## TAWAS CITY

# Auto Collision Tuesday Is Fatal To E. J. Ogden

## DECEASED WAS PROPRIETOR OF GRAYSTONE INN

### Clarence Fowler, Driver Of Other Car, Seriously Injured

Elmer J. Ogden, owner of the Graystone Inn in this city, was fatally injured Tuesday evening in an auto collision on Lake street. Clarence Fowler, driver of the other car in the accident, suffered severe cuts about the face and the ligaments of his left arm were torn. The accident occurred at nine o'clock and Mr. Ogden died at Samaritan hospital, Bay City, two hours later from a loss of blood.

In addition to any internal injuries which Mr. Ogden may have received, his left arm, broken in two places above the elbow, was nearly severed. The hemorrhage from this wound was the cause of death.

Mr. Ogden, at the time of the accident, was on his way home from East Tawas. Mr. Fowler was driving to that city. At the corner of Beech and Lake streets the two cars collided. The left wheels of the cars had engaged, but with such force that the Ogden car, apparently, rolled over on its right side and slid along the pavement about 160 feet to the fence between the L. H. Braddock and Justin Carroll residences. The Fowler car swerved into the guard rail on the side of the street. Both cars were damaged beyond repair.

Mrs. Justin Carroll and Harold Colby were the first to arrive at the scene of the accident. A large crowd quickly gathered. As soon as the car could be uprighted a tourniquet was placed on the severed arm of Mr. Ogden. This Harold Colby accomplished by reaching through a window. About 20 minutes elapsed before one of the doors could be forced open and the wounded man removed from the car. Mr. Ogden was rushed to the hospital but he succumbed to hemorrhage. He did not lose consciousness and talked to those with him until a few minutes before death.

The deceased had been a resident of this city for about two years, coming here from Bay City. He is survived by the wife, five children: Junior, Billie, Audrie, Jerry and Janet, his mother and one sister, Margaret, of Bay City. He was 34 years of age.

The funeral services will be held Saturday morning from Holy Trinity church, Bay City.

The Twentieth Century Club will open its club year Saturday, October 5th, with President's Day being observed. Mrs. Horton will be hostess at the Horton cottage at Sand Lake. Mrs. Wm. Leslie and Mrs. Chas. McLean will serve as transportation committee.

A favorite recipe will be response to roll call. The president's message by Mrs. Campbell and reading of the by-laws by Mrs. Dora Mark will complete the program.

The following are the officers for the year: President—Mrs. May Campbell. Vice-President—Mrs. Lydia Bing. Second Vice-President—Mrs. Grace Mark.

Secretary—Mrs. Elizabeth Holland. Treasurer—Mrs. Annabel Davidson. An interesting program for the year has been planned by the program committee, and club members are looking forward to an active year.

**Hemlock Team To Play Colored Giants Sunday**

The Hemlock baseball team will play the Colored Giants, a powerful club from CCC Camp Hale next Sunday at the Tawasville diamond. The game will start at 2:30 o'clock. Owing to a conflict in the schedule the colored team failed to appear for last Sunday's contest but guarantees to be present for this game. Fans are assured an afternoon filled with "color."

**Notice**

I will be in charge of the Beauty Box, East Tawas, for the winter. Open from 9 to 6; evenings by appointment. Delta Leslie.

With the beginning of work under the new W. P. A. program there will be a demand for trucks and other construction equipment.

This equipment must be in first class mechanical condition and will be subject to a rigid safety examination. Anyone having such equipment for rent should register same with the local W. P. A. office at the City Hall, Tawas City, stating type of equipment and capacity.

## Coats--Wakefield

A very pretty wedding was solemnized Saturday evening, September 21, at the home of Mr. and Mrs. Wesley Coats in Grant township when their second daughter, Eleanor, was united in marriage to Erving Wakefield, youngest son of Mrs. L. D. Watts.

The bride was prettily gowned in blue crepe with an overlace top, and carried an arm bouquet of gladioli and ferns. Her sister, Miss Mildred Coats, acted as bridesmaid. Maxine Carlson was ring bearer. To the strains of the wedding march played by Mrs. Earl Daugharty they took their places at the archway beside the groom and his attendant, Roy Coats, brother of the bride. Rev. F. Metcalf performed the ceremony.

After the usual well wishes, the guests, numbering thirty-four, were served a sumptuous supper. The table was prettily decorated in pink and blue, the bride's chosen colors.

The newlyweds were the recipients of a number of pretty and useful gifts.

The groom has employment in Flint and the happy couple left for that city Sunday morning. They have the best wishes of their many friends for many years of happiness.

Guests from out of town who attended the wedding were: Mr. and Mrs. Smith and Mr. and Mrs. Walter Miller of Detroit; Mr. and Mrs. Carl Weckler; Mr. and Mrs. James Carlson and daughter, Maxine; Jos. Erwin, Mrs. Katherine Höcum and George Shutz of Flint; Mr. and Mrs. Earl Daugharty and Mr. and Mrs. Thomas Frockins of Reno.

## PROPERTY OWNERS IMPROVE TREES

Property owners of Tawas City and East Tawas are having their trees improved by trimming, spraying and "tree surgery" by the Johnson Forestry company of Manton, Michigan. Among those having this work done are: Mrs. Charles Curry, John Coyle, Mrs. L. B. Smith, Charles Moeller, Ira Horton, Isoco county (at the court house), W. A. Evans, Charles Pinkerton, J. K. Ozerby, Dr. O. W. Milton and Wm. DeGow. Mr. Johnston says that he has about three weeks of work now booked in the two cities and that he has had 15 years of experience without a dissatisfied customer.

## Askey--Binder

Miss Lillian Askey of Bay City and George Binder of the Hemlock road were united in marriage Saturday, September 21, by Rev. M. A. Sommerfeld at his home in Tawas City.

The bride was prettily dressed in white satin and carried a bouquet of yellow roses. She was attended by her sister, Mrs. Adam Birkenbeck, who wore a gown of blue lace.

Adam Birkenbeck acted as best man. After the ceremony, dinner was served at the home of Mr. and Mrs. Adam Birkenbeck to twenty-five relatives and friends.

The young couple will make their home in Bay City, where Mr. Binder has employment. Their many friends wish them a long and happy married life.

## Notice

All heirs of the Leonold and Kathryn Mueller estate are hereby notified to present their claims against said estate within 60 days of this date, July 18, 1935.

Mr. and Mrs. John A. Miller.

## LAST OF CITY HALL BONDS PAID DURING PAST TWO MONTHS

### Only Sewage Disposal Plant Indebtedness Remains

City Treasurer Mrs. Charles Duffey has announced that the last of the city hall bonds were paid during the months of August and September, of this year, and that the city has only the bonds issued for the construction of the sewage disposal plant, amounting to \$12,000, left, as bonded indebtedness.

With the retirement of the high interest bearing city hall bonds, the city will have to raise only three mills per year to retire its present bond issue, which reduces the yearly levy about six mills below the present level.

Other interesting data relative to the tax situation in Tawas City has been obtained from the records of the city clerk, especially as to the rates and valuation of taxable properties during the past ten years. The records show a reduction on the assessed valuation of the taxable properties of the city of over \$86,000 since the boom periods from 1925.

The lowest tax rate during that period was in 1928, being \$18.50 per thousand of assessed valuation. At the same time the assessed valuation of property was the highest that year of any during the ten year period. The highest tax rate during the period was \$25.00 per thousand in 1930. The tax rate for the year 1935 is one-half mill less than the highest rate with a 20 per cent lower assessed valuation.

City officials state that, even with the contemplated bond issue for the proposed water works system, the tax rate for the next year will be about \$2.50 per thousand less than the present rate.

## Whittemore Sportsmen Organize Gun Club

At a meeting held Tuesday evening at the McKenzie building the Whittemore Sportsmen's Association was organized. Much enthusiasm was shown and a large membership is expected. Weekly trap shoots will be held. At this meeting Dr. E. A. Hasty was elected president and Wm. Fuerst secretary-treasurer. It was decided to prepare a float for the parade at the Rose City Partridge Festival.

## AUSABLE APPEALS TAX ALLOCATION

Ausable township is dissatisfied with the allocation of the 15 mill tax as set up for that township by the Isoco County Tax Allocation board last July. The board allocated five mills for schools and two mills for township purposes. The township desires a larger portion of the township tax money and so a petition was made to the State Tax Commission for an appeal. The appeal was granted this week and a hearing will be held next Monday.

## TAWAS WINS OPENER WITH BENTLEY, 5-3

### Locals Take Lead In Series When Lixey Bests Dixon In Mound Duel

A three-run rally after two men were out in the eighth inning helped Mervyn Lixey, locals' star southpaw hurler, edge out J. Dixon of Bentley in a pitchers' battle at the athletic field here Sunday. Tawas won the contest, the first of a three-game title play-off series between the local team and Bentley, by a score of 5 to 3.

With the score close at all times, the game proved interesting throughout to the large number of spectators. Although spotted with several miscues by both teams, the contest also had a good share of fine fielding plays which brought forth hearty applause from the fans.

Bentley took a two-run lead in the third inning on a single by Hasso, Osocki's double and a single by Wilson after both teams had gone scoreless in the first two frames. The local boys cut one run off this margin in their half of the same stanza. Kasischke opened with a single, went to second when an overthrow was made in an attempt to trap him off first, took third when Quise placed a bunt down the third base line for a hit, and beat the throw to the plate when Mark grounded to first.

The visitors' other tally was scored in the sixth inning on an error, a fielder's choice and a single by Dixon. Mallon made a nice pick-up of Wilson's grounder and perfect throw home to cut off another run in the same frame by wiping Kozlow out (Turn to No. 2, Back Page)

## Woodward--Stepanski

Gerald James Stepanski, son of Mr. and Mrs. Jos. Stepanski of Tawas City, Mich., took for his bride Miss Margaret Izatys Woodward of Detroit, Mich., daughter of Mr. and Mrs. Phillip Woodward of 3150 Alter Road, Detroit, in a morning ceremony yesterday at the cathedral. The marriage service at 8 o'clock was performed by the Right Rev. Monsignor P. C. Brennan.

The bride wore a charming gown of white mousseline de soie fashioned in shirtwaist style with ruffled sleeves and trimmed with tiny rhinestone buttons. Her corsage was of yellow roses.

Mrs. Clement Jordan as bridesmaid wore a gown of wine colored transparent velvet and a corsage of red roses. Clement Jordan was best man for the bridegroom.

A wedding breakfast following the ceremony was served at Twist O' Hill Lodge.

The bride was born in Minnesota. She attended Detroit schools and was graduated from Highland Park high school. She held a clerical position at Motor Products Corporation.

Mr. Stepanski was born in Tawas City, Mich., and graduated from St. Joseph's high school. He completed the pre-medical course at the University of Detroit and was transferred from Detroit here. He now holds a position as inspector for the Burroughs Adding Machine Co.

After a short trip Mr. and Mrs. Stepanski will make their home at 203 South Winoske Ave.—Burlington (Vermont) Times.

## Gallagher--Merideth

Frank Gallagher of Oscoda and Miss Vereta Merideth of Harrisville were united in marriage Thursday morning, September 19, at the Methodist Episcopal parsonage in Whittemore. Rev. H. E. Davis performed the ceremony.

## Unusual Photographic Exhibit At Van's Studio

From October 3rd to 15th an exhibit of portrait photographs made by leading studios in this and other countries will be open to the public at Van's Studio, East Tawas, from 10:00 A. M. to 10:00 P. M. every day. This exhibit is made available because of the membership of Van's Studio in The Photographers' Association of America.

The exhibit includes some 50 large portraits, all by photographers whose names are internationally famous. All of the pictures were awarded medals or blue ribbons at the last International Convention of Photography in this country, and these 50 represent one of seven similar collections selected by the jury as being the best from a total of more than 4,000. The opportunity is not often afforded to see such a collection and Van's Studio is to be congratulated on its enterprise in bringing it to East Tawas and making it possible for residents of the surrounding community to see the pictures.

Van's Studio has been completely redecorated and refurbished during the past two weeks.

## Christian Science Services

Literary Club Rooms, East Tawas. Sunday, at 10:30 a. m.—Subject: "Reality."

## EAST TAWAS

Mr. and Mrs. Alfred Swales of Detroit spent the week end in the city with relatives and called on friends.

James McGuire and Wallace Grant of Detroit spent the week end at their homes here.

Cladys and Robin Gregory have left for Mt. Pleasant, where they will attend Central State Teachers College.

Mrs. J. McCray and daughter, Jane, spent Saturday in Bay City.

Lloyd and Rosemary McKay left for Ann Arbor, where they will attend the U. of M. the coming year.

Miss Rosemary Hickey spent the week end in Midland with friends.

Miss Vivian Harwood left for Alma where she will attend college again this year. Her sisters, Misses Mildred and Violet, will attend college at Mt. Pleasant.

Ranges, heaters, circulators. Trade in your old stove. Mielock Hardware & Electric Co. adv

Mrs. Ed. Haglund and son, who spent a couple weeks in Detroit, returned home Saturday.

Mr. and Mrs. John Zupon of Detroit are in the city with Mrs. Zupon's parents, Mr. and Mrs. P. Rupert, for a few weeks.

Miss Margaret Durant has left for Saginaw where she will attend business college.

The Ladies Literary Club will hold its first meeting of the year at the club rooms Wednesday, October 2, at 2:00 p. m. At this meeting Mrs. J. Harrington will give a report of the triennial meeting of the General Federation of Women's Clubs held in Detroit last June. Mrs. Eli Miller and Mrs. Rose Anker will act as hostesses. Members are requested to answer to roll call with current events.

New and used radios. Prescott Hardware, Tawas City. adv

The Ladies of St. Joseph church will serve a chop suey supper at the K. of C. hall Tuesday, October 1, 5:30 to 8:00. 35c. adv

Mrs. Anna Carpenter and Mrs. S. Ferguson returned home Thursday after visiting in Ann Arbor with their sister, Mrs. D. Lyman, who is very ill.

Mrs. Nyda Campbell-Leslie will present her pupil, Miss Elsie Ahonen, in a recital Saturday evening, September 28, in the East Tawas Methodist Episcopal church. The recital will be open to the public and the friends of Miss Ahonen are grateful for the opportunity to hear her sing.

Mrs. E. Lang and sister-in-law, Mrs. Roy LaBerge, of Detroit are in the city helping to care for their mother, Mrs. M. LaBerge, who is very ill.

Walter Klump left Saturday for Kalamazoo where he will attend college again the coming year.

Mrs. Herman Haglund is spending a vacation in Saginaw with relatives. Thos. Thompson of California spent Saturday in the city calling on friends.

Don't forget Sportsman's Night every Saturday at Prescott Hardware, Tawas City. adv

Mr. and Mrs. Chas. Conklin have left on a two weeks trip to Mackinaw and other cities.

Mr. and Mrs. Jas. LaeBrge and daughter, Ardath, who have been enjoying a motor trip, returned home.

Mrs. Jas. Daley and family spent the week end in Lansing.

Mrs. A. N. Hult and son, who spent a few days in the city with her parents, Mr. and Mrs. Thos. Oliver, returned Saturday to Chicago. Her parents took them to Flint and remained there over Sunday.

Circulating heaters, heating stoves, ranges. Trade in your old stoves. Prescott Hardware. adv

(Turn to No. 3, Back Page)

## Dante's Deathless Tale Of Purgatory A Film Classic

"Dante's Inferno," one of the most startling dramas ever produced by the motion picture industry, comes Sunday, Monday and Tuesday, September 29-30 and October 1, to the Family Theatre, East Tawas, with scenes of unmatched spectacle and soul-stirring sights that leave one breathless in their mighty sweep. The screen play is the drama of a modern transgressor which utilizes the symbolism of hell, as expounded in the Dante classic, to illustrate its theme. It provides for an amazingly graphic pictorial reproduction of that great spectacle in a sequence in which a kindly character and devotee of Dante's work, Henry B. Walthall, reads the classic to the principal character, Spencer Tracy, in an effort to make him see the error of his ways. The modern angle of the film, which has Claire Trevor in the leading feminine role, is closely linked with the spirit and atmosphere of its spectacular parallel, the story of Dante—both presenting the same moral, "the sins of yesterday are the sins of today, and human nature doesn't change."

# News Review of Current Events the World Over

## Crisis Nears in Italo-Ethiopian Embroglio—Mussolini Defiant, Great Britain Ready—Committee of Lawyers Hits Labor Relations Act.

By EDWARD W. PICKARD  
© Western Newspaper Union.

MATTERS in Geneva were rapidly approaching a crisis—a crisis for Italy and Ethiopia, for European peace and for the League of Nations itself.

The Italian cabinet, in which Mussolini holds eight portfolios, announced in Rome that Italy would accept no compromise and would not retreat from the course it has laid out in East Africa; that its military preparations were being intensified, and that its forces were adequate "to respond to any menace whatever."

Still more important, in the light of developments, was the cabinet's announcement of strengthening its military forces in Libya, where General Balbo has been establishing a strong line of air reports. This colony borders Egypt on the west, and there was immediately a lot of speculation as to whether Mussolini planned to attack the British empire in that region. Italian forces in Libya have received reinforcements of 40,000 men with tanks and field artillery, and are much stronger than the British forces in Egypt. If economic sanctions were imposed on Italy, Mussolini might well reply by threatening Great Britain in that quarter, by invasion and by arousing the native population to revolt.

Premier Laval's speech before the League of Nations was exceedingly clever but did not clear the situation sufficiently. While he gave assurance that France would abide by the league covenant and fulfill its obligations, he hinted that his government would demand in return that Britain enter a definite engagement to carry out the program agreed upon in London on February 3—an air Lercarno with automatic enforcement and the conclusion of Danubian and Baltic security pacts.

One after another the nations represented in the league announced their support of the British stand against Italy. If the British do not back down—and that seems unlikely—and if Italy persists in its adventure, the league will be called on to apply article 15 of the covenant. This requires the submission of any dispute, likely to lead to a rupture, to the council which must then try to effect a settlement. The council also will adopt as its own the report of the committee of five, which has failed to find a solution acceptable to Italy. The parties to the dispute are obligated to keep the peace for three months in any event, which would prevent an Italian campaign before the rains set in again in Ethiopia.

If in the next three months either side accepts the council's decision, the other party is automatically outlawed if it starts a war at any time in the future. In that case, the penalties against an aggressor as provided in article 16 must take effect automatically.

It is believed in Geneva that the penalty easiest to apply would be a general boycott of all trade with Italy. In that case the course followed by the United States would be all important. The European statesmen feel confident that they can count on President Roosevelt, once a war breaks out, to interpret cotton, wheat, and other raw materials as war material and under the American neutrality legislation forbid direct shipment to Italy and Ethiopia.

"Take a look at this," virtually said Great Britain to Italy as she massed a great fleet of powerful warships in the Mediterranean. Many of them were at Gibraltar, others at Malta and Alexandria and yet others at the entrance to the Suez canal. Practically the entire north Atlantic fleet was concentrated in the inland sea, and there was a chain of fighting vessels all the way from there to China—and every one of them was ready to defend the supremacy of the empire. The royal air force, too, was fully represented at the naval bases, and the shore garrisons were reinforced. This was John Bull's reply to Mussolini's defiance, and it might well give him pause.

"UNCONSTITUTIONAL" is the verdict of the American Liberty League's committee of 58 lawyers on the Wagner-Connery labor relations act.

"It is our belief," said the opinion, written in the form of a brief, "that the statute unnecessarily and arbitrarily infringes upon the individual liberties of the employer and the employee and is therefore invalid."

This is the first of a proposed series of opinions on recent federal legislation by the committee of lawyers. It was formulated by a subcommittee consisting of Earl F. Reed of Pittsburgh, chairman; Harold Beacom, Chicago; Harold J. Gallagher, New York; D. J. Kenefick, Buffalo; Harrison B. McGraw, Cleveland; Gurney E. Newlin, Los Angeles; Hal H. Smith, Detroit, and E. Randolph Williams, Richmond, Va.

Copies of the opinion were sent to all members of the full committee and

dissenting opinions were invited, but none were offered.

Raoul E. Desvernine of New York, chairman of the general committee, denied that it was "packed with Republicans," but he did not explain why no labor lawyers and no attorneys with New Deal leanings were appointed to serve.

Among the members of the committee are James M. Beck, nationally known constitutional authority and former solicitor general of the United States; Bainbridge Colby, secretary of state under President Wilson; John W. Davis, Democratic candidate for President in 1934; Joseph B. Ely, former Democratic governor of Massachusetts; Ralph M. Shaw of Chicago, former head of the Association Against the Eighteenth Amendment; James A. Reed, former United States senator from Missouri, a Democrat, and George W. Wickersham, chairman of President Hoover's commission on law enforcement.

Frank E. Morrison, American Federation of Labor secretary, said: "This committee simply represents the views held by special privilege and big business, which have always opposed every piece of legislation introduced in congress and the states to bring a little more happiness into workers' homes."

A. E. MERCKER, who used to be secretary of the Interstate Early Potato committee, has been made head of the potato section of the Agricultural adjustment administration, and his troubles are just beginning. Control of the potato crop is considered a natural sequence in the policy that is being followed by the AAA, and, like other parts of Secretary Wallace's agricultural plan, it is earnestly and as seriously condemned. Among those who oppose potato control is Porter R. Chandler of Genesee, N. Y., a gentleman farmer. He has advertised extensively his intention to grow and sell potatoes in defiance of the federal potato control act and invites prosecution.

Now, co-operating with Mr. Chandler, comes Norman C. Norman, a New York jeweler who some time ago defied the jewellers' code. He sent to the gentleman farmer an order for six or more bushels of "strictly illegal potatoes," and the order was filled at once. Norman suggested that the potatoes be routed through New Jersey to make the offense interstate, and offered to make more than one purchase, "as it is my understanding that the second purchase will entitle me to go to the penitentiary."

WHILE all the nation was celebrating Constitution day, the citizens of Pennsylvania went to the polls and voted overwhelmingly against the calling of a Constitutional convention for the purpose of "modernizing" the state's basic law which was adopted 61 years ago. Since the proposed changes were to have a decided New Deal trend, the Republicans looked on the result of the referendum as a victory of national significance. The revision was strongly supported by Governor Earle and the state Democratic organization and also by organized labor.

New Mexico voters turned down a proposal to boost their property exemption to \$2,500, along with four other suggested amendments to the state constitution.

WHEN the new Philippines commonwealth is formally born on November 15 in Manila, with Vice President John M. Garner officiating as its godfather, Manuel Quezon, for 20 years the leader of the fight for independence, will be inaugurated as its first president. In the recent election he and his entire ticket were victorious. The defeated rivals for the presidency were Emilio Aguinaldo, who led the rebellion against American rule years ago, and Bishop Gregorio Aglipay. They were virtually snuffed under.

Sergio Osmena was elected vice president, and victory of Manuel Roxas, Quintin Paredes and Camilo Osias assured the new president ample leadership in the unicameral national assembly, where he also will have a clear voting majority.

Quezon's term of office is six years and his annual salary will be \$15,000. The commonwealth will be a ten-year prelude to complete independence from the United States. Quezon, who is largely of Spanish blood, is fifty-seven years old. He has numerous friends and acquaintances in the United States and for a long time has been a frequent visitor in Washington in his endeavor to gain independence for the island archipelago.

RESOLUTIONS adopted by the Iowa Farmers' union in convention at Des Moines demand that President Roosevelt dismiss Secretary of Agriculture Wallace from the cabinet and halt "the program of hunger." The AAA was called "infamous, worthless and vicious."

MARRINER S. ECCLES, head of the federal reserve system, has been re-appointed by the President, and so will be chairman of the board that will put into operation the new banking reform law. Later the President will name six other members of the board. Mr. Eccles is the exponent of the theories that monetary control must be from a "national viewpoint," that the government should spend heavily in bad times to create employment and expand credit, and that it should tax in good years to reduce debt and prevent excessive accumulation of income.

PAID advertisements in weekly magazines of national circulation are now being used by the treasury to promote the sale of baby bonds. The aim of the campaign is to interest small investors in these bonds, the smallest of which sells for \$18.75, with a cash maturity value of \$25 in 10 years.

SIX hundred members of the German reichstag, all fervent Nazis, met in special session in Nuremberg and at the demand of Reichsfuehrer Hitler passed two laws bearing down hard on the Jews in the reich. The first of these new statutes prescribes prison sentences as penalties for marriages between Jews and citizens of German or kindred blood, and declares such marriages void if performed in a foreign country. Extra-marital relations between Jews and Aryans also are punishable by prison sentences. Jews are forbidden to employ women under forty-five years in their households after January 1, on penalty of imprisonment. Jews are not allowed to hoist the national flag, being limited to the Zionist blue and white emblem.

The second law provides that only a person who "belongs to the protective association of the German empire and is especially obligated to the reich" may be a citizen of Germany. This citizen must be of German or kindred blood and show that he is willing to serve the German people. Thus Jews and Germans of whom the Nazis disapprove may be excluded.

Hitler also put through a third law establishing the Nazi Swastika as the national and trade flag of Germany. The war ministry was instructed to adopt a war flag of black, white and red.

In his address to the reichstag Hitler said that by the laws adopted he hoped to deliver a fatal blow to Communism and Jewry.

THE Committee of Jewish Delegations has appealed to the League of Nations on behalf of the Jews of Germany, declaring that "the conscience of mankind will not tolerate that Jews should be degraded in this century as pariahs."

CHANCELLOR HILLER'S remarks about Memel aroused President Antonas Smetona to putting out the first interview he has granted in six years. In it he declared that Lithuania, relying to the utmost on the legality and justice of her stand and action in Memel affairs, is ready at any time to defend her position before the permanent court of international justice.

But should an effort be made to disregard legality and justice, in favor of force, Lithuania is prepared, stated President Smetona, to "defend Memel with all the means at her command."

Continuing, President Smetona said: "Memel is to us an economic necessity, not a political issue. We are too small a nation to engage in political bargaining, as we are too small a country to engage in contra-propaganda. Our only point is that Memel, containing Lithuania's only seaport, is an essential part of Lithuania. And the freedom and preservation of Lithuania is to her people a precious thing."

DEATH came to Jules Cambon, one of France's "elder statesmen," at Vervey, Switzerland. He was ninety years old and had lived in retirement since the close of the World war, though he was frequently consulted by high officials of France. His brilliant career as a diplomatist covered nearly 50 years. He served as ambassador in Washington five years.

COMPTROLLER GENERAL McCARL in a formal opinion held that there is no legal authorization for the federal government to pay out any funds for the construction of a furniture factory at Reidsville, Va. This has been a project especially favored by Mrs. Roosevelt. It was intended originally that the factory should make furniture for government offices and give employment to transplanted coal miners. A year ago McCarl refused to sanction an allocation to the factory from recovery funds. Then congress turned on the project on the ground that it discriminated against private industry. McCarl says the Department of the Interior went ahead with letting contracts for the construction, nevertheless, and the building is about 80 per cent completed.

RESOLUTIONS adopted by the Iowa Farmers' union in convention at Des Moines demand that President Roosevelt dismiss Secretary of Agriculture Wallace from the cabinet and halt "the program of hunger." The AAA was called "infamous, worthless and vicious."

Taxless Heaven Is Sought by Millionaires

NEWS dispatches saying that two of Canada's richest citizens were contemplating moving to the Channel Islands have directed public attention to that group of British isles. On one of them, Sark, no taxes are levied, and the only duty exacted of man is that he work on the roads two days a year. There are no automobiles or divorces and unemployment is unheard of. The island is ruled by a "queen," Mrs. Robert Hathaway. The picture shows the little harbor of Le Creux, Island of Sark.

## Bedtime Story for Children

By THORNTON W. BURGESS

WIT AGAINST WIT

IT WAS a dreadful game the hunter with the terrible gun and Lightfoot the Deer were playing in the Green Forest. It was a matching of wit against wit, the hunter seeking to take Lightfoot's life and Lightfoot seeking to save it. The experience of other years had taught Lightfoot much of the ways of hunters and not one of the things he had learned about them was forgotten. But the hunter in his turn knew much of the ways of deer. So it was that each was trying his best to outguess the other.

When the hunter found the hiding place Lightfoot had left at the warning things told the hunter which way Lightfoot had gone.

Slowly, patiently, watchfully, the hunter followed. After a while he stopped with a satisfied grin. "He heard that pesky Jay and circled around so as to get my scent. I'll just cut across to my old trail and unless I am greatly mistaken I'll find his tracks there."

So, swiftly but silently, the hunter cut across to his old trail and in a few moments he found just what he expected, one of Lightfoot's footprints. Once more he grinned. "Well, old fellow, I've outguessed you this time," said he to himself. "I am behind you and the wind is from you to me so that you cannot get my scent. I wouldn't be a bit surprised if you're back right where you started from,

There Was Only One Direction in Which It Was Safe for Lightfoot to Move.

of Sammy Jay, he followed Lightfoot's tracks for a short distance. It was slow work and only one whose eyes had been trained to notice little things could have done it. You see, there was no snow and it was only now and then when he had stepped on a bit of soft ground that Lightfoot had left a footprint. But there were other signs which the hunter knew how to read, a freshly upturned leaf here and there, a bit of moss lightly crushed. These

## QUESTION BOX

by ED WYNN, The Perfect Fool

Dear Mr. Wynn: I have been in America for the past six months without earning one dollar. I am an artist, having studied in France and Italy. I am an expert on portraits of women, having made a specialty of painting ladies' faces. Can you tell me why I cannot get at least one job?

Yours truly,  
MINNIE ATURE.

Answer: You are in the wrong country. In the United States you will find that all the ladies paint their own faces.

Dear Mr. Wynn: During an English lesson at a night school I attend the teacher said that the two words "recollect" and "remember" can be used in the same sentence and mean different things. If this is true, will you give me an example?

Sincerely,  
HANS N. FEET.

Answer: The teacher is right. I "recollect" lending a friend of mine

## Do YOU Know—

That John Adams lived to the oldest age of all the Presidents, being ninety when he died? Both he and Jefferson died on the fiftieth anniversary of the adoption of the Declaration of Independence.

## PATTY WENT TO SCHOOL TODAY

By ANNE CAMPBELL

PATTY went to school today  
It is lonely on our street,  
No small girl to smile my way,  
No bright curls and twinkling feet.

All her playmates are in school,  
Barry, Phil and little Nan—  
It was noisy, as a rule,  
On our street till school began.

Sometimes in the afternoons,  
When they took their naps at three,  
There were no bright baby tunes,  
And no voices calling me.

Now the morning breeze is cool,  
And September's sky is gray.  
All the sunshine is in school,  
Patty went to school today!

When Machines Were Needed  
Years ago the making of guns entirely by hand was one of the chief industries of Guilford county, North Carolina.

## MOTHER'S COOK BOOK

COMPANY ICE CREAM

ALMOST any of the fancy ices and creams prepared and served in the shops may be duplicated at home. Ice cream is one of the desserts that one always finds room for, no matter how hearty the meal. With the fancy brick ice cream ready to serve, many housewives find it a most attractive way of serving cream. The following are a few suggestions for using it in different desserts:

Cut cake, either sponge, angel, chocolate or caramel, using the kind appropriate to the cream served.

Take two slices of gold cake, put together with a slice of caramel cream, cover the sandwich with caramel sauce and sprinkle with toasted almonds.

Angel cake, strawberry ice cream and crushed berries for the sauce.

Chocolate cake, vanilla ice cream and a sauce of whipped cream and chopped nuts.

Fruit Sundae.  
Prepare a nut sauce, using chopped dates, figs preserved in sirup, marshino with the sirup and blanched toasted almonds. Prepare the fruit, using equal amounts of each finely chopped, adding the sirup to make of the right consistency. Serve vanilla ice cream with the sauce poured over it.

Mint Float.  
Boil one-half cupful each of sugar and water together for five minutes. Add the leaves from a bunch of mint finely chopped; there should be six tablespoons; add a scant half cup of lemon juice and let stand several hours or overnight. Tint with green color paste. In each glass put a tablespoon of the mint sirup, fill the glasses with ginger ale and add a scoop of lemon water ice for each glass.

Chocolate Cream Squares.  
Place a square slice of chocolate ice cream on a dolly-covered plate and cover with whipped cream, hot fudge sauce and chopped pecans.

Stitched black antelope is fashioned into this charming norman bonnet. A stiffened veil is cleverly manipulated to emphasize the slanting front line and to flare at the sides.

## Bathers Hail California Invention

BELIEVED to be the world's first motor-powered bathing beach cleaner, this odd mechanical monster successfully passed its tests at Santa Barbara, Calif., and is hailed with glee by bathers. It picks up and carries away rubbish of all kinds and sizes, from tiny bits of glass or nails and pins, to stones measuring five and one-half inches in diameter. The device "shaves" off the sand to a depth of four inches, sifts it thoroughly in a revolving hopper-screen, where all foreign objects are retained, and sprinkles the cleaned sand back in a smooth loosened layer.

\$25, yet I don't "remember" ever getting it back.

Dear Mr. Wynn: I am filling out an application for a job as a letter carrier. One of the questions is: "How far is it from Boston to Tucson, Arizona? What answer shall I give?"

Yours truly,  
WILL I. B. WON.

Answer: Tell the government if that is to be your route you don't want the job without an airplane.

Dear Mr. Wynn: According to my history teacher in school, Christopher Columbus took a couple of schooners and discovered America. Don't you think that is wonderful?

Sincerely,  
IZZIE LYING.

Answer: It was wonderful in those days but if Columbus lived today and took a couple of schooners of the kind of stuff they are making now, there is no telling what he would discover.

Dear Mr. Wynn: I am bookkeeper in an office where also works a pretty office girl. Yesterday we had an argument and she called me a "snake." Wasn't that awful?

Truly yours,  
I. PUSHAPEN.

Answer: Don't take it to heart. It sounds worse than what she probably meant. You see, you are a bookkeeper, meaning that you were an "adder."

Measles Serious Scourge  
Measles has been one of the most serious scourges of mankind, having sometimes wiped out whole populations.

# United States Ahead of Europe in Flying Boats

## Foreign Manufacturers Using Subsidies to Catch Up.

Washington.—Backed by large government subsidies aircraft factories in Great Britain, France, Germany and Italy are busily at work on huge flying boats aimed at catching up in the race for over-ocean trade routes of the air which the American system, Pan American Airways, now dominates. There is rivalry as between the European countries themselves, but all are bent upon a race with American aviation in the field of overseas flying in which the big Clipper ships constructed in this country are far in the van.

Few details of specifications for foreign boats have been allowed to leak through the cordon of military secrecy. Those craft that have reached the flying stage, however, have fallen far below the performance of the American ships. Great Britain, for example, started the testing of the first of her four-engine flying boats of new construction on a flight by easy stages from Plymouth to Singapore. Preliminary test flights of the Short Brothers craft showed that in efficiency it did not compare with the Sikorsky and Martin Clippers built here.

### New Boats for England.

Construction has therefore been begun by the air ministry for Imperial Airways of two six-engine, 35-ton flying boats for the domination of the transatlantic route to America. One of these ships is being built by Short Brothers and the other by Blackburn Ltd.

The French have had preliminary hard luck with the first of their ocean-going giants to be flown, the 37-ton Lieutenant de Vaisseau Paris. Powered with six 980-horsepower engines, this boat was constructed inland and then hauled to the sea in order to better preserve the secrets of its construction details and spring a surprise when it went into service for Air France.

The Pan American Clipper has twice crossed the Pacific, 2,410 miles between California and Hawaii at an average speed of 136 miles an hour and had sufficient gasoline in the tanks at either end for an additional 800 miles.

While the first of the three big Martin boats being built at Baltimore for the American airline weighs 26 tons

as against the 37 of the Vaisseau Paris, it can carry as great a passenger, mail and express load over ranges of 2,000 miles and transport them nearly 50 miles an hour faster and at one-third of the estimated cost per mile. The Martin, which will have speed trials in the next week or so, has already made 180 miles an hour in tests over Chesapeake bay.

### Italy Holds Speed Records.

Details of Germany's Dornier Wal boats for the South Atlantic service, except those comparatively small types which have been using the steamer Westfalen as a mid-ocean base, are unavailable here. Little more about Italy's big boats is available. It is known, however, that within the past year Premier Mussolini welded into one operating unit, government owned, all operating airlines under the Italian flag for the acknowledged purpose of a unified drive for a dominant place

## Chinese Remember College Rah-Rahs

Nanking.—The great impression which American university life has made on the Chinese national government was well illustrated at the annual meeting of the American University Club at Nanking. Six hundred graduates of colleges and universities in the United States attended the function, the vast majority being Chinese. Practically the entire 600 members are officials of the government. American college yells and songs showed that the Chinese had not forgotten their student life.

in the 300,000 miles of organized airways which now link the outposts of the world.

Under the impetus of this move Italy has already achieved world records for aircraft speed and distance. The lessons learned from the smaller aircraft making these records are said to be incorporated in long-range flying boats now under construction. Two of them are four-engine of 3,600 horsepower each.

## Dental Drug Makes Patients See Double

### Puts End to Choking Sensation of Gas.

London.—A jab in the arm instead of the choking sensation of gas is a new method of "putting you to sleep" in the dentist's chair.

The new drug is called evipan-sodium, and it has been in use for some months, not only for dental work but for more serious operations.

You sit in the chair. The anesthetist puts a strap around your upper arm just as in taking a blood pressure. A vein expands a little under the pressure. You feel a short jab of the needle.

In a second things become hazy. You feel delightfully tired. Then you sleep. There is none of that swelling, bursting, choking feeling that gas gives some people.

You do not suspect the surgeon and the doctor of trying to suffocate you.

In fact, you do not suspect anything. You do not even dream as you do under gas.

Meanwhile your teeth are being extracted.

Then you come round—slightly intoxicated. You see things double. You are not safe on your feet.

And this is the disadvantage of evipan. Unlike gas, you cannot go back to work after it. You must rest; and sleep.

But the evipan method is excellent for people who have had gas once and fear it.

Almost everybody can have it, if the dentist is given warning that it is wanted. The exceptions are people who have liver trouble or whose veins are too thin to take an injection.

## HEADS LABOR BOARD

Joseph Warren Madden, attorney, of Pittsburgh, Pa., who was appointed chairman of the new national labor relations board.

## Old Lifeguard of Seine Rescues More Than 100

Paris.—Paris nearly lost one of its remaining picturesque characters recently when Father Chartier, as every one calls him, caught a cramp and nearly drowned in the Seine.

Father Chartier is Paris' unofficial lifeguard. All passers who have occasion to cross the Pont St. Michel regularly know his little boat, moored to its quays. It carries a blue pennant on the one small mast, with the white lettering, "Volunteer Lifeguard."

Life saving is Father Chartier's hobby. He has actually rescued from the treacherous and swiftly flowing waters of the Seine more than 100 persons. He has 40 life saving medals. He made his first rescue when he was thirteen. That makes 49 years he has been a life saver. He is sixty-two now.

## Austrian Blind Will Be Aided by Yankee Couple

Vienna.—Through the efforts of Mr. and Mrs. Rufus Graves Mather of New York city Austria soon will have its own lighthouse for the blind.

When the Austrian Lighthouse is founded it will be the eleventh caring for the blinded poor of four continents, the North and South Americas, the Far East, and Europe.

Mrs. Mather, the former Winifred Holt of charity fame in New York, has interested Princess Fanny Starhemberg, Austria's vice chancellor, in the scheme.

It is proposed to organize the Aus-

trian Lighthouse at Lillfeld, where the blinded poor from all parts of Austria can gather to learn new trades. It will be conducted on similar lines to the blind institutions established in New York, Paris, China, Japan, and South America by Mrs. Mather and her husband.

## FANS LIKE THE UMP

Dolly Stark, National league umpire, is so popular among New York baseball fans that they recently presented him with an automobile. Dolly is here seen, at left, as he accepted the gift from Ford Frick, president of the National league, who acted on behalf of Stark's admirers.

## Professor Calls Five Hours' Rest Sufficient

Helsingfors.—Five hours' sleep a day are sufficient for the average human being, a German professor, Doctor Schiffhauser, believes, after experiments. In order to live a healthy normal life, he asserts, everyone should go to bed at 7 p. m. and rise again at midnight.

The following of such a spartan rule, he says, will avert all danger of suffering from neurasthenia and similar nerve troubles.

Experiments conducted by the professor on school children are stated to have given beneficial results.

## When Is a Rotten Egg Rotten?—Law Defines

Boston.—Just what constitutes a bad egg in Massachusetts has been established by an act passed by the legislature.

The definition, somewhat technical, specifies the depth of the shadow of an egg's interior under a testing lamp, and stipulates that the yolk must conform to uniform health standards now in effect.

Old Apple Trees Still Grow  
Marysville, Ohio.—Five apple trees which were planted by one of Ohio's first pioneers, Johnny Applesseed (Jonathan Chapman), are still growing.

## Frock That Puts Accent on Youth

PATTERN 9343

9343

Always a good beginning, this youthful tailored collar on the simple yoke makes a demure foil for the dainty softness of the bodice. The prettiness of the chic frock is furthered with a graceful flare sleeve—or it may puff, if you prefer. The results are so satisfying you'll find it real fun to run up this little dress in a dainty printed silk or cotton. A soft handkerchief linen would be stunning, too, and so easy to tub. Buttons and belt can pick up a color in the print and make a striking accent.

Pattern 9343 may be ordered only in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 requires 3½ yards 30-inch fabric. Complete, diagrammed sew chart included.

SEND FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Send your order to the Sewing Circle Pattern Department, 232 West Eighteenth Street, New York, N. Y.

## Smiles

### FORTUNATE FAMILY

Teacher—And what is your father's name.

New Pupil—It's Daddy.

Teacher—Yes, I know, dear, but what does your mother call him?

New Pupil—She doesn't call him names. She likes him.

### Hosses and Buggies

"Do you favor going back to the horse and buggy days?"

"No," said Mr. Dustin Stax. "We don't need Roman chariots. We can have airplane races and make martyrs of men because of their opinions."

### Popular, Anyway

"Did you see that tall, dark man at the wedding reception? He didn't take his eyes off me the whole time." "So I noticed, dear. He was one of the detectives guarding the presents."

### Chance to Save

"Every time they fire one of those big guns £200 goes up in smoke."

"Why don't they use smokeless powder?"—Answers Magazine.

## Notice of Election

To All Qualified Electors  
Notice is hereby given, that, pur-  
suant to the resolution of the Com-  
mon Council of the City of Tawas  
City, there will be submitted to the  
qualified electors of the City of  
Tawas City the following proposals  
to be voted on at a special election  
to be held at the City Hall of Tawas  
City on Tuesday, the eighth day of  
October, 1935, and that said proposals  
will appear on the ballot as follows:

### BALLOT NO. 1

For the issuance of full faith and  
credit bonds of the City of Tawas  
City for complete water works sys-  
tem.

Shall the City of Tawas City be  
authorized and empowered to borrow  
the sum of \$15,000.00 and pledge the  
full faith and credit of the City of  
Tawas City therefor, and issue its  
full faith and credit bonds to mature  
on September first, in years and  
amounts as follows:

1936 to 1945, inclusive.....\$500.00  
1946 to 1955, inclusive.....\$1000.00  
with interest at a rate not exceeding  
four per centum per annum, payable  
semi-annually on the first days of  
March and the first days of Septem-  
ber in each year, for the water  
works system?

Yes  
 No

### BALLOT NO. 2

For the issuance of Special Obli-  
gation Water Bonds of the City of  
Tawas City for a complete water  
works system.

Shall the City of Tawas City be  
authorized and empowered to borrow  
the sum of \$17,500.00 on Revenue  
Bonds payable, as to both principal  
and interest, from a gross revenue  
of the water works system including  
all additions and extensions there-  
to after deducting a sum sufficient to  
provide for the payment of adminis-  
tration, operation, and maintenance,  
and secured by a statutory first lien  
on and pledge of the gross revenues  
of the aforesaid charges. Said bonds  
to mature on September first in years  
and amounts as follows:

1938 to 1948, inclusive.....\$500.00  
1949 to 1960, inclusive.....\$1000.00  
with interest at a rate not exceeding  
four per centum per annum, payable  
semi-annually on the first days of  
March and the first days of Septem-  
ber in each year, for the water  
works system?

Yes  
 No

You are further notified that under  
the Constitution of the State of  
Michigan and the resolution of said  
Common Council any such persons  
having the qualifications of electors  
and having property assessed for  
taxes in the City of Tawas City, or  
the lawful husbands or wives of such  
persons shall be entitled to vote  
thereon.

You are further notified that the  
polls of said election will be open  
at seven o'clock A. M. and remain  
open until eight o'clock P. M., Eastern  
Standard Time, on said day and  
that said election will be held at the  
City Hall in the City of Tawas City.  
Dated, Tawas City, Michigan, Sep-  
tember 16, 1935.

W. C. Davidson, City Clerk.

Man's Relative size  
In size, man is midway between the  
smallest and the largest mammal and  
also midway between an atom and the  
smallest star. Collier's Weekly.

## TOWN LINE

Mr. and Mrs. Clyde Proper and  
daughter of Flint spent the week  
end with their parents, Mr. and Mrs.  
W. Proper.

Mrs. Gerald McIntyre and son of  
Bay City are spending this week  
with her parents, Mr. and Mrs. Jud-  
son Freel.

Howard Messler is spending a few  
weeks in Monroe.

Ira Bessey spent a few days last  
week in Detroit.

Don't forget Sportsman's Night  
every Saturday at Prescott Hard-  
ware, Tawas City.

Mrs. O. O. Keppel of Ohio spent  
the past week with her mother, Mrs.  
T. Winchell. Mrs. Winchell accom-  
panied her home for a short visit.

We wish Marshall Proper, who is  
in a hospital, a speedy recovery.

Mr. and Mrs. Harness spent Mon-  
day with their sister, Mrs. Jos. Ul-  
man.

Mr. and Mrs. Orville Proper and  
family spent the week end with their  
parents, Mr. and Mrs. Will Proper.

Mrs. Thos. Ulman is on the sick  
list.

Mr. and Mrs. Carroll Symons re-  
turned to Flint after spending a few  
weeks with the latter's parents, Mr.  
and Mrs. Joseph Freel. Mrs. Freel  
accompanied them home for a couple  
of weeks' visit.

Quite a number from here attend-  
ed the surprise party given in honor  
of Ephraim Webb, the occasion be-  
ing his 74th birthday. A fine lunch  
was served and a good time was en-  
joyed by all.

John Friedriehsen spent the week  
end with his mother, Mrs. J. Fried-  
riehsen.

Word was received here that Mrs.  
Omar Frank is recovering from a  
recent operation.

Floyd Ulman and Ervin Gauthier  
of Lewiston spent the week end  
here.

Women Can Stand More Cold  
As a generalization, women can stand  
the cold better because they have a  
thicker layer of fat under the skin.

58-Letter Town Called "Jlan"  
A town in Wales has a name con-  
taining 58 letters but it is called Jlan,  
the first four letters.

## Western Union Inaugurates Birthday Greeting Telegram

A twenty-five cent telegram for  
sending birthday greetings to any  
point in the United States, proposed  
by the Western Union Telegraph  
company and filed with the Federal  
Communications Commission, marks  
a wholly new departure in the tele-  
graph field. The texts of the birth-  
day telegrams are to be selected  
from a standard list of thirty mes-  
sages which have proven favorites  
for such occasions. This new service  
will become effective October first.

Riches of Croesus  
Although the riches of Croesus are  
proverbial, no exact figures or com-  
parisons of his wealth with that of  
present-day wealthy men are available.  
His riches were obtained chiefly from  
mines and the gold dust of the River  
Pactolus, and were greater than those  
of any king before him. He carried  
his love of splendor to extravagance.

Births and Deaths  
It is estimated that 150,000 persons  
are born every day and 100,000 die.  
The population of the world, therefore,  
is increasing by about 50,000 daily.

Columbia Gets Rare Document  
A document dated 1754 relating to  
the founding of Columbia university  
has been presented to that univer-  
sity.

## Citizens of Tomorrow

It is an obligation of good citizen-  
ship to pay taxes; it is an obligation  
of government to spend this tax  
money wisely. In common with many  
thousands of other citizens, Michi-  
gan Bell Telephone Company recog-  
nizes its obligation to pay a share in  
the support of the functions of  
government.

The Federal, State and other taxes  
paid this year by Michigan Bell  
averaged \$7.28 for each telephone in  
use. In total this amounts to more  
than \$3,225,000, of which \$2,737,-  
955.25 is in the form of payments to  
the State of Michigan. It is particu-  
larly pleasing to us that these State  
taxes go into the primary school  
fund for the purpose of educating  
our citizens of tomorrow.

Like all other citizens who have  
a genuine pride in the progress of  
Michigan, we appreciate the value  
and profound importance of an ade-  
quate school system.

And to the telephone users of our  
State it must be a great satisfaction  
to know that indirectly they make  
an important contribution to a  
school system entrusted with the  
education and character-molding of  
960,000 boys and girls—  
Michigan's school children to-  
day, her citizens of tomorrow.

The primary school fund helps  
support the State's clemen-  
tary, grammar and high  
schools. It erects and main-

For any furnace, stove, or boiler—

## Line your heater with FIRELINE

THIS new refractory material gives you more heat from less fuel. It gives you a fuel-burning surface that reflects the heat across the entire furnace. It is a fire-resisting material that stands up to the fiercest heat. It is a fire-resisting material that stands up to the fiercest heat. It is a fire-resisting material that stands up to the fiercest heat.

SEALS CRACKED FIREPOTS. Seal cracks and holes in firepot castings—fixes them better than new. Stops leakage of gases into the house. Cheaper than new castings. Not necessary to take down the furnace. Withstands 3000 degrees. Protects new castings against burning out. Get our quotation on Fireline for your heater. It will pay for itself in a short period in fuel savings. Packed in 2 1/2, 5 and 10-lb. cans and in 50 and 100-lb. steel drums.

VOL. VIII SEPTEMBER 27, 1935 NUMBER 46

Feeds We Carry in Stock: Corn, cracked corn, oats, ground oats, corn and oat chop, bran, scratch feed, middlings, barley, ground barley, wheat, and Blatchford's calf meal.

Sweetie: "These garters came from Paris."

Salty: "Very expensive, I suppose."

Sweetie: "Yes, they can't be touched in this country at any price."

Scratch Feed—100 lb. sacks, \$1.80; 25 lb. sacks, 45c.

When the umpire was leaving the grounds, after a game, he was approached by an irate fan. "Where is your dog?" demanded the fan. "Dog?" ejaculated the umpire. "I haven't any dog."

"The Helya haven't," bawled the fan. "You're the only blind man I ever saw who didn't have a dog."

Wife: "No, I did not sew a button on your trousers; I was too tired. Which is the more important, anyway—your wife, or your trousers?"

Husband: "Well, there are places I can go without a wife."

Just received a car of "Kazak" egg coal.

An old Indian came to town one day, and for the first time he saw a man riding a bicycle. "Huh!" he exclaimed. "White man heap lazy. Sits down to walk."

Father: "Daughter, isn't that young man rather fast?"

Daughter: "Yes, but I don't think he'll get away."

Mother: "Now, Willie, I want you to go in and get acquainted with the new nurse and kiss her nice."

Willie: "Yes! And get my face slapped like papa did."

"Are they very strict at your college?"

"Huh! Are they? Why, when a man dies in a lecture there, they prop him up until the end of the hour."

Default having been made in the conditions of a certain mortgage dated the fourth day of October, 1923, executed by Irving Beardslee and Jane Beardslee, his wife, of Burleigh Township, Iosco County, Michigan, as mortgagors, to the People's State Savings Bank, a banking corporation, of Auburn, Michigan, and recorded in the office of the Register of Deeds of Iosco County, Michigan, on the fourth day of October, A. D. 1923, in Liber 23 of Mortgages on Page 76, which said mortgage was duly assigned on the fourth day of October, 1923, to Jane Beardslee, said assignment being recorded in the office of the Register of Deeds, of Iosco County, Michigan, on the twenty-fourth day of March, 1933, in Liber 25 of Mortgages on Page 181.

NOTICE IS HEREBY GIVEN That said mortgage will be foreclosed, pursuant to power of sale, and the premises therein described as follows: The Southeast Quarter of Southwest Quarter (SE of SW), and Northeast Quarter of Southwest Quarter (NE of SW), and Southwest Quarter of Southwest Quarter (SW of SW), all in Section Eleven (11), and the Northwest Quarter of Northwest Quarter (NW of NW), Section Thirteen (13), and the Northeast Quarter of Northwest Quarter (NE of NE), Section Fourteen (14),—descriptions all being in Town Twenty-one (21) North, Range Five (5) East, containing two hundred acres of land more or less according to the Government Survey thereof; lying within said County and State, will be sold at public auction to the highest bidder for cash by the Sheriff of Iosco County, Michigan, at the front door of the Court House, in the City of Tawas City, in said County and State, on Saturday, the fifth day of October, 1935, at ten o'clock A. M. There is due and payable at the date of this notice upon the debt secured by said mortgage the sum of \$2667.53.

Dated: July 10, 1935.

Jane Beardslee, Mortgagee.  
John A. Stewart  
Attorney for Mortgagee  
Tawas City, Michigan 12-28

Dr. Gladys Kleinschmidt of West Branch was a supper guest at the Frockins home Tuesday evening of last week.

Sam George called on friends here and was a dinner guest at the Will White home Friday.

Miss Helen Latter is teaching at the Glennie school for her sister, Miss Ruth, who is at home this week entertaining a bad cold.

Mrs. Will Leslie called on Mrs. Harry Latter one afternoon last week.

Mr. and Mrs. J. M. Johnstone, granddaughter, Odessa, and grandson, Raymond, of Flint spent the week end with Mr. and Mrs. Alex Robinson.

Mr. and Mrs. Thos. Mason and sons, Charles and Rupert, were Sunday visitors at Tawas.

Mr. and Mrs. Leland Barker and two sons, Bruce and Billy, of Elkhart, Ind., are visiting at the home of her brothers, Alex and Ed. Robinson.

Mr. and Mrs. Floyd Sherman of Standish spent Friday evening with Mr. and Mrs. Frank Larson.

Don't forget Sportsman's Night every Saturday at Prescott Hardware, Tawas City.

Mr. and Mrs. Earl Daugherty and Mr. and Mrs. Thos. Frockins attended the wedding at the Coats home on the Hemlock road on Saturday evening.

Mr. and Mrs. David Otto of Fairgrove were Sunday afternoon visitors with Mr. and Mrs. Alex Robinson.

Mrs. L. McCamley of Battle Creek motored here Sunday to get her sister, Miss Blanch Finney, who has been visiting at the home of her sister, Mrs. A. T. Vary, for several weeks trying to regain her health.

Mr. and Mrs. Arthur Latter called on Mrs. Will Latter last Thursday.

Born to Mr. and Mrs. Will Brown on Tuesday morning, a daughter.

Mr. and Mrs. Thos. Frockins attended the baptism of Charles Russell Binder at East Tawas Sunday.

That Borrowed Umbrella  
"Since he became a candidate for office," said H. Ho, the sage of China town, "my neighbor, H. Hat, extends his hand, but the umbrella I lent him never in it."

Lion-Fixing in South Africa  
Lion-fixing was formerly a profitable occupation in South Africa. Natives would poison an antelope, kill it and place it in a likely spot. Lions eating the poisoned meat would become groggy, and white hunters, for a price, were then permitted to shoot the beast in the area without danger to themselves.

Miss Gertrude Streeter will return to her home this week end with Mr. and Mrs. E. E. LaBerge of Grayling, where she is attending school.

R. D. Brown is building a new kitchen on one of his cottages.

Mrs. John Rambottom, known as "Grandma" Rambottom, passed away Monday, September 23. The funeral services were held at one o'clock Wednesday at the Long Lake Adventist church.

Panics Favor Autumn  
It seems that most panics occur in the autumn. Black Friday, one of the worst in September, 1869, and the panic of '73 started in September. The 1907 panic was in the autumn. An exception was the beginning of the 1920-21 depression, which broke in April. The panic of 1929 began in October.

A Preserved Cathedral  
The cathedral at York, England, has fared well in the preservation of its old glass. Every window in the nave and aisles, except four, retains its ancient splendor, the earliest in point of date being that of the Twelfth century.

Hindu Philosophy  
To the Hindus, a system of philosophy is an insight, a "darsana"; a vision of truth and not a matter of logical argument and proof.

Largest Lake in Missouri  
The largest lake in Missouri is the Lake of the Ozarks, which was formed by damming up the Osage river at Bagnell.

WATCH THE CURVES

By RICHARD HOFFMANN

Copyright by Richard Hoffmann WNU Service

CHAPTER VIII—Continued

Hal turned toward Barry then and, hands deep in jacket pockets, watched her in gloomy detachment. It was as if his mind were possessed by a local anesthetic, numb and useless around the small clear conduit that led from his eyes to the springs of superficial action. Where had love, or whatever it was, gone? When would the acid of this shabby lesson in beauty eat through, searching out each crevice in his spread wounds like iodine, to sting them deep? Tomorrow, after he had left her at some Los Angeles hotel, with Crack? Or tonight, soon, when he was out of this room.

She and Crack married—bound, linked, moving together across the country, hiding their connection till Hal should make himself vulnerable as an abandoned puppy. Later he might think of all the details of his opening himself to her, with Crack somewhere near by, drowsing over "shy" secreted schemes that amused him. He might think of the smallest things he had said as well as of the enormous things he had asked her to bring to him. And thinking of those, and remembering her dark, hard, unstirring acquiescence here there would be a richness of pain at which to clench his teeth, in which to learn how arrogance is cut down.

"There!" Crack exclaimed, darting from the bureau. "Tell me what you think that. Tell me if that starts changin' your mind."

Hal took the telegram and read it. Under his father's name and office address the message ran: "Young man between twenty-five and thirty six feet hundred sixty-five pounds gray eyes brown hair gray flannel suit made by Selkirk in Oxford name Henry Ireland nickname Hal traveling from New York to Los Angeles in share expense auto stop claims he is your son account trouble which will explain after our wire Martin Crack at Grand hotel on Santa Monica boulevard Hollywood California if he is your son very important please reply quick—Martin Crack."

Hal pushed out his underlip carelessly, looked up at Crack, and handed the form back. "Why not say what the 'trouble' is? Save you another wire."

"Listen, Ireland," said Crack, his dry cheeks colored, his eyes shining and white all around the irises, "you're a good sorta guy. I'm only human." That's it, Hal told himself with quick satisfaction: he's not human, any more than a little puff-headed viper in the dust is human. "I'd like to save you the trouble this is gonna make for you if—"

"Oh, shut up," said Hal, wonderfully keeping his voice in superficial contempt. "If you've got to talk about it any more, talk to her." It hurt much more sharply than he'd expected—to say that so negligently; and his voice was dull as he added, "I'm going."

He walked past Crack to the door, opened it, and as he passed it from one hand to the other behind his back, he looked at Barry again. Still hugging her legs, her head still partly bowed, her staring went on, hard and dark and sullen, into the corner of the room. A jet of anguish sprang molten from his dead sense of her involiability.

"And this is all," he said in a slow, moderate voice. "Everything led here—to this."

She turned her head slowly, not raising it, and looked at him, her scorn dull and general, only incidentally for him. Then her eyes went back to their staring before she said, her voice frankly husky, "This is all."

Crack followed him out the door, was following him down the hall outside as Hal heard the key turn the lock behind him. So she was ready to move as soon as they left. To do what? he wondered. Read, go to sleep, take up her staring again? As if it mattered!

"Listen," said Crack, a perverted intimacy struggling in his voice. "I'll tell you what I'll do. I'll—"

"You'll shut up," said Hal, and turned into his room, locking the door behind him lest he anticipate everything by throttling Crack's little life out of him there in the dark hall.

CHAPTER IX

Tuesday

When daylight began to heat the sky outside, Hal still lay awake and sweating on his bed, with only his coat off. He had meant not to doze, so that Crack, in the next room, shouldn't have a chance to send his telegram without Hal's knowing it.

He couldn't think of Barry except as he had last seen her—golden head a little bowed, staring over her satin knees into the corner. And though he kept putting the dark portrait from him, he found himself later regarding it again, intently, without knowing how it had come back, or why.

Then the light was broader over the wide street. He heard the creaking of Crack's bed next door, light steps, and then the running of water. Crack wouldn't send the telegram now before he found an open office somewhere. In Las Vegas probably, where—with luck—they would eat breakfast. With luck? What did so slight a thing as luck on the road matter? It didn't. But, yes, it did. There was Sister Anastasia and her serene, beautiful acceptance of sorrow. She counted most in this day, rather as if she had always counted most and Hal had not seen it for the glare and dazzle of his moonstroke.

Hal washed without refreshment and went down to unlock Rasputin.

He found the inside door to the de-

serted lunchroom open, so he bagged oranges for Mrs. Pulsipher, leaving a quarter in the dish where they'd been. And he sat on the running board eating one of them when Kerrigan came down, brown eyes bright in a combination of greeting and alertness for signs of news.

"Don't look as if you'd slept well," he said, his voice dubious in disappointment.

"Plenty," said Hal. "Wasn't as tired as I expected."

Hal watched him, tasting—still through that internal numbness—his rich affection for the quick, kind eye, the tough cheeks with their labyrinth of minute red veins, the straight lips with their implication of readiness and gusto. Then the Pulsiphers came out, not wholly awake but bustling in tandem already. Then came Crack, his bag in one hand, golf ball loose in the other; he pushed the ball nervously into his side pocket as he made his insecure good morning to Hal. And after him came Sister Anastasia and Barry. The cool peace of the nun's face was softly animated in the prospect of this last day between her and her brother, and Hal knew Barry hadn't told her anything. Barry, simply groomed as ever in her ceaseless tailleur, gave him acknowledgment of nothing—nothing. The defensive mistrust of the journey's start was in her brief look; no suggestion of a smile framed her curt good morning; even Doc's lead was held short, as if to keep him from friendliness.

Rasputin put behind him the hundred and thirty-odd miles to Las Vegas in less than two hours and a half. The telegraph office was across and down the street from the place where they stopped to breakfast. Hal saw Crack's careless looking for it,

"When D'You Shove Off for Santa Barbara?"

saw him find it and stand for an indelible moment before starting toward it. Hal drank orange juice and wolfed a bowl of cereal at the counter; it was natural enough he should pay his bill and saunter out to the street when Crack returned.

In the telephone booth next door, was following him down the hall outside as Hal heard the key turn the lock behind him. So she was ready to move as soon as they left. To do what? he wondered. Read, go to sleep, take up her staring again? As if it mattered!

"Listen," said Crack, a perverted intimacy struggling in his voice. "I'll tell you what I'll do. I'll—"

"You'll shut up," said Hal, and turned into his room, locking the door behind him lest he anticipate everything by throttling Crack's little life out of him there in the dark hall.

When daylight began to heat the sky outside, Hal still lay awake and sweating on his bed, with only his coat off. He had meant not to doze, so that Crack, in the next room, shouldn't have a chance to send his telegram without Hal's knowing it.

He couldn't think of Barry except as he had last seen her—golden head a little bowed, staring over her satin knees into the corner. And though he kept putting the dark portrait from him, he found himself later regarding it again, intently, without knowing how it had come back, or why.

Then the light was broader over the wide street. He heard the creaking of Crack's bed next door, light steps, and then the running of water. Crack wouldn't send the telegram now before he found an open office somewhere. In Las Vegas probably, where—with luck—they would eat breakfast. With luck? What did so slight a thing as luck on the road matter? It didn't. But, yes, it did. There was Sister Anastasia and her serene, beautiful acceptance of sorrow. She counted most in this day, rather as if she had always counted most and Hal had not seen it for the glare and dazzle of his moonstroke.

Hal washed without refreshment and went down to unlock Rasputin.

Hal who had the secrets. He felt it secret to himself—his certainty that they would finally be alone; and it must stay secret, immune from a personal fury that could give Crack formless warning of danger. For it Crack vanished, slipped idly away with the sly, drowsing triumph returned to his eye, Hal was obsessed for the rest of his life by the thought of that unbeaten evil, alive somewhere, gloating, hating him.

Would he see Barry after that? Would he look at her and remember things? Perhaps, but it couldn't get into his mind now.

They stopped at a lonely station to be sure of gas, oil, and water. Later, an unassuming fingerpost pointed the way to Death valley, off to the right. Hal heard the flat echo of the name in him and wished dreadingly for relief from these long, long stretches of the baking road. There must be an end to it; there must be an end, too, of this dull inability of his to see Barry except as she had sat on the bed the last night, staring, everything between them sullenly dismissed.

California welcomed them officially at its agricultural quarantine station, where the luggage had to come down off the roof and be opened for an inspector. Dropping the bags to Kerrigan and Crack, Hal didn't resist the temptation which the last two offered. "That—" he said to Crack in a voice casual enough, but plainly audible: "that's Kerrigan's, and that"—when Crack reached for it—"that's your wife's." He knew Barry wouldn't turn; but Sister Anastasia and Kerrigan both looked up at him as if he had cursed, and he had to drop his eyes to hide deep self-disgust.

A cool mist drifted up the Cajon Pass to meet them; and lower down the smooth concrete turnings they had a vista of the square-laid streets of San Bernardino, the low California bungalows, and the ranks of feathery eucalyptus. Hal didn't care why it seemed exciting to be so near the end—the end of a journey which once he had thought would be all tedium and then resolved should be carefree holiday. After it was over he might begin to know what had happened to him, but there was nothing exciting about that.

In the middle of Mrs. Pulsipher's statistics on the thyroid Hollywood ladies took to keep their figures, John broke into frustrated sounds. He snapped his fingers in a moment and said, "It-tit-tit-tit said that way—that way. It-tit-tit."

Hal half turned toward John with a feeling near absolute tenderness for him and said: "These darn signs seem to point in any direction for Los Angeles. What place is this, d'you know?"

"Pasadena," said Crack warily. "You can run out to Hollywood this way if you want." And he added, the insinuation of his voice unsure of its own slyness, "Why'n't you drop—us off there on the way?"

"Do that," said Hal briskly. It awoke him a little to think again what might happen if Crack used that "us" when they were alone.

Guiding Rasputin to Crack's directions, Hal made a final attempt to fancy how it would be—to put Barry's bag down on the sidewalk and leave her there with her husband. Something might move and give him a remembrance other than the fixed image of last night. It might be the last time he saw her. Some little thing should happen, must happen, to show him where he was.

But it was nothing. Hal, on the roof, heard the good-bys said below him and saw Barry go a little apart with Sister Anastasia, write something on a slip of paper and give it to the nun before she kissed her. Her blue eyes came slowly to his, the hostile, unremembering screens fixed against him. Perhaps she watched an instant longer than suited her negligence, but that was all. He knew she wouldn't speak; and he looked away first, bending over to take Doc's muzzie in his hand and shake it gently. "Bye, puddle," he said. And then he was watching the ingenious, unsurprising grace of her boy's stride take her away, beside the terrier's bright trotting.

And this might be the last he ever saw of her! Good G—d, why did that still mean nothing?

The room was nondescript and comfortable and Kerrigan, in shirt-sleeves by the window, swept his paper down when Hal came in, smiled a faintly disturbed welcome, and said, "Well, here we are. When d'you shove off for Santa Barbara?"

"In a while," said Hal. "She's seeing a priest who knows her brother—what's on his mind, how he is and all. You knew her brother was dying? He is. That's why she's in a rush, bless her good heart. She's going to call up when she's ready. When do you have to be on the job, Colonel?" he asked.

"The End of the Trail?" he said, his eyes barely lived for a moment. "No hurry. Any time this month."

Hal watched him consider an opening for what he had to say and carelessly thought to head it off with: "Colonel, if you got the chance to round out your collection of experience, how would you do your man in? Knife, I mean? Or gun? What?"

"Would depend," Kerrigan said cautiously. "Why?"

"Interest," said Hal. "Interest." A bad poke; try something else, quick.

Golden Phantoms

FASCINATING TALES OF LOST MINES

By Editha L. Watson

THE MISSING MUSKETEER

WHEN a London syndicate employed Herbert Hoover, then an engineer, to hunt for a lost mine, it was a rather good sign that there really must have been such a mine.

Its name was the Musketeer. It lay—and surely it still lies—in the Fraser river region on the border between the United States and Canada. It was found by Jacob Henshaw, an old prospector, and his partner.

The two men had lived with the Indians for several years. Perhaps they first heard of the mine from these humble friends—or perhaps they stumbled onto it as they followed after the golden phantom. But they found it rich enough to stay their steps. They built a little cabin, and went to work.

In September, 1873, Henshaw came into Vancouver—then a small place just beginning to grow—with a donkey which carried two sacks of ore. He took this to an assayer, and presently word spread about that here was something which assayed the richest north of the Comstock lode.

There would have been a gold rush in no time, had anyone known where to rush. But Henshaw, who could neither read nor write, had a deep-rooted suspicion of his fellow-men. He felt that no good would come of it if he gave out even the faintest of clues. He knew that he should file his claim—but that would place on record the exact location of his find.

In the meantime, men bothered him continually, asking all sorts of questions, watching every move he made. To get rid of them he invented various stories, hoping that they would believe his tales and go away. But somehow there lacked the ring of truth, and no one bothered to take his stories seriously.

Henshaw was being driven to desperation. At last he figured that if he could go back and consult with his partner, they could work out some way of filing the claim in secret. But here was another problem, to get away without detection.

How he managed it, no one knew, but somehow Henshaw "turned up missing" one day. Everyone thought that he had eluded his annoyers, and that after a while he would return to Vancouver with more ore, or else that his partner would show up, to try what he could do in Henshaw's stead.

Weeks went by; months; years. Neither of the miners came. No one heard of them. No one knew what had happened. Everyone guessed: perhaps Henshaw had been caught in a blizzard; perhaps his partner had been killed by Indians; perhaps—

And perhaps some day the Musketeer will be discovered again. So far it has managed to stay a mystery. Men have hunted for it, certainly, time and time again. Those who have faith in spirits have often been told by these unseen influences just where to search—but something must be wrong, for they seek but never find.

RED MEN'S GOLD

THREE brothers named Rolleston went into the Uintah basin in the '60s, in search of gold. They found more than they were looking for in a rich silver and gold deposit—silver sulphide, sprinkled liberally with coarse gold.

Although the Indians were a constant menace, the brothers got out of the place with three mule loads of ore, which they took to Salt Lake City and sold for \$20,000.

The Indians had warned them, in no uncertain terms, never to return to the mine, but three years later they took five mules and went back for more of the ore. They mined enough to load their animals, and were about ready to go back to civilization again, when the Indians appeared once more. Exactly what happened no one has been able to say, but the Indian version of the affair was that the brothers fell into the Duchesne river and the weight of the gold in their pockets held them under and caused them to drown. The mules simply disappeared.

After, this the place remained unmolested for years. At last a relative of the Rollestons went out to hunt for it. But cloudbursts had obliterated all signs of the diggings.

This may have been the same mine that Caleb Rhoads found. He said, at least, that it was in the Uintah reservation and that he had an understanding with the Utes so that he would be unmolested if he kept the place a secret. It is certain that men who tried to follow him were fired on by unseen persons.

Rhoads made a trip into the unknown region every year for 18 years; then he died. A man named Hartzell married the widow in hopes, it may be, of inheriting the mine, but she did not know the location—and although Hartzell hunted for a long time for the mysterious mine he never succeeded in locating it.

Sparrow Hawk's Diet

The sparrow hawk's diet consists of less than one-fifth of 1 per cent of game birds and no poultry. More than 50 per cent of its diet is composed of insects and 25.4 per cent of mice and other small mammals.

Let Our Motto Be GOOD HEALTH

BY DR. LLOYD ARNOLD  
Professor of Bacteriology and Preventive Medicine, University of Illinois, College of Medicine.

ASTHMA, HAY FEVER, HIVES AND SICK HEADACHE

Spontaneous hypersensitiveness in man are big words that, without proper explanation, mean very little, but, as a matter of fact, spontaneous hypersensitiveness includes asthma, hay fever, eczema, and such common diseases which, while they rarely carry us to the grave, certainly make us exceedingly uncomfortable.

Asthma attacks the muscular tubes of the air passages and causes these muscles to contract, thereby diminishing the volume of air that is breathed in. Hay fever attacks the membrane of the nose. Eczema may break out in the skin almost anywhere.

It has been found that, when both parents have suffered from hay fever or asthma, 58 per cent of the children have these ailments. When only one parent suffers from hay fever and asthma, usually just half of the children have the same ailment. But hay fever and asthma also develop in some children where there is no family history of this disease. When both parents are asthmatics or hay fever sufferers, children develop the same disease earlier in life than when only one parent is involved or when there is no history of these particular ailments in the mother or father.

Hay fever parents usually beget hay fever children, and asthmatic parents beget asthmatic children.

Hay fever is usually associated with August, the month in which ragweed pollens are most numerous in the air. But the hypersensitive condition of the nose can be brought about by other substances than plant pollens, animal hair, dandruff, or such substances can cause it, as can face powders, perfumes and certain foods, such as strawberries, almonds, fish, etc. Or it can be brought about by bacterial infections. In this instance it is not the bacteria that cause the disease, as in the case of a boil, but it is the component parts of the bacteria that are absorbed by the blood stream and come in contact with the nose in this way.

The cause of asthma can be the same as that of hay fever. Inhaling certain substances, ingesting certain substances as food or remote foci of bacterial growths, can cause an increased sensitiveness of the musculature of the tubes leading air to the lungs. This increased sensitiveness causes spasms of these muscles. It is during the period of spasm or cramps that the asthmatic is most uncomfortable. Another manifestation of hypersensitiveness to foods is the urticaria or hives that break out on the skin after the eating of certain foods.

In studies which have been carried on at the Illinois Research hospital in connection with the University of Illinois, it seems that an individual belonging to the asthma, hay fever, eczema or hives group is put together in a different way from the rest of us. These hypersensitive people are so constituted and constructed that they react in an abnormal manner to what would be normal to most of us.

The individuals who suffer from migraine headache, the sick headache that comes on with regular periodicity, really belong to the same general group as the hypersensitive persons do. This does not mean that the migraine is brought on like an attack of asthma or hay fever. But studies of the headache groups that we have made in our research laboratory leave us impressed with the fact that preceding an attack of sick headache, certain definite internal changes take place. These include changes in constituents of the blood, and there seems to be a difference in the internal metabolism of these migraine sufferers. The changes seem to be periodic, occurring some times at weekly intervals, and again at fortnightly, monthly or even longer intervals. Consequently these sick headaches, although not brought on by inhaling plant or animal substances or by eating certain foods, seem to depend on a changing or unstable internal regulating system that makes the migraine patient closely akin to asthmatic and hay fever sufferers.

Our conclusion then is that persons suffering from asthma, hay fever, eczema, hives and migraine, have a very unstable involuntary nervous system. The involuntary controlling machinery of their body functions is so regulated that it can be upset or thrown out of tune as a result of contact with irritating substances that to the rest of us produce no deviation from the normal. We know even less about the migraine group of sufferers than the hay fever group. The cause of the attacks of sick headache seems to be developed within the individual, because we can demonstrate certain internal body changes preceding the onset of migraine. It will be necessary to do a great deal more laboratory work before these spontaneous hypersensitive people and the migraine sufferers can be clearly understood. We must know more about the cause and how the body changes during the attacks of these diseases before we can attempt to prevent them.

LION WOULD LEARN

"Time after time," said the big-game hunter, "the lion sprang at me, and time after time as he leaped I threw myself forward and he went harmlessly over my head. Eventually the animal gave up the attempt to fell me and trotted off into the jungle. The following day I came to a cliff overlooking the sea, and there on the beach I saw the same lion. I stood transfixed at its antics."

"What was he doing?" "What was he doing?" said the hunter, dramatically. "Perhaps you won't believe me, but that lion was practicing short jumps."—Tit-Bits.

**GOOD LIGHT Every Night**  
WITH A Coleman LANTERN

Just the light you need for every outdoor use—on the farm, for hunting, fishing, outdoor sports. Has genuine Pyrex bulge-type globe, porcelain reflector top, nickel-plated foot, built-in pump. Like Coleman Lamp, it makes and burns its own gas from regular gasoline. It's a big value, with years of dependable lighting service, for only \$5.95.

SEE YOUR LOCAL DEALER—or write for FREE Folder.

THE COLEMAN LAMP AND STOVE CO., Dept. WU150, Wichita, Kans.; Los Angeles, Calif.; Chicago, Ill.; Philadelphia, Pa.

Think only of the past as its remembrance gives you pleasure.—Jane Austen.

**Quick, Safe Relief For Eyes Irritated By Exposure To Sun, Wind and Dust**

**MURINE FOR YOUR EYES**

China Plans 48,986 Schools  
China will establish 48,986 mass education schools next year.

**FLY-TOX Kills MOSQUITOES FLIES-SPIDERS and OTHER INSECTS**

BEST BY 10,000 TESTS REFUSE SUBSTITUTES.

**Watch Your Kidneys!**  
Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as nature intended—fail to remove impurities that poison the system when retained.

Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, swollen limbs; feel nervous, miserable—all upset.

Don't delay! Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

**DOAN'S PILLS**

**ITCHING... anywhere on the body—also burning irritated skin—soothed and helped by Resinol**

WNU—O 39—35

Quick, Pleasant Successful Elimination

Let's be frank—there's only one way for your body to rid itself of the waste material that causes acidity, gas, headaches, bloated feelings and a dozen other discomforts. Your intestines must function and the way to make them move quickly, pleasantly, successfully, without griping or harsh irritants is to chew a Miliesia Wafer thoroughly, in accordance with directions on the bottle or tin, then swallow.

Miliesia Wafers, pure milk of magnesia in tablet form, each equivalent to a tablespoon of liquid milk of magnesia, correct acidity, bad breath, flatulence, at their source, and enable you to have the quick, pleasant, successful elimination so necessary to abundant health.

Miliesia Wafers come in bottles at 35c and 60c or in convenient tins at 20c. Recommended by thousands of physicians. All good druggists carry them. Start using these pleasant tasting effective wafers today.

## Little Lights on LIVING

By MARIA LEONARD  
Dean of Women, University of Illinois

### WHAT PLAY CAN DO

PLAY is one of the four builders of life. The other three are work, love and religion. Nations have risen like the Greeks and fallen like the Romans through their play. Play has not been given serious enough attention by modern parents, as a factor in their children's physical, intellectual and moral development. Play time has been considered a tag end usually—"run away and play" when there is nothing else to do.

Everything that functions has equal capacities for both good and evil. Food, medicine, exercise and even religion, with the fanatic can change virtue to vice. Progress of the race comes from directing all these functions properly into positive channels. When this does not occur the individual and nation alike may be retarded in its growth for betterment, or still worse may be actually irrevocably harmed. Parents probably seldom think of play and its effects on their children in such serious philosophical terms, and yet play and recreational hours have the power to make or mar young life.

Play should be part of an educationally planned program for children. Each child should be studied by the parents and helped to succeed in at least one kind of sport, or should be furthered in one hobby, whether it be making some kind of toy or collecting insects or stones. These creative loves in children should be hunted out and fostered by parents. This gives to children early in life a sense of achievement which later may grow into a habit of success.

Good sportsmanship not only implies physical skill, but also mental and moral skill, as it takes courage to be a good loser and sometimes more courage to play fair.

Planned play as an educational program will take time, effort and sacrifice on the parents' part, but in the end it brings the largest dividend of character. Parents are sometimes unwilling to give as much of their own pleasure time to play with their children, as such a play program demands. As for instance, a movie manager of one of the large theaters in Chicago told me recently, that in his opinion, the movies have become the modern nurse maids for the children of the rich and poor alike. Cars from Cadillac to "Tin Lizzies" drive up and discharge their small occupants each night regardless of the sex picture shown, and the parents drive nonchalantly away. In two or three hours these carefree parents return to take their children home. Some parents a few years hence will wonder why their children are different from their neighbors' children.

### GOLD FOR GOD

THERE lived one time a very rich king; his wealth increased so rapidly that he began to think in terms of gold. One evening as he sat alone, long after his little daughter's good-night kiss, he felt a tiny tapping on his foot. Rubbing his eyes in the subdued light to be convinced he was not dreaming, he heard a tiny voice which said, "Thou art great, O King, and rich; my wand and I can give thee thy one heart's desire. Speak now, ere I go," the fairy said.

"Give me gold," excitedly spoke the king, "Give me the golden touch." "This will be done. At dawn tomorrow thy touch will turn each thing to gold and that, oh Midas, will become earth's richest king." The fairy circled her tiny wand three times above her head and disappeared. "Can this be true?" thought the king.

The sun was high when the king awoke. "It is true, it is true!" he cried joyfully as he touched his kingly robes into beautiful golden fabrics. As he sat before his morning meal, his heart grew proud and haughty. But, alas, his food, too, turned to gold. "What matters that," he said—"I am the richest king on earth today!" Just then his little daughter laughing and singing, sprang into his arms for her accustomed morning kiss. He held her happy little form close to his heart. But just one moment and there lay in his strong arms, his daughter lifeless, body turned to gold! "Oh, God," he cried in anguish, "what have I done, what have I done! It is not gold I need, but God," he sobbed, falling to his knees. "Help thou me this day, the most wretched man in all my kingdom wide." Another gentle tapping on his sandal brought again the fairy to his side. "Take my gold away and give me God," he cried.

"It shall be done," the fairy said, "But tell me first, O King, wherein real riches lie." From out the depths of his agonized heart the king replied, "In the heart of man, in my fatherhood, in my people, in my honor and service to God and man. My goal has been gold, henceforth it shall be God." Has America like King Midas been seeking gold instead of God? One statesman recently said of her, she is in the Twentieth century scientific, America need seek the abundant life through no other path, for His is "the Way, the Truth, and the Light."

# HAMBURG, Great Seaport

View of the Port of Hamburg.

Prepared by the National Geographic Society, Washington, D. C.—WNU Service.

HAMBURG thinks in terms of ships, of fish, and trade with far-flung places. Overseas news, especially news that affects trade for better or worse, means more to it than all the politico-social tangle of Berlin or Munich.

Since the days of sail, its sons have scoured every nook of the world to barter, buy, and sell. Many now extensive German colonies in South America and the Orient began as small groups of traders and clerks first sent from here. Some marry foreign women, retire well-to-do, and bring their families back here to educate the children.

This close tie with distant lands accounts for Hamburg's well-known study of tropic economics and diseases, its researches into new uses for imported raw materials, the world-wide work of its trade groups, and the desire of its young people to learn foreign languages and to travel abroad. Visit in any Hamburg home, or any industrial museum where foreign products are seen, and at once you are struck with youth's eager interest in men, events, and things overseas.

During the years when endless shiploads of immigrants left Germany for the New World, Hamburg was the port from which millions of them sailed, including those from middle and eastern Europe.

Many a Hamburg sitting room is cluttered with curious and quaint mementos brought back from distant voyages by father, uncle, or brother. Always, Hamburg shares its sons with the sea—many never to return. From here red-faced crews in smelly oilskins and high boots sail each season to fish the wind-swept North sea, working as far away as Iceland. The loss of life, ships, and nets in this trade is recorded in many a North sea ballad. Herrings they harvest in countless millions, herrings being to the North sea what bananas are to Central America. Special fish cars, gaudily painted like circus trains, run at high speed from North sea fish ports to fish-hungry cities as far away as Vienna.

What the "Free Port" Means. That phrase, "the Free Port of Hamburg," means what? Only this:

Away back in 1189 Frederick Barbarossa (the Red Beard) gave Hamburg its "free charter." Though a state now in the German republic, it still enjoys a peculiar degree of independence. Its ancient senate still functions in traditional Spanish dress. While Hamburg joined the German customs union in 1888, the senate cannily maintained its free-trade rights by holding back a part of its harbor area as a free port. Shut off by a high iron fence, this section is a city within itself, free from the plague of duties and customs inspectors.

Here are mammoth warehouses piled high with China silk, frozen meats from Argentina, coffee from Brazil, farm machines from the United States, many waiting reshipment to strange-named Baltic ports, none to pay a cent of customs duty to Germany. Here many of the world's huge ships are built; here are foundries and machine shops. Here, too, flocks of factories profit by the free use of imported raw material and easy shipping facilities.

Hamburg, as a German state, has tariff protections, but this part of it enjoys free trade in all its enormous transit commerce. This benefit is shared by American firms who have warehouses here. Like Manhattan Island, crowded Hamburg uses tunnels. Between St. Pauli and the Steinwarder side of the Elbe, in the harbor sections, a double tube leads under the river. It is similar to the Hudson tunnels at New York, except for approaches. So crowded are the river banks that no space could be spared for inclines; hence, at each end, men and vehicles use elevators, which lift and lower them 77 feet below street level. Domed temple-like structures house these elevators, whose high windows pour daylight down to the bottom of each shaft.

Pig-iron weights hold the tubes from shifting. The tunnels, their walls faced with glazed tiles and decorated with sculptured reliefs, are brilliantly illuminated. On bad days, when fog or ice slows down the Elbe ferries or crowds the bridges, pedestrians and cyclists all prefer the dry, warm tubes.

Many Languages There. Hamburg is a polyglot port. Shopping street window cards read "English Spoken," "Se Habla Espanol," "On Parle Francais." Syrian cafes display sidewalk dinner signs in "fish-worm" writing. The hoariest newspaper joke tells of one store whose sign read, "German spoken here."

English words and phrases "five-o'clock tea," "sport," "morning coat," "gentleman," even "boule dogue" for

bulldog—are often sandwiched in German speech and news text. "Jazz" is pronounced "yotz." At the theater one sometimes hears the phrase "Echt Amerikanische Yotz Bandt," meaning "real American jazz band."

Germans take their pleasures seriously. Sport is highly organized so that fun-making may function smoothly, like electric cargo cranes in the harbor! Hamburg crowds leaving for winter sports take every conventional article advertised in fashion journals.

Watch the Luft Hansa planes, whose pilots can't start till uniformed air policemen come with orders; or observe the race crowds on Derby day, where many wear monocles and London sport clothes, and see with what clocklike precision all events are clicked off. In busy cafes waiters keep count of beers served by the number of paper coasters stacked under each guest's glass.

Go out in Mecklenburg to shoot, and servants carry your coat, lunch, gun, shells, even a stool to sit on, while others drive the game past you, in easy shooting range. In a vast St. Pauli pleasure palace you see dinner dancers suddenly scurry from the floor when uniformed attendants rush in, as if raiding the place, dragging mats, rugs, poles, wires, and all the gear of aerial acrobats. In a jiffy this is set up, and girls in tights are flying through the smoke or swinging out over the tables by trapeze. Just as magically, all this spectacle vanishes; again the jazz band plays, and back to the floor the diners rush to dance again.

Alster Lake in the City.

Alster lake is set in Hamburg like a reflection pool in some ornate exposition grounds. Imagine Times Square, in New York city, as a tree-bordered lake, alive with toy ferries, rafts, pleasure craft, floats, and swans. Hamburg's Alster lake is like that, only larger. A river, the Alster, on its way to the Elbe splays wide as it reaches the city. A dam divides the lake, cutting off one end, the Inner Alster, in Hamburg's busiest quarters; so that hotel guests, department store and office building workers can look down on cafes and canoes and watch huge flocks of swans fed at troughs like pigs. Gulls are tame; they fly past and peck bread from your extended hand.

Neat white cafes, with glassed-in verandas, fragrant with potted plants and window flower boxes, stand along the promenade that runs about the lake. Crowds gather here to sit, and sup, and listen to the band or watch boat races, but are politely blind to open-air love-making in cozily cushioned canoes that drift by, often with gramophone playing.

Riding to Hamburg in a third-class coach affords a quick flash of life among the masses. Through snatches of salty dialogue overheard run the themes about which working people think. Jobs, wages, the price of food and clothes, what the government ought to do, politics in its many variations—the same here as everywhere. Also, you hear many poor are leaving the city to save rents and try to live on the land. Some men in the coach, returning from visits with country kin, carry a goose, a sack of flour or potatoes.

"It was better before the war," "Ach, ya, the good old peace times!" Peace, war; fires, floods, and cholera—Hamburg has known them all since Charlemagne first laid out the place as a fort from which to fight the Wends, the Swedes, and other half-wild pagans hereabout, whose descendants later helped people England, Danes, French, Russians—all have struck their blows at Hamburg. But, from the day that Rome soldiers built the first hut and sounded their bugle blasts over the swampy Elbe lands down to the steam-siren chorus of today, Hamburg has slowly grown in power and influence, till now she is the greatest seaport in continental Europe. Heiress of the Hanseatic league, Germans call her.

As in olden days her sailing ships pioneered the Seven seas, so now her liners, freighters, and tankers follow every ocean lane and her voice is the sound of steamers whistling.

First Artificial Teeth

The first artificial teeth were made white, and dentists were obliged to stain them to suit their clients; nowadays they have no trouble of that kind, for they have no fewer than 30 different shades from which to choose, and there is no tooth in the world that cannot be perfectly matched. The variety in shape is equally wide. In all, the dentist has a choice of something like two thousand different shapes. Artificial teeth are made of a special porcelain, which is about as perfect a material as can be imagined. Before this was discovered they were sometimes carved out of solid ivory.

## Yes and No

By HAL C. VERMES  
© McClure Newspaper Syndicate, WNU Service.

"HUNKY DORY," says Mudder, "won seven races last winter out of sixteen starts, which is a beautiful record indeed. And as he is not well known up here at Arlington, he should get the nod at a very juicy price."

"But," says Harry the Pinhead, "that other Mexican hide, Shanghai, is also a fast runner and his record, I do believe, is equal if not better than this other gelding. Therefore, I am thinking that Shanghai will beat Hunky Dory, though undoubtedly by not so very much."

While we are discussing the points of these two bangtalls, Beezer Bertie arrives and insists on settling the argument.

"Both of these hides," he says, "are fast on the turf and as they are still young, they will run at good prices. However, I have discussed the whole matter privately with all and sundry and I am giving you the best tip you ever had in your life when I say that Shanghai will win this contest."

"Okay," says Mudder, "We will plank down our roll on Shanghai as long as you are sure that he will get the nod."

"Positively!" says Bertie as he hurries away on another of his frequent mysterious errands.

But when Bertie is gone, Harry the Pinhead lets out some plain words with fancy trimmings.

"Why all the exclamatory fireworks?" I ask.

"Because," says Harry, "it is easy to be seen that Bertie is trying to put the finger on us again. Do you not remember that at the dog track a few weeks ago, he gives us a positive tip on Fleetfoot and then Skagway wins?"

"Yes," I reply, "And the reason he do this is to get everybody to crack down their dough on Fleetfoot and lay off betting on Skagway. So by the pari-mutuel system, the odds on Skagway stay way up in the air and Bertie wins himself five grand."

"Well," Harry continues, "as they use the pari-mutuels here at Arlington park too, can't you see that Bertie is trying to give us another bum steer? He is undoubtedly telling everybody within 50 miles to bet on Shanghai. Therefore, there will be very little money on Hunky Dory except for what Bertie cracks down himself. So the price on that nag will be very beautiful indeed and Bertie will collect another barrel of cherries, by making dopes out of everybody else and us."

"That," exclaims Mudder, "is indeed the situation, it is plain to be seen. But now all we have to do is put down our dough on Hunky Dory and clean up ourselves."

"That is perfectly right," I agree. "We know from past experience that Beezer Bertie is the best picker of winners among us. So my vote is that as we have figured out that he really knows Hunky Dory is the hide what will win, we should lay down all our cherries right across his nose."

As it is unanimous among us, we then lay our century notes along the line on Hunky Dory to win.

"Watch the board," says Harry when we sit in the stand. "Now you will see that the price on Shanghai, which is at present \$69.20, will start dropping as Bertie goes around giving everybody the false tip."

"Yes," I say, "And the price of \$58.80 on Hunky Dory will stay up just like Bertie planned that it would."

And that is exactly what occurs. The price on Shanghai goes down until at the final sweep it is \$33.47. While the price on Hunky Dory only flutters a little and ends still generously over 50 bucks. Therefore, we know that we will beat Bertie at his own game and we are very happy indeed.

But as Mudder so frequently remarks, with bangtalls and blonds one can never be positively sure what will happen. And in this case we get the shock of our life when Shanghai wins. "It is indeed with great pleasure," Mudder reflects when Bertie meets us after the event in the paddock, "we inform you that you are a double doubler and you ought to be shot at sunrise and preferably before."

"But gentlemen," Bertie protests when we explain what has happened, "you do not really think that I would purposely provide that you should lose your entire bank, do you? That little affair at the dog track I just tried out to see if I could beat the totalizer, which was new to me then. And it only cost you ten bucks apiece which, if you will remember, I spent a lot more than that on the party celebrating my winnings. Today however, I know that you want to be the whole barrel of cherries and as you are indeed my very best pals, naturally I give you the straight tip on Shanghai."

"Therefore," says Harry, "the only consolation we gets is to find out that you are not a doubler and like we suspected. However, that do not return us the ten grand which we have lost on Hunky Dory. But as you are one of our partners, I suppose there is nothing to do but forget it, which we do herewith but with much regret."

"I am indeed very sorry, gentlemen," says Bertie, "that you do not figure out correctly that at the dog track I did not mean what I said but that when I told you to bet on Shanghai today I was very serious indeed."

"I agree with Harry," I conclude, "that we will have to forgive you. And especially because as he and I have been very much married for many years, we have had similar experiences in the past. But hereafter we will be sure to remember that you are just a woman who about the only time she means what she says is when she does not say anything!"

## First Lady Says U. S. Does Not Want Woman President

Mrs. Franklin D. Roosevelt answers the question, "Can a Woman Ever Be President of the United States?" in the Cosmopolitan.

"Certainly, a woman can be President," she states, "in all probability some time a woman will be, but she may not, in my opinion, be elected at the present time or in the near future. People in general do not like the idea of a woman as Chief Executive."

"Men and women in this country today would vote for a man against a woman for President no matter what her qualifications might be. I, for one, am glad this is so, for when a woman assumes this great responsibility, other women throughout the country should be qualified to help her carry the burden of that office. This will require a far more general development of interest in public questions, past and present, and more willingness to serve in public positions than we have yet seen."

Before they arc Presidential timber, the First Lady believes women must not only possess the character, education and physical strength which the office demands of men, but they must mature politically. They must become leaders. They must conquer their emotionalism, and their too personal point of view. They must assume responsibility and take the consequences.

"Before a woman may serve the country usefully as President, not to speak of being elected," she goes on, "we women as a whole shall have

to be more willing to master subjects which we have considered uninteresting; we shall have to be willing to perform tasks which we have shunned in the past; we shall, I believe, have to reach the point in industry and government where the sex line is practically removed.

"The vast majority of women have not yet attained the power to be objective about their work and impersonal in their business contacts. They must learn to stand criticism and disagreement without allowing personal feeling to enter into their evaluations of that criticism. They must freely grant the other person's right to a different point of view. . . . They must stand on their own feet and make no excuses. They should come up from the bottom and learn their jobs in public life step by step. Above all, they must learn to take other women with them. They must learn that only in proportion as women as a whole are educated in public affairs will individual women succeed in positions of importance."

"When women are prepared and do assume leadership and command a following, regardless of sex, I believe that the advance of the human race toward the goal of human happiness will be more rapid than it has ever been."

### Before the Gold Rush

I doubt that any area of activity ever showed up the graft and chiseling of civilized life and government more clearly than did the Klondike of the old days. Prior to the summer of 1898, when the rush was on full tilt, these towns got along without murder, thievery or graft; without jail, courthouse, post office, church or schools. There were no rules in general, except the Golden Rule, and justice was not only fast but fair.

Nobody had locks on anything until the influx of "civilization" in volume. I remember one instance of a door being barred from the inside in the absence of the owner, with complete written instructions outside on how to get in. Newcomers commented on this, but the old sourdough explained that it made sense. Only Indians couldn't read and were lousy.

—Edward Dean Sullivan in Cosmopolitan.

### Bird Linguist

Several sentences in English, one phrase each in French, German and Spanish and several words in Latin are spoken by a budgerigar bird owned by a man in Bradford, England.

## HITCH-HIKING FLY SPREADS DISEASE

The common house fly is a hitch hiker. However, the fly doesn't bother to jerk a thumb and ask a ride; it flies into moving autos or even trains or airplanes without permission and often travels hundreds of miles before leaving its chosen vehicle.

This habit of flies traveling great distances on other power than their own has made local fly eradication campaigns less effective than the campaigners hoped. Cases have been found where a fly carried disease germs on its legs and body for miles and infected people in the community where it settled. No previous cases of the disease were in existence in the new community and health authorities could find no other source of infection than flies.

Repeated warnings of physicians and health officials have apparently failed to instill a proper fear of the house fly in the average mind. However, a more thorough knowledge of the habits of a fly would increase the respect for this tiny insect, according to authorities on the subject.

Decent cleanliness in any home requires protection against the menace of flies. Whether a fly is home-born or a hitch-hiking visitor, he is a danger. Fortunately, an effective fly-killing program can be conducted in any home by the use of a reliable fly spray containing an ample quantity of Pyrethrum, a product derived from Pyrethrin flowers, which is death to flies, when sprayed in a fine mist.

## DOG FORGETS LAND LEGS

A dog which has not set foot on land for over 18 months recently viewed Auckland, New Zealand, from the Norwegian tanker South Africa. It is a short-haired chow, which was purchased in China by the master of the vessel, Capt. J. Darn. If the pet were allowed to land in any port it would be placed in quarantine. He gets plenty of exercise on deck and has been taught tricks by the crew, but has forgotten just how it feels to have land beneath his feet.

### Arab University

The Arabs of Palestine are planning a university in Jerusalem to offset the Hebrew university located there.

## WHEN THEY SHOW THESE SIGNS

—Nervousness, Constipation, and Poor Appetite, check their diets for this all-important, 3-purpose vitamin

Many are nervous, poor in appetite, system out of order, because their daily diets lack enough of the precious vitamin B for keeping fit.

Few things keep them back like a lack of this protective food element.

So give everyone Quaker Oats every morning. Because in addition to its generous supply of Vitamin B for keeping fit, it furnishes food-energy, muscle and body-building ingredients. For about 1/2¢ per dish.

Start serving it tomorrow for a 2-weeks test. Quaker Oats has a wholesome, nut-like, luscious appeal to the appetite. Flavors, surpassingly good. All grocers supply it.

IN VITAMIN B FOR KEEPING FIT... 1c worth of Quaker Oats equals 3 cakes of Fresh Yeast

Quaker and Mother's Oats are the same

## Beauty that "Stays On"

Try Simoniz and Simoniz Kleener on your car. They'll make it sparkle like new again. . . . and stay beautiful! In fact, you can't expect your car to keep its beauty unless you Simoniz it. Only Simoniz protects the finish, makes it last longer, and keeps the colors from fading. So, the sooner you Simoniz your car the better.

MOTORISTS WISE  
**SIMONIZ**

## "I've discovered Calumet's big, new 10¢ can!"

"No more 'by-guess-and-by-golly' baking in this house now!"

says Mrs. Owen H. Fleming, 1235 Judson Ave., Evanston, Ill.

Mrs. Fleming was one of the first women to get the big, new 10¢ can of Calumet, the Double-Acting Baking Powder.

"No need for any woman to take chances with her baking now," she says. "That new 10¢ can of Calumet certainly means that the very best can be bought at a bargain."

Ask your grocer to show you the new, bigger 10¢ Calumet can!

A SIMPLE TWIST... and the Easy-Off Top lifts off. No spilling, no broken ingredients!

WHY DOES CALUMET give such astonishing "baking luck?" Why is Calumet different from other baking powders? Because Calumet combines two distinct leavening actions. A quick one for the mixing bowl. A slower one for the oven. . . . And Calumet's famous double-action is so perfectly balanced and controlled that it produces perfect leavening—every time.

All Calumet prices are lower! Calumet is now selling at the lowest prices in its history. The Full-Pound Can now sells regularly for only 25¢. And if you want a smaller size—get the new, big 10¢ can—a lot of good baking for a dime—with Calumet, the Double-Acting Baking Powder.

**Philosophers and Aviators**  
 "Philosophers are like aviators," said Hi Ho, the sage of Chinatown. "We think they will explore the stars, but they are fortunate if after a short flight they get back to earth with dignity."

 Mrs. Chas. Kane entertained the Birthday Club on Monday evening in honor of her birthday.

Mrs. G. A. Prescott, Sr., and Mr. and Mrs. G. A. Prescott, Jr., left Tuesday for Detroit.

**Old Church Razed, Rebuilt**  
 After serving as an Anglican place of worship in Leeds, England, for 87 years, St. Philip's church was torn down and the materials used to rebuild it at Middleton.

**School Notes**

**High School**

Our baseball team won two and lost one game during the past week, winning from Alabaster, 8 to 6, and dividing two games with East Tawas, winning the first, 8 to 2, and losing the other, 6 to 1. Bill Mallon pitched the first East Tawas game, holding our opponents to one hit and striking out 14. Walter Zollweg had a perfect day at bat, getting three doubles and a walk in four tries. Eugene Wegner pitched the second East Tawas game. He allowed eight hits and walked six men. Seven errors on the part of his teammates gave East Tawas four of their six runs. Hensley, pitching for our opponents, allowed only three hits in the first six innings but weakened in the seventh, walking three men in a row, when he was relieved by Small who retired the side in order. In the Alabaster game several of the substitutes were played. Leslie Frisch pitched the first two innings, in which Alabaster scored all of their runs. Eugene Wegner pitched the next two innings, allowing no hits and striking out four. Bill Mallon finished the game. We play Alabaster on our diamond Friday, September 27.

At the first meeting of the Freshmen, the following class officers were elected: President, Otto Ross; secretary, Norma Musoff; treasurer, Herbert Cox.

The Sophomores have elected the following officers: President, Jack Coyle; vice-president, Bill Prescott; secretary and treasurer, Helen Bradford.

Beginners on wind instruments are practicing hard and are showing rapid progress. We hope to start regular band rehearsals in the near future.

The high school music class, open to Seniors only, is studying music appreciation this semester. Next semester their work will consist of theory and harmony.

The membership of the Girls' Glee Club has increased to forty-two. They are rehearsing three-part songs, Pale Moon, Russian Folk Song, Green Cathedral and In Old Madrid.

Seventh and Eighth Grades

The eighth grade just began the study of Michigan government.

Donnafay Groff and Dorothy Blust have been absent on account of illness.

Miss Huhtala told us about how Haydn composed his surprise symphony. We enjoyed hearing her play it.

**Fifth and Sixth Grades**

Betty Ferguson, Lyle Hughes, Betty Nelson and Ruth Giddings wrote the best papers in a fifth grade arithmetic test.

The room is enjoying the reading of the book, "Road to Adventure," for opening.

Verna Jean Humphrey of Hale visited our room Monday.

Amelia Herman has been absent this week because of illness.

The sixth graders have begun the study of multiplication of decimals.

**Third and Fourth Grades**

A number of us had the Schick Test Monday afternoon.

Donna Moore's penmanship paper was voted the best in our contest Monday afternoon.

Marion Bing was absent Monday and Tuesday on account of illness.

Yvonne Carson, Donald Nestcott, Mary Ann Rempert and Verna Humphrey were visitors during the week.

**Primary Room**

Quite a number of the children took the Schick Test Monday afternoon. Miss Hoffa also tested vision Monday in our room.

Joan Johnstone entered the first grade last week Wednesday.

The second grade had perfect attendance last week.

**Indeterminate Sentences**

In criminal law an indeterminate sentence is a sentence which fixes the period or amount of punishment only within certain limits, leaving the exact term or amount of punishment to be determined by the executive authorities, usually a board of managers. The term is applied to such sentences where the release before service of the maximum period is upon parole as well as where it is by absolute discharge.

**The Canada Goose**

The Canada goose is the best known and most highly valued of the several species of wild geese that breed each summer in the far reaches of the Northwest territory. Nests of the Canada goose have been found as far north as Great Bear lake through which the Arctic circle passes.

**Wild and Tame Turkeys**

The most readily recognized difference between the northern wild turkeys and domestic fowl is the outer band of the tail. Wild turkeys have chestnut bands, while the tame turkeys have a white band.

**Coins Decorate Silverware**

Coins and medals were oftentimes used by early New York silversmiths as decorations for their wares.

**No. 2** Continued from the First Page

at the plate when he attempted to score from third. Tawas also added a run in that inning on singles by Roach, Kasischke and Quick to make the count 3-2 in favor of the Bentley crew.

An error paved the way for a three-run Tawas uprising in the eighth and swung the lead in favor of the local lads for the first time during the game. Kasischke was safe at first when Hasso booted his grounder with two out in that frame. He stole second and a moment later scored the tying run when Quick slammed one of Dixon's pitches into deep right for a triple. Quick scored what proved to be the winning counter when Mark bounced a slow roller to short for a hit. Mark stole second and then crossed the plate with the final Tawas run when Laidlaw singled to left.

The mound duel between Lixey and Dixon was the highlight of the game. Lixey's six-hit performance in this contest was his second in the past two weeks and both came in title play-off competition. He only issued one base on balls and pushed the third strike by six men. Dixon was found for nine hits by the local boys but he kept the Tawas sluggers well in check until an error by a teammate proved his undoing. He struck out eight men and issued three passes.

"Lefty" Quick, who has been grabbing the limelight with his hitting all season, continued on the rampage last Sunday with three out of five times up, one of them, a triple, coming in the eighth inning rally which turned the game in the local team's favor. Kasischke, with a pair of singles to his credit, was the only other Tawas player to get more than one hit during the afternoon. Dixon, besides pitching a fine game, led the Bentley attack with two hits in four trips to the plate.

The local boys were a jovial lot when the final out of the game was made and victory was theirs. The contest had to be played without the services of four regulars and Manager Laidlaw was forced to make a last-minute roundup of all available players in order to place a full team on the diamond. The boys he selected to fill in held up their end in fine style, both in the field and at bat.

Next Sunday, September 29, these two teams will tangle in the second game of the series. The contest will take place on the Bentley diamond.
