BETTER HOMES EAST CAMPAIGN IS TAWAS PLAN OF GROUP

Sternberg Made Chairman Directing Program For County

A county-wide modernization and A county-white modernization and improvement campaign as part of the National Better Housing Program sponsored by the Federal Housing Administration is being planned for Iosco county. The first plans of the organization of this campaign were organization of this campaign were discussed at a meeting held at East Tawas Monday evening, at which were present the editors of the three newspapers of this county, meeting with T. George Sternberg who has been designated by the state director of the Federal Housing Administra-tion to act as chairman in organizing the local campaign the local campaign.

The purpose of the campaign is to enable the people of this county to get as large and immediate benefits as possible from the National Housing Act. The Federal Govern-ment has provided a plan under which local lending institutions can make money available to property owners for repairs and improvements at the lowest charges ever offered

The purpose of this campaign is to inform every property owner in the county how he can take advan-tage of this new financing plan and of the desirability of making neces sary improvements to his property at this time

'Evelyn Prentice' Packs

Powerful Dramatic Punch William Powell and Myrna Loy, ensational hits in "The Thin Man" and "Manhattan Melodrama," could not but be reunited by popular de-nand. This has been done, in a paricularly entertaining and gripping manner, in "Evelyn Prentice," new Cosmopolitan mystery romance play-ng at the Family Theatre, East Ta-vas, on Sunday, Monday and Tues-lay, December 2-3-4.

With Powell as a criminal attor-ney and Miss Loy as his wife, the play deals with a murder case in which the fate of a defendant, and the life happiness of the attorney, are woven together in a mystery that holds its suspense until the final surprising denouement in a

pectacular court sequence. Blonde Isabel Jewell forsakes comedy roles for a tragic interpre-

tation of the murder defendant which s one of the surprises of the picture. ond Edward Brophy and Una Merkel handle the comedy relief with hilar-

General Butler's Fantastic Story of Fascist Plot to Seize the Government-Strike in the Great Steel

Industry Becomes Imminent.

By EDWARD W. PICKARD © by Western Newspaper Union.

S OBER minded American citizens will be worked out by a committee of three arbiters, with the union recogfind it difficult to take seriously nized as the bargaining agent for the the fantastic story that Maj. Gen. employees. Smedley D. Butler told to the congressional committee

Gen. Smedley resentative John W. D. Butler

McCormack of New York, considered the tale of enough importance to warrant the calling of witnesses to prove or disprove it. General Butler made his story public through the columns of the New York Evening Post, as the proceedings of the committee are conducted in private.

If Butler is to be believed, he was approached by Gerald P. MacGuire, bond salesman in the stock exchange firm of Grayson M. P. Murphy and Company, and urged to accept the leadership of a soldier organization of half a million men "which would assemble-probably a year from now-in Washington, and that within a few days it could take over the functions of the government." MacGuire, according to the general, thought the overturn of the government might be accomplished peacefully and suggested that "we might even go along with Roosevelt and do with him what Mussolini did with the king of Italy."

Butler's story continued: "He told me he believed that at least half of the American Legion and

Veterans of Foreign Wars would follow me. "MacGuire explained to me that they had two other candidates for the posi-

tion of 'Man on the White Horse.' He said that if I did not accept an offer would be made to Gen. Douglas Mac-Arthur, chief of staff of the United States army, and that the third choice would be Hanford MacNider, former commander of the American Legion.

'So far as I know, neither General MacArthur nor MacNider has been approached. Their names were merely mentioned as 'alternates.'"

The general said he was offered considerable sums "for expenses" which he did not accept. He said MacGuire intimated that among the backers of the plan were Mr. Murphy and Col. Robert S. Clark, a wealthy New Yorker with offices in the Stock Exchange building; and he added that later Colonel Clark offered him money to go to the American Legion convention in Chicago last year and make a speech for

BY ORDER of the national labor reinvestigating un-Amerlations board there will be held ican activities. This soon a great workers' election which retired officer of mawill determine whether organized labor rines charges that shall dominate the country's rubber inthere is a plot, endustry. gineered by Wall

The board decreed that the Firestreet men, to seize stone Tire and Rubber company and the government of the the B. F. Goodrich company of Akron, United States and set Ohio, must allow their employees to up a Fascist dictatorballot on the question of whether they ship, and the chairman want a company union or an American of the committee, Rep-Federation of Labor union to represent them in collective bargaining under the NRA.

Twenty-one thousand workers, the largest number ever polled by the labor board on an NRA question, will participate in the election. In addition another 15,000 workers of the Goodyear Rubber company may ballot on the same question. The Goodyear angle of the case has not yet been passed upon by the board.

Both the Firestone and Goodrich companies have opposed the elections now ordered, maintaining that conditions in their plants are satisfactory and that electioneering in rival unions would only disturb the peace among the workers.

D ONALD R. RICHBERG, executive director of the national emergency council and now perhaps the President's chief adviser, addressing the Associated Grocers of America at their convention in New York, proposed the creation of a new federal body, combining functions of the NRA and the federal trade commission, to define and regulate concerted trade action in the 'twilight zone" under antitrust laws. Discussing the program for permanent NRA legislation, he reiterated his opposition to control of prices and production. He said the fixing of minimum wages and maximum hours had demonstrated its soundness for eliminating the worst forms of unfair com-

that admittedly dishonest business practices should be proscribed. PHILADELPHIA lawyers are tradi-tionally supposed to be able to unravel the worst of tangles, so Presi-

dent Roosevelt has picked one to be chairman of the national labor relations board. He is Francis Biddle, of the famous family of that name, and he succeeds Lloyd K. Garrison, who retired from the chairmanship to resume his duties as dean of the law school of the Un versity of Wisconsin. Francis Biddle has Francis Biddle been engaged in law practice as a member of the Philadelphia firm of Barnes, Biddle, and Meyers. He served from 1922 to 1926 as assistant district attorney for the eastern district of Pennsylvania. In his new post his task will be the settlement of labor disputes arising out of the recovery act, especially those involving collective bargaining.

PRESIDENT ROOSEVELT is revel-ing in baths and rest at Warm Springs, Ga., but he is not neglecting the nation's business, keeping in close touch with Washington and receiving many official visitors. At his first press conference there he announced with glad smiles that he would again "lend his birthday," January 30, to the national committee that arranges birthday balls all over the country for the benefit of infantile paralysis sufferers.

COMPTROLLER GENERAL J. R. M'CARL has thrown a monkeywrench into part of the machinery of Relief Administrator Harry L. Hopkins. Turning down a check from Hopkins to the officials of the District of Columbia which was to have started work on a housing development, Mr. McCarl held that the federal emergency relief act, providing for the granting of funds for various relief purposes, could not apply to the acquisition of real estate and the construction of homes. This type of activity, he said, would be of a permanent and not an emergency nature, and the act

was adopted to meet emergencies. The FERA already has under way program of "rehabilitating" 80,000 farm families in homes and on land to be sold to them by the government.

MORE and more it becomes evident that President Roosevelt intends to pursue a middle of the road policy

in his efforts for national recovery, and that in the overwhelmingly Democratic next congress there will be no one faction strong enough to dic-SHORE MILL tate to him. The Chief Executive and the business leaders of the country are grad-

ually coming together, and if and when they reach an accord on methods it will be Silas Strawn found that a good many of the more radical ideas of the brain trusters will have been discard-

ed. The best minds in industry and finance are no longer standing back and merely criticizing. They are taking an active part in planning for the future welfare of the nation. Herewith are summarized some of the important new developments in this direction:

President Henry I. Harriman of the United States Chamber of Commerce, in pursuance of a resolution adopted by the board of directors, has appointed a committee of six men, headed by Silas Strawn of Chicago, to co-operate with other business and agricultural associations in drafting plans for the recovery of business. The board of the chamber endorsed the continuation of petition in treatment of employees, and relief and housing, but signified that business is still opposed to the unbalanced budget, further reduction of working hours as embodied in the movement for a 30-hour week, new and

unprecedented outlays for public works, continuance of the NRA, the doctrine of majority rule in collective bargaining, and unemployment insurance.

000.

Through the National Association of Manufacturers, invitations were sent to every manufacturer in the United States to attend a national industrial conference in New York on December 5 to draft "constructive recommendations" for presentation to President Roosevelt.

A glance into the history of the islands reveals that

New Leaders of the Mormon Church the Russians long dominated them, but there are today few traces of this for mer domination.

Nearly 300 Islands.

"In all. there are nearly 300 islands. About eighty of them are inhabitedthe larger ones by farmers who live by their rye and potato crops and dairy herds; and the smaller ones by fishermen, whose tiny villages hug the shores. The uninhabited islands are mostly jutting rocks, which are no more to the islanders than menaces to navigation.

"The islands, including the barren uninhabited rocks, have a combined area.of 550 square miles. There are about 25,000 inhabitants, most of whom live in neatly kept buildings of logs or dressed lumber. In many villages only the steepled church buildings are of stone construction.

"Aland island, the largest of the group, is 30 miles long from north to south and 17 miles broad. Despite these measurements, however, the coast is so deeply indented that few spots on the islands are more than a few miles from a deep outlet to the open sea. Aland, unlike its neighbors is largely covered with rich soil. Forests clothe many square miles. Once the forests were favorite elk hunting grounds for Swedish sovereigns, but game now is almost extinct. The open spaces on Aland are almost entirely in farms. One recent visitor to the

the Aland islands sought a change in

government. The inhabitants, by an

unofficial vote indicated that they pre-

ferred to be reunited with Sweden.

Finland granted the islands autonomy

in 1920, but refused to allow them to

A few minutes later a second skeleton was brought to the surface. The authorities were notified and

ered a skeleton.

the remains were taken to the bureau of unidentified dead of the New York police department.

Life is supposed to be held cheap in the metropolis, and it would have been quite easy to have dismissed this gruesome find as an unsolved mysterv.

But the police did not take that view of the matter.

They felt that a crime had been committed and they went about the solution with all of the ardor of detectives of fiction, but with a great deal more common sense.

By means of a brass check that was found on the first skeleton the remains were identified as those of Rossario Passerelle, a laborer, who had been well known in the Italian colony in East New York.

The second skeleton was not so readily placed.

But it was discovered that Passerelle had a friend named Dominic La Rosa, and that they were inseparable companions.

Also it came to light that Passerelle and La Rosa had strangely disappeared at the same time.

Incidentally, it was suggested that the two men had been in bad odor with some of the wretched secret societies which had imported their bad habits from Italy.

In a word it was felt that the two dead men had been the victims of the dreaded Black Hand,

But before going after the murderers it was necessary to make sure that the second skeleton was that of La Rosa.

In order to demonstrate that the detectives of New York city performed a most remarkable piece of work.

They reconstructed the remains of the dead man.

Around the skeleton was built a face, some hair, and by the use of cosmetics these were made to appear natural.

Two gold teeth that had been found in the lot, and which undcubtedly belonged to the deceased, were placed in such way as to attract immediate attention.

His old felt hat was perched on his head.

A coffee can, covered with newspapers, served as a neck, and around this false form was draped the ragged coat of the man.

retention of the gold standard, which speech MacGuire had previously given Butler.

Clark, at present in France, admitted he had asked Butler "to use his influence in favor, of sound money and against inflation," but strongly denied that he had sponsored a Fascist movement. He declared he would take action for libel against any person accusing him in such a connection.

Murphy and other Wall street men said the story was absolutely false and unutterably ridiculous, and Mac-Guire, after being heard by the Mc-Cormack committee, said: "It's a joke -a publicity stunt. I know nothing about it. The matter is made out of whole cloth. I deny the story completely."

S O FAR as the great steel industry is concerned, it appears that the industrial truce asked by President Roosevelt cannot be arranged, and the prospect of a strike of the steel workers is growing.

In behalf of the United States Steel corporation, a proposal was made to the American Federation of Labor that recognition of that organization would be granted, but that no contract would be made. This proposal, it was said, would be agreed to by 85 per cent of the steel industry.

The labor spokesmen, led by William Green, president of the A. F of L., rejected the tender on the ground that it was hedged about in such a way to permit collective bargaining with minority groups or company unions, and that the employers were still unwilling to accept the principle of majority rule as set forth in the national labor relations board's decision in the Houde case.

If a rupture comes the Federation of Labor may find the federal government rather unsympathetic. Mr. Green's influence in the White House has been waning noticeably and he has had no personal contacts with the President for some time.

New Yorkers with offices in skyscrapers were gladdened by the news that a threatened strike of elevator operators had been averted and an agreement, drafted by Mayor La Guardia's board of arbitration, had been signed by representatives of the real estate interests and the union. The union withdrew its demand for a closed shop; and standards of wages and hours in various types of buildings | ings and his blessing.

FRANCE is worried by the admitted fact that Germany has developed a military air fleet of considerable size. composed of modern pursuit and bombing planes, and Gen. Victor Denain, French minister of air. estimates that by January the reich will have from. 1,000 to 1,100 of these machines, swifter and better than those possessed by France. Consequently he has asked the chamber of deputies for about \$230,-000,000 to finance a program for re-

covering the ground lost by French aviation. The task is already under way, \$32,500,000 having been spent out of an appropriation for modernization.

HUGH R. WILSON, American am-bassador to Switzerland, laid before the disarmament conference in Geneva a proposal by the United States for international control of arms traffic and full publicity to prevent secret arming of nations. The proposal was well received by most of the delegates, and it will be studied by committees in January.

By the American plan each government would license its manufacturers of munitions for five year periods. No reserve stocks would be allowed and manufacturers would be required to present bona fide orders before receiving a license. Details of war vessels built for other nations would have to be reported. Reports of licenses and orders would be turned over to a central committee at Geneva and made a matter of public record. A permanent commission, including a member from each signatory nation, would

be empowered to investigate transactions. NOTABLES of the Catholic church gathered in Chicago from all parts of the world to take part in the silver jubilee of Cardinal Mundelein, ago. The pope sent his personal greet-

a petition addressed to the President and congress the National Economy league has presented a definite program for balancing the federal budget in the coming fiscal year, holding that only by balancing the budget can sustained national recovery be accomplished. The petition proposes heavy reductions in government expenditures

and additional taxes totaling \$935,000,-

NOT so pleasing to the industrialists were the two speeches the President delivered during his inspection of the Tennessee valley project, for if his predictions are borne out, his "revolution" will bring about the death of private enterprise in the power industry. At Tupelo, Miss., he declared himself flatly for public ownership of public utilities, saying: "What you are doing here is going to be copied in every state in the Union before we are through"; the allusion being to the fact that Tupelo has contracted for TVA power.

In Birmingham the President said: 'I am aware that a few of your citizen. ry are leaving no stone unturned to block and harass and delay this great national program. I am confident, however, that these obstructionists, few in number in comparison with the whole population, do not reflect the views of the overwhelming majority. "I know, .too, that the overwhelming majority of your business men, big and little, are in hearty accord with the great undertaking of regional planning now being carried forward."

 $F_{\rm through}^{\rm ORTY-FIVE new bills were pushed}$ in five days with Senator Huey Long on the rostrum telling the legislators just what to do, but seldom stopping to tell them why. The "Kingfish" says he now is in position to make the state a Utopia, or rather, in his own words, the kind of state nobody has dreamed of." It is the general belief that he hopes his "share the wealth" program will ultimately land him in the White House.

The senator's most ambitious legislation is the statute proclaiming a twoyear moratorium for harassed debtors. Another bill sets up a civil service commission, composed of state administration leaders, with power to re-

move police and fire chiefs. That will give Long control of virtually all muwho was consecrated a bishop 25 years | nicipal policemen and firemen. Long said the bill was intended to take them "out of politics."

TRANSPORT AID

Secretary of Commerce Roper has announced the appointment of Labert St. Clair of New York as transportation assistant secretary of commerce. Mr. St. Clair has specialized in rail and motor transportation for 15 years, and is familiar with other forms of transportation. He is the author of a standard history of all types of land, water. and air transportation used since the birth of civilization.

helped her in other ways to win an education. She is taking a secretarial course.

Clara was fifteen that day in March. 1931, when the heroism she and two others showed caught the headlines of newspapers all over the nation.

It was the story of twenty pitiful children and a courageous bus driver pitted against the worst storm in the history of southeastern Colorado. On the morning of March 23 Carl Miller, thirty-three, driver of the bus, took twenty laughing children to Mount Pleasant school under threatening skies and with the mercury dropping

with the children. The wind ripped away at the pasteboard in the windows of the bus. Night came and still no car came to rescue the children. At dawn there still was no aid and Miller went for help.

All through the day Miller stave

He left the children, ranging in ages upward from six, in the care of Bryan Untiedt and Clara Smith.

Bryan and Clara kept the children moving within the bus. They had them pinch each other to keep them from falling asleep. They gave their meager clothing to the smaller tots. In the hours that followed five children lapsed into a heavy sleep and then into death, despite all that Bryan and Clara could do.

When aid finally came, the fifteen surviving children were rushed to a hospital where all recovered. Miller was found frozen to death not far from the bus.

Duke Who Lost Princess

Sidesteps Her Marriage

London .- The duke of Norfolk will leave London for India after obtaining special permission from King George of England to absent himself from the kingdom for six months.

As the hereditary earl marshal of England, the duke of Norfolk is responsible not only for the ceremonial at the opening of parliament, but also

for all royal marriages and funerals. His departure a few weeks before the wedding here of the duke of Kent, fourth son of King George, and Princess Marina of Greece has caused some comment. His departure is said to be due to the fact that two years ago he proposed marriage to Princess Marina, but because she was not a Roman Catholic the Vatican forbade the union. It was not desired that the duke of Norfolk, head of the Roman Catholics in Great Britain, should marry a Protestant.

Breeding Ground Set Up for Large Nazi Families

Berlin .--- A special breeding ground for large families has been erected at Altenhof in Thuringia, where nineteen "hereditarily healthy and efficient" familles have been settled in one-family homes which are to become their property provided they produce at least two children within five years and two more within the next five years. Families which do not fulfill this

zation is prescribed.

Suit Against College

College workmen overlooked the old wall, he alleged, and instead moved his all-important boundary wall. Inasmuch as the stone already was

part of the foundations of the new building, Maynard asked to be reimbursed in the amount of \$5,000.

Manuscript of Popular Hymn Sold for 24 Pounds

London .- The manuscript of Baring Gould's hymn, "Onward, Christian Soldiers," has just been sold at Sotheby's for £24, no great price for a hymn that has its full share of popularity and even of controversy. It was written for a Sunday school festival at Horbury, in Yorkshire, where the author was then curate. The bishop of the diocese raised objections to the lines, "With the cross of Jesus going on before," as savoring of ritualism, whereupon the author suggested the modification, "With the cross of Jesus

left behind the door."

Airplane Sends Radio

Message 15,000 Miles Chicago .- A record for long-distance radio communication between a transport plane and a ground station was reported by United Air Lines, following receipt of word from Col. Roscoe Turner, flying a Boeing transport in the London-Melbourne race, that his radio operator talked with San Francisco when approaching Melbourne, Australia, on the opposite side of the globe. In earlier tests from the big transport, Turner, when flying between New York and Washington, had talked with the Argentine.

Christ Was 5 Feet 10,

French Scientists Say

Paris .- Two French scientists, Professor Colson, of the French Polytechnic school, and Professor Vignon, biologist at the Paris Catholic institute announced that they had demonstrated the height of Jesus Christ to be 5 feet 10.9 inches.

Using infra-red rays, the scientists said, they photographed chemical stains on the shroud preserved at Milan, said to be Christ's. They found the wearer to have measured 1 meter 80 centimeters, they said.

The detectives presently located a blacksmith who lived near the lot where the skeletons had been found. He said that it bore a striking likeness to a man whom he had seen very often in that locality.

While all of this was going on the police department had been busily engaged in rounding up suspects.

On a fixed day it was resolved to make a test by having the friends of La Rosa, and those suspected of the murder, file past the reconstructed body.

It was a gruesome scene, these sons and daughters of sunny Italy marching in that procession.

One, two, three, five and ten, they filed by without any sign of emotion beyond a natural repugnance over looking at such an abnormal corpse. Presently a woman in the line wavered.

She was young, with an olive complexion, with great long black earrings, a large gilt breastpin and dressed in bright red and yellow.

Her face paled and she uttered a scream:

"Santa Maria! It is the ghost of Dominic La Rosa!"

Almost at the same moment she turned on one of the suspects in the line and cried out in a wailing voice: "You devil! Why did you kill him?" He was taken into custody, was this Giovanni Romana, and before nightfall another Italian, Victor Picciotto, living near the scene of the murder, was also arrested.

Both, charged with homicide, were held to await the action of the grand jury.

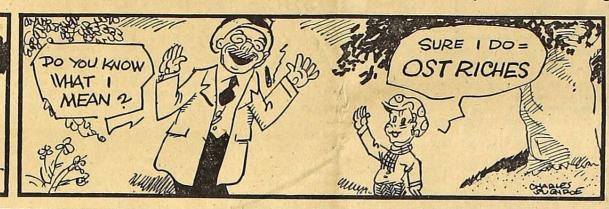

Lest it be forgotten, attention should be called to the fact that the idea and the work of reconstructing the body was due to Lieut. Grant Williams, of the New York police, and Dr. Pecchini, of the city testing laboratory. WNU Service.

Buttons on Men's Sleeves

Buttons on men's sleeves is an ornament of fashion of which the origin is unknown, but one story says the practice began with the Prussian king, Frederick the Great. He is supposed to have ordered a row of buttons sewed on the upper side of his army's coat sleeves in order to prevent the soldiers from wiping their faces with their sleeves, thus solling their uniforms. Later, the buttons were shifted to the side of the sleeves and became a matter of style.

Crime Laboratory Uses New Methods

Test Tubes and Microscopes Trace Criminals.

Washington .- Test tubes and microscopes, no less than machine guns and high-powered rifles, are the government's weapons in its relentless campaign against crime.

In a suite in the new Justice department building, Director J. Edgar Hoover of the division of investigation has established one of the world's most complete and modern crime laboratories.

Scientists in those quiet rooms, working over bits of hair, scratched byllets or fragments of paper, develop many of the clews that enable armed federal agents in the field to go after criminals with the certainty they are getting the right man.

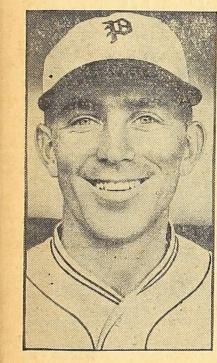

It was a laboratory expert. Charles Appel, who gave important evidence in the preliminary hearing of Bruno Hauptmann, Lindbergh kidnap-murder suspect. Appel analyzed Hauptmann's handwriting and held it identical with that in the ransom notes.

Typewriting Is Traced.

If a criminal seeks to protect himself by using a typewriter, he is scarcely less safe. On file in the laboratory are specimens of writing made on ev ery known make and model of machine In each are minute variations that stand out like a sore thumb-to the experts.

Messages written with "secret" ink

Bought by Giants

are secret no longer when the laboratory gets them. An ultra-violet light brings out most hidden writing in an instant and, if it won't, chemicals will.

Thousands of watermarks are on file, to aid in tracing the kind and source of paper used in ransom notes, extortion threats or other documents bearing on a crime. The laboratory is assembling specimens of the tracks made by all known kinds of automobile tires.

Hair Carefully Studied.

A bit of hair found at the scene of a crime may lead to important evidence. With a microscope and specimen of hair, the expert can tell whether the hair fell out, was pulled out or cut off; the race and approximate age of the person from whom it came. From the tiny oil glands at the roots they can even make a good guess as to whether the person was fat or lean. "Some people even claim they determine sex, height and other characteristics of a person from a sample of hair," explains Chief L. C. Schildren of the division's identification unit,

that far." More than one criminal has been con victed because of the fact that every gun makes minutely different scratches on bullets fired through it. Given the bullet used in a crime and a suspected gun the ballistics expert can determine quickly if that gun actually was used. The expert fires a shot through the gun. The two bullets are placed under

"but we don't think you can go quite

a double microscope, connected by a single eye piece. If minute scratches blend into a single image it is certain that the two bullets came from the same weapon.

White Enamel

THE RIGHT TO LIVE By

The universal demand is "the right o live." Whatever is necessary in or-

LEONARD A. BARRETT

der to achieve that end, man claims as his inalienable possession. When the privilege of earning one's daily bread is taken away. something mighty

serious is bound to occur. When men become hungry, not moderately but tragically hungry, they are not normal. The same spirit grips them as when the wild

beasts kill as well as risk all sorts of hazards in order to obtain food for their offspring. The innate right to live has been the cause of nearly all the revolutions in history. When the so-called upper classes claim the privilege of "let him get who can." the submerged population claim the same right, and then we have war.

Heads Auxiliary

from the cost, which may be consider able, there is the still more important matter of suiting the shoe to the foot. Adults who have trouble with their feet realize that shoes have a great deal to do with it. A child cannot know about such things. What he wants is new shoes and some children

are too easily satisfied. There are few things which please a little child's vanity more than to display on his feet a pair of new shoes. It is an event to be taken to the shoe store and have the sole attention of sales person and parent while various pairs of shoes are tried on, and discussed. Sometimes he feels rath-

er out of it, although the shoes when purchased are to be worn by him, for conversation quite over his head will go on about the shoes, and why they do or do not fit. All the time he is conscious of the ones which he likes best, and often insists on having a hearing.

6

While it is a wise thing to buy children's shoes rather big for them, it is unwise to get them too large. The shoes will not support the foot in just the right places. The instep of the shoes may come too near the ball of the foot, and the width will permit the toes to rub against the inside of the shoe. Adults find that corns are made worse, if not actually caused, by wearing shoes that are too large, as well as those too small.

A Child's Foot.

The bones of a child's foot are still in a somewhat formative state, and they should not be forced into strained positions, lest they become slightly deformed, not enough to show, but enough to give trouble later on.

The matter of high and low heels is one that should be taken into account in misses' and adults' shoes. It is now recognized that not every foot is best fitted with low heels. Some feet need high heels. But the reverse is more likely to be true, as more feet need low-heeled shoes than high. However, one woman I knew had constant trouble with her feet and finally went to a famous orthopedic doctor. He died of a broken neck." put her into fairly high-heeled shoes and she found that her "sensible" shoes had never been the kind for her feet. Part of her trouble was immediately relieved by the higher heels. the blister led the bird to kill itself. However a very small tapering heel

K EEPING children well shod is one in common. They focus attention on the problems of parents. Apart the thing or things of importance. It is of small value to prod a child's mind. He has other things to think about besides those parents and teachers want him to consider. A child's mind is not inactive. It may be miles away from the subject that is in the mind of the instructor, but there is too much that is new and strange in the world in which the child finds himself for him to be unresponsive to them. The young mind needs direction rather than stimulation.

I'll change my name!" "Mary! Why I thought you liked Scott Morgan! .

At that moment Scott Morgan entered. He was flushing furiously. His red hair seemed even redder.

"I had no intention of eavesdropping, Miss Sanders." His voice was like cold steel. "But I assure you I received no bonus on your brilliant ideas. If you had been content to wait until tomorrow, the end of the month, you would have seen I recommended you for a sizable increase in salary As for a girl changing her name for financial

reasons . . . social success . . ." "It is no concern of yours why I change my name!"

"It is my affair when you say you're changing your name because I got a bonus on your bright ideas. . . ." "You're insufferable! I loathe you!

I've always loathed you!" But tears ple's self approval. were in her eyes; her hands trembled.

myself, Miss Sanders." Now his voice was a white heat. "I trust your doctor has all the virtues I lack-every advantage that-"

Leslie Miller laughed hysterically. "Mary's not getting married! She's ly to get new vibrations. Doctor Urbanic is a wonderful numerologist. Why, did you know that Mark Twain never had any luck under his own name of Samuel Clemens? All the movie stars-"

"Not getting married?" Scott Morgan gasped.

"Hardly," Mary announced grimly. "Oh, no," Leslie went on. "There's name! Nothing but kindness that's not appreciated, virtue that goes unrewarded, brilliant-ideas that-"

"Leslie!" Mary's face was flushed. "I'm not exactly tongue-tied, and I didn't give you my confidence to uroadcast to the whole office force!"

"Im not the whole office force," said Scott Morgan with commanding authority. "I'm merely a man so in love with you that he almost went crazy when he thought you were going to marry some one else."

Leslie Miller discreetly withdrew.

If men and women would leave off bragging when they get out of their teens, we vaould be a happier and a better contented race.

The trouble is they keep on-that is too many of them do.

I never could see any reason for people's continually exalting themselves, unless it is a consciousness of inferiority.

Perhaps they are not really "sold on themselves" as the expression goes and feel they must constantly shout their own virtues and their own possessions in order to cover their defects.

But whatever is at the bottom of it, it is a bad habit.

In the first place it is always irritating.

Nobody likes to listen to other peo-

Nobody likes to hear others boasting, "And I do not exactly admire you, even if they are justified, as they occasionally are.

If you can do something extremely well you needn't be coy and retiring.

But neither do you need to shout to the housetops about it.

Basically we are all more or less just changing her name numerological- alike; to quote the old song "from the rich man who rolls in his millions of wealth, to the poor starving wretch in the street."

If we use such abilities as we possess, and keep on using them in good causes, we have done all that is expected of us.

But if we continually "put on the high hat" and sneer at others who don't, we not even a marriage vibration in her shall soon find that we have very few people to watch us achieving that operation.

. The very attitude that some people take is a boast.

Before you begin congratulating yourself that you are a little more important and a little wiser than others. check up and see if you can prove it. Do a little thinking and a little observing before you begin strutting,

There is practically no one living today who could not be replaced if he should pass out.

for \$1,980.

the right to have its daily bread. It is folly to attempt to stifle this inner urge. The English queen may have decreed that all unemployed persons either find work on a certain day or go to prison, but that does not always settle it. Prison bars may limit the activities of the physical, but have never yet silenced the power of the mental and spiritual forces. The Roman emperor murdered the martyrs. but the cause which led them to their death still lives, while Rome is only

charged with a spirit of "the struggle to survive." The so-called dole generously distributed is in danger of being pressed too far, especially when it lowers the morale. Some persons are endeavoring to rise above it; especially that person who modestly insists upon your acceptance of an article offered for sale instead of keeping the money you offered as an act of charity. The supreme need of the day is the preservation of self-respect, thus avoiding the menace of a lower standard of those values which constitute one's right to live. When mutual confidence has been restored the problem of unemployment will be solved and men will have the privilege of earning their daily bread.

Your Automobile

Your spark plugs fire over 10,000 "shots" in every mile. Worn or dirty spark plugs misfire and unburned gas discharges in the exhaust pipe without producing power. This wastes gasoline-usually one out of every ten gallons. Spark plugs should be properly cleaned and the firing points readjusted at least twice a year. This will save gasoline and give better pick-up.

SYNOPSIS

Prudence Schuyler comes to Prosperity Farm to make a new life for self and her brother, David, his health broken by tragedy. The second day on her farm Prue falls from the barn loft into the arms of Rodney Gerard, rich young man, a neighbor. There is at once a mutual attraction, but Pruat once a mutual attraction, but the dence suspects men since her sister's husband ran away with her brother's wife. Len Calloway tries to buy Prue's timber, but she contracts with Rod to dispose of the trees. David comes to dispose of the trees. David comes to the farm. Prue accompanies Rod and Jean, Rod's thirteen-year-old niece, to a circus. Chicot, an old clown, is ac-cidentally killed. He was the grand-father of Milly Gooch, one of the cir-cus riders. Rod became friendly with Milly when she lived on Prosperity Farm, Calloway intimidates laborers so that they cannot be bired to cut the that they cannot be hired to cut the timber for Rodney Gerard. Milly Gooch broke her engagement to Calloway; he believes Rod was the cause and has since been his enemy. After Chicot's death Rod calls on Milly to see if he can be of any help. Prue sees in a newspaper a flashlight picture of him with Milly. Rodney goes to New York for timber cutters, taking David with him to help select men from among the Rescue Mission hangers-on. Rod sends word of his coming, with a crew of laborers.

CHAPTER VIII—Continued

-12-"Light the lamp, Jean," said Prudence.

Jane Mack clutched her shoulder. "No! No! The convict might see and s-s-shoot. I know folks."

"Pull yourself together. Wait till I've drawn the hangings, Jean." "Don't go near those windows, Miss

Prue."

"Nonsense, Macky. All right, Jean. Light the lamp."

Spooky shadows cast by the wavering flashlight skulked into corners as a soft glow suffused the room. "That's better. The light will send

your bad dream hustling, Macky. Sit down and tell us what happened." Jane Mack twisted her bony hands. Jean, in her candy-striped pajamas, put her arm about Prue's waist. The woman sniffed.

"You two girls think I've had a dream, don't you? Well, I haven't. I was just getting into bed-I thought I heard a door creak down here. I stole down quietly. I didn't want to scare you. I tip-toed to this door. A man was flashing a 1-light over that!" She pointed a blanched finger toward the safe. "You'd left it unlocked.

"I knew in a minute 'twas the escaped prisoner I'd been expecting. I guess I gurgled. He pulled his hat lower over his eyes. Pointed his light straight at my face, so I couldn't see anything.

'Got you covered. Make a s-ssound, woman, an' I'll s-s-shoot!" he hissed.'

Prudence's eyes widened with in-

They were too early for the train. In the village they indulged lavishly in ice-cream cones, and still the minutes lagged.

"Let's drive out the pond road a little way, Jean." Prue's thoughts wandered. Why had

Dave decided to stay at High Ledges? It would make it awkward for her. Of course, she would want to see Dave daily; equally, of course, distrusting Rodney Gerard as she did, she couldn't go to High Ledges.

Rodney! She had wondered if Callowest. way had forged that letter about the check. After Jean's revelation about the photograph she had found in her uncle's desk, how could she doubt any more? Walter Gerard had been right, the unfinished word was love, of course. "Flitting from flower to flower"! Mrs. Walt had been right, too, her brother-in-law was unreliable. He was the type of man Julie had mar-

ried. She must put the Gerards out of her mind. They were becoming an obsession. 'Her own affairs needed all her attention. Who had stolen the jewels? The escaped convict? She did not believe it any more than she believed

that Walter Gerard was the thief. "Here comes Mr. Calloway in that snappy red car of his."

Jean's excited whisper set Prue's pulses quickstepping. Calloway on his way to the village! How soon was the train due? She pushed back her glove. Maddening. She had forgotten her wrist watch. Jim Armstrong had said: "I wish Calloway might be providentially called out of town an hour or so before that train arrives."

Evidently Providence was busy elsewhere. Could she stop him? "Success" was in line with the pasture bars from which a path-now a mere shadow under the snow-led uphill to the southerly boundary of her property, The Hundreds. That gave her an idea. She would ask him to show her the trees he wanted to cut. It would be adventure with a capital A to lead him off the scent, and she

arm. "Stop a minute! Drive the car home, K. K. Don't go to the village. At the crossroads take the turn to the right: that will bring you to the back of the red brick house.' "What's the big idea?"

loved adventure. She gripped Jean's

"I'll ask Len Calloway to show me where he wants to cut. If he consents, I will keep him away from the village until the new gang is at High Ledges.

"Good afternoon, Mr. Calloway." Prudence acknowledged the sweep of the dark-eyed man's ten-gallon hat with gay friendliness. "This is a clear case of thought transference. I suppose seeing that path to The Huncredulity. Could this vibrant, dramatic dreds brought you to my mind. I hate quarreling with my neighbors, it's so -so tenement-housey. Can't we arbitrate? Perhaps when you have time you'll tramp over the land with me

gang would be on its way to High Ledges, and Calloway was here! Prudence lowered her lids. She felt as If her eyes were twinkling stars of triumph.

"Suppose I agreed to let you cut my timber, would you still try to stop Rodney Gerard?"

Calloway, who had started on again, turned. Prudence stopped so as better to preserve the distance between them. His massive figure blocked the trail where it divided and ran east and

"Do you mean that you'll chuck Rod Gerard and give me the contract to cut? Do you mean that?" His eyes burned red as he hurled

the question. Perhaps it was the shadow of his theatrical hat that gave the effect. Whatever the cause, she didn't like it, Prudence told herself. She would back track as soon as she was sure the men were well away from the village. "Can't a girl change her mind?"

Calloway's eyes flamed. He caught her shoulder. She shook off his hand. "Don't !"

"Sorry. I didn't mean any harm, Miss Schuyler. Say listen, I'm a just man, but I don't stop at anything, get me, anything when I've been doublecrossed. I'll pay Rodney Gerard for interfering in my affairs-it goes back long before he thought of cutting timber-if I never do anything else in my life, but I don't want a fight with you. I'm crazy about you. Marry me, and I'll cut your logs, sell them, and turn the money over to you. You can have your own bank account."

"Oh, c-can I! You don't r-really mean it? Your romantic attack of the subject thrills me.'

She must not chuckle like that, and she had better cut out sarcasm, she

a little way down stream, looked familiar. She would wade to that. She Zowie, the water was icy. slipped on slimy, concealed rocks, splashed through pebbly shallows, plunged into a good pool.

WNU Service.

"I'll bet I gave the trout the thrill of their lives," she said aloud, as she pulled herself up by shrubs to the bank. A fresh blaze! She had seen Jim Armstrong slash it. She was on the home trail now! Better rest for a moment.

"Hullo-o-o!"

The call set her nerves vibrating. It didn't frighten her, but she didn't like it. It was too near. The woods seemed to be closing in on her. She hated the feeling. She couldn't be mistaken about this trail. She was sure that she had been on it before. She must get into

the open. She was freezing. She ran as swiftly as clutching bushes and treacherous tree roots permitted. Her cold, wet skirts lashed her knees; her teeth chattered. How long could she keep this pace? Darn! What fiend had looped that root across the trail? She picked herself up. Ooch! What a lump! Lucky she had

struck in the middle of her forehead, not under her eyes. What was that? Was she just seeing things, or was lt-it was a log cabin! She had been following the freshly blazed trail to her cabin instead of one to the clearing! What

difference did it make? There was a chimney. She could get warm. She stumbled toward it. Threw herself against the door. It opened! The breaks were with her! She plunged in. Lost her balance. Some one caught her.

She stared unbelievingly. Closed her eyes. Opened them. She was awake. Every hard-drawn breath had been wasted; every step she had run, every fall had been futile. Calloway's furious, triumphant eyes blazed down at her.

CHAPTER IX

Sudden, uncontrollable panic shook Prudence. In the tense silence she stared up into Calloway's inscrutable face.

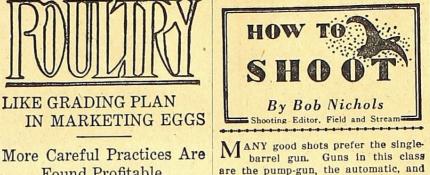

"Thought 'you'd double-cross me, didn't you? There are several trails to this cabin.'

At his harsh voice her mind and courage sprang to arms. -

"My cabin, isn't it? I had no idea it was so-so luxurious."

She forced her eyes to move slowly, as if appraisingly from the antlers over the fireplace to the water bucket on the bench by the door, on to the wood pile near the hearth with an ax leaning again it. That ax-she looked away quickly. Calloway must not suspect that it had seemed like meeting an unexpected friend.

"Rather nice. I came here the oth

also the so-called "over-and-under." The last named is really a double bar-

rel gun. But its barrels are superim-

posed, one on top of the other, so that

it offers the single-barrel alignment of

the true single-tube guns such as the

erence is that the single tube is easier

and quicker to aim. And more accu-

either type of gun.

rate to aim.

Found Profitable.

By R. E. Cray, Poultry Extension Specialist. Each year more eggs are marketed

on a graded basis. Along with this trend it is noticeable that poultrymen are taking better care of their eggs. And we are finding that the farm practices leading to better quality are no more difficult to follow than many of the practices now in vogue that lead to poorer quality.

Eggs, like milk, deteriorate. Because the egg comes in a sealed package, and its appearance seems much the same whether kept under good conditions or poor conditions, farmers have come more slowly to those practices that make for quality.

Here are the four practices poultrymen say lead to good quality:

Remove all cockerels from the flock as soon as the breeding season is ended.

Use good laying ration. It happens that the best laying rations also are proving to be the rations that give quality and, when the eggs are fertile, hatchability.

Produce clean eggs, by using good litter in nests, on the floor, and covering dropping boards with wire netting.

Gather eggs frequently. One poultryman reports saving time by gathering four times a day. He had less washing to do, he explained.

Guinea Fowls Marketed

Like Other Game Birds The marketing season for guinea fowls is during the latter part of the summer and throughout the fall. At this time the demand in the city markets is for young birds weighing from one to two pounds each. As the season advances, the demand is for heavier birds.

over an area perhaps ten yards on Guineas are marketed as game birds both sides of the target. I think this and, like game birds, are usually sold proportion is very nearly correct for on the market unplucked, although shots in the open. hotels and restaurants buy them plucked. There are three varieties of say in quail hunting for instance. "The principle guiding much of this work," he said, "seems to be that, if a small amount of iodine in eggs is desirable, a large dose of it would be much better. This is following the same rule which caused the Indian buck to kill himself with cough medicine." Minimum and maximum iodine requirements of laying birds and growing chicks, according to Doctor Almquist, are not known, and until they are, considerable caution in the use of lodine supplements is to be recommended, he said,

AS HE UNDERSTOOD SONG

Curtis, who has just passed the five-year mark, is getting a big kick out of kindergarten. His parents have been amused at the enthusiasm with which he has entered into the activities of the class, even though he occasionally has not fully understood what they were all about, He likes the games and drawing lessons, but his real delight is the music. Every day he has come home singing a new song, or snatches of it. Recently he astonished his parents by lustily singing a refrain that sounded familiar, but whose words were strangely twisted.

"What's that you're singing, Curtis?" his mother asked.

"Here We Go Around the Malberry Books," replied Curtis, who hadn't encountered mulberry bushes in his short lifetime .- New York Sun.

About Ourselves

The individual is an atom, but principles are eternal.

woman be the taciturn, dour spinster who cooked and scrubbed for her every dav?

Jane Mack swallowed hard, "All I could think of was the money you had tied up in those jewels, Miss Prue, an' what 'twould mean if you lost them. What was this old body of mine good for, anyway? So I yelled."

"I'll say you yelled. Then what did the man do?" Jean demanded. "Did he shoot?"

"If he did, I didn't know it."

"Perhaps he sneaked in to look around because he was born here or his father died here; we haven't had one of those old-timers drop in on us for a week."

Jane Mack sniffed. "Better look and see if the 'old-timer' got any of your Jewels."

"Never mind the jewels, Macky. I deserve to lose them for forgetting to close the safe. Sure you are not hurt?"

"Sure, Miss Prue."

Jean was on her knees before the safe frantically examining the white packets when Prudence reached it. She looked up with frightened eyes. "Gone!" she whispered.

"What's gone?"

"The emerald and diamonds !" * * * * "You ought to set the sheriff after that convict," Jane Mack insisted for

the third time the next afternoon. At the kitchen table Prudence was snipping the stems of the roses before placing them in vases of fresh water. Impulsively she put an arm about Jean's shoulder and hugged her as the child drew a long, hard breath. She knew what she was thinking, knew that she was remembering the look in her father's eyes as he had asked if the jewels were kept in the house. Of course, Walter Gerard had not stolen the gems, he wouldn't fall so low as that, but-

"I'll wait until Mr. David comes, Macky. He will be here so soon that we had better consult him before we enter complaint."

"Well, of course, if you can afford to lose that emerald and the diamonds, Miss Prue, it's up to you. If you'd seen what I saw in my teacup this morning-" With a sniff Jane Mack disappeared into the pantry.

* * *

Snug in fur coats, red beret and green beret making brilliant spots of color in the gray day, Prudence, with

and show me what to cut-but I'm detaining you. Drive on, Jean." "Just a minute!" Calloway's nearset eyes were triumphant. "What's the matter with now, Miss Schuyler? My business at the village can wait. What say if we take that tramp now? This snow won't amount to much."

Prudence smiled the most radiant smile in her not limited repertoire. "I'm all for it, if you are, Mr. Calloway. I'm the original 'Do-it-now' girl." She looked intently at Jean. "Wait

here, won't you, K. K. I---" "Don't have the kid wait. I'll take you home, Miss Schuyler."

"That would help. Drive very carefully, Jean, and straight home, remember. Tell Miss Mack that Mr. Calloway is personally conducting me over The Hundreds. Go out to the barn and tell Mr. Si. He and I were planning to set an incubator this afternoon, but that can wait." Having posted which two sentinels on the ramparts of protection, she stepped

over the bars that Calloway lowered. Why didn't the man speak? He was leading the way along the snowy path. Woods stretched endlessly ahead dense, dark, dismal. She didn't for an instant doubt Calloway's respectability, but she had a shivery sense of repressed fury smoldering under his urbanity.

"Here we are !" Calloway stopped to brush the snow from the top of a granite boulder. "See that B cut in the stone? It marks the southeastern corner of the tract your uncle purchased from my father. Here's a trail. We'll go in a little way so that you can see the quality of the timber." "All sweetness and light again, aren't you?" Prudence mentally addressed his

straight back as she followed him. He paused and turned. 'Sorry to have made trouble for you about your timber, Miss Schuyler, but when I say I'll put a thing through, I do it, no matter what the consequences

may be to anyone else." Prudence looked up at him. Wistfulness was entirely out of her line, but she did her best with voice and eyes.

"Suppose-suppose-is it too late to change my mind and let you-" The shrill whistle of a locomotive shattered the silence. The train had knockout after all. She had better Jean, backed the cart out of the shed. arrived! In a moment or two the get home. The trail on the other side,

Alle . Y. Soll and the

Prudence Darted Along the Trail Which Turned Sharply East.

warned herself. How long since the whistle had blown? She hated the eyes looking down at her. He was coming nearer. Perhaps he was a little mad. Violent-tempered people sometimes ended that way. Should she make a break into the woods. Of course, Calloway would follow, and somehow she would elude him. She couldn't get lost.

"Well?" "Really, Mr.-Len-you've surprised me so that I'm all jittery." Her laugh made no dent in his glow-

ering regard. "I'm not in the habit of snapping up an offer of a heart and hand. You must allow me time to think." She pushed back the sleeve of her cardigan. "My word! Have I dropped my wrist watch? I must go back. David gave it to me and I wouldn't

lose it for all the timber in the world. Please help me hunt for it." Her suggestion roused opposition, as

she had hoped it would. "We're going on. Looking the layout over was your idea. Don't be a quitter. I've got you here; you'll stay. I'll go back for the watch. I can find it quicker alone. Wait here."

Taking compliance for granted, he stalked back. As he disappeared around a bend, Prudence darted along the trail which turned sharply east.

She went on cautiously looking for the blaze on trees. No sign of human occupation. She stopped to listen. Was Calloway following? Did he think her a quitter? She wasn't. She was, to use a favorite legal term of David's, merely "in the exercise of due care," while she diverted his attention from the village.

The trees thinned. What was that ound? A brook! She couldn't be far from home if it was the stream which crossed her lower meadow. She climbed a high bank, drew a long, ragged breath of relief. No danger of being lost now. She had her bearings.

"Hulloa! Hul-lo-o-!" Calloway shouting. A thin gray fog of doubt dimmed her satisfaction in the success of her role of Providence. Perhaps her idea hadn't been such a

day with Jim 'Armstrong, but we didn't come in."

She was talking against time. Surely Jean must have reached the red brick house by this time. Must have told someone where she was.

"Better sit down," Calloway suggested with sickening suavity. He pushed forward a wooden chair. "Thank you. I prefer to stand here." Prudence caught hold of the great shelf of rock, which served as a mantel, with a grip which turned her nails white.

"Suit yourself. When you beat it, I figured that any path you'd take would lead here. I took a short cut and started the fire. There were red coals: someone's been using the place. Sorry I can't provide a lamp. It's getting dark outside."

If Prudence had distrusted the man back on the trail, she hated him now, hated his mocking smile to which the flickering light gave a Satanic twist. She took a step forward.

"Then we had better start home at once. I'm wet and c-cold." In one move he was between her

and the door. TO BE CONTINUED.

Dutch Guiana Once Was

Closely Related to U.S. Surinam, or Dutch Guiana as it is

usually called, was very closely related to the United States in one period of the latter's history, says a writer in the Chicago Tribune. At the Treaty of Breda, 1667, the British ceded Surinam to the government of the Netherlands as a partial payment for having seized New Netherland from the Dutch a few years before. Had this exchange not been made, and had the Dutch been confirmed by treaty in their possession of what is now New York, the United States might never have existed, since the most active agitators for

been divided by a foreign territory.

New England would, have been quickly subdued, and the other colonies intimidated. The map of America might still show the Spanish colonies of Florida, Mexico, Texas, and California; the French in possession

of the Mississippi valley, and the British as far south as the Columbia river on the Pacific coast. Perhaps, therefore, the United States may be grateful that there was an English claim to territory in Guiana, which could be traded to the Dutch for her claim on New York.

Watch the Water Supply

Water fountains for poultry are often counted expensive appliances. Those who keep only a small flock are apt to think ordinary open vessels which can be bought for a small fraction of their cost will do as well. The great advantage of the fountain is that it keeps the water much longer at the temperature it was when put in, and that in summer there is very little evaporation from it. On a hot. dry day water will evaporate from open drinking vessels so fast that they may be dry long before the time when they are usually refilled. Where the attendant is away from home all day, the consequence is that the birds cycle always has the right of way. are without water when they need it There are no exceptions and no exmost.

Poultry Affairs

Poultry houses should be ventilated at the top.

Poultrymen have found it costs just as much to feed a nonlaying hen as it many Danes unconsciously do so even

head," is caused by a microscopic mounting anything more unseemly germ affecting the skin and mucous than a rocking chair, sedately and noiselessly glide past on bicycles.

vision in watching his gun-or the man who shoots with one eye closedcan't begin to do this. After the first shot he is floundering, and when his eyes finally focus on the second bird he needs the range of a full-choke barrel to catch it-and the third shot on the cise is almost impossible. Moreover, usually he will be in the dark as far as knowing where all the rest of the birds flew to.

For the frequent shot one gets in thick woods and brush-especially on grouse, and quite often on quail-here I think the really good shot seldom sees his gun. His vision is concentrated about 80 per cent on the target and 20 per cent dispersed over an area around and ahead of the target. This is called the "snap" shot. It is pure, instinctive gun pointing. It can be extremely accurate. But it should be used only in emergency-never in open country where easy, deliberate aiming is possible. For the deliberate.

aim is the surest killer. C. Western Newspaper Union

Denmark's Bicycle Rider

Always Has Right of Way In Denmark, writes Harry A. Franck in "A Scandinavian Summer," the bicuses. Automobile drivers who dislike dodging bicycles ought certainly to leave their cars behind when they visit the little land of the Danes. True, most two-wheeled riders there usually hold out a hand to right or left when about to swerve from a straightforward route-so habitually, in fact, that on foot! and not a bad idea at that. But a cyclist may cut in from either

A Quaint Siamese Cart.

eignty.

Prepared by National Geographic Society, Washington, D. C.-WNU Service. eign affairs, Siam, in 1925, secured the ALAM still is oriental in spirit, but possesses modern occidental appointments of great variety. In assimilating things western, Siam

has maintained its distinctive individuality. Few countries offer more startling contrasts. It is not unusual in Siamese cities

to see policemen halting motor and street car traffic to make way for some kaleidoscopic medieval pageant. With modern hospitals and dispensaries available, many people still prefer medicinal concoctions made from rhinoceros horns, snake galls, and strange herbs. Slow-moving oxcarts and shuffling elephants vie with motorcars for the right of way on many country roads. Siamese Rebeccas in Bangkok fill their jars (or oil tins) with water at sanitary street hydrants. In some parts of north Siam tiger whiskers are considered much more effective in punishing an enemy than is a police court.

Yet, on the visit of the king and queen of Siam to the United States in 1931, when King Prajadhipok revealed his keen interest in athletics, radio, and motion pictures, and discussed in excellent English with newspaper correspondents and business leaders such things as free press and democracy, while the queen played golf, many people were amazed to discover how modern the royal family really was.

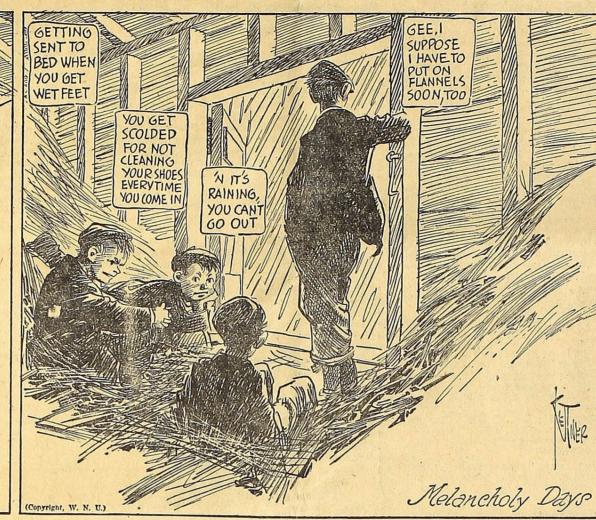

Again, through the forthcoming visit of the king for further optical treatment, the "Land of the Free" in Asia will meet our United States and mutual appreciation will be increased.

Siam a Land of the Free? Such is the meaning of Muang Thai, the name by which the Siamese have always known their country. Superficially, it might seem somewhat of an anomaly; for, until less than two years ago, when a constitution was born, Siam was the sole remaining absolute monarchy in the Family of Nations.

Yet the name Muang Thai has significance. Of all the numerous races and tribal groups who in successive migrations have swept down across southern Asia, only the Siamese have emerged victorious. Against many vicissitudes they have maintained their complete independence and forged themselves a modern state.

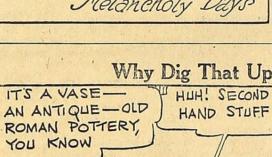

Now Quite Accessible. Today we can step aboard the magic carpets provided by Imperial Airways, OUR COMIC SECTION

Two-Piece Frock in Smart Design

PATTERN 2030

In this two-piece frock youth is deightfully served. Make it of one of the new fabric prints which look like wool, or of a smart sheer woolen. It suggests a suit in its trim lines and neat tailored finish. The yoke extends down the front to the edge of the jacket in a vest effect from under, which a belt partly encircles the waistline. The bow at the neck is extremely attractive in velvet. Think of it in rust color with the frock in two shades of green. With the diagrammed sewing chart which accompanies the pattern, even a young girl

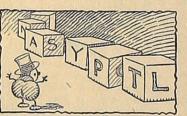

can easily make the frock. Pattern 2030 is available in sizes 10, 12, 14, 16 and 18. Size 12 takes

2030

21% yards 54-inch fabric, and 11% yards 4-inch ribbon. Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to Sewing Circle, Pattern Department, 243 West Seventeenth street, New York City.

ALL IN ORDER

Chandaburi province, bordering the

of the elongated Malay penisula, with its population gradually shading into almost pure Malay. Like lower Malaya, it is rich in minerals, especially tin, and also produces considerable quantities of rubber. In normal times an average of nine million dollars' worth of tin annually goes into foreign marts from these mines.

Eastward, westward, and northward from Bangkok stretches the vast alluvial plain of central Siam, level as a

Wild Tiger corps. Although that organization has since ceased to function, its spirit is carried on in a Boy Scout organization known as the Wild Tiger Cubs.

abrogation of outgrown extraterritorial

treaties and won her complete sover-

Education has become compulsory. More than 86 per cent of local schools and 50 per cent of government schools are situated in monasteries or are modern outgrowths of the old temple schools. In Bangkok, too, is a wellfunctioning university and medical school.

In the east of Siam, bordering on French Indo-China, is a wide mountain-encircled plateau, 300 feet to 500 feet above sea level and tilted slightly to the east, so that it drains into the mighty Mekong.

During the six-months' dry season this territory is very arid, and during the rains it is often heavily flooded; consequently it is the poorest section in Siam, and the people often have difficulty in securing a comfortable livelihood.

Until recently, when the railway was extended beyond Nagor Rajasima (Korat) to Ubol Rajadhani, the people were severely handicapped in getting their produce out to market centers. Considerable wealth, however, lies in the redwood and other forests located in the mountains. These and other resources will be developed because railroads and highways are being extended into the region.

Gulf of Siam, finds prosperity in its forested hills, in pepper, coffee, and in ruby, sapphire, and zircon mines.

Minerals and Rice. South Siam embodies about one-half

in ?"

K. L. M., and Air-France at London, Amsterdam, or Marseilles and be whisked away to this interesting oriental land in a little over a week, for Siam lies at the aerial crossroads of the Far East. Or we can go by boat and drop off at Penang, Singapore, or Hong Kong, as Bangkok is linked to Penang by train, to Hong Kong by local steamer, and to Singapore by both. In the long curving sweep of Bangkok's river highway, the Me Nam Chao Bhraya, is revealed the pageant of Siam's commercial activity. Many of Bangkok's 80 rice mills line the water front. Chinese junks and lighters clutter their wharves, with endless queues of perspiring, bare-backed coolies dumping baskets of rice in their holds. Other boats lift their rough matting sails and slip downstream to the offcoast island of Koh Si Chang, where deep-draft steamers take on cargo.

Nearly 90 per cent of all Siam's foreign trade moves up and down this waterway, accompanied by all the strange smells and cries peculiar to an oriental port.

As a capital city, Bangkok is not old. It is but a few years senior to Washington, on the Potomac. The New Rama I bridge, its enormous spans etched sharply against a background of colorful temples and water-front shops, gives the city its date line. This 475-foot structure, first to link the two portions of the city, was dedicated in April, 1932, in commemoration of the one hundred fiftieth anniversary of the founding of Bangkok and the reign of the present Chakkri dynasty.

Extensive festivities brilliant in oriental splendor attended its dedication. At six o'clock in the morning on that April day, after having said prayers and lighted incense before the statue of the Rama I, which stands at the approach of the bridge, King Prajadhipok, clad in ancestral garments, cut the thread of silk that barred the entrance. Then, mounting the golden palanguin, surrounded by parasols of state, and accompanied by the princes and high officials, he made the first crossing of the bridge.

American Influence. America has touched Siam in many ways. Through American missionaries and progressive schools developed in the country. Americans brought the first printing presses and also adapted the 44 consonants and 20 vowel and tonal marks of the Siamese written language to the keyboard of a typewriter.

Aided by American advisers of for- Indo-China.

table top-the rice granary of the country. It is the heart of the kingdom and the source of nine-tenths of its wealth. An area of roughly 50,000 square miles is enclosed between the high mountain backbone that extends along the Burma border and the battlements that face the Korat plateau.

What the Nile is to Egypt the Me Nam Chao Bhraya is to this fertile valley. Every year during the summer rainy season the river overflows its banks and stretches out through its network of canals and distributaries, depositing rich silt and providing the required water for the rice lands.

Nearly two-thirds of all Siam's export trade consists of rice. Most of the people devote their lives to its cultivation, and it forms the chief food for both people and domestic animals. Chiengmai, second city of Siam, was founded in the Eleventh century, and subsequently gained ascendancy

neighboring principalities. Because of its importance, it long sat on the fence between Burma and Siam and was pulled first one way and then the other, according to which rival sought by force of arms to claim its allegiance. Chiengmai is attractively located on the Me Ping, one of the chief tributaries of the Me Nam Chao Bhraya. Beyond it stretches a rice plain backed by the imposing 5,500-foot mountain of Doi Sutep.

Chiengmai's unsophistication is her chief charm. There are no hotels; only a railway resthouse. Visitors usually stay with friends. One associates Chingmai with Lao saleswomen. They come and sit on your veranda for hours, displaying beautiful handwork specimens of antique and modern silver, bronze, silk and lacquer ware which few can see and resist.

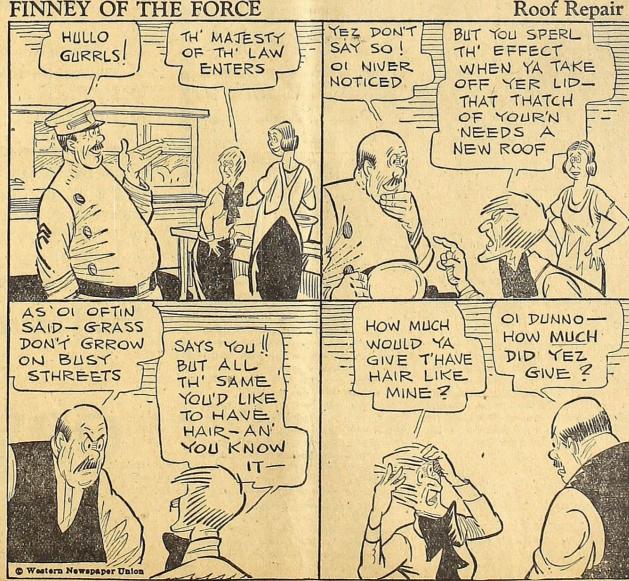

The staffs of several teak companies and of the missionary schools and hospitals comprise the principal foreign population in Chiengmai. One of the outstanding missionary enterprises in the city is the asylum for lepers. Many of these unfortunates are made comfortable in the excellent cottages provided for them. They are treated with the esters of chaulmoogra oil, and in many cases the disease is arrested, if not completely cured. So effective has modern medicine was first practiced been this work that the government now grants an annual subsidy toward

> its upkeep. Each year approximately 100,000 teak logs go down the river to Bangkok, 23,000 are routed by the Salween river to Burma, and another 8,000 ride the turbulent waters of the Mekong to

FINNEY OF THE FORCE

They had been discussing the habit of certain authors who do most of their work at night.

"When does our old friend Scrib bler do his best work?" asked A. "In the daytime," replied B "That's when he mows the lawn and keeps the garden generally in order."

Bug Railroad President-Well, I declare, there's a block system all ready for our new road.

Thought Revived Lionel-By jove, old fellow, when a man's in love he begins to think that his eyes are open for the first time!

Sympathizing Friend - Yes, and when it's all over he sometimes has the same sensation! - Vancouver Province.

Warning

-Montreal Star.

Mrs. B .- What made you count your change so carefully after paying our bill? Mr. B .- The clerk kept saying that "honesty is the best policy."-Border Cities Star.

Ambition He-I'd like to write the most pop-

ular book of the day. She-You think that is the way to fame? He-I don't give a hoot for the

fame, it is the way to fill a pocket book, and that's what interests me.

Not Missing Anything

Old Gentleman-Didn't I give you a dime just now in the High street? Tramp-Yes, sir; I've got a branch office there.

Her View of It

He-Would you marry for money? with no car in it.

Leader

Encouragement At an English theater they were playing "The Forty Thieves," and as the company numbered only eight, the entry of the robbers into the cave was achieved by their passing out at the back of the stage and entering again at the front.

Unfortunately one of the robbers walked with a limp, and when he had entered five times a voice from the gallery cried: "Stick it, Hoppy; last lap!"

Hard Luck's Limit

They were discussing their bad luck.

"Do you know, Bill," said one, "my luck is so dead out that if I threw a dollar bill into the air it would come down an income tax demand note."

Resented Imputation.

Specialist-This eccentricity you speak of in your daughter-isn't it, liter all, a matter of heredity? Mother (severely)-No, sir! I'd have you to know there never was any heredity in our family!

Length, Not Breadth First Voter-How long did the candidate speak, Bill? Bill-About an hour and a half.

First Voter-And what was it all about? Bill-He didn't say .- Exchange.

Seventh and Eighth Grades We are glad to have a short vacation.

The honor roll in our room for November has only two names: Norma Jean Musolf, eighth grade; and Norma Jean Musolf, eighth grade. We voted by secret ballot for the committee which is to have charge

of our Christmas program. We had a short impromptu pro-gram in our room during music class Wednesday afternoon. Miss Morris was unable to have her class. Ruth Clark read the President's Thanks-giving Proclamation and Mrs. Bige-low read a short story, "The Night Ruth Before Thanksgiving.

Third and Fourth Grades The following people were on the November honor roll: Evelyn Colby, Maxine DePotty, Rosalie Groff, Neil Libka, Hugo Wegner, Norma Lou Westcott, Wayne White, Betty Jane Ferguson, Ruth Giddings, and Betty Nelson.

Donald Britting and Donald West-cott visited our room Wednesday. Ruth Giddings was absent a few days due to illness. We enjoyed a Thanksgiving pro-gram with Mrs. Anschuetz's and Miss Myles' pupils Wednesday afternoon.

High Prehistoric Culture Evidence of high prehistoric culture has been discovered in eastern Oklahoma. Excavation of prehistoric Indian mounds reveals resemblances to the famous Hopewell mound region of

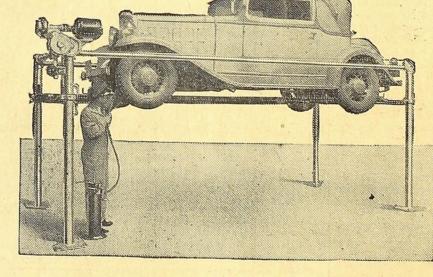

"Streamline"

Ohio.

The word "streamline" has been in use for a number of years in connection with hydrodynamics. It was defined by Horace Lamb in 1906 as "a line drawn from point to point so that its direction is everywhere that of the motion of the fluid."

First Weather Records The first weather records in America, so far as known, were kept by Rev. Johann Campanius, who recorded the weather each day in the colony of New Sweden near the present site of Wilmington, Del., for the years 1644 and 1645.

First Drama by an American The first drama written by an Amer-Ican and acted in America was "Gustavus Vasa," a tragedy, by Benjamin Colman. Harvard students gave a performance of this play in 1690 in Cambridge, Mass.

You often have admired the graceful lines and body design of your car---and probably have inspected the powerful engine under the hood---but we doubt if you have ever turned your car up side down to see what it looks like underneath.

Ou rnew Electric Lift gives you this opportunity. When your car is raised on this lift, we can reach the places that are hard to get at, and do a quicker and better job of lubrication. Bring your car in tomorrow and let us put it on the lift and check it over. We have the newest type of high pressure grease guns, and one of the most completely equipped lubrication services in Northern Michigan.
