## TAWAS CITY

### IOSCO COUNTY REPUBLICANS VICTORIOUS

#### G. O. P. Also Wins Four Out Of Six Contests For State Offices

Election returns Wednesday showed Frank D. Fitzgerald, Republican candidate for governor, to be leading in the race by a margin of nearly 80,000 votes. Thomas Read was also well in the lead for the lieutenant governorship.

The Democratic party scored, however, in the re-election of Auditor General John K. Stack, Jr., and State Treasurer Theodore L. Fry. The contest for attorney general was won by the Republican candidate, Harry S. Toy, Patrick H. O'Brien falling far behind. Complete control of the state senate was gained by the Republicans. Fred C. Holbeck, Republican candidate for state representative from the Arenac district, won out over the Democratic contestant, H. Eugene Hanson, by a majority of about 1600 votes for the district.

In the race for congressional honors Arthur H. Vandenberg, Republican candidate for United States Senator, triumphed over Frank A. Picard, Democrat, by nearly 50,000 votes, according to Wednesday's figures. Roy O. Woodruff, who held the Republican candidacy for United States Representative in the 10th district, won out over his Democratic opponent, Hubert J. Gaffney.

Of the six amendments submitted to the voters of the state only one was approved. Amendment No. 1, providing for non-partisan elections for judges, was ahead by 70,000 votes, according to late returns. All six of the amendments were turned down by Isosco county voters.

Final returns from all precincts in Isosco county showed a definite Republican majority for all offices. For some offices the G. O. P.'s margin of victory was small in certain precincts. Figures indicate, however, that straight-ticket voting was common. Split ballots were evenly enough divided between the two major parties so that their effects were hardly noticeable.

#### Notice

I wish to thank the citizens of Isosco county and assure them that I will give the office of county road commissioner my very best efforts.

Frank Brown.

#### To Voters of Isosco County

I sincerely thank you for your loyal support at the general election.

Grace L. Miller.

## Eleven O'clock—Armistice Day

(Copyright, W. N. U.)

### MEMBERSHIP DRIVE OF RED CROSS WILL BEGIN ON SATURDAY

Seven local chairmen for the Isosco county chapter of the American Red Cross were appointed this week to carry on the annual membership drive. Mrs. J. D. LeClair, roll call chairman for Isosco county, announced Wednesday. Roll call work will begin Saturday, November 10, and continue until Thanksgiving.

After opening the membership campaign Saturday from booths in stores and hotels of the larger communities, the chairmen will on Monday begin house-to-house calls.

Women appointed to head the drive in their communities are: Twentieth Century Club, Mrs. Dease in charge, Tawas City; Ladies Literary Club, Mrs. E. Kunze in charge, East Tawas; Mrs. McGilivray, Oscoda; Mrs. Brockenbrough and Mrs. Curtis, Whittemore; Mrs. Freel, National City and McIvor; Mr. Erickson, Alabaster; Mrs. D. Pearsall, Hale and Long Lake.

Red Cross assistance in this county has been of great help to many citizens year after year. We hope, therefore, that enrollment this year will be large, so that the work may be carried on efficiently.

Red Cross should not be confused with that of the Federal Emergency Relief administration or other governmental relief agencies. The American Red Cross carries on its special work years before the federal agencies were created, and it will continue to spread its benefits after the governmental organizations have ceased to function.

Annual membership in the Red Cross is \$1.00. One-half of the money collected for annual memberships stays in the county. A contributing membership is \$5.00, of which \$4.50 stays with the local chapter. Sums of less than a dollar are gladly accepted, Mrs. LeClair stated, although such sums do not entitle contributors to regular membership.

Most of the work done in the county is financed, Mrs. LeClair explained, from the chapter's share of the money collected in the membership drive. In event, however, of some disaster resulting from fire, storms, or the like, the county chapter would receive additional financial assistance from the national Red Cross organization.

### Astaire and Rogers Score Big Hit In "Gay Divorcee"

Mischievous, gay, spectacular and glamorous, RKO-Radio's musical comedy, "The Gay Divorcee," will afford wholesale amusement for local theatregoers at the Family Theatre, East Tawas, on Sunday, Monday and Tuesday, November 11-12-13. It is a high-speed entertainment with no time for parking and co-stars Fred Astaire and Ginger Rogers, in the delightful pair who made such a hit in "Flying Down to Rio."

Brilliant dancing demonstrations by Astaire and Miss Rogers, in one of which they introduce the new Terpsichorean rage, "The Continental," spectacular and novel ensembles, together with music by five famous composers, enhance the show's comedy theme.

With Miss Rogers and Astaire are seen an excellent group of other comedians, including Alice Brady, Edward Everett Horton, Erik Rhodes, William Austin and Eric Blore.

### ELGIN ULMAN DIES AFTER LONG ILLNESS

#### Death Occurred Monday; Deceased Was Veteran Of World War

Elgin Ulman, World War veteran, died Monday afternoon at his residence in this city after a long illness. He had acquired tuberculosis while in the service.

Elgin Curtis Ulman was born August 20, 1896, in Tawas township. He entered the army on August 28, 1918, and was discharged from service July 21, 1919. On November 10, 1921, he was united in marriage to Hilda Lange. To this union three children were born, two of whom preceded him in death. During the greater portion of his life since returning from the army he had resided on the farm in Tawas township, but a short time ago he purchased a home in this city and last week he moved his family here.

He fought the long losing fight with illness to the end bravely with a smile and a joke on his lips.

He is survived by the wife, Hilda; daughter, Ruth; his mother, Mrs. Anna Ulman; brother, Fred, and three nephews.

The funeral services were held Thursday afternoon at the Methodist Episcopal church, Rev. W. A. Gregory officiated. Burial was made in the Tawas City cemetery. Military honors were given by Jesse C. Hodder Post, American Legion.

The family has the deep sympathy of the people of this community.

### Motor Testing Machine Is Installed By Leslies

A new Ford Testing Machine has been added to the equipment of the garage of the Orville Leslie Ford Sales. This is one of the newest ideas in garage equipment and it will make precision tests of the motor, ignition system, lighting system, carburetor, vacuum system and brakes. The machine will save many steps in the operation of servicing a car.

### School Notes

#### High School

We are pleased to note the scholastic record made by our alumnus, Irwin Schlechte, at Valparaiso University, mentioned by the last week's issue of the Herald.

The ninth grade led in attendance the past month with a percentage of 98.6. The attendance of the whole school for the year is 96.8.

Albert J. Phillips, Research Director of the Michigan Education Association, will talk concerning school taxation in Michigan, Sunday, at 1:30 over W. J. R.

The members of the botany class have taken individual tests this week concerning the identification of certain plants of the community.

### ARMISTICE PARTY TO DRAW LARGE CROWD

When the Audie Johnson Post of the American Legion put on their first party in the old Opera House in 1920 no thought was given to the swift passing of the years to follow. It was a night of dancing and carnival, and who will ever forget jovial Capt. Carpenter acting as judge sentencing would-be offenders to purchase home-made fudge and kewpie dolls.

On next Monday night the Legion marches again. Their fifteenth annual party will be held at the Community Building that night. The ghosts of memories of other Legion parties are taking shape once more and this promises to be one of the real old time parties that brings everyone together. Nate Fry's band will keep everyone stepping to the tunes of today and long ago. You should not miss it.

### Report Surplus Crops To Local F. E. R. A. Office

The F. E. R. A. has recently received several contributions from those who have had surplus crops. These donations have been very valuable to the organization and it is wished that all who have any surplus crops would communicate with Mrs. C. E. Edinger, acting administrator of Isosco county.

One contribution consisted of 20 bushels of cabbage supplied by a farmer who received some seed in the spring. Any crops that have not been harvested, such as potatoes, beans, etc., will be taken care of if the owner does not wish to do so himself. These commodities will be distributed to the welfare clients in Isosco county. It is urged that those who wish to donate will inform the office immediately so that the crops may be taken care of before the cold weather renders them valueless.

### Will Hold Turkey-Chicken Demonstration On Nov. 13

A turkey and chicken dressing demonstration will be held Tuesday, November 13, at the Reno town hall, five miles north of Whittemore, on M-65. Highlights of the demonstration include turkey dressing, dry picking, drawing, problems of marketing, finishing and flock management.

Otto Shearer, extension poultryman, will work with the actual fowl throughout every phase of the numerous operations. A dressed and properly cooled turkey will be brought by Mr. Shearer for the drawing discussion. The phases of poultry demonstrations over the state have helped thousands of poultrymen market their products to better advantage and greater profit.

### County Child Health Committee

The regular monthly meeting of the County Child Health Committee has been postponed until further notice.

Margaret E. Worden, Chairman.

### Emanuel Lutheran Church

Sunday, November 11—English service, 9:30 a. m.; German service, 11:00 a. m.; services at Hale at 8:00 p. m.

Monday, November 12—Choir rehearsal, 8:00 p. m.

### DIGGING JOB KEEPS SEWER CREW MOVING

#### Interceptor Completed, Men Begin Excavation Work For Pumping Station

Having completed the intercepting sewers early this week, workers on the Tawas City sewerage project are now excavating for the pumping station and continuing to lay the force main, Edward C. Schneider, resident engineer, said Thursday.

About 140 men are now listed on the payroll. Each man works every other week on the sewerage project.

The excavation for the pumping station, located at the foot of Second Avenue, will when completed be about 20 feet deep. A hand crane, Mr. Schneider explained, is now being used for lifting dirt out of the excavation and dumping it directly into trucks. The crane, operated by a hand winch, lifts loaded wheelbarrows, and lowers them again after they are dumped.

The completed pumping station will be 26 feet long and 16 feet wide. It will contain two sewage pumps that will work alternately. These pumps will force sewage from the pumping station to the disposal, or treatment, plant.

Gravel and sand for construction of the pumping station and the disposal plant have been purchased. Materials for the pumping station, such as reinforcing steel, electrical equipment, pumps, and motors, will be bought soon.

Construction of the pumping station is being pushed as rapidly as possible, Mr. Schneider stated. Work on the force main, he indicated, should be finished shortly since the force main pipes require a minimum covering of only five feet. Pipes for the intercepting sewers were laid at depths from nine and one-half to 13 feet.

About 1,400 feet of the force main, which will extend from the intercepting sewers to the disposal plant, has already been laid. Slightly more than 1,200 feet of force main pipe remains to be laid. Total length of the intercepting sewers, now completed, is 1,070 feet.

### Deer, Dazed By Lights, Crashes Into Side Of Car

E. D. ("Ted") Jacques and Howard Hatton of Tawas City were involved in a freak accident north of East Tawas Sunday evening when a deer ran into their car while they were on their way home from a hunting trip.

The animal, apparently dazed by the lights, dashed itself against the side of the moving auto, breaking a window and fatally injuring itself. The two men escaped injury. Damage to the car was not great.

### East Tawas City Club Holds Halloween Party

Tuesday evening, October 30th, those who were privileged to be the guests of the East Tawas City Club had a most enjoyable time at a Halloween party at the Ottawas Beach Club House.

A parking place was arranged some distance from the club house. His Satanic majesty with flaming torch and forked spear motioned directions. There was but one course open and that was to pick one's precarious way along a murky and winding avenue that led under and between trees. Light from a few jack-o'-lanterns cast suggestively weird shadows upon a dangling skeleton, a cadaver in the last stages of mortification, a scurrying skunk and the sheeted and jibbling phantoms that squeaked among the trees. Hoarse cries, muffled groans, wild shrieks, and the coarse tones of protesting horse fiddlers added thrills to the walk.

The hall was appropriately decorated with fall leaves, corn stalks, jack-o'-lanterns, and wise and blinking old owls and an illuminated skeleton.

Nearly all of those present complied with the request to mask and the time between arrival and 10:15 o'clock passed quickly in dancing and guessing just who that was that passed. At the time mentioned the grand march began and soon thereafter the order came to "show your face." It was great fun to verify one's guessing and amazing to find how far afield some were.

At intermission a beautiful buffet luncheon was served. Everyone especially enjoyed the delicious cider.

The music was furnished by Monahan Brothers trio from Rose City. The zestful response to their rhythmic initiative was testimony to the appreciation of the guests.

We hope that the City Club will feel like having more of these lovely parties.

The committee deserves much credit for the thrills and fun furnished for one of the best parties yet.

### Christian Science Services

Literary Club Rooms, East Tawas. Sunday, at 10:30 a. m.—Subject: "Adam and Fallen Man."

## EAST TAWAS

Mrs. Fred Wilkins of Alpena spent Thursday in the city.

Mrs. Roy Hickey spent Tuesday in Bay City.

Dr. A. Stealy, a former resident of East Tawas, passed away at Alma. He was buried Wednesday in that city beside his wife, who died several years ago.

Misses Frances Phillips and Ethel Schramm spent Tuesday in Bay City.

Roger Misener, who spent a couple weeks in the city with his parents, Mr. and Mrs. Oren Misener, left on Tuesday for the South, where he has been employed for two years.

Mr. and Mrs. A. Anschutz are rejoicing over the arrival of a son born Sunday.

Mrs. J. Burgette and daughter of Lorraine, Ohio, were called here owing to the serious illness of the former's sister, Mrs. L. Larabee.

Mrs. Harry Carson, who has been visiting in Howell for a few days, returned home.

Dr. and Mrs. O. W. Mitton spent Wednesday in Bay City.

Mrs. Basil Quick and Mrs. C. L. Barkman were Wednesday visitors in Bay City.

Miss Ruth Scheeter, who spent the week in the city with her sister, Mrs. H. Barkman, returned to Bay City Thursday.

Mrs. J. Mielock, Mrs. Elmer Carpenter, Mrs. Earl McElheron and Miss A. Mielock spent Wednesday in Bay City.

Mrs. W. A. Evans, Mrs. Emma Lomas, Mrs. S. Wood, Miss Sarah Richards, Howard Evans and Wm. Gurley attended the funeral of Dr. A. Stealy at Alma on Wednesday.

Miss Allie Frank spent a few days in Detroit with her brother.

Nathan Barkman spent Thursday in Lexington, Mich., on business.

Dr. and Mrs. O. W. Mitton left Thursday for a few days in Detroit.

Mr. and Mrs. A. J. Berube spent Wednesday and Thursday in Detroit and Flint. While in Flint they attended the convention of the Allied Theatres of Michigan, of which they are members.

A party of hunters discovered a dead doe at Huron Shores last Saturday and upon investigation it was found that the deer had been killed by a wildcat. Conservation Officer A. G. Leitz set traps for the animal and on Wednesday morning of this week caught a cat which weighed 25 pounds.

A six o'clock dinner party given on Halloween night was the second social event sponsored by the Normal class this year. The dinner was served to eight guests and fourteen students in the Normal room which was artistically decorated for Halloween. After dinner the party enjoyed a social hour planned by Miss Dora Mark and Miss Rose Mary McKay.

Mrs. Eliza Murray left Saturday for Bay City and Detroit, where she will spend the winter with relatives.

Mrs. W. A. Evans and Mrs. G. N. Shattuck spent the week in Grand Rapids attending a meeting of state Sunday school workers.

Mrs. David Hennigar of Buffalo, N. Y., spent a few days in the city with relatives. Her mother, Mrs. Janet Grant, accompanied her daughter on her return and will spend the winter in Buffalo.

Miss Hazel Jackson of Detroit spent a few days in the city with her father, C. R. Jackson, Sr.

Mrs. Mae Bullock spent the week in Saginaw with her brother, Mrs. Elizabeth Wesendorf, who spent several weeks in Detroit, returned home.

Mr. and Mrs. James Hughes and children of Lansing spent the week end in the city with relatives.

Mrs. D. Rush left Saturday for Detroit, where she will spend a few weeks.

Mrs. Roual LaBerge and daughter, Margaret Ann, spent Saturday in Bay City.

Mrs. G. Bergevin and children spent the week end in Bay City with relatives.

Miss Ruth Muskin spent the week end in Grand Rapids with her parents.

Mr. and Mrs. Owen Hales were called to Saginaw owing to the death of a friend.

### Notice

I am leaving in two weeks for Buffalo for the winter. Anyone wishing permanent before I leave please call 235-F2 for appointment. Miss Delta Leslie will have charge of the shop during the winter months.

Leaone Brabant.

## News Review of Current Events the World Over

### William Green Gloomy About Unemployment—Henry Ford Cheerful—Serious Charges Concerning Government of the Virgin Islands.

By EDWARD W. PICKARD  
© by Western Newspaper Union.

**W**ITH another winter at hand and millions of Americans still unemployed, organized labor, through President William Green of the American Federation of Labor, has asked the administration to appeal to all industries to increase production 30 per cent. Mr. Green in a public statement asserted that for the first time since President Roosevelt's re-employment program got under way in July, 1933, unemployment has exceeded last year's level. The number of persons without any employment he puts at 8,348,000. Those without jobs in industry in September numbered 10,951,000. Jobs for 2,220,000 were provided by conservation camps and emergency relief projects, "but these emergency jobs," he said, "are not creating incomes to pay the costs."

Mr. Green continued: "Could not the administration invite all industries to cooperate in a general program to increase production and put men to work?"

"If the nation-wide level of all production were lifted 30 per cent in a balanced program, adjusting production to consumption needs, each industry would then be assured that all other industries would increase their production, and the wealth produced by putting labor to work would create income to buy the product of all."

"The total number at work in the United States was 39,764,000 in September, 1933; by September, 1934, it had declined to 39,367,000. During these 12 months the normal increase in population has added close to 450,000 to the army of job seekers for whom industry provides no work. Thus the number without work in industry has risen from 10,108,000 in September, 1933, to 10,951,000 in September, 1934."

Quite as gloomy as Mr. Green's report was a statement of the National Industrial Conference board. This agency noted that the general improvement in manufacturing activity usually occurring in September failed to materialize. Instead, declines of 5.7 per cent in the number of wage earners employed, of 6.1 per cent in total man hours worked and of 5.8 per cent in payrolls disbursed, were reported. In addition, it was stated, the rise in the cost of living from August to September depressed real weekly earnings of wage earners 2.1 per cent.

On the other hand, the United States Chamber of Commerce in its summary of conditions throughout the nation reports continued improvement of business sentiment although it has not as yet been reflected definitely in the volume of transactions.

**M**ANY thoughtful persons comment on the apparent discrepancy between the pleas of William Green for more employment and the policy pursued by organized labor in fostering great strikes seemingly for the sole purpose of enforcing unionization and the closed shop. Many thousands of persons are thrown out of employment by these strikes, industries are hampered or shut down and often serious disorders result. To the bystander it does not seem fair that, in a time of distress, such methods should be followed in order that the strength of the unions might be increased. The latest example of this policy is the strikes which brought about the closing of all the Great Atlantic and Pacific Tea company's shops and warehouses in Cleveland and which went into effect in Milwaukee against the A. and P. and two other chain store companies. There was a prospect that these walkouts would spread throughout Ohio and Wisconsin.

**HENRY FORD**, who says that what is done in Washington doesn't matter much so far as recovery is concerned, came out with a statement that should be encouraging to the American business man. He told the Ford managers gathered in Detroit that his company was out of the depression, and they in turn told him of generally improved business conditions in all parts of the country.

"The depression," Henry Ford stated, "would be over for the whole country very soon if American industrialists would just forget the alphabet schemes and take hold of their industries and run them with good, sound American business sense."

"They should take hold of their country, too, in the same way, and run it with good sound American common sense."

**SPEEDY** ruling by the United States Supreme court on constitutionality of the NRA act and the code of fair competition for the lumber and timber products industry may be expected. Judge W. I. Grubb of the Federal District court at Birmingham, Ala., has

ruled them unconstitutional and dismissed an indictment against an operator of several sawmills. The action was taken by agreement of both sides so as to expedite an appeal to the Supreme court.

**PRESIDENT ROOSEVELT** announced that, beginning July 1, 1935, he will eliminate the 5 per cent pay cut that is now taken out of the salaries of all federal employees. The pay restoration, he explained, is being planned on the assumption that increases in the cost of living will necessitate it.

The Treasury department thereupon admitted frankly that this means the taxpayers will be called on to pay an additional fifty million dollars a year for the benefit of the 700,000 federal employees who will benefit by the restoration in salaries.

Mr. Roosevelt predicted flatly that the cost of living will advance substantially within the next eight months. When he made this statement at his regular press conference he also cautioned reporters to remember that an increase in the cost of living meant an increase in commodity and property values, thereby lessening the difficulty in paying debts. This is one of the avowed aims of the Roosevelt program.

He said he expected the rise of food, clothing, fuel, housing, and other living costs to be large enough by next July 1 to justify the 5 per cent restoration.

**D. R. ERNEST GRUENING**, chief of the bureau of territories and insular affairs, has gone rather hurriedly to the Virgin Islands to make a personal investigation into a state of affairs that has led to the filing of serious charges before committees of both houses of congress. In a petition for a congressional inquiry, Paul C. Yates, who recently resigned as executive assistant to Gov. Paul M. Pearson, charges that the present administration of the islands is "wasteful, extravagant, inefficient, and tainted with corruption."

Yates was recently suspended and ordered to Washington for an inquiry by Secretary Ickes, who accused him of "disloyalty, insubordination, and gross inefficiency," and in general of being a trouble maker. Yates resigned immediately and came to Washington, but chose to ignore Secretary Ickes' office, carrying his complaints instead directly to congress.

He charges that Mr. Ickes has been "outrageously deceived" by Governor Pearson and subordinate officials of the Interior department, has ignored "complaints, petitions, and specific charges" presented by the citizens of the islands, and has dealt with officials "in a peculiarly harsh, cruel, and dictatorial manner."

The petition further charges that minor officials in the Interior department aided and abetted Governor Pearson to "whitewash a major public works scandal and deceived the secretary of the Interior regarding public works and the general situation, and were criminally negligent in the performance of their duty."

Secretary Ickes is accused of making prejudicial and injurious remarks about T. Webber Wilson, judge of the Federal District court in the islands, remarks which "reflect unjustly upon the federal judiciary and which are unbecoming the dignity of a cabinet officer." Ickes also is accused of "unjustly and at the instance of Governor Pearson," having removed from office Charles H. Gibson and Eli Baer, government attorneys, and Capt. Michael J. Nolan, director of police of St. Thomas and St. John, with a record of 14 years' "loyal and efficient service."

**C**ONVERSATIONS in London preparatory to the scheduled naval conference have been quite unsatisfactory so far, for neither the United States nor Great Britain shows any disposition to accord to Japan the equality that nation demands, even though it is merely in principle with the Japanese agreeing not to build up to parity with them. Well-posted observers do not believe the conference will accomplish anything valuable, and Secretary of the Navy Claude A. Swanson says that, regardless of its outcome, his department plans to bring the American fleet up to full treaty strength and will ask congress for the necessary appropriations.

Additional maritime strength was urged before the federal aviation commission. Lieut. Com. C. E. Rosendahl, former commander of the airships Los Angeles and Akron, advised the construction of two military dirigibles to protect aerial trade routes. Secretary Swanson said this proposal is under consideration in the Navy department. The United States is now 136,975 tons of war craft behind treaty strength. This represents one aircraft carrier, two class B cruisers, 61 destroyers, and 24 submarines, the department disclosed.

**C**HICAGO'S magnificent World's fair is no more. It closed formally and forever at midnight, October 31, amid a riot of gaiety and with a final burst of fireworks, and the vast throng of last-day visitors left the grounds with a feeling of sadness. Mayor Kelly had proclaimed a half-holiday and thousands upon thousands of Chicagoans joined with the crowds that had come from elsewhere to celebrate the windup of this most notable exposition. After artillery salutes and parades, the final ceremonies were staged in the Court of States with Governor Horner, Mayor Kelly and President Rufus Dawes of the exposition as speakers. Exactly at midnight Mr. Dawes threw a switch that shut off all lights on the grounds and set off a gigantic fireworks display. This was not quite the end, however, for the lights were turned on again and, though no one was admitted after midnight, the Halloween carnival continued until three o'clock in the morning. Then the lights went out forever.

**KING PRAJADHIPOK** of Siam is not satisfied with his present status as a limited monarch and has threatened to abdicate unless the government withdraws a measure proposed in the national assembly which deprives him of his traditional right to decide whether persons sentenced to death for crimes shall live or die. This, of course, is but one of the distasteful limitations prescribed by the national assembly since the revolution of 1932 which forced the king to give the country a new constitution. There is no revolution in this case, for the people of Siam generally know nothing about the dispute between the king and the government.

Prajadhipok is at present in England with his queen, and the negotiations are carried on by cable. His majesty's secretary there said the king's fight was really a fight for the principles of democratic government and that he would not give in. The secretary explained that half the members of the Siamese legislative assembly are elected directly by the people, and the other half nominated by the government, with his majesty placing "great importance upon the attitude of the elected members," who Prajadhipok claims opposed the measure relating to life and death prerogatives.

**M**EXICAN governments, both federal and state, are carrying on a determined campaign against the Roman Catholic church, charging that the latter has been fostering a revolutionary movement. On the other hand, a vigorous denial that the Catholic church had advocated armed resistance to the Mexican government or intervention by the United States in the religious conflict in Mexico was issued by Archbishop Ruiz, the Apostolic delegate to Mexico, in San Antonio, Texas. Bishops and priests are being expelled from various states, and the state of Mexico issued an order limiting the number of churches in the region in which services may be held to 34, the same as the number of priests permitted to officiate in the state. All churches above this number, the decree provided, will be used as schools and public libraries. The action was believed to have been taken to prevent priests ousted from other states from coming to the state of Mexico to officiate.

The Supreme court ruled that all buildings used for Catholic ceremonies shall become the property of the nation. Acting President Rodriguez in a letter to Attorney General Portes Gil said the clergy, on pretext of opposing the initiation of compulsory socialistic education in Mexico's schools, has "incited a frank campaign of sedition which reveals clearly its intention to bring about a revolution."

**C**HANCELLOR HITLER has realized the danger to his regime in the revolt of the Evangelical Protestant pastors against the tyrannical rule of Reichsbishop Mueller, and has decided to separate church and state. The government of the reich, he said, would not interfere in the quarrel. Some observers in Berlin expressed the fear that this policy would lead to unrestrained growth of German paganism and also to further acts against the Jews, under the leadership of Dr. Alfred Rosenberg, philosopher, and Julius Streicher, publisher of the Stormer, heads respectively of the pagan faith and the anti-Semitic movements.

Acceptance of Chancellor Hitler's new constitution for the German Labor Front, which gives the Labor Front money and property which once belonged to trade unions and employers' associations, was celebrated in 16,000 demonstrations throughout Germany. The biggest was in Lustgarten, Berlin, where over 850,000 were assembled. The Labor Front includes all laborers and office workers.

**B**OTH France and Germany are worried over prospects of trouble in the Saar, where a plebiscite is to be held January 13, 1935, to determine whether the region shall revert to Germany, be attached to France or remain under the control of the League of Nations. The Nazi campaign in the Saar has been active and large numbers of Storm Troopers are said to have entered the region in disguise. Geoffrey K. Knox, president of the governing commission for the league, has warned that in case of difficulties during the plebiscite he will call for the help of French troops. Foreign Minister Pierre Laval says the French will be ready to respond. The German Nazis are correspondingly irate. There is reason for anxiety.

## Indians Spurn All Beads but Those Made in Italy

### Red Folk Are Very Particular About Quality.

New York.—For generations Italy has been supplying the American Indian with beads employed in the decoration of his apparel and his horse gear, to the exclusion of the products of any other nation. The red folk will buy nothing that isn't up to their own standard of quality, and, thus far, no people, save the Italians, have been able to meet this demand.

Just how American manufacturers have managed to neglect this field of production is yet to be explained, but the fact remains that they don't count at all in the competition for the Indians' trade, and, in point of fact, Czechoslovakia is the only other country which has attempted, without success, however, to "horn in."

Right in New York is the center of this bead importation for the whole aboriginal population of America, and from the wholesale district her consignments of these tiny decorative globules are dispatched almost daily to trading posts all over the West and to a considerable extent to the remaining Amerind communities of the East, such as the New York State Indians, the Seminoles of Florida and the little groups in Maine.

#### Tribal Taste Varies.

According to tribal taste the size and colorations of the beads vary, but whether the eventual output of the Indians' industry is moccasins, war bonnets, war shirts, knife and tomahawk sheaths, belts, leggings, rifle slings, or papoose carriers, the beads themselves are Italian, made for the most part in the neighborhood of Milan and from there shipped to New York via Venice.

Dan Frost, sole proprietor of S. A. Frost's Son, in Howard street, explains that the buying of the Indians' supplies of beads requires a complete knowledge of the taste of the various tribes. "Alaskan Indians, for example," he said, "buy the smallest beads manufactured. Eastward from that territory slightly larger beads are preferred. None of them, however, are large, for the delicacy of the designs most generally requires the use of quite tiny beads. But every Indian tribe has some variation of taste, either as to size or color, in the beads they acquire for their industry. They are disposed to use the more delicate and exquisite for the things they make for themselves as compared with the things they make for sale, but they maintain a pretty even standard in the matter of demand at that."

#### Forty Shades Are Used.

Difference in the size of the beads is not the only test of Indian taste, according to Mr. Frost. Some of the tribesmen want clear glass beads,

whereas the larger demand is for those of the opaque type.

The color range is wide, about forty different shades of glass beads being sold here with all the rainbow colors and many variant tints based upon the seven shades of the spectrum. The largest demand for beads centers upon the opaque white variety.

"Of course," Mr. Frost resumed, "the latter-day Indian makes no beads of his own. He uses porcupine quills, dyed and sewn in intricate designs, for some of the decorations on his apparel, or other gear, and there are horn and bone and feather embellishments to his ceremonial dress. But it is a remarkable, and to me unexplained, fact that the Indian in distant centuries possessed beads and used them. Whence they came I do not

## And He Calls Himself a Hermit

"I feel 50 years younger already," declared Dad Jowett, seventy-five-year-old World War veteran of Jackass Mountain, Ore. He had gone to Miami, Fla., for the sixteenth national convention of the American Legion. He is a self-styled hermit up Oregon way but lost his status when Paula Roberts and Frances Jones, local bathing beauties, came out to greet him. "This must be the fountain of youth," said Jowett.

## Wife Rents Her Husband From His Mother

### Many Strange Marriage Customs Among Malay Tribes.

San Francisco.—In Minangkabau a wife rents a husband from his mother—and he is only permitted to see her secretly and at night.

In the Batak tribes, next door neighbors, the husband buys the wife outright and neither appears in public until their first child is born.

While in Mentawai, wives do the heavy work and no man marries until his children are able to support him satisfactorily, in the style to which he is accustomed.

These and other customs among the Malay tribes were discovered by Dr. Edwin M. Loeb, University of California anthropologist, who has returned here after five months spent among the natives.

Among the henpecked husbands of Minangkabau, Doctor Loeb found divorce exceedingly simple. The wife simply was not in her room when the

loverlike husband crawled through the window in the dead of night.

In the Batak tribes, however, divorce is unknown. Wives cost too much to be divorced no matter how naughty they may behave. Only if a wife bears no children is she freed from her husband, who is furnished with a new one by the family with no deduction for the trade-in.

The practice of remaining single until his children grow up follows the Mentawai men's stubborn aversion to labor. If a man married before his children were grown, he might have to toil. To avoid this, he eschews the nuptials, leaving the children with their mother's family until they can earn a fair living for him.

Cannibalism was practiced among the Bataks until the Dutch took over the country in 1860, Doctor Loeb reported.

Any enemy of the tribe, be he thief, traitor, or other type of miscreant, was tied to a stake. Then the other members of the tribe danced about him, slicing off strips and eating them.

This practice, Doctor Loeb added, was considered quite humiliating to the victim's relatives.

## COUGAR QUARTERBACK

Boyce Magness, who hails from Texas, is quarterback of the Washington State college team at Pullman, Wash.

## Signal System Is Used in Postal Spy Galleries

Kansas City, Mo.—A new signaling device for the 48 lookout galleries of the new post office here resembles an airport on a dark night.

Small red lights glow in the unlighted corridors, indicating plug-in points for hand telephones carried by inspectors when they enter the galleries for observance of postal employees at work.

By telephone the inspector can communicate with the central office when he sees anything amiss in the handling of the mail.

The galleries are connected by secret corridors. The entire system covers two miles.

## Minors Need No Permit to Wed in Washington

Wenatchee, Wash.—Marriage between minors, without parental permission, is valid in Washington. Common-law marriages are still permissible.

The state never has, by law, raised the common-law female age from twelve to eighteen and the male age from fourteen to twenty-one.

These and other revelations brought out in an annual case here recently probably will turn the legislature's ac-

## A "Smith" Is Born Every 11 Minutes

Glasgow.—A man named Smith who has retired from the army and is living in Glasgow with a lot of time on his hands, has devised the agreeable pastime of counting all the other Smiths there are in the world, the net of it being that on December 26 last, the figure was 12,635,005. This presumably included all the national variations like Schmidt and Smythe, and figures out to the effect that there is a Smith born every 11 minutes.

know. There were bead designs on the costumes of the Peruvian Incas and the Aztecs. In the burial mounds beside the Mississippi there have dug up remains of buried heroes, laid to rest long before De Soto ever saw the river, that wore on their last journey garments embellished with beads similar to those sold today."

### HOW TO SHOOT

By Bob Nichols  
Shooting Editor, Field and Stream

**S**OME upland gunners become good shots in spite of the fact that their guns do not fit them. What happens in their case is that through years of practice they fit themselves to their badly fitting guns. This makes learning a slower process. They would become better shots in shorter time if they began with a gun that fitted them.

If you already have a shotgun, here is an interesting test you can make to see how near it comes to fitting you: Get about half a dozen sheets of dark colored paper. Black building paper such as is used in the walls of frame dwellings is excellent for the purpose. The sheets should be about three feet square.

Select a site for your testing ground that has an absolutely safe background. You are going to make your test at night. The darker the night the better for your purpose. But you must make sure that no living thing will be endangered by your test shooting.

Against this safe background you now set up a light framework for your target sheets. Two 2 by 4's about six feet long may be driven into the ground about 30 inches apart. Drive them in just so that they make a secure support.

Now take a tin can, and cut a hole in its side about 1½ inches in diameter and near the bottom. Attach to the top edge of the tin can two pieces of wire, long enough to suspend the can from each 2 by 4 so that the hole in the can hangs directly behind the center of the black target sheet when it has been tacked lightly to the 2 by 4 posts.

Cut a small hole in the center of the target sheet, so that when you place a small bit of lighted candle in the bottom of the can the light will shine through. And this tiny spot of light is all that you should see when you stand back about 15 yards, gun in hand, ready to make your test.

The night must be so dark, and the candle light must be so dim that you are quite unable to see your gun barrel. For your test shots must not be aimed consciously. They must be pointed instinctively.

In making the test, place only one shell in your gun. Bring your gun to shoulder deliberately and fire quickly. Keep your eyes intently on the small spot of light. Your eyes will guide your hands. Remember that the object is not to hit the center of the target consciously. What you are really after is to see whether your gun fits you well-enough so that in your hands it points on the target unconsciously and instinctively.

After your first shot, go up and tack on another target. Shoot three targets before examining the results too closely. If you are conducting the test correctly, all three shots should strike in approximately the same sector on your targets.

If the shots show a tendency to be under the "bull's-eye" your gun has too much drop at the heel of the stock, or too much pitch downward at the barrel. Or both faults may be present. Unscrew the butt-plate and try a couple more shots with the gun this way. The usual butt-plate adds somewhat to the gun's pitch.

If your first three shots are over the "bull's-eye" then it is probable that your gun-stock is too straight and has too little drop at the heel. Or it may be that the comb is a trifle too high to suit you. Or again, it may mean that you are raising your head as you shoot—a bad habit that will always make one over-shoot. But if your gun shoots only a trifling two or three inches directly above the "bull's-eye"—let it alone. An upland gun should shoot this way to help catch up with the rise of the flushed bird.

If your gun shoots regularly to the left, your stock may be too long, or you may be holding out too far on the barrel. If to the right, your stock may be too short or you may be holding in too far on the barrel. Try it!

© Western Newspaper Union.

## Wild Zoo Animals Would Make for Trees if Loose

What would happen if a zoo's entire collection of several thousand wild animals were suddenly set free in the midst of a metropolitan city? Except for the hysterical frenzy of the population when the news became current, nothing much would happen, according to Edmund Heller, director of the Milwaukee Washington park zoo.

The great man-eating tigers and lions would be the first to make for the bushes and trees. Unless they were cornered, they would probably not attack human beings. They would be the most dangerous of adversaries, but the instinct of caution, without which they would have long ago been exterminated, would prevent them from seeking out as prey a creature whose killing power they have long had reason to fear.

## Bird That Dodges Bullets

One of the most common of local aquatic birds is the grebe, often called hill-diver. There is hardly an inland lake in the state that doesn't harbor at least one family of grebes during the summer season, writes a correspondent in the Detroit News. This is the bird that is able to dodge bullets if it happens to be watching the hunter, and for speed and quickness in diving it is in a class of its own.

## Makes Hard Promise

Provo, Utah.—School Attendance Officer T. W. Dyches has given himself a tough job. He has tentatively promised that every school child in his district will be to school on time every day during the school year.

# OREGON

Prospecting for Gold in an Oregon Back Yard.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

No hundred years ago, a Methodist minister, Jason Lee, Bible in one hand and rifle in the other, plodded through the Willamette river valley and made the first mission settlement that was the beginning of the state of Oregon. Others had visited the territory but historians aver that Lee was the first to vision the region he settled as a future state.

Discovery of Oregon came first by sea. But for nearly three centuries the wild and dangerous aspect of the mountainous coast held at bay the navigators of five nations who sighted it. Spaniards, Russians, Englishmen, Frenchmen, and then Americans searched vainly for the fabled "River of the West" that legend said flowed through this coastal mountain barrier into the sun-down sea.

It remained for a Yankee skipper, Robert Gray of Boston, seeking a cargo of furs for the China trade, to find and cross the breaking bar of the mighty river in 1792. He named the river for his ship, the Columbia.

Captain Gray, who traded a chisel for 200 otter skins, probably did not sense the river's destiny in the clutter of his plunging anchor chains. After establishing this claim to the River of the West for the infant American Republic, he continued to stoke his hatches with fur, and sailed for the marts of Canton. But the barrier was broken, and the Columbia became the wilderness highway through Indian Oregon.

In the exploration by land that followed, Lewis and Clark led the way across the continent in search of the headwaters of the Columbia, 13 years after Gray had entered its mouth. Close in their moccasin trails followed fur traders and trappers of two nations, competing for control of this stream that drains an area of 259,000 square miles, taps the snow beds of the Yellowstone and the Saskatchewan, and provides the only sea level passage through the lofty Cascade Range to the Pacific ocean.

## Over the Oregon Trail.

For more than a generation Columbian waters echoed to the buoyant songs of the fur brigades before the first covered wagon, hauling an ironed plow, rumbled westward. Then, beginning in 1843, throngs of men, women, and children trekked over the perilous Old Oregon Trail from the Missouri.

Covered wagons, stretching as far as the eye could see, rumbled their toilsome course toward the Columbia, carrying pioneer families into a tragic struggle with stinking death. The old Emigrant road is strewn with unmarked graves. In 1852 several thousand persons died from cholera alone. This western migration of home builders, bearing the elemental beginnings of empire on their wagon beds, created, by the things they did, a heritage of spirit that runs through the years and the generations of people.

The goal of this 2,000 mile trek was the fabulous Eden of the Willamette valley.

Here, near the junction of the Willamette and Columbia rivers, the building of Portland into one of the world's major inland seaports and the peopling of its enormous domain mark an American epoch.

People once considered the city's distance of 100 miles from the sea a disadvantage, but this location has been a major factor in its growth.

Improvements in the natural sea lane provided by the Columbia river have brought the ocean liner to the threshold of a rich and productive area, and to the center of industrial production at Portland. Mountain and valley contours that dip portions of several states into the Columbia basin give easy grade to cargoes of golden grain, wool, lumber, and fruits that pour through the gorge into the city's huge terminals and manufacturing plants.

In pioneer days the Willamette valley was the meeting place of two currents, the border Missourians, who came by the plains, and the so-called "Boston men," who arrived by sea. This vanguard of empire was marooned for a generation, until the railroad was built. Portland's fine schools, its symphony orchestra and its junior symphony orchestra, and its patronage of the arts reflect the New England ancestry, while the city's hospitality reveals the influence of the southern strain.

From Portland, the broad and populous Willamette valley extends south for 150 miles between the Cascade and coast ranges, containing, in only

about 14 per cent of the area, 64 per cent of Oregon's population. Agriculture is concentrated on either bank of the river in a belt five to ten miles wide.

The highway above the canyon furnishes an excellent vantage point from which to watch the spray from the horseshoe-shaped Willamette falls rising to mingle with the blue smoke of the woolen, pulp, and paper mills that its thundering waters operate on either bank. These falls have long been famous for their salmon fisheries.

Above this lava obstruction the Willamette valley for 135 miles to the south has been filled with silt, forming a broad, alluvial valley floor. This floor is 100 feet higher than it would be without this natural dam; hence the streams that flow into the Willamette from the bordering Cascade and coast ranges deploy upon the plain and form a natural irrigation system for the valley.

Many communities have concentrated in the production of one crop, such as loganberries, strawberries, cherries, prunes, and celery. Most of this produce moves direct to more than 50 canneries located in the valley; some is shipped to distant markets.

## Champoeg and Salem.

Twenty-seven miles north of Salem is Champoeg, the "Plymouth Rock" of Oregon. Here, on May 2, 1843, pioneers organized the first American civil government in the Northwest—an event which, during the dispute with Great Britain, helped to save Oregon for the United States.

Salem, hub city of the Willamette valley and capital of the state, lying 52 miles south of Portland, is the center of the largest hop-growing area in the United States, and is also one of Oregon's largest fruit-canning centers. With a climate similar to that of Ireland and portions of Belgium and France where flax is grown, Salem has made a persistent effort to establish a linen industry.

To obtain a better view of the valley, one may climb into the lofty copper dome of the state capitol, overlooking the city, more distant hop fields, and red orchard hills.

A stone's throw across the street are the historic buildings and campus of Willamette university, the oldest educational institution in Oregon. Newberg, McMinnville, Albany, and Forest Grove have similar institutions, monuments to pioneer days, when religious sects founded academies and small colleges almost before they were settled on the land.

Both the Oregon State Agricultural college at Corvallis, and the State university at Eugene, are surrounded by green-shaded campuses that are veritable garden spots in this beautiful valley.

## Douglas Fir and Cedar.

Although flanked by vast resources of Douglas fir, the Coos bay region is noted for its Port Orford cedar. These valuable forests reach south to the Rogue river, in a belt rarely more than 40 miles wide, growing amid protecting firs.

The Japanese flag waves in and out of Coos bay over the stern of vessels carrying Orford cedar logs and squares to Japan for house construction.

All the verdant richness of spring seems to be blowing landward on the moisture-laden sea winds. For miles the Oregon Coast highway runs through arcades of rhododendrons. In February, trilliums, shootingstars, ladyslippers, pink, fragrant calypso, and the fawn lilies bloom under the firs in the vast forests.

North from Tillamook bay for 35 miles one drives through rich pastoral valleys devoted almost exclusively to the production of Tillamook cheese. Factories of the farmers' association dot the valley floor along the highway, using altogether about a hundred tons of milk daily in the production of a standardized product. Each community builds its own factory and keeps its own books, but the expenses of the buying and selling organization are pooled and prorated according to the number of pounds of cheese produced.

About Astoria, at the mouth of the Columbia, much of the early history of Oregon is woven. To the south, across Youngs bay, Lewis and Clark wintered in 1805-06 at Fort Clatsop. The Pacific Fur company started, 204 years after Jamestown was founded, to erect the fort, which became the nucleus of the first American settlement in the Columbia valley. It took four men two or three days to cut down one of the lofty firs.

## SHORTENED HER VISIT

"For goodness sake, Bobby, why are you offering me that oil can?" asked the old aunt, who had settled down for a long stay.

"Well," explained the kid, "daddy said that squeaky voice of your nearly drove him nuts, and I thought maybe it would quit squeaking if you oiled it."

**Daytime Is Night Time**  
Little Joan had heard her older brother discussing the difference in time to be noted between one side of the world and that on the opposite side. Joan was very much impressed and rushed in to her mother and exclaimed excitedly:

"Oh, mother, did you know that in China when it's day time it's night time and when it's night time, it's day time?"—Indianapolis News.

**Couldn't Use Nickel**  
Joan A. of Greencastle was all ready to start Sunday school and asked her father for a penny for the collection box. Unable to find any pennies in change her father offered her a nickel instead. This was indignantly refused.

"Them don't want nickels," she said hotly, "them only wants pennies!"—Indianapolis News.

**Paying Off a Substitute**  
The family knew that Junior had something on his mind—that look boys have when they have a serious problem confronting them. Finally it came out.

"Dad, gimme a quarter, will ya?" Junior pleaded.

"What do you want a quarter for?"

"Well, I promised a guy a quarter if he'd lick another kid for me!"

**Get Ambitious**  
"Where's old Bill been lately? I haven't seen him for months."

"What? Haven't you 'eard? He's got three years for stealin' a car."

"What did he want to steal a car for? Why didn't he buy one an' not pay for it like a gentleman?"—Stray Bits.

**AFTER THE SERIES**  
"You seem to be sticking very close to business these days."

"I need the relaxation. The baseball season is a terrible strain on a man."

**Leadership**  
"You are accused of being a political boss of Crimson Gulch," said the reformer.

"The reputation for power is the basis of leadership," answered Cactus Joe. "What you refer to as an accusation I regard as one of my credentials."

**Force of Habit**  
Corporal—The new recruit used to be a clerk.

Sergeant—How do you know?

Corporal—Every time he stands at ease he tries to put his rifle behind his ear.—Fredrick Gleaner.

**He Knew**  
The teacher asked whether anyone could give her a good definition of toast. Only one hand went up.

"All right, John, you tell us about toast."

"Toast," said John confidently, "is burnt bread scraped."

**Keeps His Word**  
Tenant—I'm sorry I can't pay my rent this week.

Landlord—But you said that last week and the week before.

Tenant—Yes, and didn't I keep my word?

**Sad Parting**  
Wife (after tiff)—You brute! I'm going to get the baby and go to mother's.

Husband—Yes, and I'm going to get the jewelry and go to uncle's.

## Charming Design, and "Tubs" Well

PATTERN 9937  
Here is a design that was born to make laundresses happy. One can see them with the mind's eye smiling "friendly-like" at it every time it is tubbed. The little sash will be untied, and first they will iron the ruffles. After that it will be plain sailing—or should we say ironing? In our concentration upon laundresses, we have forgotten to mention the proud possessors of the frock who will one and all adore it because, in the first place, it was

so easy to make—and ever afterward so smart and becoming to wear.

Pattern 9937 may be ordered only in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40, 42 and 44. Size 16 requires 3 3/4 yards 36 inch fabric.

Complete diagrammed sew chart included.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth Street, New York, N. Y.

**A REGULAR TRADE**  
Prison Governor (to released convict)—I'm sorry. I find we have kept you here a week too long.

Convict—That's all right, sir. Knock it off next time.—Louisville Times.

**Up-to-Date**  
"That Miss Blonde is much older than I thought," remarked a young man to his friend in the boarding house.

"What makes you think that?" asked his friend.

"Well," he replied, "I asked her if she had read Homer's 'Iliad,' and she said she read it when it first came out."—Stray Stories.

**A True Trader**  
"Have you any objection to government ownership?"

"None at all," answered Mr. Dustin Stax. "I'd rather enjoy getting the government into the market so that I can sell to it when values are high and buy back when they go down."

**Not Worth It**  
Mazie (showing photograph)—This is my new boy friend—he's in the lost property office.

Madge—Hm! I shouldn't trouble to reclaim him if I were you.—London Answers.

**And Weren't Playing**  
Dentist—Have you seen any small boys ring my bell and run away?

Policeman—They weren't small boys—they were grown-ups!—Humorist.

**Helping Out**  
Mistress—You eat twice as much as my last maid.

New Maid—Yes, but to make up for it I shall only stay half as long.—Jugend.

## CERTAINLY

First Stenographer—There is no sentiment in business.

Second Stenographer—I think you are mistaken. My experience with business men is that they all love the profits.

## TOLL THE BELL

"Your playing certainly does it. But what a death!"

## THAT'S DIFFERENT

Gentleman of Leisure—I shall be happy to take it in that form, sir.

## ADVICE

## MAYBE LESS

# The Tawas Herald

Established in 1884  
Published every Friday and entered  
at the Tawas City Postoffice as  
second class matter

P. N. THORNTON, Publisher

## LONG LAKE

A. M. Hicks and daughter, Florence, were callers in Tawas City on Monday.

The Davis family has moved into its new home on Main street. Robt. Buck attended a young people's meeting at Twining last Friday evening.

Fred Kruse is installing a fee mill in part of the old depot. A number of people will be attending election at Hale on Tuesday.

Mr. and Mrs. Haugh of Pontiac are visiting Mr. and Mrs. Anthony. Mr. and Mrs. Schloss of Detroit are spending a few days with the Hicks family.

Mr. and Mrs. J. D. Dyer and Mr. and Mrs. J. S. Dyer are traveling across the Straits in their house car for a few weeks' hunting.

James Dugan of Long Lake has taken over the management of the Graceland Ballroom.

Mr. and Mrs. Curry of Bay City and son, Manning, of West Branch were visitors at their cottage here Sunday.

Mr. and Mrs. Lewis LaBerge journeyed to West Branch and East Tawas Monday of last week.

Miss Margaret LaBerge, who has been visiting relatives in Midland, is expected home this week.

Miss Olive Streeter was a guest at the home of Miss Lillian Schroeder of Melvor on Thursday.

Mr. Pellett of Flint had guests at his cottage this week.

## Growing Pineapples

Pineapples will not grow where the frost bites.

Leopards, lions, tigers, panthers and animals were kept awake for seven nights. The animals kept awake the next night several droppings fell. The third night still more fell to sleep. At last on the seventh night, only the owl, the panther and a very few of the animals still were awake. Therefore these have the power to see and move about in the dark. Even the trees went to sleep. Only the cedars, the pine, the spruce, the holly and laurel were awake all seven nights. For that reason they are always green.—The Earth.

## "The Place of Killing"

Bulawayo, largest town in Rhodesia, South Africa. Literally translated means "the place of killing." The famous Indaba tree, under which judgment was so frequently rendered by Chief Masilikatse, still stands on the grounds of the government house. From the site may be seen the hills of Thabas Induna, where executions and timed suicides took place in accord with royal decree. Cecil Rhodes, whose unnamed statue stands in the main street, lies buried at his request amid the Matopos Hills, 27 miles from Bulawayo.

## Meaning of "Junket"

The word junket as often applied to congress was originally applied to a banquet, or a picnic or excursion with feasting but it has come to mean a trip at public expense by government officials to some distant post, territory or public works for the purpose, they claim, of investigating conduct or for inspection. Congressmen, especially, have been noted in the past for their junkets to distant regions flying the American flag.—Pathfinder Magazine.

Make your plans now to be at the annual Legion party November 12th at East Tawas.

## Hemlock

Mr. and Mrs. Harold Black and Mrs. Partlo of Reno spent Friday evening with Mr. and Mrs. Ralph Burt.

Mr. and Mrs. Clair Smith and son, Willard, of Flint visited from Sunday until Tuesday with his mother, Mrs. Reuben Smith, and other relatives.

Mr. and Mrs. Will Herriman and family were Sunday dinner guests of Mr. and Mrs. Ralph Burt.

Mr. and Mrs. Clarence Earl were Sunday visitors at the home of Mr. and Mrs. George Baker.

Orville Youngs and Allan Herriman spent the week end in Flint with Mr. and Mrs. Carl Youngs.

Mr. and Mrs. W. E. Coates entertained the following on Sunday: Mr. and Mrs. Sylvester Baldwin and Ben Speley of Grand Rapids, and Mr. and Mrs. W. H. Miller and daughter, Nancy Jane.

Mr. and Mrs. Raoul Herman of Oscoda spent the week end with the latter's parents, Mr. and Mrs. Chas. Brown.

Mr. and Mrs. Jas. Chambers returned home Friday night after spending four days in Midland at the Grange convention.

Mrs. N. C. Miller and daughters, Mrs. Lester Biggs and Miss Mabel Miller, Mrs. Amelia Bamberger and daughter, Mrs. Clifford Hayes, spent last Tuesday with Mrs. W. E. Smith at Mio.

Mr. and Mrs. Russell Binder spent Sunday with Mr. and Mrs. Chas. Brown.

Walter Miller was called back to work at Detroit Monday morning. Charles Miller accompanied him for a few days' visit with his aunt, Mrs. Doyle Johnson.

Mr. and Mrs. Ed. Youngs and Mrs. Minnie Green were Sunday dinner guests of Mr. and Mrs. John Bowen in Whittemore.

Mrs. Olive Davison and Mrs. A. Mallon of Tawas City and Mrs. Minnie Green were Saturday callers at the Mrs. R. Smith home.

Mr. and Mrs. Russell Binder spent Sunday evening with Mr. and Mrs. Ed. Youngs.

A few friends called on Mr. and Mrs. George Baker last Friday. The evening was spent playing pedro.

Mr. and Mrs. Hugo Marwinske of Tawas City helped John A. Miller celebrate his birthday.

On Saturday twenty ladies with baskets of chicken and other good things to eat gave Mrs. Reuben Smith a pleasant surprise, the occasion being her 71st birthday. A splendid time was enjoyed. Mrs. Smith was the recipient of a number of gifts. Upon returning to their homes the guests wished her many more happy birthdays.

Mr. and Mrs. E. Warner, who spent the past month in Ohio and in Minde City, Mich., returned home last Thursday.

Mr. and Mrs. Thomas Frockins of Reno spent Sunday with Mr. and Mrs. L. D. Watts.

Eleanor Coates has gone to Grand Rapids for a two weeks visit.

Mr. and Mrs. Clair Smith called on the former's sister Tuesday morning.

## Scarce Advice Combination

"For advice to do any good," said Uncle Eben, "dar has to be one man smart enough to give it and another smart enough to take it; which is a scarce combination."

## The Nutria

The nutria is a South American animal. In size it is between the muskrat and beaver and somewhat resembles both animals. At one time the pelts of these animals were in great demand at good prices.

## Young Otters Fear Water

Despite the fact that adult otters are so thoroughly at home in the water young otter cubs seem to be very much afraid of the water until they have been subjected to an aquatic education by their parents.

Fifty minutes continuous dancing to each hour at the Armistice party November 12th. adv

## Reno News

Alex McTice was taken to the Samaritan hospital, Bay City, last Saturday, where he underwent an operation for a ruptured stomach. We are wishing him a speedy recovery.

Sixteen Reno relatives and friends of Mrs. Arthur Latter motored to Curtisville Wednesday evening of last week and gave her a pleasant surprise with a Halloween party, the occasion being her birthday.

D. I. Pearsall was a caller at the Frockins home Monday evening.

Alex Robinson and Percy Crego were at Detroit during the week end.

Mr. and Mrs. Lloyd Johnson of Flint are rejoicing over the arrival of a 9½ pound baby boy born November 5. Mr. and Mrs. Johnson were former residents of Reno.

A. T. Vary was a business visitor at Detroit Wednesday.

Mr. and Mrs. Will White were Sunday evening visitors with Mr. and Mrs. Chas. Harsch.

Mrs. Josiah Robinson spent Sunday evening with Mr. and Mrs. Frockins.

Mr. and Mrs. Will White entertained the following at dinner Sunday: J. A. White and John Shaum of Flint, and Roy Leslie and Jack Miller of Whittemore.

Mr. and Mrs. Keen spent Tuesday evening at the White home.

Ed. Kocher and Mr. and Mrs. Lloyd Murray spent Tuesday evening at the Frockins home.

Thos. Frockins, Jr., spent Tuesday and Tuesday night with relatives and friends here.

Everybody and his brother got out to vote on Tuesday. The Republicans carried by a large majority.

Mr. and Mrs. Loren Wesenick and daughter, Phyllis, of Flint were week end visitors at his parental home.

Mr. and Mrs. Allan Burlew and Mr. and Mrs. George Burlew and daughter, Georgia, of Flint spent Saturday with Mr. and Mrs. Herman Wesenick.

Don't forget the Taft P.-T. A. meeting Wednesday evening, November 14th.

## Largest National Park

Jasper National park, on the western fringe of the province of Alberta, has the distinction of being the largest national park in the world. Its borders inclose 4,400 square miles of territory, all of it situated in the heart of the Canadian Rocky mountains.

## Notice of Mortgage Sale

Default having been made in the terms and conditions of payment of a certain mortgage dated July 19th, 1917, made and executed by Mabel M. Colvin of Burleigh Township, Iosco County, Michigan, to J. C. Weinberg & Co. of Prescott, Michigan, and recorded in the office of the Register of Deeds of Iosco County, Michigan on the 23rd day of July, A. D. 1917, in liber 22 of mortgages on page 155, and assigned by assignment dated the 11th day of May, 1918, to the First National Bank of Bay City, said assignment being recorded in the office of the Register of Deeds of Iosco County, Michigan, on the 16th day of May, 1918, in liber 2 of assignments on page 234, and again assigned to the National Bank of Bay City, a Federal Banking Corporation, by assignment dated October 24th, 1932 and recorded in the office of the Register of Deeds of Iosco County, Michigan, on October 28th, 1932 in liber 25 of mortgages on page 174. There is now claimed to be due on said mortgage for principal and interest One Hundred Sixty-eight and 85/100 Dollars. And no suit or proceedings having been had to recover the amount claimed due or any part thereof, said mortgage will be foreclosed by a sale of the mortgaged premises, at public vendue, to the highest bidder, at the front door of the Court House in the City of Tawas City, Michigan, (that being the place where the Circuit Court for the County of Iosco is held) on Saturday, the 26th day of January, A. D. 1935, at eleven o'clock in the forenoon, eastern standard time. The premises are described in said mort-

gage as the east half of the east half of the northwest quarter of section twenty-two, township twenty-one north, range five east, Burleigh Township, Iosco County, Michigan.

Dated October 27th, 1934.  
The National Bank of Bay City, Assignee,  
By John Hoffman, Vice-President and Cashier.

B. J. Henderson,  
Attorney for Assignee,  
308-310 Shearer Building,  
Bay City, Michigan. 13-44

## Camels

About 80 camels were introduced into the United States in 1857-1858. These animals as beasts of burden in the deserts of southwestern United States was tested by a man from the Gulf of Mexico to the Pacific and back. It was considered that the experiment was successful. At the end of the Civil war the camels which still remained in the hands of the government were auctioned off at different times. It is believed that most of these eventually found their way into circuses or zoos.

## A Preserved Cathedral

The cathedral at York, England, has fared well in the preservation of its old glass. Every window in the nave and aisles, except four, retains its ancient glazing, the earliest in point of date being that of the Twelfth century.

## Strongest Odor

Musk, the world's strongest and most penetrating odor, is so powerful that when a man opens a musk-gland it frequently causes his nose to bleed.

## Bowing Low

In Persia the common form of greeting is the phrase, "I prostrate myself before you," the answer being, "I am already prostrated."

## Mortgage Sale

Whereas default has been made in the payment of the moneys secured by the mortgage executed by Elmer Streeter and Catherine N. Streeter, his wife, and in her own right, to the Rose City State Bank, a Banking Corporation of Rose City, Michigan, dated June Tenth, 1927, recorded in the office of the Register of Deeds for Iosco County, Michigan, on the 23rd day of June, A. D. 1927, in Liber 24 of Mortgages on page 377, and

Whereas the amount claimed to be due on said mortgage at the date of this notice for principal and interest is Five Hundred Eighteen and 49/100 (\$519.49) dollars and Twenty-five dollars as an attorney's fee stipulated for in said mortgage, and no suit having been instituted in law or in equity to recover the debt now remaining secured by said mortgage or any part thereof, whereby the power of sale contained in said mortgage has become operative,

Now, therefore, notice is hereby given that by virtue of said power of sale and in pursuance of the statute in such case made and provided I will foreclose the said mortgage by sale of the premises therein described at public auction to the highest bidder, at the front door of the Court House in the City of Tawas City, County of Iosco, State of Michigan, (that being the place of holding the Circuit Court for said County of Iosco) on the Fourth day of February, A. D. 1935, at ten o'clock in the forenoon, which said lands and premises are described as follows:

A piece of land in the Northwest Quarter (NW¼) of Northeast

Quarter (NE¼) (or Lot 2) of Section 6, Township Twenty-three North (23N) Range Five East (5E) described as commencing at center of Highway, 3 chains, 27 links, North 48 degrees East of intersection of center of Highway and East line of Right of Way of Detroit and Mackinac Railway, thence Northeast along center of Highway 5 rods, thence at right angles Northwest 9 rods, thence Southwest parallel with Highway 5 rods, thence Southeasterly 9 rods to place of beginning, County of Iosco, State of Michigan.

Dated: October 30, 1934.  
HARVEY A. CHAMBERLAIN,  
Receiver of the Rose City State Bank, Rose City, Mich.  
Melvin E. Orr,  
Attorney for the Receiver,  
West Branch, Michigan. 13-44

## Doom of the Mississippi

Steamboating on the Mississippi received its first setback in the general disruption of ordinary business caused by the Civil war. And it was just beginning to recover when more sinister opposition appeared in railroad competition and as the steamboats supplanted the old hand-propelled broad-horns and keel-boats of an earlier time, so the speedier railroads gradually took away all through river traffic and the great Mississippi packets were a thing of the past.

### Trained to Save Lives

First aid certificates were issued by the Red Cross last year to 130,972 persons who finished the course of instruction put on by the chapters. Included in this list were more than 70,000 foremen, time clerks and other key employees on Federal Civil Works projects. Further evidence of the government's endorsement of the first aid program is found in projects now under way where Red Cross chapters, at the request of the War Department, are giving first aid instruction in CCC camps. Where it has been requested by Army engineers the same instruction is also made available to key men working on federal water conservancy and flood control projects.

### War Veterans' Problems Increase

Last year American Red Cross chapters dealt with the problems of nearly 400,000 veterans and their families. The workers find that as the years go on their responsibility increases rather than decreases. Changes in legislation, the increasing age of veterans and the consequent increase in physical ills, bring new needs for sympathetic treatment by trained Red Cross workers. In addition to this service to veterans the Red Cross served as the official medium between the people and the men in military and naval service, giving aid through this service last year to 6,979 men in the army, navy and marine corps.

### Fires on Morro Castle and at Nome, Alaska, Received Help of Red Cross Workers

A number of tragic and unusual disasters have recently called for Red Cross relief. Included in them have been a flood in Kentucky, following a series of cloudbursts in August; epidemics of disease which threatened several sections, including some caused by drought conditions. Red Cross workers found much to do for the survivors of the Morro Castle fire and for those engaged in rescue work; and Red Cross relief went by airplane to Alaska when the famous old gold camp, Nome, burned in September.

Sure we will all be there for the Legion party November 12th at the Community Building. adv

### Ordinance No. 90

An ordinance to regulate the speed of motor vehicles on Bay Street, in the city of Tawas City. The council of the city of Tawas City ordains:

Section I. That from and after the date of the passage of this ordinance, it shall be unlawful for any person or persons to drive or operate any motor vehicle at a speed of more than twenty (20) miles per hour on Bay Street, between the intersection of Matthew street and Bay street and the intersection of First street and Bay street, said area on Bay street being hereby deemed to be a business section of the said city of Tawas City.

Section II. That from and after the date of the passage of this ordinance, it shall be unlawful for any person or persons to drive or operate any motor vehicle on Bay Street at a speed in excess of thirty-five (35) miles per hour.

Section III. Any person or persons convicted of violating the provisions of this ordinance, or any section thereof, shall be deemed guilty of committing a misdemeanor and subject to not more than one hundred dollars fine or not more than ninety days imprisonment in the county jail or both at the discretion of the court.

Section IV. This ordinance shall be enforced by the City Marshal or any state or county peace officer with jurisdiction within the city of Tawas City.

Section V. This ordinance shall be published once each week for three successive weeks in the Tawas Herald, a newspaper published in the city of Tawas City.

The foregoing ordinance was adopted and passed by the Common Council of the city of Tawas City at a regular meeting thereof held on the 5th day of November, 1934. 3-45 Will C. Davidson, Clerk.

Forget your troubles. Celebrate with the Legion November 12th at the Community Building. adv

**Currency Inflation**  
Currency inflation is disproportionate and relatively sharp and sudden increase in the quantity of money or credit or both, relative to the amount of exchange business, notes a writer in the Indianapolis News. Such increase may come as a result of unexpected addition to the supply of precious metals, or in times of business activity by expansion of credit through the banks. It may come in times of financial difficulty by government issues of paper money without adequate metallic reserve and without provision for conversion into standard metallic money on demand.

### Hale News

The Dorcas Society served dinner election day. The unusual interest manifested in the political situation this year brought out a large number of voters and Hale had a busy day Tuesday.

R. D. Brown, at the Omer hospital, is reported to be gaining a little this week.

Mr. and Mrs. J. H. Johnson were business visitors in Saginaw on Monday.

Mr. and Mrs. Joe Krutz returned to their home in Saginaw on Monday after a few days' visit in Hale.

Lutheran services will again be held at the town hall Sunday at 8:00 p. m. Three children are to be baptized at these services. So far all services have been well attended.

Mrs. A. E. Greve, superintendent of the Baptist Sunday school, Mrs. Petteys, assistant pastor, and a number of the Sunday school members were guests of the North school Sunday school last Sunday. A chicken dinner was served at noon, followed by the devotional exercises and Sabbath school hour.

Mr. and Mrs. Rader of Saginaw, who have rented the Brown hardware store, were business visitors in the village Wednesday. They will move to Hale next week to put their new business in operation.

Shirley Streeter entertained a number of her little friends at a Halloween masquerade party last Wednesday evening at the home of her parents, Mr. and Mrs. Forrest Streeter. Eva Glendon arrived in a "Bunny Rabbit" costume, Dorothy Johnson as the "Queen of Hearts," June Clayton as the proverbial stout lady with Eloise Chrevia her much devoted husband, Elmer Kruse as the clown, Austin Rahl and Ellsworth Bernard as two old maids, Olive Getchell in "Fortune Teller" costume, Izalda Streeter as a Spanish dancer, Leona and Helen Healy as "Twin Larkspurs," Ducky Grandprey as a movie star. Several others were masked but without costume. Shirley welcomed her guests in gypsy garb.

Mr. and Mrs. Otto Rahl attended Eastern Star chapter at Whittemore last Thursday evening.

The students of the Hale high school enjoyed a masquerade party at the M. E. church Halloween evening. Games were played and luncheon served.

Mr. and Mrs. Norman Staebler and family of Turner spent Saturday evening as the guests of Mr. and Mrs. Otto Rahl.

The Hale P. T. A. held its November meeting at the Kees school on Tuesday evening, November 6. A large crowd was present, and a very interesting program was presented by the members. The general topic for our meetings this year is the reading material for our boys and girls. The next meeting will be held at the Hale school Tuesday evening, December 4. All parents are urged to attend.

The Ladies Aid was entertained by Mrs. Edith Dorcey at her home for an all day meeting Wednesday of this week.

We are very glad to learn that William Allen is recovering nicely from the burns which he sustained in an accident recently. Mrs. Allen has been with him during his convalescence at the Samaritan hospital in Bay City.

**HALE BAPTIST CHURCH**  
Sunday School, 10:30; Preaching Service, 11:30.  
Birthday party, Mrs. Humphrey's, Monday evening, November 12.  
Prayer meeting, Wednesday evening, 8:00 o'clock.  
Guild Girls, Saturday, 2:00-4:00 p. m.

No party lines on democrats or republicans at the Legion party November 12th—just Americans. Be there. adv

**The Business of Art**  
It is the business of art not to copy nature but to express her.

### Alabaster

Mrs. P. Baker and daughter, Grace, have returned home after two weeks' visit with relatives in Detroit.

Harry Behn, Gus. Proulx, Edwin Benson, Claude DeLosh and Harry Bolen spent Sunday at their hunting lodge on the AuSable river.

Mrs. A. McKiddie of Detroit spent the week end here with relatives.

Mr. and Mrs. G. W. Brown and family and Mr. and Mrs. H. Brown and family have returned from Harbor Beach to spend the winter at their homes.

Virgil McKiddie is visiting at the home of his grandmother.

Mr. and Mrs. C. O. Tate and family spent Saturday in Oscoda on business.

Miss Angela Mielock spent last week at the home of her brother, J. P. Mielock.

Miss Alfred Wiltise of Owosso is spending two weeks at the home of her sister, Mrs. E. Wemert.

The community was shocked to hear of the death of Mrs. George Baker at Mercy hospital Tuesday morning.

Mr. and Mrs. Emil Christenson and Miss Theresa Michalski spent Wednesday in Bay City.

Wm. Baker spent the week end at his home.

What'll you have—waltzes, fox trots or two-steps? See you at the Legion party Monday, Nov. 12. adv

**The Subconscious Mind**  
The expressions, conscious and subconscious mind, are well defined psychological terms. The subconscious mind may be defined as anything that is neither in the focus nor in the margin of the consciousness (that is, that does not receive attention and cannot be regarded as an actual experience of the moment), but which, nevertheless, must be assumed to be influencing the mind in some way.

**Really Helping the Weak**  
The best way in which the strong can help the weak is by making them strong enough to help themselves.

### Notice of Mortgage Sale

WHEREAS, R. D. Brown and Sara J. Brown, his wife, of Hale, Michigan, as mortgagors, made and executed a certain mortgage dated January 30th, 1932, to the Rose City State Bank, a banking corporation, of Rose City, Michigan, as mortgagee, which mortgage was recorded in the Register of Deeds office for the County of Isosco and State of Michigan in Liber 25 of mortgages on page 159; and

WHEREAS, by an order duly made and entered by the Circuit Court for the County of Ogemaw in Chancery, on the 16th day of February, 1934, H. A. Chamberlain of Standish, Michigan, was duly appointed to succeed Edward H. Jewel as Receiver of all the assets and estate of said mortgagee, and has duly qualified and is acting as such receiver; and

WHEREAS, default has been made in the performance and payment of the money secured by said mortgage and the sum of \$958.20 principal and interest being now due, to which is added the statutory attorney fee; and

WHEREAS, no suit or proceedings have been instituted at law to recover the debt now claimed to be due on said mortgage, notice is hereby given that said mortgage by virtue of the power of sale therein contained, will be foreclosed by the sale of the premises therein described at public auction at the front door of the court house in the City of Tawas City, County of Isosco and State of Michigan (that being the place where the Circuit Court for the County of Isosco is held) on the 21st day of December, 1934, at ten o'clock in the forenoon, which premises are described as follows:

### MICHIGAN BELL TELEPHONE CO.

"THAT WAS ANNE CALLING FROM CHICAGO . . . she'll be here tonight"

As easily as a hail from the neighbor next door, one may receive a telephone call from the next block, from across the continent, from a ship at sea, from foreign shores. Such ease of communication is the result of constant research by the Bell Telephone Laboratories . . . of the precise manufacturing skill of the Western Electric Company . . . of increased speed and accuracy of operation. Telephone service is a social and business asset. It enables you to keep in close touch with family and friends. In emergencies, it is priceless protection.

Telephone service may be had for only a few cents a day. For complete information, write or visit the Telephone Business Office.

SUCH IS LIFE—Have You a Lil' Infernal Machine?

By Charles Sughroe

California to Get Largest Telescope

Palomar Mountain to Be Site of Giant Mirror.

Washington.—Search for a desirable location for an observatory in which to house the world's largest telescope, which will contain a 200-inch mirror, ended recently in the choice by scientists of Palomar mountain, about 50 miles northeast of San Diego, Calif.

"For several years astronomers have been studying the map of the United States for a new observatory site," says the National Geographic society. "They chose Palomar because, according to specialists, it is far enough from the desert on the east and the Pacific ocean on the west to give promise of atmospheric conditions favorable for astronomical studies.

Rises 6,126 Feet.

"Palomar is not one of the giants among mountains of western America. In fact it is not as high as many of the peaks of the eastern United States, for it rises only 6,126 feet above sea level. Nor is it even the highest mountain in Southern California.

"It thrusts its rugged summit above the valleys of Cleveland National forest, a tract 27 miles long and from 5 to 12 miles wide, comprising portions of Orange, Riverside and San Diego counties. Created in 1910 by a reorganization of several earlier forest reserves, Cleveland forest, named for

Ex-President Cleveland, includes five mountains in addition to Palomar. The forest was created primarily for watershed protection. It supplies eight reservoirs with a capacity of 125,000,000 gallons.

"Before the gold-hungry hordes of 'Forty-Niners' moved their caravans across the western plains and through the passes of the Rockies, Palomar was a favored hunting ground among the Indians of the region. In 1831, Palomar was visited by a white man named Warner. He settled near its slopes, became a naturalized Mexican citizen—California then was Mexican—and a grant of land, including Palomar and its environs was made to him by the Mexican government. From Warner, the Warner Hot Springs near Palomar got their name.

Favorite Camping Site.

"The summit of Palomar is blanketed with a thick growth of timber—cedars, spruces, pines and black oak, in whose shade each year thousands of wanderlust hikers and ride horseback over narrow, tortuous trails. Many pitch their camps in the brisk air of the summit. Through openings in the thick forest, mountain climbers are rewarded for their fatiguing trek by spectacular views of the country for miles around. Many miles of San Diego county, a veritable flower and vegetable garden, are at their feet. In some places one's viewpoint is atop a ridge whose sides tumble in steep grass-covered slopes for thousands of feet to the valley below.

"The 200-inch telescope mirror to be placed on Palomar will be twice the diameter of the mirror at the Mount Wilson (California) observatory—present the largest in the world—which has made possible many notable contributions to astronomy. The first attempt to cast the great glass disc for the mirror occurred in the spring of 1934 at Corning, N. Y. The pouring constituted one of the outstanding scientific feats of the year and was witnessed by thousands of scientists and laymen.

"But the huge glass lens was found to have a slight imperfection, so plans have been made to pour a new one. When completed, the mirror will weigh about 18 tons, will reveal billions more stars than can be reflected by the Mount Wilson mirror, and will pierce space to 30 times the distance now possible."

Missouri Orchard Granted a Patent

Louisiana, Mo.—The Starks Orchards here recently obtained the first patent ever granted for a fruit tree.

The tree is a peach and it is patented under the title "Hal-Berta Giant." The name is a combination of two types of the fruit.

The patent was granted under a law passed by the seventy-first congress, which provides protection to originators of new fruits.

Pain and Purpose

By LEONARD A. BARRETT

A merchant in one of our large cities related his loss of a considerable sum of money due to unusual causes. Among his clients, fifteen committed suicide, twenty went into bankruptcy, and an exceptionally large number were not able to pay even a portion of their indebtedness though they had avoided the sheriff's summons. This case is typical of experiences which crossed the path of almost every person during the past three years. In every case, however, the sorrow or trouble was not due to the loss of money. Suffering of one kind or another comes to every one.

It has been interesting to study the reactions of different persons who went through these experiences. Some, rather old-fashioned in their thinking, actually believed that the calamity which came to them was sent as a punishment for a wrong they had com-

mitted. Others, who had accustomed themselves to live in a world of "make-believe," reacted in a negative way, denying the reality of the experience itself. This attitude gave rise to what our psychologists call a "wish-world," the serious dangers of which are frequently emphasized in current periodicals. Still others accepted the storm which struck them with an attitude of self pity and inactive acquiescence; and stoically met the problem, but to no apparent purpose. The president of one of our western universities writes, "The most disturbing fact of the time is the number of Americans who are falling victim to a defeatist mood, assuming that all progress has come to an end."

Another group of people, not accepting this conclusion as the verdict of history, began to look beyond the present moment, and far above the clouds which accompanied the storm. They frankly sought the purpose of the whirlwind. They refused to accept what appeared to be the verdict of fate; and determined to arise and go forward. Refusing to be like "dumb driven cattle" they became "heroes in the strife."

A violin string serves no purpose until it is stretched, almost to a breaking point. It sings when the bow passes over it. On the rack of pain and suffering many a person has been stretched almost to a breaking point. Where this experience served a higher purpose, blessings hitherto unknown have been the reward.

**Russian Cocoa**

Follow recipe for hot cocoa, substituting for the three and one-half cups of milk, one tall can evaporated milk and two cups of strong hot coffee.

**Under the Ball**

Walt Rohrscheib, big end on the University of Washington team, is as fast as he is husky and not many punts get away from him.

Value of Patience.

Large envelopes are handy to use when packing luggage. Small articles can be slipped in them, and each kind be kept separate, neat, fresh and easily accessible.

Patience is not only a virtue. It is

The Household

By Lydia Le Baron Walker

ORDINARY envelopes can be so used that they are helps in house-keeping as well as fulfilling their function in correspondence. The envelopes can be small, medium sized, and large according to their uses. Readers who enjoy detective stories will recall how those who are seeking to discover the criminal, are inveterate users of envelopes of which they seem always to have a limitless stock in their pockets. Into different ones are thrust bits of gravel, threads, etc., which may reveal some bits of evidence, and form valuable clues. This only goes to show some uses of envelopes. Others can be as valuable to homemakers as, for instance, in tabulating papers requiring classification, making them more readily accessible, and less time-consuming to find.

The envelope filing system is one not to be disregarded in the home where it can be as useful as in an office. There are filing envelopes available. The faces have ruled lines on which to write the gist of each paper, enough to catalogue the contents. While these are convenient, anyone can make satisfactory filing envelopes by using manila envelopes approximately 8½ by 4½ inches in size. The face can be ruled in ink down its entire surface, the lines being spaced about one inch apart. The flap should open toward the right when the back is toward the user as this permits the contents being withdrawn in the handiest way. These envelopes can be for miscellaneous contents, alphabetically arranged. Or different packages can be for different subjects such as recipes, in one alphabetical set; clippings in another. Locations of household things can be kept in another set. This is a convenient set, since by consulting the contents under linens, accessories, etc., which may be packed away, all searching for wanted articles is eliminated.

Handy for Clippings.

Many persons prefer keeping such a filing system for clippings instead of pasting them in scrapbooks, for in the envelopes each clipping can be taken out for use when needed, and unwanted clippings can be discarded at will. In a scrapbook the clippings are permanently placed.

In starting a stamp collection, envelopes can be used for cataloguing them. Small envelopes are recommended for this. I use envelopes in size approximately two by three inches with the name of the kind and denomination clearly penned on the face of each, together with a number stating how many stamps are in an envelope.

Thermometer Is Old

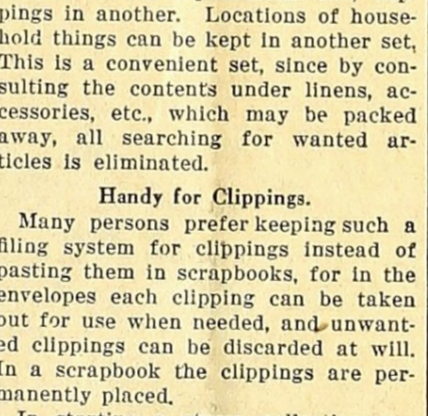

The Fahrenheit thermometer dates back to 1714.

**Alluring Furs**

The new little fur fixings in the way of sets and ensembles and separate pieces are that fascinating you will have no peace of mind until you acquire some one or other of these flattering fantasies. As to that adorable jacket, hat and muff set of white ermine, wouldn't you just love to possess it? The muff is "tricky" for within its depths reposes a satin-lined receptacle with all the dainty appointments one expects in a perfectly fitted out hand-bag.

**Cleveland Birthplace a Memorial**

This little white frame house, formerly the manse of the First Presbyterian Church of Caldwell, N. J., where Grover Cleveland first saw the light of day, March 18, 1837, was presented to the state of New Jersey as a permanent memorial to the only President of the United States born in that state. The home, purchased in 1913 by the Grover Cleveland Birthplace Memorial association for the purpose of preserving it, was given to the state without encumbrance and with all its valuable collections.

Dumb Belle

By ALICE D. KELLY  
© McClure Newspaper Syndicate, WNU Service.

ERNEST LEIGHTON singled her out after his popular lecture on psychology before the Women's Clubs of Denby because she was so absolutely lovely, and because she apparently hadn't assimilated a single word that he'd said.

He'd had enough, and to spare of intellectual women.

"Dear Professor Leighton, do you subscribe to the Gestalt theory?"

"Professor, I've been simply enthralled by your last book. I was a little in doubt about the primitive emotions."

Because he was comparatively young and very bronzed and big and comely they pursued him chaste, with coolings born of much book learning.

He'd come to Denby and his new position on the university well on the defensive. One glance at the girls in his advanced classes and he knew he'd better stick to books. He liked his women little and helpless and as dumb as they could be without actually having an I. Q. below eighty.

That's why he fell so hard for Jennie-Lou Truesdale that very first moment he saw her. She couldn't have been prettier and she couldn't have looked more gaily and unshamefully dumb. He got himself introduced directly after the lecture and looked rapidly down at her five feet one inch of curves, satiny skin, ultra clothes and general sweetness and said:

"What were you doing at my lecture?"

She dimpled at him and answered with a darling little gurgle of laughter: "Oh, I had to come. My aunt's on the committee. Aren't you tired saying all those long words?" He could have kissed her with the greatest of ease and, indeed, made his plans to do so as speedily as it could be arranged.

When she suggested with a provocative sweep of black, curly lashes against an apple blossom cheek, "I know a place where you can dance and get tea with awfully good rum in it." He said "Let's go" without ever thinking of the reception committee whom he was mortally insulting.

He kissed her going home in the car, and she said: "Oh, you shouldn't! Should you?" And he said masterfully, "I should and I intend to go on doing so."

After that he spent every waking instant with her for days. She thought he was wonderful and told him so, frequently. The simplest things had to be explained to her in words of one syllable. "No, dear precious, it's no use blowing up the tire, it has a great big cut in it. You remember you drove over all that glass?" "Yes, dear, I do have to study." "No, I don't know all the psychology there is . . ." etc, etc.

They were engaged two weeks after they met and events progressed smoothly toward a speedy and elaborate wedding.

Then the blow fell. It was at a reception. A plain woman came up to the happy pair. She beamed up at Ernest.

"You're getting a real little treasure," she told him. "I had Jennie-Lou in all my courses in the university, and she passed with honors. She may not know much about your subject but she's at the top in her own."

It was shattering! All Jennie-Lou's adorable dumbness had been a line, then! Ernest couldn't take it. The thing he loved was dead. He took advantage of a convention in the Middle West and went away. He couldn't bear even to write to Jennie-Lou. For the first few days a sense of escape from a lifetime of companionship and mental equality sustained him. But after that he realized that he wanted Jennie-Lou. He wanted to hear her gurgling little laugh and her delightfully, idiotic questions and wipe away her facile tears. He decided to sacrifice everything for love.

She greeted him ecstatically. "Bad boy, not to write," she chided him gently. "I should scold you for that. Darling, we've had thirty-six new wedding presents. And my wedding dress is done," she gurgled infectiously.

It was on the boat that Ernest summoned up his courage. He had loved Jennie-Lou enough to give up the dream of a lifetime and marry her complete with honors. He had given up years of comfortable evenings of dancing and lovemaking and foraging in the ice box for the horrors of discussing each other's work.

He held Jennie-Lou close, as he asked tensely, "Sweetheart, what was your subject in school?"

"School?" she asked vaguely. "School? Oh yes! Oh, I never stayed in college, dear. I think it would have been too awfully boring, don't you?" she gurgled. "I always forget you keep on and on going to college." She laid a bright head against his shoulder. "I took domestic science," she told him. "Of course not the chemistry part and all that silly stuff about what foods are which. Everybody eats the same things anyhow, and it was so dull. But I learned to make the loveliest layer cake and lobster Newburg and everything. I got a 100 per cent in cooking. But what I got my honorable mention for was a chocolate soufflé with vanilla sauce that I made up all my own self!"

Ernest drew a slow breath of entire relief. He smiled. He kissed her passionately.

"Dearest," he begged her fatuously. (And he loathed sweets) "Make me one of those very first minute we're in our own little home, won't you?"

RELIGION AT VASSAR

Students at Vassar college are showing a revival of interest in religion. More of them have enrolled in courses in the religious department than ever before.

The Vassar Community church, non-sectarian, is administered by a student committee, with ex-officio members, including Dr. Henry Noble McCracken, president, and the head of the religious department. This year a rabbi and a negro minister, in addition to representatives of various denominations, will be heard. —Literary Digest.

ASK THE MOTHER who has made this change

The average mother gives any laxative the family may be using, while family doctors give children a liquid laxative of suitable ingredients, suitable strength, and in suitable amount.

If you want to know just what a tremendous difference this means to any youngster, first inquire of any mother who has tried it!

She knows that a bilious boy or girl needs a gentle liquid laxative when constipated, and a little less if dose is repeated until bowels seem to be moving regularly and thoroughly without need of help.

Use a liquid laxative containing senna (a natural laxative). California Syrup of Figs has the right amount for children's use, and this rich, fruity syrup does not harm or upset a child's system.

Get a bottle of the real California Syrup of Figs at any druggist's. All children like its agreeable taste, and it agrees with them. No need to give a child anything stronger. This fruity syrup is laxative enough; indeed, many adults use it in preference to pills and tablets.

THE "LIQUID TEST." First: select a liquid laxative of the proper strength for children. Second: give the dose suited to the child's age. Third: reduce the dose, until the bowels are moving without any help.

An ideal laxative for this purpose is the pure California Syrup of Figs, but be sure the word "California" is on the bottle.

If They Are Evil

Thinking is a habit; at certain times a bad one.

If you tire easily—

why not reason out the cause of this unnatural condition?

Your first thought may be, "I must eat more." That's not all. You should enjoy what you do eat. Frequently, the blood cells are low . . . and this, perhaps, is what makes you feel weak. If this is your trouble the stomach may not be calling for sufficient food. Zest to eat may be lacking. But what a difference S.S.S. makes when taken just before meals. Just try it and notice how your appetite and digestion improve.

S.S.S. stimulates the flow of gastric juices and also supplies the precious mineral elements so necessary in blood-cell and hemo-globin up-building. Do try it. It may be the rainbow you need to brush away present discouragement over your health condition.

Do not be blinded by the efforts of a few unethical dealers who may suggest substitutes. You have a right to insist that S.S.S. be supplied you on request. Its long years of preference is your guarantee of satisfaction.

## SYNOPSIS

Prudence Schuyler comes to Prosperity Farm, inherited from her uncle, to make a new life for herself and her brother, David, his health broken by tragedy. The second day on her farm Prue falls from the barn loft into the arms of Rodney Gerard, rich young man, a neighbor. There is at once a mutual attraction, but Prudence decides to maintain a cool attitude toward him. She suspects men since her sister's husband ran away with her brother's wife. Len Calloway tries to buy Prue's timber, but she dislikes him and contracts with Rod to dispose of the trees. David comes to the farm. A clown appears, advertising a circus in a nearby town. Prue accompanies Rod and Jean to the show. While they are watching the parade, Chicot, an old clown, is accidentally killed. He was the grandfather of Milly Gooch, one of the circus riders. Rod became friendly with Milly when she lived on Prosperity Farm. Calloway intimidates available laborers so that they cannot be hired to cut the timber for Rodney Gerard. Milly Gooch broke her engagement to Calloway; he believes Rod was the cause and has since been his enemy. After the accident to Chicot, Rod calls on Milly to see if he can be of any help.

## CHAPTER VI—Continued

"It's so fine, I'll tuck it in here." She thrust it under her low-cut bodice.

"What will you do this winter, Milly?"

"Hollywood. Two big shots from a traveling talkie studio saw me ride a month ago. And what do you think? Mother Puffer and old 'whatta mean is' Si came to see me this afternoon! She wants I should spend Christmas with them. What say, Roddy?"

"If you visit the Puffers you may run into Len Calloway."

"What if I do? I'll give him a little whirl for old times' sake. You don't think I'm afraid of that big noise, do you? I've traveled some since I sent you that S O S."

"And traveled straight, Milly?"

She met his eyes squarely. "Sure thing. Didn't I promise? I'm off men, they're just a game, anyway."

"Time for your act, Milly."

As the maid spoke behind them, a groom in rose-color velvet with silver trimming led a milk-white horse bridled with rhinestones to the tent.

Milly caught Rodney's hands and looked up at him. "I'll be good. I promised you, didn't I? There's only one person who could tempt me not to be, and he—doesn't know I'm on earth. He—"

A hiss. A flash cut off the word.

"What was that?"

"Don't be so jumpy, Roddy. If you traveled with this show you'd get used to that sound. Flashlight. Publicity, of course. Some reporter writing up the show wants a picture." A whistle blew. "That's for me. I'd better get going. Bye-bye, Roddy. Don't—don't send me any more money—ever—I won't need it—now that I've gone Hollywood. Perhaps you'll be at High Ledges at Christmas—if Miss Schuyler stays."

What had she meant by that, Gerard wondered, as his eyes followed her in her rose-color tulle and glistening satin across the yard. Was his feeling for Prue so evident?

One foot on the step of his car, Gerard stopped and stared. Had a red roadster shot out of the parking place just ahead, or was Len Calloway so much on his mind that he had imagined it?

Prudence pulled at the wire netting at one side of the poultry yard.

"Darn!" she gritted between her teeth, as the elusive thing wriggled away from her. "Mr. Si, I'm not so good as I thought. Give me a hand, will you?"

Puffer seized the netting, and pulled. "Grand! Hold it a minute till I get this brad in; two more and it's done. These pesky hens got out yesterday and scratched in my garden border. There! I'd like to see them get through that!"

"The pesky hens ain't the only things that escaped yesterday. Hear 'bout the convict who dug himself out of prison?"

"Jane Mack heard the announcement on the radio and told me. She's all excited about it. He isn't likely to come to this small town, is he?"

"Gorry-me, he'd be running his head into a noose if he did." Puffer shook the wire netting. "That's a good job you've done. And you've done another good job. Your brother is so much better."

Prudence sprang to her feet. Her eyes shone, her face was radiant.

"Then you've noticed it, too, Mr. Si? It isn't just my imagination?"

"Sure, I've noticed it. So's Mother. Whatta mean is, his color is better, his voice is stronger, an' he moves quicker. Comin' to live in the country is jest settin' David on his feet. Rod's noticed it, too."

"Oh, he has! I haven't seen Mr. Gerard lately so I didn't know. Prudence avoided Puffer's eyes as she remembered the many times of late that she had fled to the barn loft so that she would not see Rodney Gerard when he called.

"Gorry-me, you haven't seen him? Seen Jim Armstrong?"

"No. Dave has, but—but I was out when he called."

"Well, of course, Rod was away to the city most three weeks trying to get some firms to sign up for the timber you and him are goin' to cut. Since he come back he's been terrible busy cruising the woods. Rod isn't used to havin' difficulty gettin' what he wants; things have always come easy for him. This lumber business 'pears to be gettin' on his nerves. Jim was tellin' me this morning that Rod snapped at every one who come near him yesterday. Perhaps it's that newspaper picture of him and Milly Gooch holdin' hands in front of her tent at the circus that come out in the local paper the day after the show was here that got him mad. Well, if here he isn't now! What you gum-shoeling round like that for, Roddy?"

Prudence was furious at her own start of surprise. Had Rodney Gerard seen it? He did look troubled. There were lines between his nose and mouth she never had seen before; he had lost some of his bronze. His eyes seemed deeper and darker and bluer in contrast.

"Well, will I pass? Perhaps you weren't sizing me up, perhaps you were just wondering how it happened that I had caught you, Prue of Prosperity farm."

"Don't bite, Rod." Si Puffer flung himself into the breach. "Now that you've got company, Miss Prue, I'll go an' chop some wood."

He moved away with surprising quickness.

"Mr. Si!" Prudence started after him, but Gerard caught her arm and held it.

"You're not going until you tell me why you have been dodging me."

"I dodging! How absurd!"

"Is it? Drop that hammer. It makes you look bloodthirsty." As she still clutched the tool, he loosened her fingers until it dropped to the ground.

"That's better. I want to talk to you before Armstrong and Jean get here. Have you seen that infernal picture?"

"Picture?" Prue echoed the word with breezy indifference.

"Don't bluff. You know perfectly well that I'm referring to that fool snapshot of Milly Gooch and me at the circus."

"Oh, that! Really, I'm not interested."

"Look here, you've got to be interested. I'm willing to bet my roadster that Calloway had a hand in that. He would be like his methods—"

"Don't abuse Len Calloway. It would be disloyal for me to listen because"—Prudence hoped that her eyes and voice were as maddeningly provocative as she intended them to be—"because, you see, I've decided to have him cut my timber."

"What!"

Never had she seen eyes blaze as Rodney Gerard's blazed in his white face. She remembered what Si had said about his mood the last week. She shouldn't have tried to torment him—but—hadn't that hateful picture hurt her, too? He caught her by the shoulders.

"You didn't mean that, Prue, about letting Calloway cut for you."

"Of course I meant it. The more I think of it the more I go bullish on the idea. I'm beginning to like Len very much. He's so forceful, so—"

"Forceful!" For a pulsing instant Rodney Gerard hesitated, then he caught her in his arms. "Forceful!" He crushed his mouth, hard, ardent, upon hers. "If that's what you like—Gorgeous!" He kissed her again.

Prudence wrenched herself free. Every pulse in her body was throbbing unbearably. How had he dared! Was that the way he kissed the circus rider? She dragged her voice back.

"Don't ever speak to me again! Ever! Do you think I'll let you cut my timber now? Suppose Len Calloway does cheat me in money, at least I shall be safe with him."

"Prue! You can't do it! You knew what you were doing when you looked at me like that. You're no child. Be a sport. You deliberately smashed my control, and now you make me pay for letting myself go. Well, I'll take my medicine, I will keep away until you want me, I'll never kiss you again until you ask me to, if—"

"I ask you? That's the funniest thing I ever heard."

"All right, it's the funniest thing you ever heard. But the promise stands. I—"

"Hi! Rod!"

The hail came from the garden. Prudence dashed toward the gate and collided with a big, spectacled man with heart warming eyes. He smiled.

"Miss Schuyler, isn't it? I would recognize you anywhere from Jean's description. I'm Jim Armstrong, and I am happy to report that you have a nice little bunch of money in your wood lot."

Prudence extended an eager hand. "Have I really! I'm so glad you've come. Now I can learn a lot about trees. Will you take me on as a pupil?"

From the corner of her eye Prue noted with satisfaction the set of Rodney Gerard's jaw. She would show him that he couldn't kiss her after he had been holding Milly Gooch's hands.

Jim Armstrong laughed. "Sure I'll

take you along if Rod says the word. He's my boss. I'm a whale of a teacher. Rod said you had a plan of your wood lot, The Hundreds, Miss Schuyler. May I see it?"

"Of course. It's in my shop. I'll bring it to the living room."

Prudence was conscious of Gerard watching her as a few moments later she cleared a place on her brother's desk and spread out the blueprint. Jean danced in from the kitchen, her hands full of cookies.

She crossed the room to speak to David Schuyler seated in the wing chair. As Armstrong joined them, Rodney Gerard detained Prudence at the desk.

"Wait a minute! Look here, Prue, you didn't mean what you said about letting Calloway cut that timber. You mustn't do it."

The sternness of his voice sent tingles through her veins, but she kept her lids provokingly lowered.

"I can transact my own business, thank you. When I need help I shall appeal to Mr. Armstrong. He impresses me as being such a reliable, self-controlled person."

"And I'm not. I get you. All right, let me cut your timber and you will have no fault to find with me again—ever—I'll be the original ice man."

He turned on his heel.

As the outer door closed on Armstrong and Gerard, Prudence crossed to the fireplace and head on her hands resting on the mantel looked unseeingly down at the red coals.

"Is Armstrong an old friend, Prue?" her brother asked.

His tone brought the color to her face. "No. I've never seen him before today. Why?"

"You seemed to twinkle, twinkle with excitement when you spoke to him."

She dropped to the floor cushion beside his chair. "Humorous, aren't you? Perhaps I did rather overdo the welcome-to-our-city act, Dave, but—"

"I found that on the floor near Gerard's desk. Now will you let me handle your timber?"

Furious with herself that she had stood like a lump of putty and listened to the note, an unbearable realization that it confirmed her suspicions of Rodney Gerard's philandering roughened the voice in which Prudence scoffed:

"You must be the original if-at-first-you-don't-succeed-try-again lad. But this time you have thrown sand in the machinery. It won't work. Rodney Gerard and I will get that timber out."

Calloway's eyes burned red.

"You and Rodney Gerard! That's a joke. Try to get men to cut. Just try, that's all. I suppose you are trusting to your partner for that?"

Prudence swallowed a nervous chuckle. "You have guessed it. I am trusting to my partner to engage the men to cut. Good morning."

He looked like a man who was still dazed from a body blow as he departed. Once his lips moved, but Prue banged the door behind him before he could speak.

She leaned against it. Had Calloway found that note of Milly Gooch's in Rodney Gerard's room? "Don't mail it again." Apparently there had been other checks. Why hadn't she asked the man why he had been snooping at High Ledges? Not that she cared who wrote to Rodney Gerard or what he did with his money. Mrs. Wald had been right. Her butterfly brother did flit from flower to flower. He had thought that she—Prudence Schuyler—would allow—

A sob of fury shook her. She brushed her hand savagely across her lips.

TO BE CONTINUED.

"But it was done for Gerard's benefit, wasn't it? Like him a lot, don't you?"

"Like him! No. He leaves me cold."

"What have you against him?"

"You said yourself that you were confoundedly sorry that he—knew that circus clown, Dave."

"I haven't any suspicion of him then, I haven't now. I think him one of the finest, cleanest, straightest, most likable men I ever met, and you will admit that I have had some experience."

"That's what we thought about Julie's husband before they were married."

"I never thought that. He was irresistible and charming—but—he had a bad eye. I tried to make Julie understand, but she wouldn't listen. I never have bared my heart to you before, Prue; never will again. I am doing it now to beg you to listen to your

"Brazilian Catfish Amuse Visitors to Aquarium; Suspend Selves by Suction"

The Brazilian catfishes are the comedians of the aquarium and provide more fun for the money than any other fish, says the Detroit News. They are becoming increasingly popular for a more utilitarian purpose, namely, that of scavengers. The corydorads are very hardy and they work incessantly at their scavenging job.

Some varieties attach themselves by suction of their mouths to the sides of the tank and hang vertically for hours. Though they like to prowl among the plants, they do not uproot them.

Many persons, recalling native catfish, are surprised to learn of the coloration of some of the South American species. Some of them are marked with metallic blue, splotches of black or dark brown or lateral stripes.

One interesting species is Octoclinus vittatus, which comes from Brazil. It is about an inch and a half long and has a habit of suspending itself for long periods at a time.

A King Was Cold

The judge's ermine and the mayor's fur collar are relics of the times when the temperatures of law courts and banqueting halls in England made them not an ornament but a necessity. Even at coronations it was hopeless to try to warm the Abbey, so the king and his august subjects were warmed instead, and modern sovereigns have cause to remember how chilly their ancestors felt when they in turn stifle under the same heavy fur robes. So cold were the homes of England that those who could afford it even slept in fur, and an old account book mentions the purchase of 17 skins to make a nightgown for Queen Elizabeth.

Rattlesnake Island

Belle Isle, in Michigan, at one time was known as Rattlesnake Island because of the abundance of reptiles on it, says a writer in the Detroit Free Press. Hogs, immune to snake bite because of their outer layer of fat which prevents the venom from reaching the blood stream, were turned loose on the island and quickly rid it of snakes. However, the hogs became wild, the island became known as Hog Island, and when Detroit acquired it in 1879 for park purposes, hunters had to kill the dangerous hogs.

Hens and Their Diet

The practice of throwing grain on the floor in soiled litter is coming to be looked upon with disdain. Experiment stations and commercial poultry farms have found that the normal laying flock can be fed both grain and mash in hoppers, and that they will consume about the correct proportion of the two. The same type of hopper that holds the dry mash can be used for scratch feed. But where grain is hopper fed, additional hopper space must be provided.

Confined Hens Lay Well, Experiments Have Shown

That hens kept in confinement, if properly fed, will lay quite as well as those of the same age on the usual limited range and even tend to lay eggs larger in size, has been shown in experiments at the United States Animal Husbandry Experiment farm at Beltsville, Md., covering a five-year period.

Of course it goes without saying that there was nothing in the library that was not open to the public at any time.

But the conviction grew that Harmon and Mayer were doing the preliminary work, which was afterwards verified by bolder and more audacious men who stole into navy yards and laid the foundations for destroying munition plants.

Operative Henry had several conversations with Miss Langfit and he compared this with the reports which were brought in as a result of the shadowing of the two Germans.

Up to this point they had never been found together.

In the meanwhile an attempt was made to learn something of the previous history of the two men.

One of them it was learned had been visiting a number of the seacoast towns in New England and it was also alleged that he had not complied with the alien enemy registration laws.

One night United States agents started to follow the two men and then for the first time they joined one another in a little back room in the northwestern part of Pittsburgh.

They sat at a table and produced a coastwise map which they began to study.

That was the signal for the detectives.

The suspects were arrested and in twenty-four hours had been placed in a detention camp.

What became of them no one will tell.

The mystery has gone into that limbo which is the repository of so many war secrets but to this day there are persons in Pittsburgh who are satisfied that the timely discovery of the librarian cut off the connection between these men and the German war office.

TRUE DETECTIVE STORY  
by Vance Wynn  
© Public Ledger

The Spy Plot That Failed

IT WAS during the early days of the World war that a rough-looking man, who posed as a Belgian, began to frequent one of the branches of the Carnegie library in Pittsburgh.

He was poorly dressed, wore a scraggly beard and seemed to have all of the time in the world.

Usually he went to the reference department of the library, and spent hours in reading books that had reference to America. He paid particular attention to the maps and one night was seen to be tracing some of these from one of the geographical works in the library.

Miss Frances Langfit, the assistant librarian, noticed the man, and her suspicions were aroused.

So while the fellow spied around the shelves the young woman did a little spying on her own account.

Night after night she sat there with a green shade over her eyes apparently engrossed in her work, but in reality keeping tabs upon the Belgian who was not a Belgian.

One night she watched him replace a book on the shelf, and when he had departed she hastened over to that part of the library and obtained possession of this particular book.

It contained a coastwise map, and gave evidence of having been traced.

Before the next day had dawned the patriotic young woman had informed the Department of Justice of her suspicions of the man who had been visiting the library.

Operative Henry—that will have to be his name for the purpose of this article—was placed on the case at once.

He traced the man and found that he was a stranger in the city.

He located the house where he had a room and discovered he was going by the name of Jacob Harmon.

The fellow must have sensed the fact that he was being followed, because he ceased his visits to the library.

About the same time an undersized man with a decidedly German accent began to frequent the library.

When interrogated he gave the name of Emil Mayer.

This man pursued pretty nearly the same tactics as the other, but on the surface there did not seem to be any connection between the two.

One day he was followed to his room, and later in his absence a search was made of his effects.

There was nothing absolutely criminal, but the detectives did find a number of papers and tracings.

In themselves they seemed meaningless, but if it were possible to put them together they might have meant much.

At all events, the work of shadowing Harmon and Mayer continued without interruption.

Two and two were put together and the conclusion of the authorities was that the library had been made the rendezvous of German spies for nearly a year.

Of course it goes without saying that there was nothing in the library that was not open to the public at any time.

But the conviction grew that Harmon and Mayer were doing the preliminary work, which was afterwards verified by bolder and more audacious men who stole into navy yards and laid the foundations for destroying munition plants.

Operative Henry had several conversations with Miss Langfit and he compared this with the reports which were brought in as a result of the shadowing of the two Germans.

Up to this point they had never been found together.

In the meanwhile an attempt was made to learn something of the previous history of the two men.

One of them it was learned had been visiting a number of the seacoast towns in New England and it was also alleged that he had not complied with the alien enemy registration laws.

One night United States agents started to follow the two men and then for the first time they joined one another in a little back room in the northwestern part of Pittsburgh.

They sat at a table and produced a coastwise map which they began to study.

That was the signal for the detectives.

The suspects were arrested and in twenty-four hours had been placed in a detention camp.

What became of them no one will tell.

The mystery has gone into that limbo which is the repository of so many war secrets but to this day there are persons in Pittsburgh who are satisfied that the timely discovery of the librarian cut off the connection between these men and the German war office.

WNU Service.

WOODEN SHOES SEEM TO BE COMING INTO FAVOR

Holland usually has been considered the home of the wooden shoe brigade, but it would appear that the United States has gone into the business of making wooden shoes on a large scale. It is really hard to find the wooden shoe wearers in Holland except on the feet of those who do laboring work in the fields. Those in the cities and on board ships, of which there are plenty in the dikes, usually wear leather shoes.

The stylists over here have been making wooden-soled sandals and wooden shoes for women and children's wear. Wooden work shoes of heavy material have been made for men.

Approximately a million pairs of wooden shoes are made and sold in the United States annually. The prices range from \$1 a pair for an all wood sabot to \$1.50 for a pair of Oxfords. High wooden shoes range in price from \$1.75 to \$3 the pair.—New York Sun.

Why Children Need a Liquid Laxative

The temporary relief children get from unwise dosing with harsh cathartics may cause bowel strain, and even set-up irritation in the kidneys. A properly prepared liquid laxative brings a more natural movement. There is no discomfort at the time and no weakness after. You don't have to give the child "a double dose" a day or two later.

Can constipation be safely relieved in children? "Yes!" say medical men. "Yes!" say many mothers who have followed this sensible medical advice: 1. Select a good liquid laxative. 2. Give the dose you find suited to the system. 3. Gradually reduce the dose, if repeated, until the bowels are moving naturally without aid.

An approved liquid laxative (one that is widely used for children) is Dr. Caldwell's Syrup Pepsin. The mild laxative action of this excellent preparation is the best form of help for children—and grown-ups, too. The dose can be regulated for any age or need.

Your druggist sells Dr. Caldwell's Syrup Pepsin.

Science Supreme?

The head and front of modern civilization is science.

CREOMULSION

Your own druggist is authorized to check fully refund your money on the spot if you are not relieved by Creomulsion.

COUGHS

Scaly leg, caused by mites feeding under the leg scales, can be controlled by dipping the feet and legs in a solution containing two parts of raw linseed oil and one part of kerosene.

LIFE begins at 40. If you keep internally the poisons that usually work more slowly than Nature's slow process of elimination, you will feel the effects of age.

FREE SAMPLE! Write to: GARDINER TEA CO., Dept. 2, Brooklyn, N. Y.

GARDINER TEA

At Drug Stores—25c and 100c

FEEL TIRED, ACHEY— "ALL WORN OUT?"

Get Rid of Poisons That Make You Ill

IS a constant backache keeping you miserable? Do you suffer burning, scanty or too frequent urination; attacks of dizziness, rheumatic pains, swollen feet and ankles? Do you feel tired, nervous—all unstrung?

Then give some thought to your kidneys. Be sure they function properly, for functional kidney disorder permits poisons to stay in the blood and upset the whole system.

Use Doan's Pills. Doan's are for the kidneys only. They help the kidneys cleanse the blood of health-destroying poisonous waste. Doan's Pills are used and recommended the world over. Get them from any druggist.

QUICK HEALING FOR SKIN IRRITATIONS

If you suffer with pimples, eczema, rashes, chafings, eruptions or other distressing skin trouble, begin today to use Cuticura Soap and Ointment. Bathe the affected parts with the Soap, anoint with the Ointment. Relief comes at once and healing soon follows.

Soap 25c. Ointment 25c and 50c. Sample each free.

Address: "Cuticura," Dept. 183, Malden, Mass.

#### Rattlesnake Poison

People do not always die from rattlesnake poison, if they are in good health when attacked. The poison is nearly always fatal to cattle and dogs, and if human beings are not in good physical condition it is often fatal to them, also.

#### No Indian Name for America

There was no universal Indian name for America before Europeans gave it that name. The Indians were of many tribes and nations, speaking many languages. They had no idea of the extent of the two continents and most of them knew only a few of their neighboring tribes. Tribes had local names for the regions in which they lived, and often other tribes had other names for the same territory.

#### Street Under Tree Canopy

The main street in the mountain town of Jefferson, N. C., lies under a canopy of huge cherry trees on each side with limbs interlocked in the center.

#### Electricity From Windmills

The utilization of wind power by small plants, in which electricity is generated and stored in accumulators, is widespread in Denmark.

#### Ferns Grow Upside Down

Ferns grow upside down at Hamilton pool, reached by mountain road from Austin, Texas. The pool was created by centuries of waterfall over a stone ledge. Erosion below has left a large part of the edge overhanging the pool. The upside-down ferns grow from the ceiling made by this ledge.

#### Biggest Coal Port

Cardiff, Wales, although a great coal center, takes pride in being the cleanest as well as the biggest coal port in the world.

#### All the Gold

All the gold mined since Columbus discovered America would make only a 40-foot cube.

#### Classify Blood of Mummies

The blood in Egyptian mummies 5,000 years old can be classified by the same blood tests used in living persons.

#### Chance for the Insects

Insects are protected from sub-zero temperatures through a severe winter if they crawl inside the bark of a tree.
