IMPROPER TILTING MAY KILL CHICKS

Should Never Allow Eggs to Stand Small End Up.

About half of the losses from fertile eggs that fail to hatch during incubation are due to abnormal positions of the chicks in the shell and are to some extent preventable, according to Dr. T. C. Byerly of the bureau of animal industry, United States Department of Agriculture. The normal position of the chick before hatching is with the head near the air sac at the large end of the egg. The chick breathes the air in the sac before it pips the shell, but in case of an abnormal position the chick may die from suffocation.

The principal cause of abnormal positions of chicks in the shell is believed to be improper tilting of the eggs in the tray from the fifth to the fifteenth days of incubation. Eggs incubated with the small end up show the highest percentage of abnormal positions of chicks, and the department therefore recommends that eggs should never be allowed to stand in this position. Eggs in many commercial incubators are tilted at a 45-degree angle, with the large end up, which is believed to give fewer abnormal positions among the chicks than incubating them horizontally.

Experiments indicate that losses from abnormal positions of chicks in the shell may be reduced, though not entirely eliminated. An incubator tray was devised that maintains a position between the horizontal and 45-degree angle. The eggs were turned mechanically every 15 minutes and rotated on their long axis in an arc of 60 to 120 degrees but were never rolled over and over. Eggs in a similar experiment that were turned always in the same direction every 15 minutes showed a very heavy loss.

Close Inbreeding Likely to Affect Hatching Eggs

Close inbreeding tends to decrease hatchability of eggs. Continued mating of brother and sister for a few generations often results in eggs that will not hatch at all. Breeding cannot be overlooked if good hatches are to be obtained, says Successful Farming.

For the person who desires to produce good hatching eggs this season either for a hatchery or for home hatching the best chance for improvement is through proper methods of feeding and management. The hen must be well supplied with vitamins.

Vitamins A, B, D, E, and G are all necessary in the hen's ration if she is to lay eggs that will hatch. Vitamins B and E are likely to be present in ample quantities in nearly any ration. It is vitamins A, D, and G that are most often lacking. This deficiency is responsible for poor hatches. While many farm flocks are not given feeds that contain enough of these vitamins to make good hatching eggs, yet each of them can be supplied without much trouble or expense.

A good source of vitamin A is yellow corn. Alfalfa meal of good green color, or other green hay meals, as well as cabbage and similar green feeds, provides liberal quantities of vitamin A. Supplying reasonable quantities of these feeds will insure ample amounts of vitamin A in the eggs for hatching purposes. There are many other feeds which contain some vitamin A, but among the common farm feeds these are the most important and economical ones.

Poultry Helps

The pullet's egg may be small at first, but it represents a day's work for the pullet. Size of egg is very likely to increase with age, so too much should not be expected of the flappers at first.

Don't overcrowd the laying houses. Three and one-half to four square feet per bird is required to properly house the laying bird. Each hen will need seven to eight lineal inches on the roosting pole.

In Missouri tests it was found that burning lights in the poultry house all night increased winter egg production.

A total of 216,000 eggs are needed for breakfasts of the inmates of Northwestern Federal penitentiary, Lewisburg, Pa., for a year.

A hen requires almost half a pound of feed to produce one egg. At least, this is the average feed requirements for six breeds in the 1933 western and central New York laying tests.

Store eggs in cool places, where the temperature does not get above 70 degrees, nor down to freezing.

Hens do not respond to careless management, irregular feeding methods, poor rations, or uncomfortable houses.

There is no denying that constitutional vigor in a flock is the keystone and most important factor in success. If one loses sight of this self-evident truth, disaster is sure to come.

The Household

By Lydia Le Baron Walker

Many Interesting Bits of Still Life Are Easily Found in This Well-Kept Kitchen.

EVERY room presents many examples of still life, since interiors are composed chiefly of them in combination. The term still life is one belonging to the artists' terminology. By it is meant any arrangement of inanimate objects in pictorial style. Still life pictures are not inclusive. For example a painting or other portrayal of the interior of a room, or even a section of a room comes under the category of a picture of an interior, even though the units in it are inanimate. But, on the other hand, such a picture as a brass bowl filled with fruit standing on a tray with perhaps a couple of candlesticks on either side of it, would be a still life. Also an assortment of articles on a kitchen shelf is a bit of still life, and it is easy to think of others.

With this thought in mind let us consider the still life of a kitchen. There are so many attractive glimpses of this sort that a well-kept kitchen has to offer. To the homemaker's eye, two things are important, first that the kitchen presents an orderly array of things, and second that these things be immaculate. There can be no "artistic disarray" to meet the vision. Such a thing may be attractive in a painting, but in real life it becomes confusion. A place for everything and everything in its place is a motto needed to be observed in the kitchen above all other rooms in a house. It is a sort of laboratory, and working conditions must be good and order prevail if good results with the least effort are attainable.

A row of shining saucepans hanging under a shelf is a bit of still life to delight the onlooker. The various sizes and shapes of the kettles give evidence of readiness to prepare different quantities of foods as required. Their glistening surfaces bespeak the immaculate housekeeper. Shelves of kitchenware, when well arranged, do not need the protection

of a closet door to shut them from view. The yellow of mixing bowls, the shimmer of glass tumblers, measuring cups, mayonnaise mixers, etc., the rows of white or gay colored enameled tin containers each lettered to indicate their contents with perhaps the added ornament of painted decorations—all these are other bits of still life which make the kitchen delightfully attractive.

Pictorial Elements

The modern kitchen has received its full share of attention during the past few years. It is especially interesting, therefore, to consider its pictorial elements. The enamel sink no longer has pipes and plumbing exposed, but is sheltered by closets which permit of access to pipes, although shielding them from sight. The windows are curtained with gay gingham, or other wash material, or with the flexible rubberized textile now so much used for kitchens as well as bathrooms. The kitchen table, cook books, and each item can tempt the homemaker to make delectable dishes, while she enjoys the glimpses of pleasing still life she has arranged about her.

Fox Is Trained to Chew Gum by Sheriff

Odessa, Texas.—Sheriff Reeder Webb prides himself with the achievement of what generally was termed the impossible—training a fox.

The sheriff captured a fox and taught it to search for chewing gum and chew it. He named the fox "Jojo."

Jojo now has become the mascot of the courthouse family and often carries packages of gum to his master.

Public Opinion

By LEONARD A. BARRETT

"The source of power in the nation is not so much with those who make its laws, as with those who shape its public opinion." Right.

In an address by Mr. Newton Baker, former secretary of war, appeared the following: "The world is living in a powder magazine." Students of foreign affairs are convinced that Europe is in a turmoil, more intense than the period

which immediately preceded the last war. It is no mere jest but a reasonable probability that war may be imminent in Europe. The odds accepted by Lloyds in London decidedly vision war in the very near future. What has become of the various peace pacts? International agreements and private contracts between nations? Laws? Yes—but laws guarantee nothing unless enforced,

Tigers' New Pilot

Mickey Cochrane, who gained national fame as a catcher for the Philadelphia Athletics, will be manager-player of the Detroit Tigers during the 1934 season.

and the power which demands enforcement is public opinion. In the final analysis, "swords shall be beaten into plowshares" only when the mind of the public is united in its unconditional effort to enforce peace.

By common consent we are emerging out of a depression. At least it seems so. But by no conceivable stretch of the imagination can legislation bring back prosperity. Laws are indispensable in creating the machinery, but they do not run the machinery. Public opinion does that. Prosperity will return as confidence returns. And what is confidence but another word for public opinion?

Whatever may be our views about prohibition, the repeal of the Eighteenth amendment illustrates the fact that the force of power is not in the enactment of law, but in public opinion which enforces it. At one time, public opinion voted the Eighteenth amendment into the Constitution. At another, public opinion repealed it.

In the realm of moral values, the same condition prevails. No code of laws, however, can guarantee the moral life of the community. The ten commandments, the most comprehensive and perfect moral code the world has ever known, has not prevented crime. Crime will be eliminated through a process of law only when the public demands it.

Public opinion is molded largely by the influence of religion, education and the public press. When the lawmakers dictate the tenets of religion, the facts of education, or the mind of the public press, we have a despotic form of government. When freedom of expression prevails, we have a democracy.

Big "Secret" Plane Is Ready for Tests

Huge Airliner Planned for Ocean Flights.

New York.—The first transatlantic airliner, which has been in course of closely guarded development for more than two years, and which will give to America, in the spirited international race for ocean airplanes, the first transport airplane designed especially to fly either the Atlantic or Pacific on regular mail schedules, will be ready to take the air soon for a series of running tests, it was announced here by Igor Sikorsky.

The big ship, first of three sister ships, which incorporates revolutionary improvements in construction as well as in transport aircraft design, is rapidly assuming its final form in the aircraft factory in Bridgeport, Conn.

"While no detailed specifications concerning either the construction or performance of these ships may be given out, other than those details originally made public, the new transatlantic type S-42 flying boat will provide a performance substantially improved over the basic requirements contained in the Pan-American specifications," Mr. Sikorsky said.

Improved Methods.

"Whereas these requirements called for a flying boat capable of transporting the indicated over-ocean mail load over 2,500 miles against head wind conditions of 30 m. p. h., the S-42 will actually have a considerably greater range under these same conditions and, in addition, will be able to carry a substantially greater load. Under the construction contracts, at each stage in the development of the new plane we have experimented with constantly improving materials and methods, and have thereby effected important advances in both construction and performance."

More than a year and a half was devoted to the engineering research behind the plans for the new transoceanic airliners. Construction actually got under way more than a year ago, several months before the construction contracts had been awarded.

"Because of this early start," Mr. Sikorsky stated, "both our engineers and Pan-American Airways will be able to take advantage of an important testing period which we believe will result in further substantial improvements in the performance characteristics of the sister ships which are to follow this first model."

Will Carry Passengers.

"Because Pan-American Airways must carry the entire financial burden involved in development of new international aircraft, whereas advanced equipment for European competitive lines is developed directly at government expense or under subsidies provided for this purpose, it was necessary for the American operators to develop this new equipment for a dual purpose so that, in securing a transport plane capable of performing transoceanic mail service, the same ship would also be highly adaptable for use on the present passenger, mail

and express routes between North and South America.

"For its immediate transport trial service, therefore, although basically a transoceanic, mail-carrying transport, the new flying boat will be fitted as a 32-passenger airliner for use in carefully controlled test operations on the trans-Caribbean routes of the Pan-American Airways system.

"The new S-42 will have, in addition to the regular crew of five, capacity for 32 passengers, with more adequate accommodations than now existing in any type of transport plane, in addition to 1,000 pounds of air mail and express and will be capable of flying this load over a 1,200-mile range."

Well Dressed Youngsters

Twin sweaters like mother's and an abbreviated, pleated, washable plaid skirt for sister. Brother goes in for suspenders at a tender age. His sweater and shorts are in jersey.

Flyer Carries 100,664 Pounds in Eleven Days

Edmonton, Alta.—Working against a rapidly approaching freezeup, W. Leigh Brintnell, northern flyer, has created a new record for express flying in the North. With a single machine Brintnell moved 100,664 pounds of freight from Fort Norman to Fort Franklin in eleven days.

Freezeup conditions came on quickly this year and river boats were unable to handle the freight, most of which was the winter food supply for miners of the Great Bear lake field.

In the face of poor flying conditions the pilot shuttled back and forth. Only on one day was he forced to "sit" down by bad weather.

Silkworm Industry

The silkworm industry is carried on in more than 2,000,000 Japanese farm houses.

ODD THINGS AND NEW—By Lane Bode

WORLD LIGHTNING! LIGHTNING REPRESENTS A CONTINUOUS QUARTER MILLION HORSEPOWER OF ENERGY OVER THE WORLD.

ICE-BOUND FINLAND MASTERS HANDICAPS

One Debtor Nation That Meets Its Payments.

Washington.—In these days of war debt defaults and "token payments," Finland, the far north "land of forty thousand lakes," continues to set a good example for European debtor nations.

Alone among them, Finland has met each payment in full. Her debt is considerably smaller than most but her population too, is small and her location astride the Arctic circle is not conducive to great wealth.

"Often referred to as 'little Finland' by those who have not carefully studied a map, this hardy and thrifty republic stretching from the Baltic sea to the Arctic ocean has an area considerably larger than the British Isles," says a bulletin from the National Geographic society.

Known by Its Athletes. "To most Americans, Finland is known chiefly through the exploits of its Olympic athletes, headed by Paavo Nurmi. Beginning with the success of Hannes Kolehmainen at the Stockholm games in 1912 Finland's tight-fisted, strong-bodied young men repeatedly placed their country at the top of the world in the Spartan sport of long distance running.

"Believed to have originated in the Volga basin in southern Russia, the Finns were driven gradually northward to Estonia and thence crossed to the Finnish peninsula during the Iron age.

"For some six centuries after 1157 Finland was joined to Sweden while constant wars were waged with the Russians. Finally captured by Russia, Finland in 1809 became a grand duchy of the Russian empire and remained in that status until the red revolution of 1917.

"By a declaration of independence, December 6, 1917, the Finns broke the Russian yoke, but a sharp civil war ensued in which red forces with Russian Communist backing were defeated by the White guards under General Carl Gustav Mannerheim, called 'the George Washington of Finland.'

"Although forced to borrow at the outset, the canny Finns, tasting independence for the first time in their centuries of struggle, quickly placed their country on a sound financial footing. Educational facilities are good.

"Woman suffrage has long been established in Finland. Like this country, Finland tried national prohibition after the war and later abandoned

it. Instead a system of strict governmental control has been set up. "Lying in the same latitudes as Alaska and the frozen wastes of Siberia, Finland has long, hard winters but the climate is tempered somewhat by its many lakes, its low altitude, the proximity of the Baltic, and prevailing southwesterly winds.

Hot and Cold Baths Popular. "A national custom handed down from remote ages is the steam bath, followed by a shower, first warm, then icy. In the country districts, the Finns often dress outdoors in the cold and the youngsters roll in the snow-drifts for fun."

"Finland's population in recent years has passed the 3,500,000 mark. Between the Finns and the Swedish elements among them some feeling exists. The power of the Swedish-speaking group in both politics and education has been somewhat curtailed. The dwarfed, pathetic Lapps, in the extreme north, number only about 1,600.

"Abo, Nurmi's home town, was the ancient capital. In 1929 it celebrated its seven hundredth anniversary. The

Horses and Lambs Admitted to Church

Provence, France.—Because lambs are carried to the altar at the Christmas Eve mass, Provence claims a distinction shared with Sienna, Italy, the only other city where animals are permitted to enter Christian churches. Prior to the running of the Palio in Sienna each year, each horse is taken to its owner's church and blessed before the altar.

seat of government is now at Helsingfors, a modern though modest capital. "Half of Finland is clothed with valuable timber. Railway locomotives burn wood instead of coal.

"In the days of wooden ships Finland held an important place in shipbuilding and on the seas. More and more of the square-rigged Cape Horn grain ships have fallen into Finnish hands. But with the steel ship dominating modern marine traffic, lack of iron ore has crowded the Finns from their once important place in general shipping on the oceans.

"Lumbering, hunting, fishing, farming, and dairying have been supplemented by a growth of industries turning out such products as paper, linen, tobacco, and leather."

Davidson and His Roosevelt Bust

Exhibit "Holy Tunic of Christ"

Sacred Garment to Be Shown in French Church.

Argenteuil, France.—The "Holy Tunic of Christ" will be exhibited to the public in the Church of Argenteuil as a fitting close to the Holy Year commemorative of the 1,900th anniversary of the crucifixion, and with the authority of Pope Pius XI. It will be on view from Good Friday to Easter Sunday (March 30 to April 1, 1934).

This is the garment supposedly worn and colored by the Virgin Mary herself, and is about 40 inches long, resembling a shirt. It is made of wool, is purple in color, and St. Mark (chapter 45, verse 17) refers to it as follows: "And they clothed him with purple." It is made without a seam and is probably the "seamless robe" referred to in the gospels.

According to ecclesiastical authorities, this holy tunic was worn by Jesus on his way to Calvary; what is believed to be a definite trace of the cross proceeds from the right shoulder downward diagonally across the back. Experts of the Gobelin's Tapestry works, who examined the tunic in 1892, estimate that it dates back to the beginning of the Christian era and perhaps beyond.

There are very few authentic relics of Jesus left, and the tunic of Argenteuil is one of three—the other two being at Treves, Germany, and Turin, Italy. They have been exhibited to the faithful during 1933, but as a climax to Holy Year the Argenteuil relic will be exhibited. This is the first time this has been permitted since 1829.

Canon Louis Breton of the Argenteuil church said: "This holy tunic was discovered by Empress (Saint) Helene in 300 A. D., about the same time she found the true cross. It remained in Constantinople until the Ninth century, when Empress Irene, who needed soldiers to fight the caliph, presented it to Charlemagne, the great king, who, in turn, made a gift of it to his daughter, Theodrada, benefactress of the priory of Argenteuil. Consequently, it has been in Argenteuil more than a millennium."

Spies Swarming Around French Frontier Forts Paris.—The recent arrest by French secret police of the most famous woman spy since the war, "La Belle Sophie," as she sought to smuggle a new French army rapid-fire rifle across the German border draws public attention to the swarm of spies hovering around the new French frontier fortifications.

"La Belle Sophie" is the first of these spies arrested with proof of her guilt in her hands. Hundreds of others have been tagged and trailed among the fortifications, but Sophie alone has proved a rich arrest.

Sophie had all the tricks of the Mata-Hari school of women spies. She used her wiles to ensnare Rene Pleston, a lovesick French conscript soldier, and persuaded him to steal the new rifle and give it to her.

Pleston played sick, hid the rifle and finally delivered it to his enchantress. She was caught with the gun in an automobile when frontier guards—evidently warned by counter spies, went through her belongings. Sophie is in a military prison.

The peacetime penalty for a woman spy caught in the act of betraying a military secret is long imprisonment. She cannot be shot as was Mata-Hari, famed H-21 of the German spy service; Felicie Pfadt, "R-17" of the German service, who was caught and executed at Marseilles during the war, or "La Dulcimetiere" and Marguerite Francillard.

Builds Own Tombstone, Leaves No Death Space

Lebanon, Mo.—Every person who comes to Laclede county makes a pilgrimage to A. A. Wilson's monument. Wilson, a storekeeper and postmaster at Prosperine, 12 miles from Lebanon, has spent many years erecting an elaborate tombstone in the graveyard near his store. The monument is

made of cobblestones and there is a low wall enclosing the space for the grave. On the four corners are electric light bulbs. A whisky bottle is thrust in the center of the monument. A piece of farm machinery is cemented at the bottom. There is a metal lizard on one side and a fringe of seashells on the wall.

In the middle of the monument is a plate bearing his name and date of birth and that of his wife, Emma. There is no space left for the date of his death.

"Everyone'll know that, anyhow," Wilson declares.

Mexico Cuts RedTape to Tempt U. S. Travelers

Nogales, Ariz.—To encourage American tourist traffic into western Mexico the Nogales, Sonora, chamber of commerce succeeded in removing some of the border restrictions.

The most important obstacle that has faced Americans in the past, the posting of a customs bond ranging from \$50 to \$200, has been removed, and Americans now may enter Mexico upon payment of 5 pesos.

"All red tape of the past has been eliminated," officials announced.

An increase in travel is expected to result.

Ten Cents Worth of Seed Produces Record Crop

Cape Girardeau, Mo.—Christ Freeman, a farmer, planted ten cents worth of turnip seed that grew into a crop which was considered record breaking.

Some of the turnips weighed 6½ pounds with the "scrubs" ranging downward to 4 pounds.

Freeman said that when he pilled the turnips from his 10-cent investment he could hide a motor truck behind the vegetables.

Find Lost Continent on Floor of India Ocean

Calcutta.—Scientists, groping along the floor of the ocean between India and Arabia, have discovered what they believe to be the "lost continent of Lemuria."

Members of the Murray Oceanographic expedition, exploring the depths of the Gulf of Aden in a three months survey, said they had discovered ten ranges of hills on a sub-surface in the sea.

Law Passed to Protect Gem-Eating Ostriches

Cape Town, Africa.—So many ostriches were being slain in the diamond fields of the Kalahari desert that a law has been passed protecting the birds against hunters who wantonly killed them for the gems found in their stomachs. Seventy-one diamonds were found in one ostrich killed prior to the enactment of the new legislation.

Around the County

The various school districts are to be congratulated upon the fine improvements that they are making under the C. W. A.

The C. W. A. projects have practically reached their peak as far as C. W. A. payrolls are concerned.

Old adage: "A man is like a hog—you never know what he is worth until he is dead and dressed."

The Board of Supervisors will convene in their regular January session on Monday, the 15th. Some important problems will confront them.

Most of the trunk lines are free from ice but driving on the side-roads, especially in the townships, is still very hazardous.

The annual harvest of ice has begun by local icemen.

Scott Is Honored

Foundations of the chapel of Saint Bride, in Callander, Scotland, which is mentioned in Sir Walter Scott's "Lady of the Lake," have been restored and a memorial gateway to the author has been erected by the people of Callander.

Ice Fields in Alberta

The largest and most spectacular ice field close to civilization in North America is the Columbia ice fields. It is reached by pony trail from Jasper, Alberta.

Salt in Ocean Water

Salt content of a cubic mile of ocean water weighs 117,089,280 tons.

The First Census

Moses is credited with being the first ruler to count noses in his flock. Solomon did likewise, some 3,000 years ago. After nine months and twenty days the census taker reported 1,300,000 able bodied men among the people of Israel and Judea.—The Country Home.

Has Real Gold Value

The value of the gold in the \$20 gold piece is \$20 at the time it leaves the mint. Some of the weight is lost by abrasion in circulation. Copper is the alloy used in gold coins. The value is a negligible amount, as only 51.60 grains of alloy are contained in the coin.

Why He Didn't Vote

Summoned to explain why he had not voted at an election in compliance with the Australian compulsory voting law, a Melbourne man wrote back to the election board: "See Her-aid birth notices." There was no procreation.

Don't Nurse It

A grievance is one ailment that cannot be cured by careful nursing.—Los Angeles Times.

Tornadoes Rank Third

Tornadoes are less deadly than lightning or fire.

MORTGAGE SALE

By reason of default in the payment and conditions of a mortgage made by Frederick C. Holbeck and wife to Susan Richards, dated July 2nd, 1923, and recorded July 5th, 1923, in Liber 22 of Mortgages at page 439, in Register of Deeds office for Iosco County, Michigan, upon which there is now claimed to be due by reason of such default the sum of Ten Thousand, Two Hundred

Seventy-five Dollars for principal and interest, and no legal proceedings having been taken to recover said amount:

Said mortgage will be foreclosed by a sale of the mortgaged premises on Saturday, the 13th day of January, 1934, at Public Auction or vendue, at ten o'clock in the forenoon of said day, at the front door of the Court House in Tawas City, in said County, to satisfy the amount then due for principal, interest, attorney fee and costs.

The land embraced in said mortgage and to be sold, is described and bounded as follows:

Commencing on the west line of Lot One, 6 rods south of the north-west corner thereof, then south on west line of said Lot 1, to northerly line of D. & M. Ry. right-of-way; thence southerly along said right-of-way 52 rods more or less to fence erected and running northerly from said right-of-way; thence northerly along said fence extended, 66 rods more or less to southerly shore of

Long Lake at water's edge; then westerly along water's edge 34 rods more or less to south line of land heretofore deeded to Joseph Cluckey by Iosco Land Company; thence westerly on Cluckey's line, if extended, to place of beginning.

Also that part of Lot One, and SE 1/4 of NE 1/4, Sec. 6, lying south-west of D. & M. Ry. right-of-way; and also the SW 1/4 of NE 1/4, Sec. 6, lying east of a line running north and south 160 rods east of the west line of Sec. 6.

Also the S 1/2 of Section 6, except the west 80 acres thereof; Also that part of the NE 1/4 of NW 1/4, Sec. 7, lying east of a N. & S. line 80 rods east of west line of Sec. 7; and

Also the NW 1/4 of the NE 1/4, Sec. 7, comprising 351 acres more or less, and all being in Town 23 N., R. 5 East, Iosco County, Michigan.

Dated October 20, 1933.
Susan Richards, Mortgagee
N. C. Hartingh, Attorney.
Business Address,
Tawas City, Mich.

MICHIGAN BELL TELEPHONE CO.

GUARD AGAINST EXPOSURE ... USE THE TELEPHONE!

Trips outside on stormy, damp winter days often result in colds and illness.

Such dangers can be greatly lessened if you have a telephone in your home. For you can "run" errands and reach friends by telephone without leaving the house!

Telephone service "pays its way" in convenience . . . in the time, steps and driving expense it saves . . . and in the protection it offers home and loved ones in case of fire, accident, sudden illness or other emergency.

For information about telephone service, or to place an order, visit any Telephone Business Office

Camel's Burden
An expert says that from 500 to 700 pounds is the average weight for a camel to carry. He usually carries this on an average of 10 hours or 23 miles a day. The average for the northern and the southern species varies somewhat in speed and the burden which they carry, but the above is an average for both.

World's Forests
Russia has the most extensive forests. Next comes the British empire; third, Brazil, and fourth, the United States, says the American Tree association. These countries together have within their borders nearly two-thirds of the forest land of the world. The remaining third is divided among more than fifty nations.

Pounds Mean Pints
The pound of grease, or other lubricant, specified for the transmission or differential of many cars means a pint in liquid measure.

Paddy
Paddy is simply unhusked rice, either growing in the field or cut. It comes from the Malay "Padi" and may, by extension, mean rice in general.

From Pulp to Paper
One ton of wood pulp will make three square acres of paper.

Venerable Spruce
Preserved in glacial ice for 300,000 years, a spruce tree was exposed again to the open air by the recent recession of the great North American ice cap in Glacier bay, Alaska, and was found by a Canadian government party. It grew for 124 years before the glacier enveloped it.

Washington in Contempt
According to some historians, George Washington during a hearing on a land dispute in 1734 protested the decision of a justice of the peace and was fined for contempt of court. He, however, succeeded in winning the lawsuit.

Common Sense in United States
In one of his essays upon America, John Stuart Mill said that "when confronted with a grave economic issue the people of the United States often seemed upon the point of doing the wrong thing, but in the end common sense prevailed, and they have done the right thing."

Incentive in Defeat
What is defeat? Nothing but education, nothing but the first step to something better.—Wendell Phillips

In a Nutshell
Fire is the test of gold; adversity of strong men.

LOOKING BACKWARD

50 YEARS AGO—JAN. 17, 1884
The long bridge over the Rifle river for the D. B. C. & A. railroad was completed Monday. Considering the unusual severity of the weather, excellent progress has been made. The transfer by teams at that point will now be abandoned.

According to a review made by the Saginaw Board of Trade, 61,320,000 feet of lumber were produced at Tawas City and East Tawas during the past year and 195,000,000 feet at Oscoda and AuSable.

John O'Brien, alias "Sailor Jack," of AuSable was brought here Tuesday charged with "assault with intent to do great bodily harm."

Hale's mill is being overhauled and enlarged, and the sawing capacity increased to 100,000 feet per day. The mill is now equipped with seven engines, including steam carriage feed and log turner.

The Tawas Herald office is located in the old Whittemore store building. This building constituted the commercial and social center of Tawas City for a quarter of a century. The upper story served for a court room, church, village school and ball room during those early years.

The following officers for the G. K. Warren Post, G. A. R., were elected Tuesday evening: Lyman Smith, Commander; B. F. Oakes, S. V.; C. W. Gabrielle, J. V.; Hugh McDonald, Officer of the Day, and H. A. Goodale, Surgeon.

The new school at Whittemore is rapidly nearing completion. The building is two stories high. The upper room will be used for a town hall. A new hotel is being built at that place by Charles Titus. Mr. Harvey's store is nearly completed. Lumber is on the ground for a new saw mill.

The general store of J. L. Hokam at Emery Station burned Sunday evening. Smith Gregory of Sherman has just returned from Dakota after an extended visit. The Holcomb mill and the Arn shingle mills are now in operation.

Alabaster

Josephine and Gabrielle Cieszlek of East Tawas were visitors in town last week.

Charles Nash of Tawas City was a caller in town Friday.

Mr. and Mrs. Arthur Benson, son, Bobby, Mrs. E. H. Lundquist and James Brown motored to Bay City on Saturday.

Peter Baker motored to Standish on Saturday.

Mr. and Mrs. Adrian McClean and Mr. and Mrs. Wm. Rath of Oscoda were visitors of Mr. and Mrs. E. H. Lundquist Saturday evening.

Dorothy and Marcella Martin spent the past week visiting in AuGres.

Mr. and Mrs. Edward Anderson spent Monday in Bay City.

Dorothy Benson spent the week end visiting in East Tawas.

Mr. and Mrs. John McLean and sons of Rogers City visited at the home of Mr. and Mrs. Alpha Martin over the week end.

Mrs. E. Martin and children of Tawas City and Mrs. Elmer Sheldon and son of East Tawas visited with friends here Sunday.

Two basketball games take place this week. The boys play at Oscoda Tuesday, and on Friday evening the boys and girls will play Whittemore here.

First Mississippi Levees
When the first levees were built along the Mississippi river is not a matter of record, says Pathfinder Magazine. Such levees have been constructed in that region since early in the Eighteenth century. At first individuals built levees to protect their own land property in time of flood and later local authorities, county and state, aided in the work. In 1879 congress created the Mississippi river commission and the first appropriation for improving the river was made the following year.

No Set Execution Time
Prisoners condemned to death are executed in the early morning hours primarily because it is the time of day when it will cause the least disturbance in the prison. There is no particular hour when all executions must be carried out.

Stored Gold
Earmarked gold in a bank vault cannot be counted as part of the bank's reserve, nor can any use be made of it. Earmarked gold is merely in storage.

STATE OF MICHIGAN
The Probate Court for the County of Iosco.

At a session of said Court, held at the Probate Office in the city of Tawas City, in said County, on the 23rd day of December, A. D. 1933.

Present: Hon. David Davison, Judge of Probate.

In the Matter of the Estate of Mrs. Jennie A. Shien, deceased.

Winfield S. Perkins having filed his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to Winfield S. Perkins and Edward Stevens or some other suitable person.

It is Ordered, That the 27th day of January, A. D. 1934, at ten A. M., at said Probate Office is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Tawas Herald, a newspaper printed and circulated in said County.

DAVID DAVISON,
Judge of Probate.
A true copy. 3-52

VOL. VII JANUARY 12, 1934 NUMBER 34

NRA MEMBER
WE DO OUR PART

"I'm going to drive into the city with you this afternoon, James," said Mrs. Buynow. "I want to do a little shopping while the bargains are still on."

"I understand your strategic plans," responded her husband. "The drive is to be followed up with a counter attack."

"Mankind knows nothing of women's clothes. What does a man understand about a woman's dress?"

"The price."

Golden Loaf flour, \$1.12 per sack; Big Master flour, \$1.05 per sack; Ideal pastry flour, 95c per sack.

Just received a car of the famous Red Pepper coal.

Wilson Grain Company

Freshman: "Say, what's the idea of wearing my raincoat?"

Roommate: "Well, you wouldn't want your new suit to get wet, would you?"

The treasurer of a ladies' aid society went to the bank to deposit some money, remarking to the banker, "Here is some aid money."

The banker thought she said "egg" money, and responded enthusiastically, "Well, the old hens did pretty good!"

25 YEARS AGO—JAN. 15, 1909
W. M. Taylor of Grand Rapids has been appointed state trespass agent to succeed P. E. Shien. Mr. Taylor has been in the city this week looking over matters here and we understand will make this his headquarters.

Franchises for power lines are being granted in several townships to the Eastern Michigan Power company.

Mina Hitchcock, Stanley Ostrand, Nyda Campbell and Beatrice Raddock won prizes for best recitations given at the farmers institute held at Whittemore. Officers of the institute were: Wm. Lattor, president; J. A. Campbell, treasurer, and Mrs. L. C. Dutton, secretary. Fully 400 were in attendance at the various sessions.

Charles Moeller, Ed. McGill, Will Laidlaw, Leslie Smith and Zoa Hayes have entered the Tawas City high school. Miss Vesta Knoll has been engaged to teach at the Ward school.

The annual meeting of the Iosco County Agricultural Society was held Monday at the court house. The following officers were elected: N. C. Harting, president; C. T. Prescott, secretary, and L. J. Patterson, treasurer.

If the county truant officer should visit Sherman township there will be no doubt but what some of the lumbermen there will lose their crews.

The contract for the construction of the Gregory drain has been let by County Drain Commissioner A. B. Schneider. The drain is to cost not over \$2500.00.

Name Is Spanish
Florida was given that name by Ponce de Leon for two reasons—first, because it was a flowery land; and, second, because he landed on the day of the Spanish festival called Feast of Flowers, which corresponds with Palm Sunday.

Never Satisfied
If you have health and no wealth you desire wealth. If you have wealth and no health the chances are you will spend the wealth looking for health.

Black Locust Seed for Birds
The seed of the black locust is a good food for game birds.

TOWN LINE

Mrs. John Rapp spent Monday afternoon with Mrs. Elmer Messler.

Mr. and Mrs. John Jordan of Sherman spent Tuesday with their parents, Mr. and Mrs. Joseph Ulman.

Miss Alma Ulman spent the week end in Tawas City with Mr. and Mrs. Ervin Ulman.

Mr. and Mrs. Glenn Hughes and son of East Tawas visited relatives here on Sunday.

Mr. and Mrs. Russell Potts and children of Alabaster, Mr. and Mrs. Ervin Ulman and Miss Myrna Sommerfeld of Tawas City spent Sunday evening with Mr. and Mrs. John Ulman.

Vivian Koepke spent a few days with her grandparents, Mr. and Mrs. Joseph Ulman, during the holidays.

Mr. and Mrs. Charles Koepke were called to Grand Rapids by the death of the former's sister, Mrs. Minnie Herman. Friends in this locality were grieved to learn of her death, as most of her school days were spent at the Townline school. We extend our heartfelt sympathy to the bereaved family.

Mrs. Elgin Ulman and daughter, Ruth, went to Detroit last week, where Miss Ruth will receive medical attention.

Cabbage an Old Food
Cabbage was one of the foods of ancient Egypt and Greece.

MORTGAGE SALE
DEFAULT having been made in the conditions of a certain mortgage made by Gustav Krumm and Lena Krumm, his wife, of Tawas township, Iosco County, Michigan, to Albert Krumm of Tawas City, Michigan, dated the 10th day of January, A. D. 1921, and recorded in the office of the Register of Deeds for the County of Iosco and State of Michigan, on the 10th day of January, A. D. 1921, in Liber 19 of Mortgages on page 556, on which mortgage there is claimed to be due at the date of this notice, for principal and interest, the sum of NINE HUNDRED FORTY-FIVE (\$945) DOLLARS, and an attorney's fee of TWENTY-FIVE (\$25) DOLLARS, as provided for by law, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage or any part thereof;

NOTICE IS HEREBY GIVEN, that by virtue of the power of sale contained in said mortgage and the statute in such case made and provided on Saturday, the 17th day of February, A. D. 1934, at ten o'clock in the forenoon, the undersigned will, at the Court House in the City of Tawas City, that being the place where Circuit Court for the County of Iosco is held, sell at public auction to the highest bidder, the premises described in said mortgage, or so much thereof as may be necessary to pay the amount as aforesaid due on said mortgage, with five per cent (5%) interest and all legal costs, together with said attorney's fee, to-wit: All that certain piece or parcel of land situated and being in the township of Tawas, Iosco County, Michigan, and described as follows, to-wit: The Southwest quarter (¼) of the Northwest quarter (¼) of Section Twenty-seven (27), Township Twenty-two (22) North, Range Seven (7) East, containing forty acres of land more or less.

Albert Krumm, Mortgagee.
John A. Stewart,
Attorney for Mortgagee.

Let the car speak for itself

HUNDREDS of thousands of people now own and drive Ford V-8 cars. Some neighbor or friend of yours has one. If we told you what we think of the car, you might say we are prejudiced, so we let the car and its owner tell you.

Economy of operation is one of the first points they will emphasize—the owner will boast of it and the car will prove it.

The 1934 car is even better than the 1933—and that was our best car up to its time. The new car is more beautiful—faster—more powerful—gives more miles to the gallon—better oil economy—is easier riding—cheaper to own and operate than any car we ever built.

You owe it to yourself and your pocketbook to ask our Ford Dealer to let you see this car, and let you drive it for yourself. At the wheel of the car you will be sure to reach a right decision. The Ford V-8 will tell you its own story.
