TRIBE DOWNS OSCODA IN OVERTIME CONTEST

Indians To Play In Finals At District Meet Saturday Evening

East Tawas wound up its basketball season by defeating Oscoda, 24 to 19, in a two-overtime period game last Friday night. The up-staters showed glory in their loss, the kind of glory that only good sportsmen can develop.

Oscoda came back fighting in the second quarter, scoring three field goals while holding the Indians scoreless. The half ended with the count 7 to 3, the Blue and White hosts having the advantage.

Fighting from the toss-up, the teams jockeyed the ball back and forth, Oscoda running its score to 16 as the Indians made seven points in the third period. In the final regulation canto four minutes went by without either team scoring. Tawas ran up nine points and Oscoda tallied with a field goal and foul shot to send the score to nineteen apiece, closing the official game in a tie.

The first overtime gave the crowd a chance to exercise its vocal powers as both teams tried time after time to score. The three minutes ended with the score still tied up at 19-19.

Battling the ball upwards from a rebound of Lixey's attempt to score, George Staudacher accounted for the two winning points of the game. Just as the final whistle sounded, the referee called a personal foul on Staudacher. McCoy was given two free-throws. In three previous games there had been a similar situation—the score tied and Oscoda having the opportunity to win or equal with a foul shot. McCoy shot, and missed, clinching the game for the Indians.

Tawas has won fourteen games out of nineteen played this season. The Alumni, Alpena Central, Alpena St. Anne, and Standish have been the only teams to win over the Tribe this year.

Seeking to defend their district title, the Indians will meet the winner of the Harrisville-Standish game Saturday night for the Class C championship, the victor having the right to enter the regional meet at Mt. Pleasant next week-end.

'Imitation of Life' Claudette Colbert's Greatest Picture

Seldom, if ever, has there been such a combination of elements which mean good entertainment as there are in "Imitation of Life," coming to the Family Theatre, East Tawas, on Sunday, Monday and Tuesday, March 3-4-5.

Fannie Hurst's great novel, it will interest millions of women. "East Street" proved that Fannie Hurst understands thoroughly what women like to see in a moving picture.

Then there is the popularity of Claudette Colbert, who is an ideal heroine for Fannie Hurst's story. John Stahl searched for three months before he was satisfied even with Claudette Colbert. The minute her tests were seen, however, he knew that she was the "Bea" Pullman. A dozen leading men were discarded before John Stahl decided upon Warren William. These two are just now being acclaimed for their "Cleopatra." The cast supporting them is of real star proportions. A new baby star, this time a three-year-old one, named Paby Jane, plays the tiny daughter and for her work was given a starring contract by Universal. Rochelle Hudson plays the baby grown up, with Alan Hale, Ned Sparks, Henry Armetta, Louis Beavers, Henry Kolker, Alma Tell, G. P. Huntly, Jr., Wyndham Standing and Paul Porcasi.

Abandoned Fort Turned Into National Monument

Fort Jefferson, Off Florida, Has Glamorous History.

Washington.—Fort Jefferson, an abandoned fortress on one of the tiny Dry Tortugas islands off Florida, recently turned over by the United States navy to the National Park service, has a history that is "at once glamorous, tragic, and futile," says the National Geographic society.

"The Dry Tortugas lie some sixty miles to the west of Key West, like an afterthought to the main Florida Keys," continues the bulletin. "These isolated isles are nothing more than seven low bars of wind-swept shell and coral sand, sparsely covered with small bay cedars and palms, encircled by dangerous reefs, and uninhabited—except for a few faithful lighthouse keepers, and thousands upon thousands of nesting sooty and noddly terns."

"The fully bastioned brick and stone walls of Fort Jefferson, on Garden Key, once earned for it the nickname 'Gibraltar of America.' Long obsolete as a means of defense, the hoary stronghold now has become a national monument by Presidential order.

Futile Military History.

"Despite its resounding nickname, however, the dismantled and decaying Fort Jefferson has played a futile part in military history. Built in 1846, it was supposed to guard the ship lanes between Cuba and Florida, but even before it was completed the vast citadel was agreed to be a military mistake. It was garrisoned, however, early during the Civil war and held by federal forces throughout the conflict, serving as a prison after 1863.

"No enemy gun ever poured shot and shell into its barracks. A Confederate gunboat sailed cautiously within range in 1861, but it was frightened away when the commander of the fort trained upon the warship his full complement of guns—scarcely a dozen of which were loaded!

"Although it never figured in a military action, the grim old stronghold is no stranger to horror and death. Within its moated walls yellow fever suddenly appeared in August, 1867.

"All officers, including the surgeon, died, and for a time direction of medical affairs rested with a prisoner. This was the unfortunate Dr. Samuel A. Mudd, who had been imprisoned at the island fort because, when awakened in the dead of night, at his Maryland home below Washington, he had set the broken leg of a stranger who turned out to be John Wilkes Booth, assassin of President Lincoln. Doctor Mudd courageously tended the sick and dying until he, too, was taken ill. He recovered, and, because of his heroic efforts, was granted a full pardon.

Used in War With Spain.

"Fort Jefferson was finally abandoned in 1873, although it was tem-

porarily reoccupied by American troops during the Spanish-American war. Since 1900 it has been a ward of the Navy department. As a national monument it will be open to visitors. Already a force of relief workers has cleaned up part of the courtyard and is installing quarters for those who come by boat or plane and wish to remain overnight. Fort Jefferson is one of the least-known bits of American domain, because under navy rule it was closed to all visitors, and not even airplanes were permitted to fly over it.

"The Dry Tortugas possess a great many attractions for fishermen and naturalists. More than 600 varieties of fish abound in the clear waters of its enveloping reefs, and Bird Key has long been a national bird and turtle refuge.

"The Dry Tortugas owe the last part of their name to Ponce de Leon, who discovered the islands in June, 1513. Tortuga is Spanish for turtle. The famous explorer captured 170 of the reptiles there to replenish the larder of his ship. In 1565 that sturdy Elizabethan, Capt. J. Hawkins, homeward bound from a profitable voyage in forbidden Spanish waters, visited the islands. He loaded his pinnace with birds of species that still breed there by thou-

Non-Freezing Lake Gives Farmer Idea

Geneva, N. Y.—Farmer Dell had a great idea.

The farmer's inspiration came from a peculiarity of Seneca lake, one of the state's most famous beauty spots.

The lake seldom freezes, despite the fact that surrounding waters are sheets of ice. Only in the most severe cold spells will the lake develop more than skim ice.

Farmer Dell's idea, as he later admitted, was to fill the radiator of his automobile with Lake Seneca water, and save the cost of purchasing non-freezing agents.

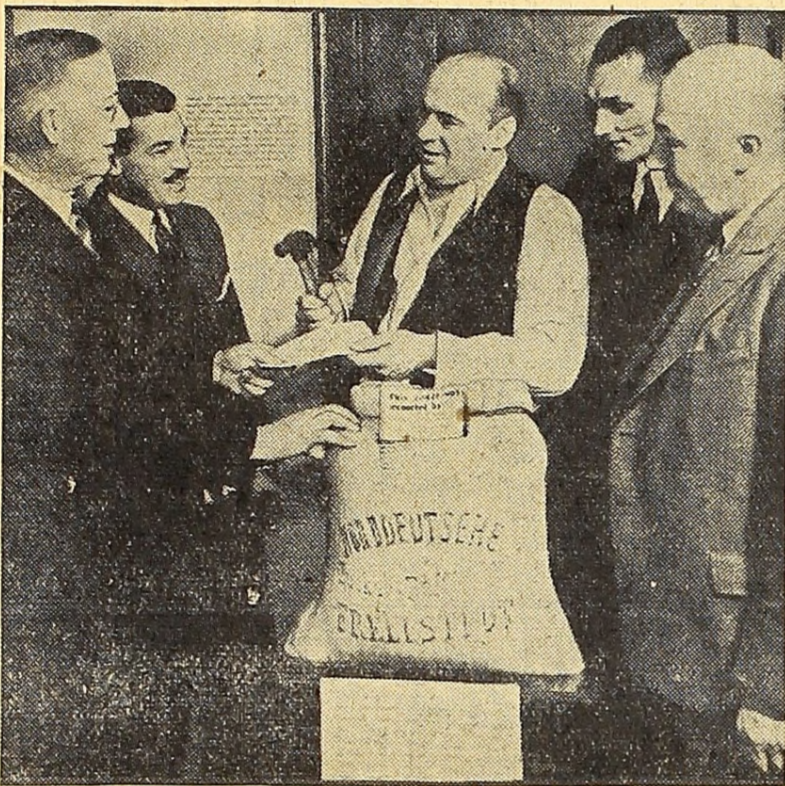

To his surprise, the water which would not freeze in Lake Seneca turned to ice so quickly during a zero cold wave that the radiator burst in several places.

sands, took the flesh and eggs of great sea turtles, and set down in his log notes that read like a page from Robinson Crusoe."

Germany's Quota of Sugar for U. S.

Going, going, gone!—all the sugar Germany will be permitted to import into the United States in 1935, all 79.8 pounds of it! C. W. Cole, auctioneer, is shown turning over the entire bag to B. F. Welch, after several minutes of feverish bidding. The sugar was purchased by Lamborn and company, New York brokers, at the Northern Sugar Refinery, Frelstedt, Germany, and brought to Chicago for exhibit during the convention of sugar refiners.

Plan to Explore Stratosphere by Rockets

Professor to Use Projectiles to Go 150 Miles.

Roswell, N. M.—Rockets equipped with automatic recording devices will be shot into the stratosphere to a distance of from 40 to 150 miles from the earth's surface from an especially constructed 60-foot tower near here this spring in science's latest attempt to penetrate the secrets behind cosmic rays, light rays and radio waves.

The experiments will be the culmination of months of work on the part of Dr. R. H. Goddard, head of the department of physics at Clark university, Worcester, Mass., who expects they will yield data of great value to science. One immediate beneficiary would be radio broadcasting.

The tower is rising in a shallow valley 25 miles from Roswell. In the

meantime Doctor Goddard is carrying out preliminary experiments on a farm four miles from here, aided by a staff of assistants.

The Guggenheim foundation is financing the unique tests. Roswell was selected for the site of the experiments because of unique atmospheric and climatic conditions.

The type of rocket to be used is 12 feet long and approximately 2 feet in diameter at its widest point. It is equipped with a parachute designed to be released at the highest point of its flight.

There is no danger of the rocket causing injury, Doctor Goddard believes, as he calculated it will return to the earth almost vertically, and its flight will be under control from the tower at all times. The tower site is 15 miles from the nearest settlement.

Advantages of the rocket ascensions over stratosphere balloon flights lie in the fact that balloons, to rise beyond 14 miles, must be of such great size and at the same time such light weight that construction dangerous to passengers results, according to Doctor Goddard. He pointed to the fatal outcome of the 72,000 feet stratosphere ascension of three Soviet Russians.

The date of the projected tests will depend on the results of ground experiments now being conducted here.

"There is a long period of testing before any practical results are certain," Doctor Goddard explained. "We will probably spend several months in the laboratory before any test will be made."

775 U. S. Planes Are Now Equipped With Radios

Washington.—A recent survey by the bureau of air commerce shows that there are 775 radio-equipped airplanes in commercial and private operation throughout the United States, whereof 345 are owned by the scheduled air lines, 246 installed in private planes, 135 in ships used by individual firms for business purposes and 49 in craft employed for air taxi and charter flights. Government-owned aircraft, such as that operated by the army, navy and bureau of air commerce itself, many of which carry radio equipment, was not included in the survey.

A considerable increase in the employment of airplane radio among private owners during the coming year is anticipated as a result of developments that have been under way for some

time with the "homing" radio compass. This device enables an airplane pilot to tune in either on Department of Commerce airways radio stations and course beacons or on regular radio broadcasting stations and fly directly toward them from any point of the compass.

Moon Looks Like Green Cheese, Asserts Expert

Washington.—Sweethearts may find romance in the moon, but it's just another piece of green cheese to Dr. Harry Burton, astronomer at the naval observatory.

Doctor Burton views the moon through a 26-inch telescope. He said the celestial body is made of pumice and volcanic ash.

Explaining why he thought the moon looked like green cheese, the astronomer said its upper quarter is full of holes, which are really extinct volcano craters. "This part resembles Swiss cheese."

Near the center and the lower half of the orb, he said, the surface is smoother and a darker green. This is caused by the setting sun and shadows cast by mountains. To Doctor Burton it looks like green cheese mold.

Find College Students' Honesty Nearly Perfect

Delaware, Ohio.—Ohio Wesleyan university students are "almost perfect" in the matter of honesty, believes Charles Hamilton, Y. M. C. A. president.

The "Y" has been selling examination books at a cost of one cent each. The books are placed on a table and students asked to drop their pennies in a box nearby. Although several thousand books have been sold, an average of only one in 100 is unaccounted for, Hamilton said.

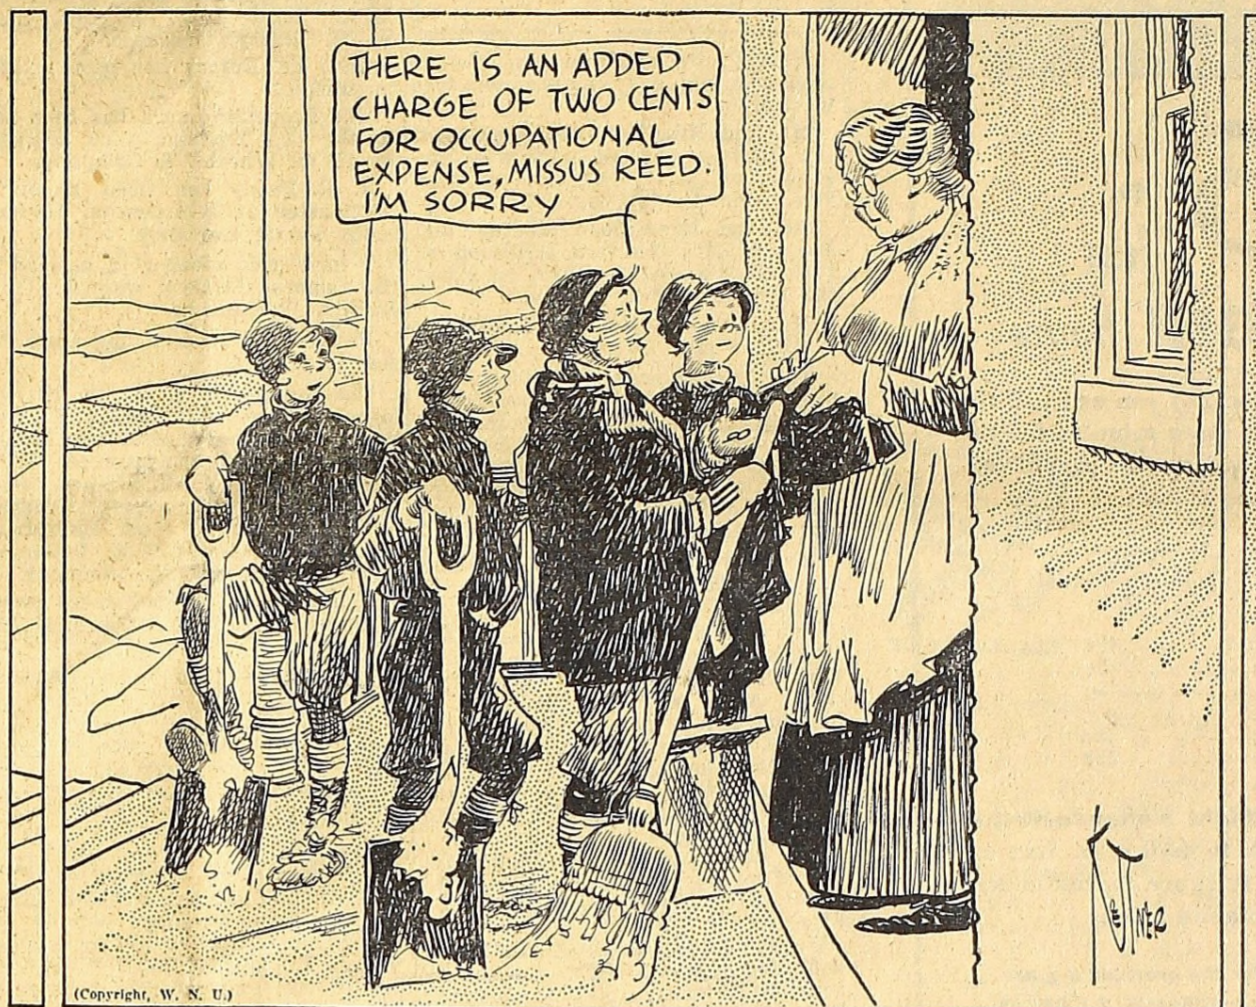

Fortune in Stamps Is Revealed in Waste Paper

Burlington, Wis.—An old receipt bearing a canceled stamp blew against the feet of Jay Land here and he picked it up. Trying to trace its source, he discovered that it came from a bale of paper which a junk man had taken from an old express office in a neighboring town.

Land bought the bale for 75 cents. It contained many more stamps of the Civil war period. He already has sold \$150 worth to dealers and has made one rare find that may be worth as much as all the others sold.

THIS FROCK "JUST RIGHT" FOR PLAY

PATTERN 9086

9086

For a tiny girl's play or school frock nothing could be very much nicer than this adorable little bloomer frock with its quaint over-the-shoulder yoke and prettily puffed sleeves. The frock is simple to slip into, too, buttoning up the front, with only three buttons to be fastened. And it allows plenty of room for romping—the skirt is gathered to the yoke at the back and box-pleated in front. A smart checked or plaid wool or cotton would be pretty for this frock—little girls always seem to love gay colors—and be sure to make up four or five of those crisp white collars in linen or pique. The bloomers, by the way, are included in this pattern.

Pattern 9086 may be ordered only in sizes 2, 4, 6, 8 and 10. Size 6 requires 2 1/2 yards 36 inch fabric and 1/4 yard contrasting.

SEND FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, STYLE NUMBER and SIZE.

Complete, diagrammed sew chart included.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth Street, New York.

"May I call on you?" Jinks asked the girl he met at the dance.
"Certainly not! I wouldn't think of it!" she snapped.

"Oh, I didn't mean tonight," he countered. "I meant one wet and miserable night, when I have nothing better to do."

No Wonder
"Is somebody sick at your house, Johnny?" asked the neighbor. "I saw the doctor going in there last night."
"Yep, pop is," replied the kid. "The stork brought mom triplets."

Leon Cadore left Wednesday for Florida where he will join the Brooklyn team at their spring training camp.

A box social was held Friday night at the Corrigan school in Reno township and was a decided success. Miss Eunice Clark and pupils deserve great praise. One of the features of the evening was a cake walk.

M. Jensen of the Iosco County Creamery of Whittemore attended a meeting of the State Dairymen's Association last week.

John Jordan of Sherman township left Tuesday for Lansing where he will resume his work with the State Tax commission.

George Hall of Grant township will dispose of his stock and personal property at public auction next Wednesday. P. H. Hammond is auctioneer.

Gill Bemis of Reno township has installed a lath mill and is prepared to do custom work.

Mosque of St. Sophia

The Mosque of St. Sophia was built at Constantinople as a Christian cathedral by the Roman Emperor Justinian, 531-552 A. D., in the form of a Greek cross, 269 by 137 feet with a flattened dome 150 feet high, set in a cluster of cupolas and minarets. The brick walls are lined on the inside with marble plundered from Greek temples. The Sultan of Turkey, Mohammed II, turned the cathedral into a mosque in 1453 A. D.

ANCIENT RABBIT HAIR

Hairs from clothing worn by people inhabiting the Southwest more than fifteen centuries ago were recently identified as those of rabbits by a biologist of the bureau of biological survey, co-operating with the Museum of Northern Arizona at Flagstaff. The hairs, for the most part in a good state of preservation, were obtained from a "Basket Marker II" burial cave in northeastern Arizona by the 1934 Rainbow Bridge-Monument Valley expedition. The biologist reports that they differ little from those of the present-day cottontail.—Literary Digest.

Normal Life Span 140, Says Voronoff

Gland Specialist Outlines a Plan for Longevity.

Calcutta.—"The natural span of life is 140 years, and I have every hope that one day we may prolong it to this period," declared Dr. Serge Voronoff, the famous exponent of rejuvenation here.
"Everybody who dies between the ages of seventy and ninety is a person who is 'killed,'" Doctor Voronoff added. "The problem is to find out how not to be so 'killed.'"
"Between sixty and seventy is a critical period. Death is awaiting us. Those who wish to survive in the unequal struggle have but one means of gaining their end—to replace their worn-out glands with young and active glands, which will impart a new impulse to the cells of all our organs, causing them to create new young cells and thus rejuvenate the whole organism."
His Methods Recognized.
Doctor Voronoff declared that the most eminent experts now recognized the efficacy of his methods and thousands of operations were being performed in Europe, and also in Japan.

The only difficulty was procuring an adequate supply of animals for the purpose. The ordinary monkey was not suitable, the specimens of the genera required being the gorilla, orang-utang, chimpanzee or gibbon.
Together with his beautiful young wife, Doctor Voronoff intends to go to Java, where he will spend some time conducting experiments on the blood of the orang-utang. Afterwards he will go to Indo-China to conduct similar research on the gibbon.
Different Blood Types.
Recalling his early work, the doctor said that at first he presumed that the blood of monkeys was of one type instead of the four types present in the human being. Some of the early experiments were not very satisfactory, but after long research he found that the monkeys had four types of blood also, corresponding to those types found in humans.
He therefore altered his methods to include tests of the blood both of the patient and of the animal to make sure that the types of blood corresponded. Then he grafted onto the human being the thyroid, pituitary and sexual glands of the monkey.
The results, he claims, are "highly successful." The change observed in the aging human being could only be described as "something marvelous."

Crosley Still Pioneering

Powel Crosley, Jr., president of Cincinnati Reds, during his first year at the head of the club, spent \$310,500 for the best young prospects available in minor leagues. Pioneer in other fields, he now is pioneering in baseball through the initiation of night baseball in the major leagues. Will spend \$50,000 in order to give the Reds the finest lighting equipment in the country. This pioneering is in line with his genius. Evident at age of thirteen, when he built an electric generator in the attic of his father's home in College Hill, using water power from a water storage tank. With this electricity he lighted his bedroom. There was no electricity service in that subdivision at that time, so it was unique.

Winds Steal Australian Soil

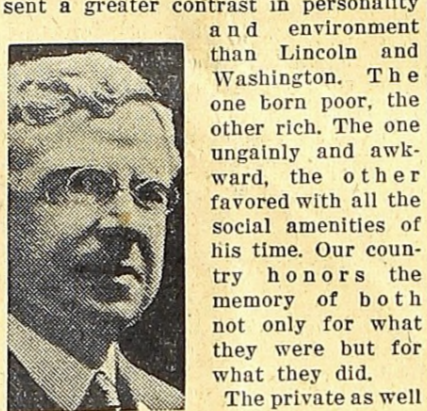

Hundreds of thousands of acres in central Australia disappear every year, according to researchers, hot winds carrying the surface soil high and far over the Pacific.

Potatoes Replace Torpedoes on Sub

Amsterdam.—Potatoes and onions—not torpedoes—are stowed in the tubes of the Dutch submarine K-18 now on a 23,000-mile trip from Holland to Sourabaya, Java.
The trip will be the longest ever made by a submarine, and will take eight months.
When provisions were stored aboard the 707-ton craft at Neuwedde, Holland, it was found that there wasn't enough room. The commander then decided it was better to leave two torpedoes at home, rather than bales of potatoes and onions.

OVERCOMING ENVIRONMENT
By LEONARD A. BARRETT

No two of our national heroes present a greater contrast in personality and environment than Lincoln and Washington. The one born poor, the other rich. The one ungainly and awkward, the other favored with all the social amenities of his time. Our country honors the memory of both not only for what they were but for what they did.

of Lincoln and Washington furnish a striking illustration of a successful effort in overcoming the influence of environment. Lincoln was forced constantly to fight poverty with all its handicaps and disadvantages. In spite of this he developed a mental poise and a convincing personality which was brilliantly demonstrated in his masterful debate with the illustrious

An Orange Belt Beauty

Betty Runkle, charming twenty-year-old miss, of Winter Haven, was chosen queen of the Florida Orange Festival, an annual midwinter event in her native city. She was selected from among 24 contenders for the honor representing as many orange belt communities, sponsored by chambers of commerce, women's organizations and civic and service clubs.

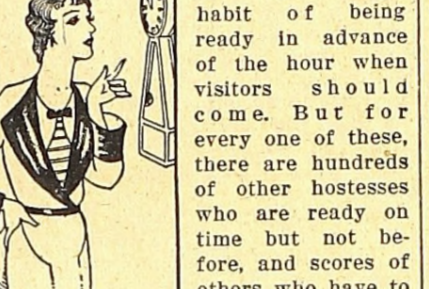

Douglas. A biographer writes "he was born as lowly as the Son of God." True. But there was also bequeathed to him certain powers which enabled him to master rather than succumb to his surroundings. The rail splitter truly became "a true-born kin of men." Washington with an environment as superior as Lincoln's was inferior, refused to be mastered either by its allurements or its proffered life of ease. When the country's call came to him he left his luxurious home on the beautiful Potomac and through service both as general and President, earned the title of "Father of his Country." His environment which offered a life of ease, did not master him any more than did his poverty master the Emancipator.
The power which enables any person to overcome the temptations and disadvantages of his environment is from within and not from without. Poverty and the loss of influence, never justifies crime or self-destruction. The possession of wealth and cultural advantages offers no excuse for indulgence or a calloused attitude toward human need. The forces of heredity are always stronger than those of environment. This fact is splendidly illustrated in the careers of both Lincoln and Washington.

Biologist Makes 5 Year Study of Fish in Texas

Houston, Texas.—Albert Collier, biologist at Rice Institute, has completed a five-year study of salt and fresh water fish in this region. His survey revealed more than 100 salt water and 25 fresh water species. The red-fish family, which includes the croaker, drum, sand trout, spotted trout, and the spot fish, is the largest of the salt water variety, while the bass species are the most prevalent of fresh water fish.

The Household
By Lydia Le Baron Walker

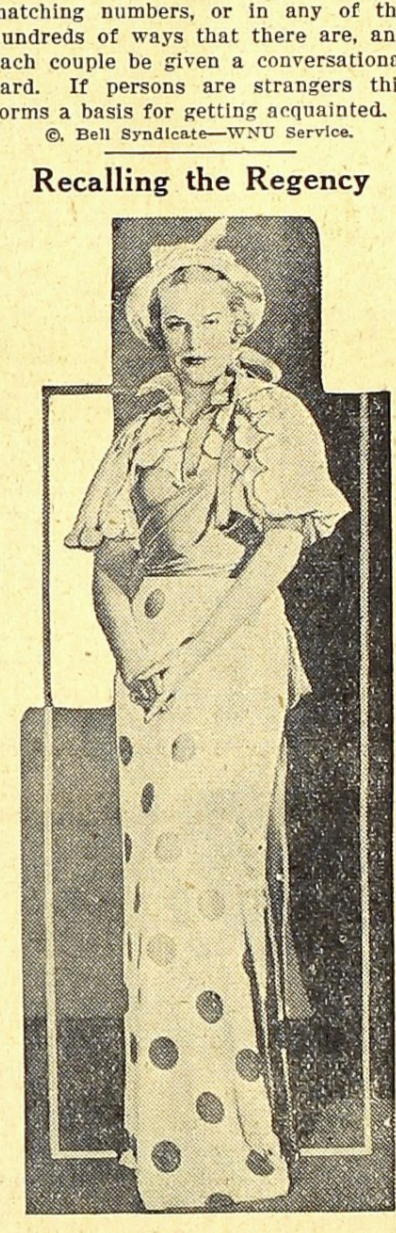

THERE is one social error that all of us can avoid, and that is arriving at a house before the time set in an invitation. It is preferable to be a few moments late than a few moments early. Few things are more distracting to a hostess than to be in the hurry of last moment preparations, and be caught not quite ready to greet a guest arriving before time. There are hostesses who have the happy habit of being ready in advance of the hour when visitors should come. But for every one of these, there are hundreds of other hostesses who are ready on time but not before, and scores of others who have to scramble to be fully ready on the minute.

What is essential for the one entertaining is to be ready to greet her friends at the appointed time, knowing that the rooms, the food and the entertainment are in readiness, also. She should plan to have at least fifteen minutes to spare before arrivals begin. Unless she does there will not be opportunity for the last minute extras which are sure to crop up. A hostess who is flustered when she welcomes her guests cannot be at ease, and this tends to make her friends a trifle embarrassed. Neither of these things gives a good start to the occasion.
An Unhappy Start.
It is the early guest who so often upsets plans. The unexpected, and really unwarranted, appearance of the too-early guest is bad enough when there are servants to admit the person, and assist in taking off wraps, but when the hostess has to do everything, which so often is the case, it is difficult for her to welcome the early arrival with the cordiality she wants to express. She must not give the impression of realizing her friend has come too soon, and this means she must not appear to have things wait for her to do.
Such a situation is awkward. It need not happen if we give a little thought to it. For example, if we find it took less time to get to the house than we had expected, we can walk around the block, or wait in some store, if there is one near enough. We must save our hostess from embarrassment by some method, and allow her the opportunity for readiness. We can arrive on the dot of time set, and feel no qualms if the hostess is not ready to receive us. It is for her to be ready then, and it is correct for us to arrive then—but not before. Most hostesses, however flurried during the final moments, are ready on time to welcome punctual guests with gracious hospitality.
Good Humor at Party.
Now that the season for entertainment is in full swing, it is well to consider how to keep what the Europeans call the humor of the occasion good. That is, how to keep everyone in a gay, happy, and contented spirit.

This is essential if a party is to be a success. An idea which helps decidedly toward this end is to have conversational subjects either of common interest to all, or so surprising that interest is created. This is particularly true when persons who are gathered together meet for the first time, or so seldom that they are entirely or partially strangers. Such an assembly occurs at club luncheons, church socials and suppers, grange meetings, etc.
Cards with controversial questions or subjects can be passed around, and different groups be given different topics. Or partners can be chosen by matching numbers, or in any of the hundreds of ways that there are, and each couple be given a conversational card. If persons are strangers this forms a basis for getting acquainted.

Painting Brick

Well-aged brick, stucco and concrete require no different paint from other exterior work. If these surfaces are not well-aged, however, they should be given special primers which usually contain tung oil varnishes. Any high quality house paint may then be used for the finishing coats. Or, if preferred, special stucco or brick coatings may be used. Ordinary brick, concrete and stucco are unusually porous. This porosity is an advantage from a painter's point of view because it allows the paint to penetrate deeply and thus secure a firm anchorage.

CHINESE DINNER PARTY

An English woman living in Siam, writes about a Chinese dinner. "Before the meal hot scented cloths were handed round on which the guests wiped their hands. No plates, knives, or forks were provided. The food was placed in a big dish in the middle of the table, and the guests helped themselves. For soup a china spoon and individual bowl were provided. Meat was taken out of the dish with chop-sticks. The following was the menu: (1) Crab meat and potato fritters; (2) shark's fin soup; (3) pigeon soup; (4) duck skin (the skin alone is roasted and eaten with a red sauce between bread); (5) pigeon's eggs stewed with mushrooms; (6) turtle soup with lotus seeds; (7) mushrooms stuffed with fish; (8) baked fish with ginger sauce; (9) rice with dried fish eggs, ginger, etc.; (10) rich custard, with fresh fruit and jelly; (11) China tea in bowls without milk or sugar.
"Hot scented cloths were again handed round, and this time they were much needed."

Constipated?

The doctors say... Use liquid treatment

Here is the soundest advice anyone can give on the subject of laxatives. It is based on medical opinion. We want you to have the benefit of this information no matter what laxative you may buy.
The secret of real relief from constipation is reduced dosage. You can't regulate the bowels unless you can regulate the help you give them. That is why doctors use a liquid laxative; the dose can be measured to a drop.
Avoid laxatives that you can't cut down in dosage; especially those that seem to require larger doses than when you began their use.
Under the doctor's care, you usually get a liquid laxative. The right liquid laxative gives the right kind of help, and the right amount of help. Smaller and smaller doses—until you don't need any.
The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara—natural laxatives that form no habit.

All building tradesmen and building trade businesses in the county are urged to register for the campaign with Eugene Bing of Tawas City, chairman of the Building Industry committee. It is highly important that the Building Industry committee, under the Better Housing campaign, have a complete list of all building trade supply dealers and all building tradesmen in the county. This is especially important because it will mean that new business and a co-operative spirit between the building tradesmen and the supply dealers and co-operation between them and the Better Housing campaign. Every effort must be exerted to make this campaign a success from the start.

Every effort must be given to carry the Iosco county Better Housing campaign at least an even parallel with the state-wide campaign during the month of March.

All civic interests must support this campaign which has so much potential benefit.

Forestry in Europe
France took up forestry only when the destruction of most of her forests was followed by heavy floods and the washing away of her hillside. Need for wood says the American Tree association, first caused the Germans to think of forestry, for there, where vines are long and severe, fuel wood is almost as much a necessity as food itself.

School Notes

High School

The first period was laid aside Friday afternoon for a short program. It was conducted by America Bell. The program was opened by the assembly singing "Yankee Doodle." Our speaker was Miss Morris, who gave a very interesting talk on the "unknown side of George Washington." Robert Fitzhugh kindly consented to entertain us with a piano solo, namely, "Patriotic Medley." Philip Giroux favored us with a reading of George Washington, and although some of his notes were missing, he struggled through it valiantly. Jean Robinson, one of the school's busiest gossips, read the "Scandal Sheet," and were our faces red! The program came to a fitting close by the assembly singing the song, "Mount Vernon Bells."

"King of Hearts and King Crooner! He put a Mythical Kingdom on the map with a map and a song." See Guy Robertson in "King Kelly of the U. S. A.," one of the features of the athletic benefit show, March 8, at the Rivoli. Help the boys earn their athletic equipment by buying a ticket for their benefit show March 8. A double feature program—"King Kelly of the U. S. A." and "Cheating Cheaters." Regular prices.

Leslie P. Keffen of Bay City spoke on the evening of February 20 at the Community House, East Tawas, concerning the financial situation of the schools. He pointed out that the income to the schools of Michigan had been cut by about 48 per cent during the past few years, while the other divisions of government are spending as much, or more, than ever. He made clear his opinion that it is impossible for the schools to effectively function without more financial support. As a result, he urged the support of House Bill No. 185, known as the Thatcher Bill, which proposes to give the public schools the sum of \$25,000,000 state aid, in addition to the primary school interest fund. Mr. Keffen is a Bay City business man, and a member of the Planning Commission of the state.

We note that the local Parent-Teacher Association at its regular meeting in February voted to instruct its secretary to inform our senator and representative that it desired to have them support the Thatcher Bill. This bill is designed to secure more financial support for schools.

"Famous Remarks"

Miss Crosby: "You remind me of Quebec."

Gordon Myles: "Why?"

Miss Crosby: "It's built on a bluff."

Miss Mackie: "Do we eat the flesh of the whale?"

Laurie Frank: "Yes."

Miss Mackie: "And what do you do with the bones?"

Laurie: "We leave them on the side of our plate."

Walter Zollwer: "Why don't you eat your apple, Robert?"

Robert Murray: "I'm waiting for Clark. It tastes much better when another fellow is looking on."

Mr. Giddings: "What are people called who are always trying to point out other people's defects?"

Tom Metcalf: "Teachers."

Miss Mackie: "Tomorrow we will take up miscellaneous work. By the way, what does miscellaneous mean?"

Bill Mallon: "Miscellaneous is the ruler of Italy."

Miss Crosby: "Have you read Freckles?"

Doris Brugger (blushing): "No, mine are brown."

Miss Crosby asked the pupils in ninth grade English to write a short essay and to choose their own subjects. Kenneth Smith sent in the following paper: "My subject is 'Ants.' Ants is of two kinds, insects and lady uncles. Sometimes they live in holes and sometimes they crawl into the sugar bowl, and sometimes they live with their married sisters. That is all I know about ants."

Mr. Forsten: "I do believe you are at least improving in your geometry." Effie Prescott: "Yes, my father went away and I'm doing it myself."

Bill Prescott (leisurely stretching himself with his feet in the aisle): "Don't step on those dogs, Nyda." Nyda Moore: "Do they belong to the 'Secret Service' too?" Bill: "Oh, no does." Nyda: "What is the matter with the other?" Bill: "That one belongs to the morgue."

Seventh and Eighth Grades
The following program was given in our room Friday, February 22: Pledge of Allegiance to the Flag; Song—Mount Vernon Bells; Edison's Life—John King; Charles Lindbergh—William Murray; Longfellow's Life—Kathleen Davis; Charles Dickens—Norma Musolf; Martha Washington—June Brown; George Washington—Mary Cummin; Song—America.

Third and Fourth Grades
We are enjoying our new library books we received last week.

The fourth graders memorized "The Bell of Atri" for their language lesson last Wednesday.

We had a Washington program last Friday afternoon with the primary and fifth and sixth grade rooms.

Primary Room
Fifteen pupils were absent Monday because of the storm.

On the honor roll for February are the following: Charles Curry, Dorothy Hill, Norma Jean Hill, Duane Leslie, Neil Thornton, Willard Timreck, Raymond Westcott, Marion Bing, Dorothy Dease, Wayne Hughes, Ardith Lake, Donna Moore, and Kathryn Westcott.

Those neither tardy nor absent during February are: Charles Curry, Norma Jean Hill, Duane Leslie, Neil Thornton, Raymond Westcott, Maurice Hayes, Norman Koepke, Jean

Mueller, Ruth Westcott, and Dorothy White. Gay Young re-entered school on Tuesday.

ciation. Iosco county is a member of this association. Therefore any farmer wishing to refinance his indebtedness or needing new capital to purchase feed, seed, livestock, etc., or make any other sound agricultural investment, can apply for a loan through this co-operative credit association. These loans like any other loans must be secured by chattel mortgage.

This is one of the many credit associations set up by the Farm Credit Administration to relieve the acute agricultural finance situation brought about by the closing of the banks.

If interested get in touch with Mr. Latter or Mr. McKenzie and C. Blumer, Iosco County Agricultural Agent. Mr. Blumer is in his office in the basement at the court house on Monday of each week.

The Fooling Game
"When you tries to fool yuh fellow man," said Uncle Eben, "you simply gives him a good excuse for foolin' you if he gets a chance."
