its many uniformed watchmen scattered on every floor, its rapid transit system, i. e. elevators, and its floor upon floor of teeming workers ensconced in offices separated by corridors so long and spacious they might well pass for city streets. Some of the working populations of these perpendicular cities run high into the thousands.

Mary Roberts Rinehart with a tarpon weighing 125 pounds which she landed after a shark had taken a bite out of it just as the noted author was bringing it in.

# Betsy Ross Corps to Serve in War Time

Kansas City, Mo.—Remembering how they were called upon to step into men's jobs during the World war women here have begun looking to the future.

The Betsy Ross corps of licensed women pilots has been formed, the purpose of which is to take over the flying of commercial airplanes during a war to allow men pilots to join the fighting forces.

Kansas City will be headquarters for the Seventh corps area which includes, Missouri, Kansas, Iowa, Nebraska, North Dakota, South Dakota, Minnesota and Arkansas.

# Women Refused Ballot by Quebec Legislature

Quebec.—Standing true to its traditions as the stronghold of Old world conservatism in the New world, the province of Quebec remains the only section of the British empire where women are still forbidden to vote.

By a vote of 52 to 23 the legislature has refused to extend the franchise taking the stand that “women should be queens of their homes and not political intriguers or hustling loafers.”

The question was not decided along party lines, for two Liberal members sponsored the bill which would have given women the vote while other Liberals were equally strong in opposing it.

# Seeks Height Record in “Thermos” Balloon

Vienna.—In a balloon with a gondola like a “thermos” flask Count Theodore Zichy, a young Hungarian nobleman, is to attempt to capture the world's height record.

Accompanied by Hans Braun, an Austrian inventor, he is going, in a few weeks' time, to assault the record made by Professor Piccard last May, when he went ten miles up in an aluminum ball. The count is going to try to get eleven miles high.

**Misses Bunny; Burns Barn**

Minersville, Pa.—A shot fired at a rabbit was believed the cause of a fire which damaged a farmer's barn near here. The shot missed the rabbit and ripped through the barn wall to land in a five ton pile of hay. The barn was destroyed by fire which followed the shot.

**His Marriages Stick**

Nacogdoches, Texas.—Of the hundreds of couples married by Dr. George L. Crockett, for 42 years Episcopal rector here and at San Augustine, only one has been divorced.

# Profanity Called For, and Caddy Was “There”

Dr. J. Whitcomb Brougher, now of Boston, but formerly of Los Angeles, took a fling at golf on the public links in Franklin park. He was doing splendidly until he reached the seventh hole, when he sliced his drive and had the embarrassment of seeing it dribble at right angles down the slope into an almost impossible lie.

As he gazed after the ball sadly, a vehement string of profanity shattered the air and turning sharply, Doctor Brougher stood aghast as his caddy spluttered cuss words on all six.

“Great heavens, lad!” demanded Doctor Brougher, “what is the reason for all this profanity?”

“Well,” replied the tough little caddy, “after a shot like that, somebody had to cuss and knowing you're too ignorant to do it, I thought I'd better do it myself.”—Los Angeles Times.

# Erosion's Heavy Cost

Erosion has modified the surface of the earth more than the combined activities of volcanoes, earthquakes, tidal waves, tornadoes, and all the excavations of mankind since the beginning of history, says the United States Department of Agriculture. The fact that it proceeds slowly, usually taking a thin layer at a time, does not in the least alter the impoverishing effects of erosion, speeded up by man and operating through long periods of time.

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 60 years ago. They regulate liver and bowels.—Adv.

The little green apple is the small boy's double.

# Worms in your child? Act Quickly!

Picking at nostrils. Gritting the teeth. Loss of appetite. These are symptoms of worms. Rid your child's body of these ruinous parasites that sap health and strength. Give Comstock's Dead Shot Worm Pellets. Prepared like confections. Children take them without suspecting treatment.

Briefly Told
Actions looks, words, steps, form the alphabet by which you may spell character.

Reno

Alex Robinson is able to be out again. Miss Olith Vaughn returned to her home in Lansing Sunday. Mrs. Vira Murray of Flint spent the week end with relatives here and on the Hemlock. A. T. Vary was at Bay City on business Tuesday. Mrs. Alex Robinson and son, Elwin, were at Tawas Monday. Nineteen ladies from here attended achievement day at Standish last week Thursday. Members of Reno group were awarded 100 per cent on their first year's work. 14 groups were represented, each member of the various groups making a house dress, kimono type. About 163 dresses were on display, and no two were just alike. There was also a fine display of work boxes and fancy work. Mr. and Mrs. A. M. Welsh of Ionia spent the week end here. They were guests of Mr. and Mrs. A. T. Vary Sunday. Mr. and Mrs. J. M. Johnstone and granddaughter, Odessa, Mr. and Mrs. Alan Smith and son, Raymond, and Carlton Robinson motored up from Flint Friday for the week, but owing to the storm, they returned home Saturday. Mr. George spent Saturday and Sunday at Tawas with Mr. Murphy. Mr. and Mrs. Thos. Frocks and Mrs. Murray. Mr. and Mrs. Earl Daugharty spent Sunday at the home of Mr. and Mrs. L. D. Watts and helped Mr. Watts and James Carlson celebrate their birthdays. Mr. Murphy of Tawas City spent Monday with Mr. George. Mr. and Mrs. Herman Wesenick returned to their farm here recently after spending several years in Flint. He went to Flint Saturday and purchased a team of horses. We are glad to welcome them back after their long absence. Wm. Lattar wishes to state in way of explanation that the amount he received last year for duties as overseer was \$65.25, amount received for team work \$43.23. He also states there was considerable work done on the road leading to the cemetery. John Thompson, Jr., of Midland spent his Easter vacation at the home of his grandparents, Mr. and Mrs. Chas. Thompson. Reno had one of its largest votes at the spring election, and everything went along smoothly. The Peoples ticket won out by a big majority—Supervisor, Ernest Crego; clerk, H. P. Black; treasurer, R. A. Bentley; highway commissioner, Henry Seafert, Sr.; Overseer, Judson Crego; board of review, Chas. Thompson; justice of peace, A. T. Vary. Mr. and Mrs. Herman Wesenick and son, Lionel, Mr. and Mrs. Henry Seafert, Jr., spent Tuesday evening with Mr. and Mrs. Henry Seafert, Sr. Mark Beardslee of Detroit and Miss Florence Baldwin of Lansing called on relatives here last week. Herman Wesenick just received a shipment of 500 baby chicks. Mrs. Oren Sherman spent Monday with Mrs. Frank Larson and little son, Frank, Jr. Miss Clara Lattar and Geo. Waters spent one evening last week with Mr. and Mrs. R. A. Bentley. Mrs. Schneck of Flint spent last week with Mrs. Harry Lattar and family. Mr. Schneck joined her for the week end. Earl Daugharty was at Detroit the first of the week. Jerry, Jr., and Patsie Murphy of East Tawas spent the week end at the Harry Lattar home.

HALE

(Too Late For Last Week) Mrs. Nellie Jennings is home from Royal Oak to spend the Easter vacation. Mr. and Mrs. Paul Labian and Rolland Nuns of Flint spent the Easter week end as guests of their parents, Mr. and Mrs. Lewis Nunn. Mrs. Clarence Peck of Loud Dam was hostess to the 500 Club on Thursday of last week. Three tables were played, first, second and low scores being awarded Mesdames Jno. Brandall, Glenn Healey and Howard Atkinson. Mrs. Rose Lake of Cook Dam and Mrs. Tyson of Loud were guests. A pleasant afternoon was spent. Mr. and Mrs. E. C. Nunn of Rose City were Hale visitors on Friday. Frank Ward, who has been in Chesaning for several months, returned home Tuesday. Mrs. Jesse Blakeslet of Chesaning and a friend from Albion were guests on Sunday of Mr. and Mrs. George Webb.

SCHOOL NOTES

Prepared and Edited by a Committee of the Student Council High School
The epidemic of the past month caused the poorest attendance that the school has had in several years. The percentage of attendance of the high school for the school month ending March 25 was 91.6. The percentage of attendance for the same month of the whole school was 87.5. The percentage of attendance of the school for the year is 95.4. The Seniors have the best record for attendance with a percentage of 97.4. The George Washington films, which are to be given under the auspices of the George Washington Bicentennial Commission, are to be presented Thursday evening, April 19. The price of admission to all school pupils is 5c, and 15c to other adults. There was no school on Friday of this week to enable the teachers to attend the county institute held in the Community Building at East Tawas on that day. All should keep in mind the next regular meeting of the local Parent-Teachers' Association, which will be held at the school building, Thursday evening, April 14. The address of the evening will be given by Charles Hamilton, assistant superintendent of the Bay City Public Schools. Instrumental music will be furnished by the High School Orchestra and Mesdames Mark and Horton will furnish the special vocal music. The pupils of the fourth grade will present a health play. This program, in addition to the beautiful refreshments, will certainly be most worthwhile. The Senior class is in charge of the assembly room program for Thursday. Everyone is heartily welcome. Evelyn Frank and John Brugger, with their instructor, Miss Crosby, journey to Alpena Friday to participate in the oratorical contest held in that city that evening. We wish them luck. Primary Phil Mark, Donald Pfeiffer and Ruth Giddings are absent this week. Several children had toxin-antitoxin treatments Tuesday afternoon. Our perfect spellers last week were Peter Pfeiffer, Amelia Herman, Les Griggs, Warren Hughes, Junior DePotty, Herbert Marz, and Nona Rapp. Maxine DePotty and Barbara Marz visited our room Friday afternoon. The Art class has made cut paper flowers this week. The 'C' group of the first grade are finishing their primers this week. Tragedies Intensified With music tones visible by means of a new device which transforms sound into light, some alleged music will no doubt present a horrifying sight.—Charleston Daily Mail.

MC IVOR

Leo, Lawrence and Miss Irene Jordan of Flint spent the week end at their home here. Mr. and Mrs. Marvin McClure and family returned to their home in Lansing Wednesday after spending the Easter vacation with her parents, Mr. and Mrs. Walter Pringle. Miss Olive Streeter of Long Lake visited Miss Lillian Schroeder over the week end. Vernon Eckstein was a caller in Black River a few days of last week. A large crowd attended the dance at the Sherman town hall Friday night. There will be a modern and old time dance there again this Friday evening, April 8. Schroeder's orchestra will furnish the music. James McGuire of East Tawas was a caller in town Sunday afternoon. A few from here attended church at Whittemore Sunday evening.

LEGAL NOTICES

STATE OF MICHIGAN ORDER OF THE CONSERVATION COMMISSION—CLOSING THE STREAMS OF THE STATE TO BROOK TROUT FISHING
The Conservation Commission, by authority of Act 230, P. A. 1925, hereby orders that for a period of five years from the first day of May, 1931, it shall be unlawful for any person to take, catch, or kill, or attempt to take, catch, or kill any brook trout in the rivers and streams of the state, excepting those rivers and streams designated or to be designated by the Conservation Commission. Signed, sealed and ordered published this fifth day of March, 1931. GEORGE R. HOGARTH, Director, Department of Conservation. Conservation Commission by: WM. H. LOUITT, Chairman RAY E. COTTON, Secretary.

Do You Know

If you cut off the stems of cut flowers a quarter inch (diagonally) every other day they will keep fresh all of two weeks? Found Ring in Carrot Madame Rerelt, a French woman, at Houdalmezeau in Brittany, when preparing vegetables for soup not long ago, found in a carrot pulled from her own garden her own wedding ring which she lost some time before

Attorney for Mortgagee,  
Business Address:  
Tawas City, Michigan.  
February 24, 1932.

**STATE OF MICHIGAN**  
The Probate Court for the County of Iosco.  
At a session of said Court, held at the Probate Office in the city of Tawas City, in said county, on the 30th day of March, A. D. 1932.  
Present: Hon. David Davison,  
Judge of Probate.

In the matter of the Estate of Earl H. Barnman.  
John A. Stewart, Administrator, having filed in said court a petition, praying for license to sell the interest of said estate in certain real estate therein described.

It is Ordered, that the 22nd day of April, A. D. 1932, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted;

It is Further Ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Tawas Herald, a newspaper printed and circulated in said county.  
DAVID DAVISON,  
Judge of Probate.

**Townline**

Mrs. Sarah Bowen of Flint visited friends and relatives here the past week.

Miss Grace Freel is home this week, ill with the flu.

Mr. and Mrs. Joseph Ulman visited their parents, Mr. and Mrs. George Goodrow at Bristol last Saturday.

Mrs. Wm. Ulman and sons of Tawas City spent Tuesday with her mother, Mrs. Orlando Frank.

Emanuel Falkenburg and mother, Mrs. Julius Falkenburg, spent a few days at Detroit the past week.

There were twenty-six children from School District No. 2 who went to East Tawas Tuesday and were immunized against diphtheria.

Mr. and Mrs. Charles Hughes and family visited relatives here on Sunday.

Mrs. Wm. Bellenger has returned from a visit at Saginaw, Midland, Merrill and Bay City with relatives and friends.

Mr. and Mrs. Charles Koepke are fixing up their new home on the lower Townline.

A good share of the people from here turned out on election day despite the bad roads. Clarence Gauthier was elected pathmaster.

**Sherman**

Chas. Kane of Tawas City visited friends here one day last week.

Dr. Hasty of Whittemore made a couple of professional calls here last week.

Chas. Jordan visited relatives at Flint last week.

Glenn and Cecil Bronson of Twining were in town Saturday.

Mrs. A. Vedusky and son-in-law of Flint spent the week end at the home of Mr. and Mrs. B. Smith.

Floyd Schneider returned to Flint Sunday after spending a week at his home here.

Mr. and Mrs. Peck Ross and family moved back to his mother's farm west of Twining after living here for three years.

Fred Hauser of Twining was in town on business Tuesday.

Roland Pierson of Grand Rapids was here with his airplane last week and hunted wildcats with Matt Jordan. They bagged five cats, which is considered good for one week. He also got some good snapshots views of some of the cats that were held at bay by the dogs. The pictures were published in the Bay City Sunday Times last Sunday.

Conservation Officer A. G. Leitz of East Tawas was a caller in town Tuesday.

There were 145 votes cast at the election here Monday. There was no opposition excepting for highway commissioner in which Ed. Norris won out over Vernon Eckstein.

**Hemlock**

Mr. and Mrs. Harry VanPatten and sons, Ralph and Glenn, and Hazen Durant were visitors in Lupton one day last week.

Arthur Cox of Flint spent the week end here.

Henry Watts of Turner was calling on old friends here Monday.

Hazen Warner was knocked off his wheel and shaken up while on his way home from school Monday.

Mrs. Chas. Brown spent Thursday with Mrs. John Katterman.

Mr. and Mrs. L. D. Watts entertained over the week end and at a birthday dinner Sunday, Mr. and Mrs. Jas. Carlson, daughter, Maxine, Mr. Carlson's sister, and husband, and Mrs. Vira Murray, of Flint, Mr. and Mrs. Earl Daugharty and Mr. and Mrs. Thomas Frocks of Reno. The occasion was the birthday of Mr. Carlson and Mr. Watts.

Mrs. Fahselt and Mrs. Louise McArdle called on Mrs. John Katterman Wednesday.

Henry Durant and Walter Pringle were at Bay City last week, where Mr. Durant had an Ex-ray taken of his arm. It was found the arm is still broken.

Will Curtis of Whittemore was a caller here Tuesday.

Miss Celia Smith spent Tuesday with her sister, Mrs. Will Herriman.

**LONG LAKE**

Mr. and Mrs. Elwyn Hobart of Bay City called at the Stretter home Saturday evening.

F. C. Holbeck drove up from Lansing and spent the week end at his farm.

Quite a number of folks from here attended the township election at Hale Monday.

Mrs. Robert Buck entertained her mother, Mrs. Alice Abbott of Wilber, and sister, Mrs. A. M. Boomer of Tawas City, from Wednesday until Saturday of last week.

**MORTGAGE SALE**  
Default has been made in the terms and conditions of a certain mortgage made by Christine Ullrich Holland, of the village of Grosse Pointe, Wayne County, Michigan, Mortgagor, to Laura M. Tobin, of the Village of Grosse Pointe, Wayne County, Michigan, Mortgagee, her heirs and assigns, bearing date the 12th day of August, A. D. 1931, and recorded in the office of the Register of Deeds for the County of Iosco, State of Michigan, on August 28th, 1931, in Liber 25 of Mortgages, on pages 144 and 145, which mortgage contains a power of sale. There is claimed to be due and unpaid on said mortgage, at the date of this notice, for principal and interest, the sum of Three Thousand One Hundred Two and 33/100ths Dollars (\$3,102.33). No suit or proceeding at law or in equity has been had or instituted to recover the debt secured by said mortgage or any part thereof. Now therefore, by virtue of the power of sale in said mortgage contained, and pursuant to the statute of the State of Michigan in such case made and provided, notice is hereby given that on Thursday, the 19th day of May, 1932, at 12:00 o'clock noon (Eastern Standard Time), said mortgage will be foreclosed by sale at public auction to the highest bidder, at the front entrance of the Court House in the City of Tawas City, Iosco County, Michigan (that being the place where the Circuit Court for the County of Iosco is held, of the premises described in said mortgage, or so much thereof as may be necessary to pay the amount due on said mortgage, as aforesaid, with the interest thereon, and all legal costs, charges or expenses thereon, including the attorney fees allowed by law, which said premises are described as follows:  
A piece of land in fractional Section 28 and E 1/2 of Government Lot 1, Section 21, Town 22 North of Range 8 East, 100 feet wide fronting on Tawas Bay and bounded as follows: Commencing on the North line of Section 23, 1400 feet west of the N.E. corner of said Section; thence south parallel with east line of section 28, to shore of Tawas Bay; thence westerly along Bay Shore 101.3 feet; thence north parallel with first line and 100 feet therefrom across Section 23, and into Section 21, a distance of 256.2 feet more or less, to south

line of 20 foot drive-way, thence south 84 degrees east along said drive-way to a point directly north of starting point; thence south to place of beginning; also use of 20 foot drive-way established across north end of said lot and use of grantee herein and adjoining lot owners, in common, for ingress and egress west and northward to "Tawas Beach Drive," so called. Reserving all commercial fishing rights; together with the hereditaments and appurtenances thereof, in the City of East Tawas, Iosco County, Michigan.  
Dated at Detroit, Michigan, February 15, 1932.  
LAURA M. TOBIN, Mortgagee.  
CHAWKE & SLOAN, Attorneys for Mortgagee.

**Tawas Breezes**  
VOL. V APRIL 8, 1932 NUMBER 49

"Did you ever hear from that money you loaned your neighbor?"  
"I should say I did. He bought a radio with it."  
Just received a shipment of seeds for spring, all first class quality. Timothy, \$3.00 per bu.; sweet clover, \$4.00 per bu.; Alsike, \$9.00 per bu.; June clover, \$9.00 per bu.; alfalfa, \$10.00 per bu.; timothy and alsike, \$5.40 per bu.; Red Cob fodder corn, \$1.50 per bu.; Leming fodder corn, \$1.50 per bu.

A rural mail carrier had a pet squirrel in a small cage to deliver. The squirrel got out and disappeared down the road.  
"Aren't you going to catch him?" asked a bystander.  
"Don't worry about that," said the mail man. "He doesn't know where he's going. I've got the address here."

We are selling small wheat for \$1.10 per 100 lbs.; quick growing mash for little chicks at \$2.20 per 100 lbs.; Hexite calf meal at \$1.25 per 25 lb. sack; Blachford's calf meal, \$1.25 per 25 lb. sack; Hexite egg mash at \$1.90 per 100 lbs.; corn at \$1.30 per 100 lbs.; Linseed oil meal at \$2.25 per 100 lbs.; meat scraps, \$3.00 per 100 lbs.; bone meal, \$3.00 per 100 lbs.

Business Man: "What do you do with all those pictures you paint?"  
Artist: "I sell them, sir."  
Business Man: "Well, name your terms, my man. I have been looking for a salesman like you for years."  
A quantity of Wolverine seed oats at 45c per bu.  
Just received a car of fertilizer.  
Mistress: "Your references seem to suggest that you frequently change your place."  
New Cook: "Yes, my fiance is with a traveling circus."
