

# Europe Furnishes Inns for Youthful Wanderers

## Tourists to Find Welcome in Many Lands.

Washington.—"With the coming of summer Europe opens her doors—thousands of them—to the youth of the world," says a bulletin from the National Geographic society. "From Alpine valleys to Norwegian fjords, from villages of central Europe to the rocky Hebrides, young wanderers will find 'youth hostels' waiting to welcome them at the end of a long day on the road. There for the price of a shilling, a franc, or a mark, is a kitchen where one may cook supper, and find a friendly group of campers around a fire, and best of all, a comfortable bed.

"Rucksack and weary feet are a certain passport. The young traveler also must have a membership in one of the national hostels associations; but this is easily obtained, and dues are only about a dollar a year. Whether it is the Reichsverband für Deutsche Jugendherbergen, La Ligue Française pour les Auberges de la Jeunesse, or the Gaelic An Oige of the Irish Free State matters not at all. Reciprocal agreements between the various countries entitle any member to the use of foreign hostels.

**Win Welcome.**

"All the associations are alike in their ideals of international democracy and simple living. There are no distinctions of race, creed, or social position. Youth and a slender purse win first consideration. In fact, in Bavaria, no one over twenty, save the leader of a group, may use the hostels. Luckily for many, England has no such literal interpretation, measuring age by enthusiasm rather than gray hairs. Travelers arriving by motor-cycle, car, or bus will probably find themselves politely turned away. The hostels have no room for the more plutocratic summer tourist.

"The youth hostel movement began in Germany over twenty years ago when a young school teacher in Westphalia started taking his students on summer walking trips, stopping overnight in empty school houses. By 1914 he had raised funds for a number of hostels, and after the war, membership increased with amazing rapidity. In 1923 there were over 2,300 hostels in Germany, giving shelter to more than 4,000,000 visitors in one year.

"Youth inns now occupy old castles along the Rhine, city towers in Medieval towns, forest huts in the Marz mountains, and even a grim old fortress at Coburg. The majority, however, are modern buildings with the most modern equipment. In many of the cities they have assumed hotel proportions. One of the largest—the inn at Cologne—accommodates 1,200 guests. More recently a chain of hostels has been added in East Prussia.

One of these is at historic Weissenberg, a point of international importance where the frontier of East Prussia meets the boundaries of the Polish Corridor and the Free City of Danzig.

"The Youth Hostels association of England and Wales is a much younger and less crowded organization. It was not founded until 1930, but by 1933 could boast of 200 hostels and 30,000 members. Shelters are of the simplest kind—farm houses, village schools, and granaries.

**Movement Grows Rapidly.**

"A few there are for whom the Great North road with its signs reading 'Edinburgh, Aberdeen and the North,' has an irresistible lure. The road leads the adventurous over bare moors, through steep glens, and past lonely lochs to the wildest beauty in Britain. Until three years ago when the Scottish Hostels association was founded, much of the grandest country in Scotland remained inaccessible to the cyclist and hiker of limited means. Inns are infrequent and fairly expensive, and it requires super energy to pack a tent and camping equipment over the rocky trails of Western Ross. Now Scotland has more than 30 hostels, usually plain stone huts, often with room for no more than ten, and sometimes straw palliasses instead of beds.

"Among the popular border hostels is Broadmeadows by quiet Yarow Water, near Scott's beloved Abbotsford and blue St. Mary's Loch. Of course

## Coast Guard Is Getting Planes

Henry Morgenthau, Jr., secretary of the treasury, and Rear Admiral Harry C. Hammond, commandant of the coast guard, inspecting the first of a fleet of Chance Vaught navy pursuit-type planes destined for use by the coast guard.

## Find Ancient Towns on Shore of Dry Lake

### Indian Villages Unearthed by CWA Workers.

Washington.—On the shores of dry Buena Vista lake in Kern county, California, an expedition of CWA workers, directed by Smithsonian Institution archeologists, has excavated two ancient Indian villages, one believed to date to the beginning of the Christian era.

The first village unearthed, the institution disclosed, was believed to have been inhabited by Yokut Indians when Zalvidea, Spanish mission priest, visited it in 1772. However, it was

added, by 1825 the village had vanished completely.

Indicating that it was long a site of human occupancy, workers uncovered seven distinct lake terraces as they dug through various levels. Although few human burials were found, the archeologists said they discovered parts of 35 skeletons in a nearby hillside cemetery. Dr. William D. Strong, of the bureau of American ethnology, estimated the village to be nearly 500 years old.

The second village uncovered was said to be unquestionably more ancient. No record of its occupancy was obtained and, it was explained, a study of skeletons unearthed indicated it to be the home of Indians who later shifted westward to the coast.

Contrasting finds in the two villages, the archeologists disclosed that the first one possessed abundant soapstone pottery and small arrow points, while the second had practically no soapstone and boasted larger, cruder flint points, which probably were used on darts rather than arrows. Also, it was added, in the latter village bodies were buried under the floors of houses.

### Excess of Elm, Maple Seeds Threat to Trees

Madison, Wis.—Overproduction of elm and soft maple seeds in southern Wisconsin this spring is threatening to kill many of the trees, according to a bulletin issued by the state agriculture and markets commission.

The trees produced many times the normal number of seeds to compensate for unusual weather conditions last year, E. L. Chambers, entomologist, said. The drouth early in June a year ago impaired development of seed buds.

This spring the drouth came later and may kill the trees which have weakened themselves by overproduction of the seeds.

**Petrified Logs in Monument**

Elensburg, Wash.—The proposed Ginkgo national monument near here contains approximately 2,000 petrified logs, valued at \$1,000 each. Among the logs is a petrified ginkgo tree, which grows today only in China and Japan, evidence that Washington once had a tropical climate.

**Light Rays Play Tunes**

Baltimore.—Using a photo-electric cell, Dr. Philip Thomas, of the Westinghouse research laboratory, can play tunes on a xylophone by casting light rays on the keys.

## She Will Probably Close Window Now

Gary, Ind.—The next time Mrs. Beulah Hopkins takes a bath she'll close the bathroom window.

Mrs. Hopkins went into the bathroom, disrobed, and turned the water on in the tub. Suddenly her husband heard a scream. He dashed into the bathroom and his wife was gone. He peered out of the open window. His wife was atop a sand pile on the ground.

At the Gary hospital, Mrs. Hopkins explained that she stepped on a piece of soap and skidded right out of the window. Her only injury was a wrenched back.

hostels exist in the Trossachs, and another chain in Perthshire. If the traveler is still following the Great North road, he will find the key to Birnam hostel at 'Macbeth Cottage.' Birnam wood still stands, nor has it 'come to Dunsinane.' Farther north, much farther, is Loch Maree, dotted with green isles, and guarded by the giant Ben Sliech which rises abruptly across the lake from Slattadale hostel.

"To seek still wilder moors and higher mountains one must go west, across the Sound of Sleat to Skye, island of blue mist and brilliant sun. Above the schoolhouse hostel in Glen Sligachan tower the purple peaks of the Cuillins. To climb their crags requires a rope, a guide and intrepid skill. Sudden mists guard their cliffs and corries; but should a climber gain the top of Sgurr-nan-Gilleann or Sgurr Alasdair and find the clouds lifted, the 'mysterious isles' will win him forever."

## British Tanks Patrol the Khyber Pass

ALWAYS the famous Khyber pass, which connects India with Afghanistan, is carefully guarded by the British. In our illustration a section of the British Second Light Tank company is seen patrolling that region. The officer is asking information from Afridi tribesmen of the Khyber Khassadar force who guard the road through the pass.

## BEDTIME STORY FOR CHILDREN

By THORNTON W. BURGESS

### JENNY WREN'S BIG COUSIN

PETER RABBIT never will forget his surprise when Jenny Wren asked him one morning if he had seen anything of her big cousin. Peter hesitated. As a matter of fact he couldn't think of any big cousin of Jenny Wren. All the cousins Peter knew anything about were very near Jenny's own size.

Now Jenny Wren is one of the most impatient small persons in the world. "Well, well, well, Peter, have you lost your tongue?" she chattered. "Can't you answer a simple question without taking all day about it? Have you seen anything of my big cousin?"

"You needn't be so cross about it if I am slow," replied Peter. "I'm just

"I saw Him Only Yesterday on the Edge of the Old Pasture."

trying to think who your big cousin is. I guess, to be quite honest, I don't know him."

"Don't know him! Don't know him!" sputtered Jenny. "Of course you know him. You can't help but know him. I mean Brownie the Thrasher."

In his surprise, Peter fairly jumped right off the ground. "What's that?" he exclaimed. "Since when was Brownie the Thrasher related to the Wren family?"

"Ever since there have been any Wrens and Thrashers," retorted Jenny. "Brownie belongs to one branch of the family and I belong to another, and that makes him my second cousin. It certainly is surprising how little some folks know."

"But I have always supposed he belonged to the Thrush family," protested Peter. "He certainly looks like a Thrush."

"Looking like one doesn't make him one," snapped Jenny. "By this time you ought to have learned that you never can judge anybody just by looks. It always makes me provoked to hear Brownie called the Brown Thrush. There isn't a drop of Thrush blood in him. But you haven't answered my question yet, Peter Rabbit; I want to know if he's here yet."

"Yes," said Peter. "I saw him yesterday on the edge of the Old Pas-

ture. He was fussing about in the bushes and on the ground and jerking that long tail of his up and down and sideways as if he didn't know what to do with it. I've never seen anybody twitch his tail around the way he does."

Jenny Wren giggled. "That's just like him," said she. "It is because he thrashes his tail around so much that he is called the Thrasher. I suppose he was wearing his new spring suit."

"I don't know whether or not it was new, but it was mighty good looking," replied Peter. "I just love that beautiful reddish brown of his back, wings and tail, and it certainly does set off his white and buff waistcoat with its dark streaks and spots. You must admit that anyone seeing him dressed so like the Thrushes is to be excused for thinking him a Thrush."

## QUESTION BOX

By ED WYNN . . . The Perfect Fool

Dear Mr. Wynn:

I am a poor woman and sell doughnuts for a living. I charge three cents apiece for the doughnuts. One man says he will buy a dozen doughnuts every day if I will take off one cent from the price of each doughnut, for the hole. I can't afford to sell them cheaper than three cents and would like him for a customer. What shall I do?

Sincerely,  
OLIVE OYLE.

Answer—The next time you see him tell him you have decided to give him one cent for each hole when he returns the holes.

Dear Mr. Wynn:

I am in love with a young lady and I thought she loved me too. Last night I called at her house and her sister told me my girl was not at home. I happened to look on the rack in the hall and I saw my girl's hat hanging there, so I knew she was home. I never want to see her again. Am I right?

Sincerely,  
BOB O. LINK.

Answer—You are acting silly. Because you saw her hat in the hall you say she must have been home. In that case, if you saw your girl's stockings in the wash you'd swear she was in the laundry.

Dear Mr. Wynn:

My father told me that a "window" and a "widow" were just the same. How can that be?

Yours truly,  
FRANK LEE SPEAKING.

Answer—Your father's advice is very good. He means that when you get near either of them, you want to look out.

Dear Mr. Wynn:

A girl friend of mine was married yesterday and of course I went to the wedding. Some relatives brought their baby to the wedding and all during the ceremony the baby cried. It seemed to spoil the whole thing. I expect to be married very shortly and I want to know how I can keep the guests from bringing babies to the wedding. What shall I do?

Sincerely,  
N. GAGED.

Answer—When you have your wedding invitations printed just have printed in one corner of the invitations—"No Babies Expected."

WNU Service

**Many Tongues Broadcast**

Czechoslovakia believes its broadcasting stations lead the world in the number of languages broadcast. That at Prague generally makes its daily announcements in Czech and German, but every week it also uses Russian, English and French and occasionally Polish and Serb. At Bratislava the announcers speak in Russian, Slovene, Polish, Rumanian and Hungarian.

## AN AIRPLANE FLIES OVER

By ANNE CAMPBELL

FROM an airplane looking down Over the recumbent town, Slum and mansion, avenue, Alley, boulevard and street, Melt into an even view, In a harmony complete.

All is equal from the skies. God, whose home is Paradise, Sees his people as do we; Little folks with aims so high, Gazing heavenward to see A red airplane in the sky! Copyright.—WNU Service.

cloves and one small piece of ginger root. Bring to the boiling point, let boil three minutes. Skim and turn into a hot stone pitcher, serve hot in small steins. Hot gingerbread, snappy cheese mixed with rich cream, makes a palatable luncheon with a stein of cider.

### Delicious Punch.

Prepare a sirup of one cup of sugar, one-half cup of water, cook until it spins a thread; pour the sirup over three beaten egg whites and add slowly to one quart of freshly made english breakfast tea infusion which has been chilled; add this mixture to one quart of lemon flavored ice cream and mix thoroughly; turn into a freezer and freeze to a mush. Serve from a punch bowl in tall thin glasses.

### Ginger Ale Cobbler.

Fill soda water glasses half full of finely crushed ice, add one slice of pineapple (the small size), then fill with ginger ale. Serve at once. © by Western Newspaper Union.

## Ensemble for Beach

This beach coat in Mexican effect is of white and henna cotton and is trimmed with large wooden buttons. The hat of sombrero type is of rough straw.

### Ant Army at Work

There is a South American ant which proceeds to a cocoa plantation in army formation. Each insect stands on a leaf and slowly and carefully cuts out an almost perfect circle, and back against they march in procession, each with the circle of leaf over the head like an umbrella. Back to their home, the ants masticate the leaf pieces and place them in prepared beds. A peculiar fungus soon grows up in these gardens upon which the ants feed, seemingly their only food.

"Pop, what is imperceptible?" "Hen's teeth." © Bell Syndicate.—WNU Service.

## Dentistry for the Alligator

THIS dentist, Carl Link, would be out of luck if Pontchartrain Billy were to shut his mouth in the middle of his annual dental work. The one hundred and seventy-five-year-old patriarch of the Los Angeles Alligator farm has his valuable molars watched with more care than some humans and as a result will probably live to snap at more than one future generation of visitors.

## WINS BRITISH TITLE

W. Lawson Little of California captured the British amateur golf title in the tournament at Prestwick, Scotland. In the final round he defeated Jimmy Wallace of Scotland by a display of astonishing golf. He is only twenty-three years old and is a student in Stanford university.

## Do YOU Know—

That at the mouth of the great Amazon River, lies an island of approximately the same size as England. It is the island of Marajo—many thousands of square miles in extent—one half of which is dense jungle the other half a vast campos or prairie. © McClure Newspaper Syndicate.

# Busy New Jersey

Making Shaving Cream Tubes in a Bloomfield Factory.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

**M**ANY cities of northern New Jersey owe their growth largely to the fact that they block the southern and western gates of New York City and receive its overflow.

Newark is the most important air door to the metropolis. Opened to air traffic in September, 1931, the Newark airport has grown rapidly. When airplane traffic was at a peak in 1932 several transport companies and local airlines scheduled 89 planes daily in and out of Newark, and in addition a constant stream of unscheduled private planes used this municipal field.

Newark today is in a state of flux, but the changes that are taking place point to a vast metropolitan center. Newark, since the World war, has changed amazingly. New high buildings have cut through its skyline; in them one finds the clerical forces of many firms whose office address is New York.

And again Newark has become a seaport. Whalers once sailed up to the city docks on Passaic river, but when ships of deeper draft began to carry world trade Newark had to be content with lighters and small coastwise vessels. Now Port Newark, a municipal development on the upper part of Newark bay, has again brought ocean-going vessels to the gates of the city.

Only Newark itself can list all the thousands of different products which pour out of its factories. The most important in order of production value are: electrical machinery and supplies, paints and varnishes, leather, meats, foundry and machine-shop products, chemicals, and jewelry.

Here are some odd trades, as well as highly specialized industries. Electrical instruments are made with counterbalancing pointers that are miracles of craftsmanship. One of these has an arm of aluminum tubing with walls one ten-thousandth of an inch thick, and balance threads (for tiny brass nuts) are cut 500 to the inch. This work must be done under a magnifying glass. In Newark, too, many of the world's largest air-conditioning plants are designed and constructed.

**Newark's Library and Trolley.**

Newark library today is the largest in the state, and one of the nation's finest. Libraries throughout the United States and in many foreign countries have adopted methods originating in this Newark institution.

Only London has a larger co-ordinated bus and trolley system than one Newark company, which serves 421 New Jersey municipalities, reaching all but one county in the state. In 1931 it transported a total of nearly 400,000,000 passengers, the equivalent of more than three times the population of the United States.

Strangers are confused by the interlocking huddle of municipalities around Newark. Essex county is really one city with nearly a million people. Once isolated villages have expanded so rapidly that outsiders cannot tell where one ends and another begins.

Bloomfield offers an example of an intensely diversified community in a state noted for variety. With a population of only 38,000, many of them commuters, it embraces some forty industries, large and small, which run the gamut from safety pins and horse radish to books, electric lights, and woens.

In a Bloomfield lamp works were made the bulbs that shine from the Statue of Liberty, and those that illuminate the Washington monument, Holland tunnels, Natural Bridge, Virginia, and the Bermuda caves. Here is made every type of lamp, from the "grain of wheat" used by dentists and physicians, to the giant bulb for movie and outdoor illumination.

Although we may not realize it when we pay a small coin for an electric-light bulb, we are purchasing a commodity that requires more delicate craftsmanship than anything else sold in bulk. The tungsten filament is one of the finest-drawn commercial wires, pulled through a diamond die to a thickness of 0.0004 of an inch. Compared to a lamp filament, a human

hair resembles a piece of heavy rope. It is all part of the day's work in this Bloomfield factory to deal with argon, helium, and neon, an atmospheric pressure of 0.00001 per cent, and pressures up to 25 tons per square inch! With pardonable pride this plant adopts the slogan used by the United States Engineers in France. "It can't be done—but here it is!"

In an unpretentious red-brick building that faces on one of the principal streets of West Orange, an empty chair sits before an old-fashioned roll-top desk. Here Thomas A. Edison spent the last years of his life. His library and study have been maintained just as he left them.

**Traffic of Jersey City.**

Jersey City, largest of the Hudson river cities opposite New York, has industries ranging from soap to printing and type-making. Oddly enough, it is one of Jersey's "least-known" cities to outsiders. Railroads skirt its business district or pass through it underground, while the main motor highway to the Holland tunnels runs in a subsurface roadway through the residential districts.

Many doughboys recall Jersey City's water front, a major embarking and disembarking point during the World war. "Where do we go from here, boys, where do we go from here? Anywhere from Harlem to a Jersey City pier," ran the words of a popular war song.

Today Jersey City handles most of the freight-car traffic that comes into the port of New York from the south and west. One of its printing plants turns out tons of telephone directories annually for New York, Philadelphia, Baltimore, Washington, and other large eastern cities. In the same plant lithographing for several widely circulated magazines is also prepared.

A museum attached to a Jersey City type-manufacturing concern contains a copy of the rare Canon Missal, dating from 1458, one of the first books printed entirely on a press, and many tiny "thumb-nail" books, exquisite examples of craftsmanship. Modern type faces are measured for accuracy to one-tenth-thousandth of an inch, the thickness of a cigarette paper.

From Jersey City northward along the Hudson to Weehawken is one of the highest concentrations of railroad traffic in the world. New Jersey leads the nation in railroad trackage per square mile, and the focus of its busiest lines is this short bit of territory along the Hudson opposite Manhattan Island.

Freight-car contents are transferred here into the holds of liners, and recently a terminal was established which places loaded cars themselves within huge vessels called "seatrains."

More interesting than the manner in which commodities are transhipped from rails to boats, however, are the split-second schedules devised for the waves of commuters that sweep twice daily through the half-dozen terminals in the New Jersey side of the Hudson. It is estimated that 2,000,000 people pour into and out of Manhattan on a typical business day, and that more than 15 per cent of them arrive from New Jersey.

**Timing the Commuters.**

Stand in the Hoboken terminal tower of the Lackawanna and watch the "big push" of commuters homeward bound. No major offensive of the World war was timed to a greater nicety than this daily event which has become as much a part of the commuter's life as his meals and sleep. Crowded ferry boats and tube trains from Manhattan have brought armies of men and women to the train shed, where long expresses are waiting to hurry them to scores of suburban stations.

"Zero Hour" comes from 5:25 to 5:35 p. m., when every commuter wants an express that will get him home about six o'clock. Commuting railroads perform the seemingly impossible by sending several trains to the same destination at almost the same time, one making stops that another skips. Newark, a metropolis of 442,000, may not be even a flag-stop on an express hurrying through-passengers on to Millburn or Morristown.

## The Clam

## WHAT'S IN A NAME?

A very dilapidated old man presented himself at a hospital for dogs and cats and asked the porter to take him in.

"You can't come in here," said the porter brusquely.

"Oh, yes, I can," said the old fellow. "I'm an old soldier."

"But that don't make any difference," said the porter, "this is a veterinary hospital."

"That's right," said the old soldier serenely. "I'm a veteran."

## Curiosity

Warsaw—A young man was arrested because he was lying across railway lines near Warsaw.

"Suicide?" he said, when questioned by the police. "Certainly not! I was just trying to find out how quickly a train could draw up."

## Simplification

"What do you think of this idea of using initials in economic transactions?"

"I like it," answered Mr. Dustin Stax. "It simplifies the story to say that business was N. G. and is now O. K."

## No Son-in-Law Wanted

Daughter—Mother, the lodger proposed to me today.

Mother—Nonsense—tomorrow is the first of the month, and I want my rent, so no more foolish talk.—Hummel (Hamburg).

## Sounds Fishy

"What is your gross income?"

"I have no gross income."

"No income at all?"

"No gross income. I have a net income. I'm in the fish business."—Montreal Gazette.

## More Important

Man—My wife is very busy. She's going to address a woman's club.

Neighbor—She's working on the address, I presume.

Man—No; the dress.

## Not Yet Ripe

Guide—The green garden snakes around here are not harmful.

Old Lady—Aren't they as dangerous as the ripe ones?

## SIMPLE FROCK THAT ACCENTS SMARTNESS

### PATTERN 9969

A simple frock is just a simple frock unless it is cleverly cut—and then it becomes one of the smartest things a woman can wear in summer. But choose your design with the greatest care—remember it will have no help from frills or furbeles. To be dead certain of getting something chic, you cannot do better than this model with its smart and becoming neck and its well fitting panels. It is, by the way, a wonderful style for

slimming the figure. Use cotton or linen for chic results.

Complete, diagrammed sew chart included.

Pattern 9969 may be ordered only in sizes 12, 14, 16, 18, 20, 30, 34, 36, 38 and 40. Size 16 requires 3 1/2 yards 36 inch fabric.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for the pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER AND SIZE.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth Street, New York City.

### HM-M1

"Mother, why do they wax people sometimes?" inquired a small daughter the other day.

"My dear child, what do you mean?" inquired the mother. "I never heard of such a thing being done."

"Well, it was done last night. Lucy's brother went to a banquet last night, and he said the party waxed Mary."

### Another Arms Row

Jane—I understand now why these disarm movements don't make much of a hit.

Fayne—What put you wise?

Jane—My parents called me into a conference last night to discuss the idea of my permitting fewer arms around me—and that one broke up in a row, too.—Cincinnati Enquirer.

### According to Custom

The Usher—Hey, you! This guy says you bounced a bottle on his bean. What's the idea?

The Guest—Nothin'. Only he batted in on our party an' introduced himself as the "Human Battleship," and I thought it was time he was tested.—Brooklyn Eagle.

### Foxy Idea

"Why do you prefer players who have happy homes?" the manager of the baseball team was asked.

"Because," he replied, "the big thing in baseball is getting home, and if a fellow thinks a lot of home he'll be more anxious to get there than one who doesn't."

### A Sure Case

Prisoner—I took the money Intending to put it back. You see, I wanted to get married and—

Lawyer—And you expected to put money back after marrying? I can get you off on the ground of insanity.—Exchange.

second class matter

P. N. THORNTON, Publisher

## Hemlock

Mr. and Mrs. Jas. Carlton and family and Ervin Wakefield of Flint spent the week end with Mr. and Mrs. L. D. Watts.

Mrs. Will Herriman visited her sister, Mrs. John Burt, on Tuesday.

The Thompson brothers are busy digging wells in this vicinity.

Mr. and Mrs. Charles Brown and Mr. and Mrs. Russell Binder attended the band concert at Mio Sunday and visited Mr. and Mrs. W. E. Smith.

Marshall Warren came up from Flint on Saturday. Mrs. Warren and baby, who spent a week here, accompanied him back to Flint.

Mrs. Lester Biggs called on her aunt, Mrs. C. Brown, on Friday afternoon.

Greenwood Grange met last week Wednesday. A very interesting meeting was enjoyed and much business was taken care of.

Mrs. C. L. McLean and family of Tawas City visited her sister, Mrs. Victor Herriman, one day last week.

Mr. and Mrs. Frank Kessler and two sons of Flint spent Saturday night with Mr. and Mrs. Ed. Youngs.

Ila May Biggs and June and Jean VanSickle are ill with the whooping cough.

Mr. and Mrs. Ed. Youngs and Mr. and Mrs. Russell Binder spent Tuesday evening with Mr. and Mrs. Chas. Brown.

A shower was held Friday night in honor of Mr. and Mrs. Arthur

Anschuetz, who were recently married.

Mrs. Lester Biggs gave a birthday supper with ice cream and cake Friday evening in honor of her mother, Mrs. N. C. Miller.

Mr. and Mrs. Frank Kessler and sons and Mr. and Mrs. Ed. Youngs were Sunday dinner guests of Mr. and Mrs. John Rapp.

Mr. and Mrs. Henry Biggs of Saginaw spent the week end with Mr. and Mrs. Lester Biggs.

An evening's entertainment was recently enjoyed by all the family and inmates of the county farm home, when Jay Thomas and Harry Anderson of Grant gave one of their popular magic entertainments. Everyone thought he could see well, but how so many articles could be taken from an empty hat was a puzzle not easily solved. Many other magical stunts were performed in the one and one-half hour entertainment given by Thomas and Anderson.

## Council Proceedings

Special meeting of the Common Council held June 7, 1934. Present: Mayor Boomer, Aldermen Burtzloff, Frank, Moore, Rollin and Rouiller.

Moved by Rollin and seconded by Frank that as an extension of the contract entered into December 15th, 1933 with the Francis Engineering Company, that from this date the City will pay the said engineers the sum of seven per cent of the total cost for the construction of the sewage treatment works and pumping station, and five per cent on all sewer work constructed after June 1, 1934.

Roll call. Yeas: Burtzloff, Frank, Moore, Rollin and Rouiller. Nays: None. Carried.

Moved and seconded that meeting adjourn. Carried.

W. C. Davidson, Clerk.

## Mayonnaise Name From Town

Mayonnaise was named from the town of Aulon, in the Balearic islands.

## LONG LAKE

Miss Olive Streeter has returned to her home after spending the winter in Detroit.

Homer Davis, who has been visiting his sister, Mrs. Ronald Harris of Flint, returned this week.

Mr. and Mrs. H. A. Carter and son, Richard, of Detroit spent the week end at the home of Mrs. Carter's parents, Mr. and Mrs. Louis LaBerge.

Mr. and Mrs. Charles Curry and Leroy Watson of Bay City spent the week end at the Curry cottage on Long Lake.

Mr. and Mrs. Elmer Streeter and Mr. and Mrs. Louis LaBerge attended the Ladies Aid dinner at the Ewing home Wednesday.

Mrs. Paul Weigold and children of Chesaning are guests of Mrs. Weigold's parents, Mr. and Mrs. Geo. Ballard.

Miss Margaret LaBerge returned home after visiting her sister, Mrs. H. A. Carter of Detroit. Edward LaBerge accompanied her for the week end.

Merrill Eastcott spent the week end at his cottage on the "Point" on Long Lake.

Mr. and Mrs. J. A. Sprague and daughter, Mildred, of Columbus, Ohio, arrived Saturday and will spend the summer months at their cottage.

Viola and Lois Hobart of Bay City spent Wednesday at the home of Miss Gertrude Streeter.

Mr. and Mrs. Edward Kelly and Mr. and Mrs. David Enos of Flint visited Mr. and Mrs. Seymour Bortle Saturday and Sunday.

Mrs. Leon Ewing of Hale spent Sunday as the guest of Mr. and Mrs. Louis LaBerge.

Mr. and Mrs. Elmer Streeter moved to Marion, Mich. Sunday.

Miss Winifred French of Northville spent Monday night at the Hicks home.

Mr. and Mrs. A. M. Hicks and daughter, Florence, went to Bay City on Tuesday.

Mr. and Mrs. Frank Schloss and Mrs. James Hicks returned to their homes in Detroit Wednesday.

Mr. and Mrs. Rannier of Flint were week end guests at Kokosing hotel.

Mr. and Mrs. MacRae of Alpena were at "Mac's-Wee-Hous" over Sunday.

Mr. and Mrs. Zeigler and Mr. and Mrs. Strain of Toledo, Ohio, are guests of Mr. and Mrs. M. Ryder.

Mr. and Mrs. James Robinson of Canton, Ohio, are at Kokosing hotel for the summer. Mr. Robinson is director of physical education of Canton high schools, and Mrs. Robinson was formerly directress of recreational work at the Firestone Rubber Co., Akron, Ohio.

Mrs. Bostwick, daughter, Barbara and son, James, of Detroit, are at "Lotus Lodge" to spend the summer.

Mr. and Mrs. Sandrock and Mr. and Mrs. Walz, all of Flint, are spending a week at the resort.

Mr. and Mrs. Burger and daughter, Miss Edith, of Detroit are spending a few weeks at "Pine Pier Cottage," and have as their guests Mr. and Mrs. Linback of Detroit.

Geo. Meister and family of Toledo arrived Monday to spend the summer vacation at their cottage.

Rev. Riale of Wooster, Ohio, is spending the summer at "Hiawatha Camp."

Francis French and D. I. Pearsall were business callers at Tawas on Monday.

Mr. and Mrs. Jackson and Mrs. Huddle of Highland Park spent the week end at "Huddle Inn."

Mr. and Mrs. R. L. Baker and grandson, Donald, of Cleveland, Ohio are at their cottage.

Mr. and Mrs. Phelps, daughter and son, and Mrs. Walsh of Highland Park are here to spend the summer.

## SHERMAN

A number from here attended the ball games at Au Gres and Hale on Sunday.

Mr. and Mrs. Arthur Colvin of Whittemore were callers here the first part of the week.

Mr. and Mrs. Frank Schneider and son, Earl, left Sunday for Chicago, where they will attend the World Fair for a week.

Clarence Curry was at Tawas City on business Tuesday.

Mr. and Mrs. Patrick McLean and Mr. and Mrs. A. Smith of Au Gres called on friends here Sunday.

Earl Schneider purchased a new Chevrolet automobile last week, which he drove to the Fair at Chicago this week.

## STATE OF MICHIGAN

The Probate Court for the County of Isoco.

At a session of said Court, held at the Probate Office in the City of Tawas City, in said county, on the 18th day of June, A. D. 1934.

Present: Hon. David Davison, Judge of Probate.

In the matter of the estate of Charles Ballard, deceased.

D. I. Pearsall, Administrator of said Estate, having filed in said court his petition, praying for license to sell the interest of said estate in certain real estate therein described, to pay debts and distribute proceeds among the heirs of said deceased and close up said Estate.

It is Ordered, that the 14th day of July, A. D. 1934, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is Further Ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Tawas Herald, a newspaper printed and circulated in said county.

DAVID DAVISON,  
Judge of Probate.

## Reno News

Mr. and Mrs. Blair Wagner and little daughter and Darrow Wagner of Inlay City, were week end guests of their father, Ira Wagner.

Mr. and Mrs. L. I. Murray, Mr. and Mrs. John Shaum of Flint, Mrs. John Kocher and son, Ed., of Plainfield, were callers at the Frockins home Sunday.

Mr. and Mrs. Jas. Carlson and children of Flint and Mr. and Mrs. L. D. Watts were Saturday evening visitors with Mr. and Mrs. Thomas Frockins.

Mr. and Mrs. Sherman Johnson, Mrs. N. Larson and daughter, Bernice, of Flint called on friends here Thursday.

Mr. and Mrs. Chas. Brown and Mr. and Mrs. Russell Binder called on relatives here enroute home from Mio Sunday evening.

Mrs. S. L. Barnes, who has been visiting relatives and friends in Flint the past two weeks, returned home Sunday.

Mr. and Mrs. Wins of Saginaw spent Sunday with Mr. and Mrs. S. L. Barnes.

Mr. Louks of Texas came recently to join his family, who arrived a couple of months ago.

Mr. and Mrs. Gus. Katterman were Sunday guests of Mr. and Mrs. Fred Wolf.

Mr. and Mrs. Chas. Westervelt and daughter, Ila, spent the week end with Mrs. Westervelt and Mr. and Mrs. Sibley.

Mrs. Alex Robinson and sons, Edwin and Carlton, spent Sunday at the state park. Bay City, with friends from Flint.

Miss Jessie Bentley of Marshall is spending this week with her brother, R. A. Bentley, and family.

Mr. and Mrs. J. P. Sibley and sons, Jesse, Norman and John, were at Harrison on Tuesday.

Mr. and Mrs. Will Shellenbarger were callers at the Bentley ranch Tuesday.

Mr. and Mrs. Chas. Westervelt and daughter, Ila, and Mr. and Mrs. Sibley spent Saturday evening with Mr. and Mrs. Alex Robinson.

Mr. and Mrs. Rufus Card of Gladwin were Tuesday dinner guests of Mr. and Mrs. Will Waters. In the afternoon Mr. and Mrs. Waters motored to Harrisville with them.

Mr. and Mrs. Fred Latter and daughters, Betty and Donna, spent the week end with relatives in Bay City.

The Misses Fay Vance, Nellie Hensley and Helen Latter camped at Sand Lake and attended the Young People's Retreat sponsored by the Council of Religious Education.

Miss Florence Latter acted as counselor for a group of girls.

Mr. and Mrs. Lester Robinson called on Mrs. Bronson and son, Jep, and Mr. and Mrs. Harry Latter on Monday.

Mr. and Mrs. Polleigh were at Bay City on business Tuesday.

Mrs. Vary and daughter, Miss Veda, and granddaughter, Sara Bly, of Marshall came Saturday and are spending the week at the ranch here. Sara Bly will remain for the summer.

Mr. and Mrs. Louks and family and a nephew were in an auto accident Sunday evening. It really is a miracle that they were not all killed, as the car rolled all of 50 feet. Mr. Louks suffered scalp wounds. All were badly bruised and shaken up. Mrs. Louks is still in bed. She was driving at the time, trying to follow another car that was going at a good speed, when she turned out to pass another car, and lost control. Mrs. Louks was formerly Miss Rose Barnes. They were rushed to Dr. Hasty's office by a passing motorist, then taken to the home of her parents, Mr. and Mrs. S. L. Barnes. We are wishing them a speedy recovery.

## Mortgage Sale

Default having been made in the terms and conditions of a certain mortgage made by Louis H. Braddock and Laura V. Braddock, as husband and wife, of Tawas City, Isoco County, Michigan, Mortgageors, to Thomas Davidson, of the same place, now deceased. Mortgage dated the 8th day of October, A. D. 1927, and recorded in the office of the Register of Deeds for the County of Isoco and State of Michigan, on the 11th day of October, A. D. 1927, in liber 22 of Mortgages, on page 578, on which mortgage there is claimed to be due, at the date of this notice, for principal and interest, the sum of two thousand one hundred sixty-five dollars and forty-four cents (\$2,165.44).

Said Mortgage was assigned to Julia Davison, of Tawas City, Michigan by order of the Probate Court

for the County of Isoco on the 15th day of February, A. D. 1930, and recorded in the office of the Register of Deeds for the county of Isoco and State of Michigan, in Liber 3 of Miscellaneous Page 125 and 126, on February 15, 1930.

No suit or proceedings at law or in equity having been instituted to recover the debt secured by said mortgage or any part thereof; Now, therefore, by virtue of the power of sale contained in said mortgage and pursuant to the statute of the State of Michigan, in such case made and provided, notice is hereby given that on Saturday, the seventh day of July, A. D. 1934, at 10 o'clock A. M., Eastern Standard Time, said mortgage will be foreclosed by a sale at public auction, to the highest bidder, at the front (southeasterly) entrance to the County Building in the City of Tawas City, Isoco County, Michigan (that being the building where the Circuit Court for the County of Isoco is held), of the premises described in said mortgage, or so much thereof as may be necessary to pay the amount due, as aforesaid, on said mortgage, with the interest thereon at six per cent (6%) and all legal costs, charges and expenses, including the attorney fees allowed by law; which said premises are described as follows: All those certain pieces or parcels of land situate in the City of Tawas City, in the County of Isoco, and State of Michigan and described as follows, to-wit: Lot No. 4, Block 14, Scheffler & Company Addition to Tawas City, Isoco County, Michigan; and SE 1/4 of Lots 7 and 8, Block 12, Wheeler's 2nd Addition to Tawas City, Isoco County, Michigan.

Dated at Tawas City, Michigan April 12, 1934.

JULIA DAVISON,  
Assignee of Mortgagee.

H. Read Smith,  
Attorney for Assignee of Mortgagee.

## Council Proceedings

Regular meeting of the Common Council held June 4th, 1934. Present: Aldermen Burtzloff, Frank, Moore, Rollin and Rouiller.

Meeting called to order by President Pro Tem Rollin. The minutes of the last regular and special meetings were read and approved.

The committee on claims and accounts presented the following:

H. M. Rollin, 4 days, board of review ..... \$16.00

C. E. Tanner, 4 days, board of review ..... \$16.00

George Myles, 4 days, board of review ..... \$16.00

J. A. Mark, Jr., 4 days, board of review ..... \$15.00

H. R. Smith, 4 days, board of review ..... \$16.00

W. C. Davidson, 4 days, board of review ..... \$16.00

Foy Brown, labor, 9 hrs. at 35c 3.15

Chas. Thornton, labor on pump 4.00

W. P. Cholger, gas, oil, brazing 6.26

H. M. Rollin, gas, oil, sewer 86.15

Jas. Boomer, truck, 18 hrs. at 75c 13.50

John Herman, truck, 3 hrs. at 75c 2.25

E. Burtzloff, truck, 9 hrs. at 75c 6.75

Moved by Burtzloff and seconded by Frank that bills be allowed as read and orders drawn for same. Roll call. Yeas: Burtzloff, Frank, Moore, and Rouiller. Nays: None. Carried.

Moved by Rouiller, seconded by Moore, that in pursuance to the authority given to the Council by the qualified electors of the City, at a special election, called for that purpose, on Monday, May 28, 1934, the Council shall cause to be issued in manner provided by law, in such cases made and provided, the sum of TWELVE THOUSAND SIX HUNDRED (\$12,600.00) DOLLARS, in bonds against the faith and credit of the City, and to pay four (4) per cent interest on said bonds, and said bonds to be what is generally called serial bonds.

Further, that the money to be raised from the sale of said bonds to be used only for the construction of a sewage disposal plant, a sewage pumping station and intercepting sewers, in accordance to the plans now on file in the office of the City Clerk, and submitted by the Francis Engineering Company.

Further, that the said Council hereby sets the period of usefulness of said project as forty (40) years. Further, that a debt service tax be levied each year of not to exceed three mills on the assessed value of the taxable property of said City, said sum to be raised shall not exceed the sum necessary each year, to pay the bonds due in said year in accordance to the following schedule for the payment of said bonds, which said schedule is hereby adopted, to-wit:

	Principal Payment	Interest	Bond Numbers
1st year	\$ 600.00	\$504.00	1 to 6 inc.
2nd year	700.00	480.00	7 to 13 inc.
3rd year	800.00	452.00	14 to 21 inc.
4th year	800.00	420.00	22 to 29 inc.
5th year	800.00	388.00	30 to 37 inc.
6th year	800.00	356.00	38 to 45 inc.
7th year	900.00	324.00	46 to 54 inc.
8th year	900.00	288.00	55 to 63 inc.
9th year	1000.00	252.00	64 to 73 inc.
10th year	1000.00	212.00	74 to 83 inc.
11th year	1100.00	172.00	84 to 94 inc.
12th year	1100.00	128.00	95 to 105 inc.
13th year	1100.00	84.00	106 to 116 inc.
14th year	1000.00	40.00	117 to 126 inc.
Totals	\$12600.00	\$4100.00	

Roll call. Yeas: Burtzloff, Frank, Moore and Rouiller. Nays: None. Carried.

Moved and seconded that meeting adjourn. Carried.

W. C. Davidson, Clerk.

**Notice TO CREDITORS AND DEPOSITORS OF IOSCO COUNTY STATE BANK, TAWAS CITY, MICHIGAN STATE OF MICHIGAN—**

RUDOLPH E. REICHERT, State Banking Commissioner, having appointed E. T. Burns, Receiver for the Iosco County State Bank, at Tawas City, Michigan, said appointment having been approved by William A. Comstock, Governor of the State of Michigan, in pursuance of section 6 of Act No. 32 of the Public Acts of 1933, did on June seventh, 1934, order:

I. That all persons having claims against the Iosco County State Bank, at Tawas City, Michigan, a Michigan Corporation, present the same and make proof thereof to E. T. Burns, Receiver, on or before October 8, 1934.

II. That all persons having claims of whatever kind or nature against said Iosco County State Bank, failing to file such claims on or before October 8, 1934, shall thereafter be forever barred from filing their claims against the said Iosco County State Bank, and shall be deemed to have no valid claim of any kind against any of the assets of the Iosco County State Bank, in the hands of said Receiver, unless time for filing has been extended on cause shown.

III. That on or before October 18, 1934, said receiver shall file with the said Commissioner of Banking, a schedule of all claims presented to him, together with his recommendation thereon as to their allowance or rejection; that a hearing will be had in the offices of the Receiver, at Tawas City, Michigan, on the 24th day of October, 1934, at nine o'clock in the forenoon, at which time the Banking Commissioner, or one of his representatives will be prepared to hear objections on the allowance of any claims filed.

IV. That a copy of this Order be published once each week for twelve successive weeks (thirteen publications) in a newspaper of general circulation in the city, village or county where the Iosco County State Bank is located, and if no paper is published in such county, then the notice shall be published at the nearest county seat.

R. E. REICHERT, Commissioner of the Banking Department.

PATRICK H. O'BRIEN, Attorney General.  
BYRON GELLER, Assistant Attorney General.

**SCHOOL ELECTION**

NOTICE is hereby given to the qualified electors of the School District of the City of Whittemore and Burleigh Township, County of Iosco, State of Michigan, that the next ensuing annual school election will be held at the place or places in said city as designated below, viz.: High School Rooms, on Monday, July 2, A. D. 1934.

At which election the following Trustees will be elected: 2 School Trustees for a term of 3 years, 1 School Trustee for a term of 2 years. The Board of Education shall determine what questions and propositions unless otherwise provided by law and matters upon which action by a vote of the electors of the district is required or necessary.

All Trustees to be placed on ballot by petition.

Business meeting at 2:30 p. m. The polls of said election will be open at 9 o'clock a. m. and will remain open until 5 o'clock p. m. of said day of election.

Dated this 1st day of June, A. D. 1934.

THEO. BELLVILLE, Secretary of the Board of Education.

**Whittemore**

The Mother and Daughter banquet sponsored by the Ladies Literary Alliance Club Thursday night was attended by about 90 mothers and daughters. A very good program followed the dinner. Mrs. E. A. Hasty was the dinner hostess. Mrs. E. A. Hasty in a very pleasing manner acted as toastmaster. Miss Florence Latter, a missionary home from Porto Rico, was the speaker of the evening and gave an excellent talk on Mother Love. Guests were present from Tawas City, Sterling and Twining. The program committee deserves much credit for its efforts in making this a worth while evening and the O. E. S. chapter for the bountiful dinner served. The Ladies Literary Alliance Club extends its thanks and appreciation to all the mothers and daughters who responded so well, and everyone who helped to make it an evening long to be remembered.

Mrs. Wm. Leslie and daughter of Tawas City attended the banquet here Wednesday evening.

Mrs. Robert Dahne and two daughters and sister-in-law are visiting in Indiana.

Mr. and Mrs. Ernest Barlow left Wednesday for a visit in Canada. Mrs. H. Hasty and daughter, Julia, of Sterling attended the banquet here Wednesday night.

A large number from here attended the wedding dance at Prescott given by Mr. and Mrs. Chas. McKay. Mrs. McKay was formerly Miss Juanita Thompson, daughter of Mr. and Mrs. Seth Thompson.

Miss Esther Fuerst is spending this week at the World Fair, Chicago. She accompanied Mr. and Mrs. F. Schneider of National City.

Mrs. Forest Armour returned from a visit in Battle Creek.

**Hale News**

Hale friends will be interested in the marriage of Ernest Lucas of Mio and Miss Grace Stevens of Bay City, quietly solemnized on Saturday afternoon, June 16, in Saginaw. Mr. and Mrs. Lucas spent a few days in Flint and in Mio, where they were guests of Mr. and Mrs. S. J. E. Lucas, formerly of Hale, leaving on Tuesday for Whitehall, Mich., where Ernest is employed as a surveyor. Ernest is a graduate of Hale school and Whittemore high school and the bride has made many friends during her visits here, who join with us in extending best wishes for a happy married life.

Rev. Davis of Whittemore, Mr. and Mrs. Elmer Streeter and Mr. and Mrs. Lewis LaBerge of Long Lake attended the Ladies Aid dinner on Wednesday.

Miss Helen Webb is spending two weeks visiting Rogers City friends.

Orvis McGirr, who was a member of the graduating class of the Bay City high school, and Miss Iola McGirr, a junior in the same school, are home to spend the summer vacation.

Mr. and Mrs. Earl Slosser of Saginaw were Hale visitors over the week end.

Mrs. Hugh Slosser, who was operated on in the Samaritan hospital, Bay City, for goitre two weeks ago, was able to return home last Saturday.

Mrs. George Brown, who was in Bay City to attend the commencement activities, her sister, Miss Harriet Stevens, being a member of the class, returned home on Tuesday.

Mr. and Mrs. John Brandal of Flint are visiting Hale relatives for a few weeks.

Mrs. L. A. Ewing entertained the Ladies Aid at an all-day meeting

on Wednesday. The meeting was scheduled for two weeks ago but postponed because of the Children's Bible school. A sumptuous dinner was served by the hostesses.

Eugene Glendon has accepted a position as bookkeeper for the Major Auto Co. at Standish.

Mrs. R. D. Brown has spent the past few days visiting friends at Bay City and Saginaw.

**HALE BAPTIST CHURCH**

Sunday School at 10:30. Church Service at 11:30. The sermon by the pastor, Rev. Harvey, will be followed by the Communion service. Note the change in time (one-half hour earlier).

Monday evening the young people will hold their business and social hour. Place will be announced later.

Tuesday afternoon the Junior Guild will meet with Mrs. Petteys at the parsonage at 2 o'clock.

Wednesday evening at 8 o'clock, prayer meeting at the church. Everyone is urged to attend these meetings if not attending elsewhere.

**Growth of Baby Crabs**

A baby crab is less like an adult crab in structure than a tadpole is like a frog when it is born, and it does not achieve the familiar crab pattern until it is about a month old. From that time on for a period of six months or more it grows so rapidly that it has to discard its outgrown shell about twice a month. At the end of that time it will have become a fair sized crab.

**Bamboo Grass**

Some bamboo grass is a foot in diameter at the base, and a hundred feet tall.

**Tawas Breezes**

VOL. VIII JUNE 22, 1934 NUMBER 4

"When you are eating you're 'appy," announced the student; "and when you're through you are 'tight; that's 'appetite."

Middings, \$1.65 per 100 lbs.; cracked corn, \$1.75 per 100 lbs.; whole corn, \$1.65 per 100 lbs.

Visitor: "And what is your daddy's business, little man?"

Little Man: "He is an insulting engineer."

Just received a car of egg coal. Under 3% ash. Now is the time to fill your bins as coal will raise every month.

"Define 'appetite,'" requested the instructor in an English school.

It was a social event. The young man had just been introduced to the young lady, and after a brief and awkward silence, he ventured:

"You are from the West, I understand."

"Yes, from Indiana," she replied; "Hoosier girl."

The young man started and flushed deeply. "Why—er—really," he stammered. "I—I don't know—that is, I haven't quite decided yet."

We are still selling scratch feed at \$1.65 per 100 lbs.

**Wilson Grain Company**

We grind your grain every day in the week.

**LOOKING BACKWARD**

**50 Years Ago—June 19, 1884**

Workers at J. E. Potts Salt & Lumber company, Gratiwick, Smith & Fryer Lumber company, T. F. Thompson & Co., J. C. Crane, and Pack, Woods & Co. mills at Oscoda and AuSable walked out in a strike Tuesday morning. The men ask \$2.00 for an eleven hour day and pay every Saturday night. Eight hundred workers are involved in the strike. Sheriff Clark Esmond and Deputies Larabee and Macklin are on the scene to keep order.

G. Goodwillie is erecting a large dwelling house in this city.

The Townliners are straightening out their road this spring and putting it in better condition.

Uncle Tom's Cabin will appear here shortly.

Eddie Tindel, six years old, had a very narrow escape from drowning Saturday evening when he slipped off a log into the water back of McBean's mill. He was rescued by A. F. Zeiter.

The supervisors voted to submit to the electors of the county the proposition to raise \$2,500.00 for building county offices and fireproof vaults.

**25 Years Ago—June 18, 1909**

Gus Karus of Baldwin township is building a new residence.

Twenty applicants are writing at the teachers' examination now in session at the court house.

Ed. Anderson, Leo Kehoe, John Patterson and Frank Labadie went to Bay City Saturday and returned Sunday with Ed's new gasoline launch, Iola. The boys report not the most pleasant trip owing to the rain and fog.

Henry Wojahn and George Luedtke, who have been attending the Lutheran seminary at Milwaukee, arrived home Tuesday. Henry has completed his school work and will take up his labors as a pastor early this fall.

Rural Carrier George Laidlaw of route No. 1, Tawas City, has a neat new mail wagon.

The first excursion of the season to Tawas Beach will be run next Sunday.

Zenas Colby is a graduate this year at the M. A. C. His father, Lafayette Colby, attended the commencement exercises.

Miss Georgena Charters and William Leslie of Whittemore were united in marriage June 16.

**Startling price reductions, just announced, place Chevrolet further ahead of its field than ever—in price, quality and value**

**CHEVROLET** In the face of the biggest demand in years, right when the trend toward Chevrolet is at its peak, Chevrolet reduces prices! No wonder America was startled when this news flashed across the country just a few days ago. And now that the public has had a chance to figure out what this price reduction means in terms of greater value, the news becomes even more important than before. Because it means that Chevrolet now offers you a big, substantial, quality car with the famous valve-in-head engine for as little as \$465, f. o. b. Flint, Mich.—making it by far the lowest-priced Six in the world. It means that you can get enclosed Knee-Action, Blue-Flame performance, cable-controlled brakes, and all the other big advancements of the day, for as much as \$35.00 less than before—and Chevrolet's former prices were already among the lowest of the low. It means, in short, that Chevrolet now presents America with the finest buy the low-price field has ever seen.

**THERE ARE PLENTY OF "BIG ONES" IN MICHIGAN WATERS**

But fishing is only one of the varied attractions Michigan offers vacationists. The Great Lakes themselves, and 5000 inland lakes and streams, present opportunity for almost every known water sport. And for those whose chief interest is golf, tennis, riding or other land sports, Michigan is an unexcelled playground.

Michigan's tourist and resort business brings large sums of money to the state each year. It provides employment for thousands, and greater prosperity for all of us. We can increase that business further by telling out-of-state friends about Michigan's vacation advantages and by spending our own vacations here.

And, no matter which part of Michigan you visit this summer, banish worry by telephoning home and office frequently. Call ahead for reservations, or to tell friends you are coming. Long Distance calls will add but little to the cost and much to the enjoyment of your vacation.

## SYNOPSIS

At the close of the Mexican war, Robin Kershaw, with his bride, rode into northeastern California. Here he found an ideal valley for cattle raising. They christened it Eden Valley. Below Eden Valley is a less valuable tract which Kershaw's wife christens Forlorn Valley. Joel Hensley, a Texan, settles in the lower half of the valley. There is bad blood over fences and water for irrigation. Kershaw kills Hensley and the blood-feud is on. By 1917, Rance Kershaw, his son, Owen, and daughter Lorry are all that remains of one clan. Nate Tichenor is the sole survivor on the Hensley side. He goes to help Lorry in her car and finds her father has died of heart disease. Silas Babson, Forlorn Valley banker, schemes to control the irrigation and hydro-electric possibilities of Eden Valley. He proposes to play Nate against Lorry, assuming that they are carrying on the old feud, in this way getting control of the key lands necessary to the project. Nate, however, has no intention of carrying on the feud. He tells Lorry that he and Owen Kershaw, Lorry's brother, met in France just before Owen was killed. They became buddies, and Nate promised that if he survived Owen he would look after Lorry as a brother might do.

## CHAPTER VI—Continued

The two days that followed Rance Kershaw's funeral were spent by Nate Tichenor at the Bar H headquarters, until his old superintendent, Rube Tenney, should arrive and, with his wife, assume the duty of looking after Lorry Kershaw's affairs and keeping her company. He spent those two days looking over his decayed estate and formulating plans for its restoration, but in the midst of these thoughts his mind constantly shuttled back to a consideration of Lorry Kershaw and her affairs. He did not know Silas Babson except by sight; hence, lacking knowledge of the man's character, he was at a loss to know why Babson had so suddenly turned on the Kershaws. Was it possible he had purchased the mortgage because he feared the holder of it might grant an extension? If so, then Babson desired it, not as an investment, but as a weapon. Nate decided finally to try a shot in the dark and halt Babson's operations before they had fairly started.

The inability to puzzle out a trail had always annoyed him; he knew, too, it must be annoying and harassing Lorry Kershaw to a far greater extent.

She was a fine girl, and if he was going to be her neighbor he desired her friendship, not only for both their sakes but for the sake of all the Hensleys and Kershaws who had died with their boots on. He'd promised Owen Kershaw he'd wave the olive branch, if and when he should get back to Eden Valley. . . . What a fine-looking lad that Owen had been! . . . All man . . . unexpectedly sentimental. . . . Well, he'd been out of Eden Valley to a private school for a few years. . . . He'd been civilized.

"Yes, Owen," Tichenor soliloquized, "it is hard to accept too many favors from a traditional enemy. The suspicion, distrust, and dislike of a half century aren't to be eradicated in a day . . . and she did throw my check in the fire! Well, she has something I want and I'm willing to pay for it and pay heavily. . . . That cursed feud is dead and I'll not revive it with a lawsuit. Why rub into the girl the knowledge that I'm rolling in money while she's bankrupt?"

Forthwith he motored into Gold Run and telephoned to his attorney in San Francisco. "Tichenor speaking, Paddon. Listen carefully, Ranceford Kershaw is dead and has left a bankrupt estate to his sole heir, a daughter named Lorraine. But two years ago he gave a deed of gift to his daughter of those four thousand acres I spoke to you about—you have the legal description. Well, Lorraine Kershaw filed that deed of gift for record very recently, as I discovered when running down the title at the court house in Gold Run. The local bank holds thirty thousand dollars' worth of Rance Kershaw's notes, unsecured, overdue and with interest in default, and the president and controlling owner of that bank holds also an overdue first mortgage in the sum of two hundred and fifty thousand dollars, with a year's interest in default. In addition the Kershaw estate owes the Bar H Land and Cattle company more than three hundred thousand dollars. The bank and the banker are going to foreclose, but the Bar H isn't."

"Good news," the lawyer interjected, as Nate Tichenor paused for breath. "It would seem that the girl is not in a position to hold you up, so you ought to get that four thousand acres cheap."

"Precisely. But I'm not going to give her the opportunity to begin to think she can hold me up; there'll be no argument as to the price. I'm mailing my bank in San Francisco today a check in its favor for four hundred thousand dollars, with instructions to issue a certified check in favor of Lorraine Kershaw and send it over to your office. Meanwhile, prepare a deed from Lorraine Kershaw to the Mountain Valley Power company for that four thousand acres—"

"Why not do a little trading? Offer

the girl twenty an acre and work up."

"Listen Paddon. You transact my legal business for me, but I do not need you for my general manager. That land is worth four hundred thousand dollars to me if I can get it without a fight and without leaving a bad taste in Lorry Kershaw's mouth. I can afford to pay for my fancies, I have a fancy for this four thousand acres, and I fancy it now! But I do not wish to be known in the premises, so do not come up yourself to close this deal. The girl would suspect collusion. Understand?"

"Aye, aye, sir."

The following afternoon a livery car from Gold Run arrived at the ranch, bearing Mr. Rube Tenney, Mrs. Rube Tenney, and two little Tenneys, a boy and a girl. Mr. Tenney, in his younger days, had been a Hensley bodyguard, willing (albeit never called upon to do so) to kill a Kershaw out of loyalty to the bread he ate. He was riding under Nate Tichenor's father, and when the latter died was elevated to the position of ranch superintendent, which position he had held with credit and honor until Nate Tichenor had gone out of the cattle business. Rube Tenney was nearly fifty years old now, but active and still trustworthy. He greeted his old master as informally as if they had not seen each other since 1917.

"Well, I got your wire ordering me to report, Nate," Rube Tenney announced. "So I came a-runnin'."

Tichenor smiled. When the Bar H retirement had left Tenney without a job, Nate had financed his old superintendent in the lease of a ranch and a band of two thousand sheep. Sheep were and always had been repugnant to Rube Tenney, but he had worried along with the nuisances and even during those lean years had managed to make more than a living off them.

"You left a good man in charge of your sheep, I hope, Rube?"

"I sold 'em to a good man. My lease was expiring in October, an' after three bad feed years I reckoned I'd better quit before my sheep died o' starvation." He handed Nate a check. "There's the money you staked me to. I got a few thousand over an' above that. Thank God, the rest o' my life will be spent with decent, respectable cows."

"Now's a fine time to git back into the cattle business," Mr. Tenney went on. "Prices is advancin' lorry you can still stock up cheap."

"I'm not going back into the cattle business, Rube. But you are. You're to be riding boss of the Circle K—on the salary of a ranch superintendent."

"Ah! Closin' in on them Kershaws, eh?" Tenney grinned.

Patently Nate proceeded to disillusion him, and while he was doing it the Tenney head wagger understandingly. "Never did figger you'd be able to keep up steam like the Hensleys," he declared. "That's your father's blood. Very well, son, I'm glad to have the job."

"Miss Kershaw knows all about you—knows I've sent for you. There's a Miss Bachman staying with her at present. Tell her I suggested she send Miss Bachman back to Valley Center in this rented car of yours."

He gazed long and affectionately after the departing Rube Tenney and his brood. "Old Faithful," he soliloquized. "He doesn't suspect I bought him out of the sheep business and took a loss to do it. But it's worth it to have him back on the job—to be free of worry about that Kershaw girl and her finances—and mine. Fine joke on Rube and me if she takes a notion to fire him—for a woman's reason!"

But in his heart he knew there was little chance of that. Lorry Kershaw was a girl one could trust to know the value of a good rider and a loyal employee. And Rube Tenney could fill the bill.

When Silas Babson returned to Valley Center he brought with him three legal documents, all undated. One was a petition to the county board of supervisors for permission to form the Forlorn Valley Irrigation district; another was a formal application to the state water commission requesting the allocation to the Forlorn Valley Irrigation district of the flood or freshet water of Eden Valley creek; the third was the articles of incorporation of the district.

The attorneys he had consulted, Messrs. Brooks, Gagan and Brooks had agreed with him that, under the circumstances, his strategy was excellent, but had taken occasion to warn him that if Nate Tichenor and Lorraine Kershaw should decide to oppose his proposition seriously he would realize he had a fight on his hands before he got through with them.

"Under legislation recently enacted a state water commission has been appointed and this commission has control of the so-called unappropriated waters in all the streams in this state. There are, undoubtedly, billions of gallons of so-called unappropriated water in Eden Valley creek, and there is no doubt but that the state water commission will grant the petition of the Forlorn Valley Irrigation district for the allocation to it of these so-called unappropriated waters."

"As I understand your situation, if

you can get your machinery in operation to enter a condemnation suit before Tichenor sells his dam site to this power company you suspect of having an interest in it, and before the Kershaw girl sells her lake site to the same power company, you will, by the filing of that suit, automatically ruin the aspirations of your competitor, and you may safely accept my assurance that you can win such a condemnation suit. However, what the proposed irrigation district will have to pay Tichenor and Miss Kershaw for these properties is, of course, a matter for a jury to decide. Your irrigation district will have to pay the price within thirty days or forfeit forever its right to acquire the lands."

Babson nodded his comprehension and the attorney continued: "Your first choice of an impounding dam is now owned by Tichenor and the lake site by Miss Kershaw. If these properties are sold to the power company, being a public service utility, cannot be disturbed in its possession by another smaller corporation. You understand that point clearly?"

Again Babson nodded.

"We will assume that this is exactly what will come to pass. You will understand that in the position the power company will occupy, it will not have to purchase or condemn any water rights from Tichenor and Miss Kershaw. The water will pass over their ranch lands just as it has been passing for centuries, and the power company will merely impound it just above the point where it normally goes to waste on barren lands which still lie in the public domain. The Department of the Interior, which has jurisdiction over the public domain, will doubtless make no objection to the impounding of water by the power company, but in the event that settlers should in the future file homesteads on the infertile lands just below the power company's dam, the power company will be forced to let such settlers on lands riparian to the old channel of the stream have their fair share of the water."

"That is a contingency which will never occur, Mr. Gagan. Those water rights, even with irrigation, will never attract anybody."

"We will assume you have the correct viewpoint. We have already assumed that you will not be able to acquire the Tichenor dam site and the Kershaw lake site. Now, have you an alternative lake site? Unless you have, just hand us a check for the cost of this interview and forget your irrigation project."

Babson drew a sheet of paper toward him and made a rough sketch of Eden Valley and the surrounding country. "This portion of the valley, which is occupied by Tichenor and the Kershaw ranches, is usually referred to as the Pan," he explained. "This narrow canyon at the head of the Pan is known as the Handle. By cutting a canal through a pass in the hills on the western boundary of Forlorn Valley and installing our flood-gate there, the water can be led from this natural reservoir by easy gradient along the northern base of the hills that form the southern buttress of Forlorn Valley and separate it from Eden Valley. Thence laterals from this main canal will lead the water over some thirty thousand acres of Forlorn Valley. There is a 10 per cent slope."

"And your diversion dam would be in the public domain, eh? Have you sufficient political influence in Washington to induce the Department of the Interior to grant you permission to erect such a diversion dam, dig your main canal and impound your water in the public domain?"

Babson smiled. "I feel assured we can work that game through our local congressman and senator."

"Nathan Tichenor and Lorraine Kershaw," Gagan reminded him smilingly. "They own lands riparian to Eden Valley creek below the proposed diversion dam and may block your aspira-

tion with the Department of Interior by claiming you are diverting water from riparian lands to non-riparian lands, to their signal loss and damage."

"But we will not divert their share of the water, Mr. Gagan. Our plan is to divert only that portion of the flood or waste waters allocated to us by the division of water rights, which is under the control of the state water commission."

"That will be fine, provided you can get away with it," the lawyer replied dryly. "My partners and I have considered this new law very carefully and it is our opinion that it is subject to successful attack, by an energetic and belligerent riparian owner, as unconstitutional."

"It's been on the statute books five years," Babson challenged. "Why hasn't it already been declared unconstitutional?"

"Probably because nobody has pressed the point. Lawyers who could be engaged to tackle such a tough fight are high-priced, and the men who would engage them usually cannot afford them. So the victims make the best of the situation and get along on the amount of water allocated to them by the state water commission."

"Tichenor and the Kershaw girl will not fight us," Babson declared confidently.

"Nevertheless, if they're smart, they'll fight you. From what you tell me, these people come of fighting stock."

"Well, suppose we lose," Babson countered. "The district can still get rid of them by condemning all their lands' water rights and buying them, can't it?"

"Yes, of course. But you'd still have the power company on the creek below you, clamoring for more water than they would then receive."

"Wouldn't the state water commission have to adjudicate the quarrel?"

Again Gagan smiled his enigmatic smile. "I suppose so. Still, with these two riparian owners eliminated by a condemnation suit, the issue would lie between you and the power company and if, as you seem to think, there is water enough for both, a compromise should not be difficult to reach."

"It's a chance I'll have to take," Babson answered doggedly, thinking of the mortgages his bank held on dry-farming lands in Forlorn Valley. Once he succeeded in getting surface irrigation on those lands their values would be stabilized—likewise the value of his bank's capital stock.

Having gorged himself with legal information on every angle of the situation that confronted him, he paid his bill and returned to Valley Center in great good humor. He had boiled the issue down to its essentials. The water would cost nothing save the expense of leading it to Forlorn Valley or, if Nate Tichenor and Lorry Kershaw should oppose him successfully, he would have to buy them out via the condemnation suit process. If his plans matured in advance of those of the power company he suspected of interest in the Eden Valley water, he was safe. If they didn't he would still not be ruined. And once safely out of the unpleasant situation in which he found himself, he cared not a fig should ruin overtake the district subsequently. He told himself it was high time he liquidated his various interests and retired on the income from his capital.

The bank was closed for the day when Babson reached Valley Center, so it was not until he sat down at his desk next morning that Mr. Henry Rookby was able to impart to him such news of local interest as had developed during Babson's absence.

"Rance Kershaw's dead," Rookby announced immediately. "Dropped dead of heart disease the day you left for San Francisco."

TO BE CONTINUED.

### Oceans Contain Gold, Silver, Iron and Many Other Precious Elements

There is enough gold in the sea to give every man, woman and child in the world about \$14,000 worth, with gold at \$20 an ounce, if it were all removed and distributed equally. Such is the conclusion which might be drawn from the most recent estimates of the composition of sea water contained in the 1933 physical tables of the Smithsonian Institution, says Popular Mechanics Magazine.

Each kilogram of sea water contains about forty-five millionths of one milligram of gold. The total ocean surface area is estimated at 365,500,000 square kilometers and the average depth at three kilometers. The seas therefore contain about 1,000,000,000 cubic kilometers of water with an estimated weight of one sextillion kilograms—a number represented by the figure one, followed by twenty-one ciphers. This would mean about 1,500,000,000,000 ounces of gold, or 700 ounces for each human being.

It is estimated the oceans contain silver 1,000 times greater than the amount of gold. Also there are vast stores of iron, manganese, phosphorus

iodine, copper, barium, arsenic and zinc—all present in sea water in minute amounts along with such vastly more abundant elements as chlorine, sodium, magnesium, calcium and potassium.

It has been found that the cost of extracting the precious elements from sea water is vastly out of proportion to the returns. While it has been assumed that the amounts of the various elements found in the surface water also would be found throughout the sea, this is by no means certain, as there is reason to believe the amount decreases with depth.

### The Name of Hapsburg

Hapsburg, or Habichtsburg, translated into English, is Hawk's castle. It was from Hawk's castle, the gloomy little mill-like fortress on the River Aar in Switzerland, that came the name of Hapsburg, a name borne by a family that ruled Austria for 638 years, or so long that scarcely anyone but the historians today recalls the name of their predecessors, the Babenbergs.—Chicago Tribune.

## That Body of Yours

By JAMES W. BARTON, M. D.

### First Symptom of Heart Failure

AS STUDENTS it was our custom to listen to as many cases of heart disease as possible, and try to tell whether the murmur came with the first beat, with the second beat, just before the first beat, and the quality of the murmur.

Then with this worked out in our minds we tried to tell just which valves were affected and gave the disease its particular name. What do we find our instructors in medicine teaching the students now about heart disease?

While they have not done away with the names of the diseases affecting the heart, they attach very little importance to them, because they have or try to have all heart ailments down to a practical working basis.

What are the practical points? First, has the heart enough power to do the work of the body when the body is at rest? Second, what amount of reserve has the heart when work, extra work, is demanded of it?

If the heart cannot do the ordinary work demanded, and cannot do a little extra work at times, then that heart is "failing" in its ability to work, and we have what is called "heart failure."

What are the signs that the heart is not doing its work properly, or is not strong enough to fulfill the usual demands on it?

If the failure is severe or has existed for some time the heart will be dilated, and there may be dropsy.

But before the heart becomes such a complete failure, what is the first sign that is noted by the patient himself?

Breathlessness on effort. Remember everybody gets out of breath if they work or exercise hard or long enough. But if work that they have ordinarily been able to do without getting out of breath, now makes them breathless, the first thought should be to have the family doctor examine the heart thoroughly; that is lying down, sitting up, standing up, exercising, immediately after exercising, two minutes after exercising, by breath holding tests, and other methods.

However, an obstructed nose, a heavy meal, or being already tired, may cause breathlessness after effort, even when the heart is normal.

Remember, then, that the first symptom of heart failure is breathlessness on slight effort.

### Insanity

Having gorged himself with legal information on every angle of the situation that confronted him, he paid his bill and returned to Valley Center in great good humor. He had boiled the issue down to its essentials. The water would cost nothing save the expense of leading it to Forlorn Valley or, if Nate Tichenor and Lorry Kershaw should oppose him successfully, he would have to buy them out via the condemnation suit process. If his plans matured in advance of those of the power company he suspected of interest in the Eden Valley water, he was safe. If they didn't he would still not be ruined. And once safely out of the unpleasant situation in which he found himself, he cared not a fig should ruin overtake the district subsequently. He told himself it was high time he liquidated his various interests and retired on the income from his capital.

The bank was closed for the day when Babson reached Valley Center, so it was not until he sat down at his desk next morning that Mr. Henry Rookby was able to impart to him such news of local interest as had developed during Babson's absence.

"Rance Kershaw's dead," Rookby announced immediately. "Dropped dead of heart disease the day you left for San Francisco."

TO BE CONTINUED.

Insanity. Fairminded people have no desire to see an insane man or woman punished by hanging or imprisonment, nor, on the other hand do they want to see a prisoner who is not insane escape the just punishment of his crime because a clever lawyer is able to bolster up a defense by various circumstances, illustrations and comparisons.

What is insanity anyway? When we think of how judges, lawyers, and juries wrestle with the problem of what is and what is not insanity, it is not easy to give a full or complete definition of just what must be found about an individual before he should be called insane.

However in a general way it may be said that everyone of us is born with certain instincts, principal or first instincts they are called, such as love, hate, fear, joy. These are a part of us, ourselves in fact.

If, then, you love, hate, fear anybody or anything, that is your own business; at least that is what one would naturally think. And if this love, hate or fear does no harm to anyone else, no one but yourself knows that you possess it.

If, however, this love, hate, or fear so affects you that you want to do things that are not considered right by the community and by the laws of the land, then a fight goes on within you, a "conflict" as it is called, because these primal instincts are forcing you, on the one hand, to do these "wrong" things, and your moral training and the laws of the land are, on the other hand, fighting back these instincts.

If we think about some cases we know who have become mentally unbalanced, we find that they didn't want to mix much with others, wanted to do things differently, weren't much interested in other people, even friends or family; in fact, didn't want to be bothered or "hemmed in" by rules and regulations.

What are our mental specialists trying to do about this type of mental unbalance or imbalance?

These physicians recognize that human beings will always be born with these primal instincts—love, hate, fear,—so that to prevent insanity every boy, girl, man and woman must be taught that the good of the community should be always the first thought.

## Howe About:

Religion Good Cooks H. L. Mencken

By ED HOWE

NO REASONABLY honest or intelligent man can refuse considerable respect to the Christian church. It has always taught morality with its religious doctrine. In the home, in the nation, it has been, in a way, the custodian of good behavior. Parents, especially mothers, are its sincerest advocates, and mainly for moral reasons.

But no intelligent man may honestly say as much of Communism. At least, the founder of Christianity is called the Prince of Peace; in his book may be found the moral teaching found in every other book of enduring fame. In it is found the simple admonition to give unto Caesar the things that are Caesar's. The Bible advises us to do unto others as we would have others do unto us, and the advice is found in a much older book, indicating that in all times it has been found a dependable and necessary human regulation for the greatest good of the greatest number.

But it is certainly true that Communism is a doctrine of violence, of war; of defiance of morality.

In my long life I have found nothing to substantiate the truth of the Christian dogma, but have never denied that millions of its followers are good people. Most of them only know of their doctrine that it teaches morals; of the rest of it they know little. Their faith is faith in the necessity of good behavior, but I have never known a Communist of whom it might be truthfully said he was an honest man.

The next time you sit down to your newspaper, note the many mentions of policemen, actresses, club women, social workers, society women, and the like, and the few mentions of women who are good cooks. Even in private life it is almost equal to "starting a story" on a woman to say she is a good cook.

One of the best things to be said about a woman is that she is a good cook; the real scandal is the meals that are prepared by the ordinary hired girl.

H. L. Mencken has expressed regret that no one since Huxley has capably defended himself against the sneers of religious sentimentalists.

Why does not Mencken himself do it? Why did he twice make the attempt, and then drift off into the usual timidity? Mencken is a better writer than Huxley; not a greater man or thinker, but he is better able to present a case in simple words easier understood by the ordinary reader. Mencken's best book is least known, and possibly out of print: "The Philosophy of Frederick Nietzsche." No other man, living or dead, has more simply, powerfully or intelligently presented a summary of truth, hidden away in important books written by a great intellectual. It is the misfortune of the world today that H. L. Mencken has not done as much for Huxley and a dozen others of equal note. It is a weary task for an average reader to wade through all of Nietzsche's books, important as they are; a joy to read one such book as Mencken's "Nietzsche."

But in summarizing his own religious opinions, Mencken is cowardly; he seems to be as much under the control of his mother as Mark Twain was under the control of his wife.

When he attempted to speak for himself about religion, Mencken even expressed the belief there "might be a good deal in it," to satisfy his mother, but Huxley didn't talk that way in his controversy with Gladstone.

What I miss in Mencken's own religious books is not his wit or wisdom, but his great ability as a writer to present the case truthfully, fairly and candidly for the benefit of confused and hurried readers. Nothing is so awkwardly, so confusingly or dishonestly written, talked, sung or shouted about as religion. Everybody is afraid of the subject, although there is nothing whatever to be afraid of in discussing it, except ignorance and cowardice.

All my life I have heard men say, as a sort of apology: "I am not a money maker." Everyone of any account at all is a money maker; the rare thing is a money saver. The maxim I have most solemn regard for is that declaring it is easier to make money than it is to save it.

So many impose on me unreasonably I am especially anxious not to impose on others. I always want what is justly my due; I do not object to this in anyone—to insist on your plain rights is a virtue. I refer only to unnecessary annoyances and impositions.

One of the reasons given by Jean Jacques Rousseau for abandoning his children was that the rich had robbed him of the means of supporting them. . . . Not one man in a hundred thousand abandons his children for that reason, or any other. Rousseau was evidently an eloquent liar.

I lately met a man and wife, and both had excellent sense, manners and ability. . . . I noted that those who met them said: "It is remarkable; usually one or the other doesn't amount to anything."

## The Housewife's Idea Box

### To Improve Potato Salad

Potato salad is a great favorite with many people. You can make it still better liked if the next time you prepare it you try this: Chop up nut meats and celery or parsley, or both. Add these to the salad just before serving it. You will be surprised to find what an improvement this is. Besides, it adds nutriment.

## Pittance or Fortune

### for Writers of Songs

In the old days, according to authorities, the writers of popular songs were a happy-go-lucky crowd and not infrequently were quite willing to accept as little as \$10 for a song. But the prices vary considerably.

For example, says the Baltimore Evening Sun, Charlie Lawlor and James Blake sold "The Sidewalks of New York" for \$5,000. Stephen Foster, writer of "Old Folks at Home," sold the right to the minstrel, Christy, to publish it as his own work for a disputed price of from \$50 to \$500, but he retained for himself a royalty of three cents a copy. Charles K. Harris received \$200 for "Last Night the Moon Was Shining," got 84 cents for "When the Sun Had Set" but netted something like \$100,000 on his royalties for "After the Ball."

L. Wolfe Gilbert made over \$15,000 on "Waiting for the Robert E. Lee." On the other hand, George Cooper sold "Sweet Genevieve" for \$5.

Gus Edwards struggled along for years before his first acceptance, "Stella," for which he got \$7.50, but in later years "School Days" and other hits brought him in more than a million dollars.

## POOR COMPLEXIONS

Clogged pores, pimples improved in a few days by Resinol Soap and the effective medication of Resinol

World's Fair Visitors furnished large, small apt. 7 hotel rooms near lake, 5 minutes to Fair. Choice residential district. Write Howard & Orr Co., 1309 E. 53rd St., Chicago.

SUCH IS LIFE—And He'll Try Anything Once

By Charles Sughroe

Seek Some Method to Use Lightning

Much Electric Energy Is Lost Each Year.

Washington.—One billion kilowatts of electrical energy is poured down on the earth every year by thunderbolts, the American Meteorological society was told here recently at its annual meeting.

The tremendous potentialities for power from the clouds, at present out of the reach of man, were described by Dr. B. F. J. Schonland, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa.

The studies of the various phases of lightning and thunderbolts have been undertaken, Doctor Schonland said, with the hope that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth.

Much New Information.

The latest research to make lightning divulge its secrets has already yielded much new information as to the speed of lightning, its manner of building up voltages, and the amounts of these voltages, Doctor Schonland said.

Measurements of the electric potential in the cloud show that each centimeter of cloud has a voltage of 10,000, or more than 1,500,000,000 volts per linear mile. Generally, the voltage is dissipated before it reaches this high

potential, though some thunderbolts have been estimated to reach 1,000,000,000 volts.

By far the largest part of the electrical energy in the cloud, fully nine-tenths of it, is discharged inside the cloud before it reaches the earth, and only one-tenth is discharged in the bolts that reach the ground, the research shows.

The electrical potential of 25,400 volts to the inch, it was determined, is built up by the splitting of drops of water in the cloud.

The top of the cloud, the experiments show, is positively charged, while the base of the cloud is negative. The large drops have a positive charge and the small have a negative one. By gravitation the large drops fall down from the top of the cloud to a lower level, where the small negative drops are discharged.

"Leading" Flash.

The downward movement of the large droplets carrying positive electricity, Doctor Schonland stated, accounts for nine-tenths of the discharge, and this takes place within the cloud. The negative charge from the base of the cloud to the earth accounts for the remaining one-tenth of the charge.

The latest findings, Doctor Schonland added, dispute the theory promulgated several years ago by Prof. G. C. Simpson of London, that the base of the cloud is positively charged, while its top is negative. Experiments, he said, show the opposite to be the case.

By the device of a special camera Doctor Schonland, in collaboration with H. Collins of South Africa, it has been possible to make photographs of lightning which furnish data for measuring its speed.

The main flash, the photographs show, is always preceded by a "leader," or trail blazer. This "pathfinder" travels from the negatively charged base of the cloud to the positively charged earth at speeds ranging from 810 to 19,900 miles per second.

The main flash travels in the opposite direction from the "leader," starting upward from the earth, from the spot struck by the "leader," and following exactly the same path traversed by the "leader," back to the cloud.

The length of the "leader" was found to vary from 1.6 to 4.7 miles. The longest time occupied by a "leader" stroke was measured at 1.67 millionths of a second for the 4.7 mile stroke. The quickest flash took sixty-nine millionths of a second to travel 3.5 miles.

Students Fail to See Answer in Question

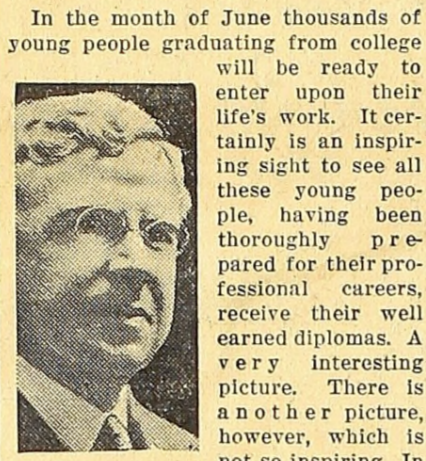

Westfield, Mass.—George G. Sharp, instructor at Westfield high school, suddenly popped this question: "What famous general is buried in Grant's tomb?"

"Sheridan!" exclaimed one pupil. "Taylor!" guessed another.

Sharp got nearly half way around his class before getting the right answer.

THE DIGNITY OF WORK

By LEONARD A. BARRETT

In the month of June thousands of young people graduating from college will be ready to enter upon their life's work. It certainly is an inspiring sight to see all these young people, having been thoroughly prepared for their professional careers, receive their well earned diplomas. A very interesting picture. There is another picture, however, which is not so inspiring. In our large cities today there are thousands of engineers, lawyers, dentists, physicians and other trained men not only idle but suffering acute poverty, without much hope for the restoration of prosperity in their chosen professions for some time to come. Many of these persons are high-class men and hold degrees from universities of the highest rank.

No person, however, can conscientiously undervalue the importance of the professions. Not only do they require from five to seven years in in-

Navy's Best Athlete

Midshipman Hugh O. ("Fid") Murray of Newnan, Ga., was awarded the Naval Academy Athletic association sword as the "best athlete of the year." He was captain and end of the football team and a varsity lacrosse man.

tense preparation but also work of the hardest kind in carrying them on. Some person has remarked that the life of a doctor is a slavish life if you have something to do and equally expasperating if you have nothing to do. This statement might be true of any of the other professions. They all require work of the hardest kind if success is to be the reward of earnest and self-sacrificing effort.

But there is another kind of work which is not generally regarded as of the professional type; and upon which some educators not only look with disfavor but as something to be avoided. We read learned articles on topics such as, "The value of leisure," "Passing of the day of toil," "Live by your wits," "Rise above toil," etc. In other words there seems to be an effort to direct the mind of youth away from manual work as contrasted with the professional career. It is the opinion of many thoughtful persons that the professions are already overcrowded and that there must be a larger return of youth to the trades and the soil. All economic stability originated from the soil and perhaps it is to the soil that the majority must return ere we have a stabilized permanent prosperity.

Java Supplies Quinine

Java is the source of about nine-tenths of the world's supply of quinine.

The Household

By Lydia Le Baron Walker

CLEARING up after the actual work has been done must be considered as part of the job unless there is a maid in the household whose duty it is to do this. In every large establishment there is a kitchen servant called a scullery maid whose work consists chiefly in clearing up after the cook or chef, who is completely occupied with the preparation and cooking of the food. The time of these cooks is valuable and it would be extravagant to pay the wages to clear up the dishes, put ingredients away, and wash, and dry pots, pans, and cooking utensils.

However, in homes of average size and moderate means there is but one maid or none. In the first case the homemaker does part of the clearing up except in the kitchen. And in the second place she does all which attends upon her work, and unless the members of the family have learned to clear up after themselves, she has to do more than her share by clearing up after them if the place is kept tidy and neat.

When some one wants to help or craves a cake or candy or a dessert or any of the extra dishes which are so welcome to have, and then piles up the bowls, pans, and other utensils and leaves them for some one else to wash and put away, this other some one loses a bit of her relish for the food. If the kitchen is left in real disorder, and the homemaker has to set it to rights again she may find annoyance, which is certainly excusable, out-weighs all her appreciation of the food. Yet if a mother does not teach her children that the clearing up is part of a task, whether it be a pleasant one or not, she cannot well find fault with the extra work coming to her.

Sewing.

It is by no means in kitchen work alone that clearing up is part of a job. Sewing is another outstanding occupation in which confusion is rife in a home unless the one dressmaking, mending, etc., puts away whatever is taken out, and keeps the room as tidy as possible. During the occupation it is permissible to have wanted things about.

In cooking, for example, seasonings, flavorings, and all needed ingredients should be at hand while the dish is being prepared. This is equally true in sewing. Patterns, materials, scissors and all materials and utensils required must be out, all or part of the time. It is only when work is done or working time is up, that the clearing away has to be done by some one, and this tidying up should be considered as part of the occupation of the worker.

Think of Neighbors.

The season of open windows has come, and it is a delight to have the fresh air course through the house, and to hear the song of birds and the buzz of bees. But it should be remembered that sounds go out through the windows as well as come in through them, and that the air may carry the

noise from our house to neighbors. While we may like the sounds, they may be disturbing to outsiders.

For example, every one has been disturbed at one time or another by the noise of alarm clock or radio which made the air vibrate when quiet was craved. The first of these mechanical instruments is necessary and is not thought of except in such capacity. The second is a luxury which has become almost a necessity by its power of transmission of messages, music, drama and news. Fortunately the noise from both can be so tempered, with a little care, that while performing their missions of help and pleasure, they would not infringe upon the privacy of others.

© Bell Syndicate.—WNU Service.

The "Swiss Babouche"

The "Swiss Babouche," a Delmon shoe, copied from shoes worn by the Swiss and French peasants and adopted for the use of the American sports-woman. It is made of white buckskin with a contrasting black calf. It has a square toe to allow for plenty of foot action, and a super flexible sole.

New Drapery Change

Among the newest innovations in the drapery line are poles of natural wood, finished only with a wax coating, which are perfect for linen draperies. Mirrored tiebacks and cornices, equally new, are being used with draperies of silk, silk mixtures and velvets.

To Clean Lamp Shades

Most silk lamp shades may be successfully washed with lukewarm soapsuds. Dissolve soap flakes thoroughly before adding them to the water and use a very soft brush to apply the suds to the shade.

Rats Prove Burden

Even in Experiment

Washington.—Science and culture are pitted against one another in "the battle of the rats" at George Washington university.

And, while science calmly experiments on the rodents, culture contemplates importation of a pied piper to rid "building B" of the pests.

It all began when Ross Pollock, psychology instructor and leader of science's forces in the combat, imported rats for experimental purposes. No one seemed to mind until the odor peculiar to rats—even educated ones for scientific purposes—began to permeate "building B," on the third floor of which is the psychology department.

English and history teachers and their classes revolted.

Fairway Nest Doubly Protected

An unusual hazard which golfers made sure to avoid was this graybird's nest on the first fairway at Renmor golf course, Detroit. The manager found three eggs in the hole almost ready to hatch, and immediately had workmen put up a foot-high screen to protect the little ones from tractors, mowing equipment and golf balls. To add to this formidable protection, Major, a police dog belonging to one of the caddies, took an interest in the proceedings and delegated himself as guardian of the nest. Both the screen and Major were left on guard until the eggs were hatched and the little graybird family was up and about. In the photograph Major is eying a couple of golf balls which have landed a bit too close to the nest.

Long Voyages Made by Derelicts of the Sea

The recent sighting of the "ghost ship" Baychimo near Point Barrow, after she had been lost to the sight of men for a year and a half, calls to mind one of the sea's most captivating mysteries, though a dread menace to every sailor—the derelict, writes Louis H. Bolander in the Baltimore Sun.

The Baychimo is, or was, a Hudson Bay steamship loaded with a \$600,000 fur cargo. In September, 1931, she was trapped in the ice off Wainwright. The following month airplanes from Nome rescued the passengers, crew and part of the cargo. On Christmas day a heavy storm broke. The next day she disappeared, but a few days later was sighted by Eskimos. On their report a trapper visited the ship and removed \$35,000 worth of furs. Again she disappeared, but was seen again by Eskimos in April, 1932. Since then, so far as the writer knows, no human eye has ever sighted the sturdy steamship, clutched in the remorseless Arctic ice.

There is something fascinating, something compelling in the thought of these lonely, broken, shabby sea hobs drifting over the seven seas at the mercy of wind, tide and current. Though a menace to sober shipping there still clings to them an atmosphere of romance.

One of the most famous derelicts known to seafaring men was the schooner B. R. Woodside. She was forsaken by officers and men some hundreds of miles east of Savannah. At once she headed straight for Europe, veered about twenty miles of her starting point. She then meandered slowly down the coast of Florida and then zigzagging again across the Atlantic. During her career as a derelict she was sighted by no fewer than forty captains of ships in all parts of the Atlantic. Each one, of course, reported her then whereabouts to the hydrographic office in Washington. At last she was picked up and towed to Abaco, New Providence.

Still another famous derelict was the Fannie E. Woolston. For three and one-half years she wandered over the Atlantic, covering a distance estimated at 10,000 miles. During her journeyings she visited the coast of England, and then sojourned impartially along the coast of France,

Spain and Portugal. She drifted down to the equator and back to America, where she was wrecked 3 degrees north of the spot from which she began her career as a hobo of the seas. This is not surprising when we find that it is not uncommon for a derelict to drift as much as 70 miles in 24 hours.

Old Canadian Town

The oldest white settlement in Canada, Tadoussac, Quebec, this year is celebrating with the rest of the province the four hundredth anniversary of the landing of Jacques Cartier.

It was at Tadoussac that Cartier wintered during one of his voyages to Canada, and Tadoussac was one of the important centers in the early history of French Canada. Long before Cartier's time, according to tradition, Tadoussac was visited by ancient Iberians and later by the Vikings.

Marvelously Sensitive

An instrument so sensitive that it will record the light from an ordinary candle 100 miles away has been built by Dr. Albert E. Whitford, twenty-seven years old, of the University of Wisconsin, says a United Press dispatch. It is an electrical attachment for astronomical telescopes that will permit the study of faint and distant stars.

SAVES MORE TIME

and WORK than a \$100.00 WASHING MACHINE

Coleman Self-Heating Iron

No Heating with Matches or Torch... No Waiting... Lights Instantly, Like Gas

REDUCE your ironing time one-third... your labor one-half! The Coleman Self-Heating Iron will save you more time and work than a \$100 washing machine! Iron any place where you can be comfortable. No endless trips carrying iron from stove to board. Operating cost only 1/8 an hour. Helps you do better ironing, easier, quicker.

See your hardware or housefurnishing dealer. If local dealer doesn't handle, write us. THE COLEMAN LAMP & STOVE COMPANY Dept. W285, Wichita, Kansas; Chicago, Ill.; Los Angeles, Calif.; Philadelphia, Pa.; or Toronto, Ontario, Canada.

Don't give up!

I DO NOT want to give up... but why do I tire so easily... why can't I 'carry on'... and how is it that I do not feel like myself?

It may be that as the result of colds... indoor or over work... worry and the like... the strength of your blood has been weakened—that is, the red-blood-cells and hemo-glo-bin reduced... and Spring finds you with that "worn-out" and "let-down-feeling."

For such cases try that time-tested tonic S.S.S.—not just a so-called tonic, but a tonic specially designed to restore body strength by its action on the blood.

S.S.S. value has been proven by generations of use, as well as by modern scientific appraisal. Unless your case is exceptional, you should soon notice a pick-up in your appetite... your color and skin should improve with increased strength and energy. © The S.S.S. Co.

In the Springtime—take S.S.S. Tonic. At all drug stores.

Eczema on Hands Skin Peeled Off in Pieces

Cuticura Healed

"I was troubled with eczema on my hands for ever so long. I could not put my hands in much water because after I got through I could just peel the skin off in pieces. It would form like a rash and bothered me terribly, burning and itching. My hands were sights and I was ashamed.

"I tried a lot of different remedies that did not help. I sent for a free sample of Cuticura Soap and Ointment and it helped a lot. I bought more and now my hands are completely healed." (Signed) Mrs. H. S. Hammond, 10 Pleasant St., Holliston, Mass., Aug. 16, 1933.

Mrs. W. Campbell (Grace Phelan) of Detroit is visiting her parents, Mr. and Mrs. L. Phelan.

Rev. Geo. N. Luedtke and son of Toledo, Ohio, were visitors in the city over the week end.

Mrs. Parker Morley is visiting in Montreal, Canada, for a couple of weeks.

J. A. Murphy of Mackinaw City spent the week end in the city visiting friends.

Mrs. A. Quast of Bay City and Mrs. Marie Zanley of Detroit spent a few days in the city with Rev. and Mrs. F. A. Sievert and friends. Miss Edna Quast of Detroit, who has spent the past two weeks in the city, accompanied Mrs. Zanley on her return trip to Detroit.

Mrs. Alfred Boomer and son, Clifford, spent Wednesday in Long Lake with her sister, Mrs. Robert Buck, and family.

William Phelan, son of Mr. and Mrs. Louis Phelan of this city, has been engaged as superintendent of the Clifford public school for the coming year.

Mr. and Mrs. Gus. Waack, Erana, and Mr. Thompson of Lansing spent the week in the city.

Mrs. Charles Moeller and Miss Ruth Cholger are attending the World Fair at Chicago this week.

Michael Covle has returned to Notre Dame for the summer term.

Mrs. C. Johnson was dinner hostess to fourteen guests, who gathered to help celebrate her birthday on Tuesday. After dinner the evening was spent playing cards. First prize was awarded Mrs. John Kelly. Later all were served a delicious lunch at the G. H. Q. Inn. Mrs. J. E. Bureau and Mrs. Roy Flagler were out of town guests.

Arthur Koepke, son of Mr. and Mrs. Paul Koepke, Sr., of this city, and Miss Avis Hunter, daughter of Mr. and Mrs. George Hunter of Flint, were united in marriage on June 16th at Flint. Mr. and Mrs. Paul Koepke, Sr., Mr. and Mrs. Paul Koepke, Jr., and all sisters and brothers attended the wedding. Friends extend congratulations.

## MOCCASIN-SOFT ..Yet Wears like IRON

**WOLVERINE SHELL HORSEHIDE**  
Alone Gives You This Amazing Softness  
Flexibility in Both Soles and Uppers

Perhaps your experience has led you to believe that a soft comfortable work shoe is bound to wear out quickly while one that wears long enough to be truly economical must be stiff — uncomfortable — hard on the feet — take weeks to "break in." That may be true of ordinary work shoes but not of WOLVERINE Shell Horsehide.

Wolverines never have to be "broken in." They're soft to start — stay soft — even dry soft after soaking. Yet they wear like iron, resist sweat and battery acids amazingly — are virtually scuff-proof. It's the shell horsehide that makes the difference. Only WOLVERINES have it in both soles and uppers. Only Wolverine tanners know this amazing secret triple tanning process that makes this extraordinary 3-ply leather soft as buckskin yet retains all its enormous strength and wear resisting qualities. Why not step in and examine these unusual shoes today? All styles and sizes.
