## Dover, New Hampshire

The people of the city of Dover, New Hampshire, have tried many names for their beloved home. It was first called Piscataqua, then Bristol, in 1639 Northam, which it remained for 12 years when it was finally christened Dover.

## Karakul Sheep Sacred

Karakul sheep have been regarded as sacred by Brahmans, Buddhists, and Mohammedans, notes a writer in the Detroit Free Press. They are the first animals mentioned in the Bible and historians consider them the first animals to have been domesticated in pre-historic times. "To the Bokharan, each part of the sheep has a symbolic meaning. The skull is regarded as the seat of knowledge, flexibility of life, etc., and on sacred pilgrimages the roadside is hung with these parts which the pilgrims touch."

## Heart Is a Pump

The heart is a pump. It has its limits, as other organs have their limits. All our hearts become "weak" when we have run hard or climbed many stairs. As we grow older our powers to run and climb become less.

## Ripples From Guiley Creek

By the Trout Specialist

It has been brought to this writer's notice that a much needed movement is under way to effect changes in the deer laws. It is sponsored by many hunters who feel that existing conditions do not provide a maximum of sport, or protection, for the hunter. The chief aim of this organization is to have the conservation department reduce the amount of air around the deer, so there won't be quite so much room to miss them. It is also hoped

that the department will persuade the deer to grow their horns on the other end of their bodies, so the hunters will have a better chance of seeing them. Having the bucks paint their tails with a blue or purple tip is also under consideration. It is to be hoped that this new organization will achieve its aims, as it is under the able leadership of Will Lowe, of Fenton.

## The Soo Locks

The Soo Locks are one of the world's greatest engineering feats, locks that literally lift up a lake 20 feet. Through these locks pass more tonnage than through any other canal in the world, including the Panama. Practically all the wheat and iron ore from our great West passes through them on their way to smelters and seaports and all the coal from eastern fields must go through the Soo on its westward passage.

## "THANKS A MILLION"

## FOR MORE THAN A MILLION

America has bought 1,130,000 Chevrolets during the past twelve months, thereby giving Chevrolet the greatest year in its history and the greatest measure of buyer preference it has ever enjoyed.

 The builders of Chevrolet are thankful for many things, but most of all for the warm friendship of the American people.

And so again at this Thanksgiving season we say, "Thank you, America," for you have given Chevrolet a measure of good-will without parallel in the annals of modern industry.

Consider, for a moment, all that you have done to inspire Chevrolet's appreciation during the past twelve months:

You have purchased 1,130,000 Chevrolets; you have made Chevrolet your favorite car for the seventh time in the past ten years; you have given Chevrolet strong prefer-

ence in every section of the country; you have conferred this same high honor upon Chevrolet trucks by purchasing more than 205,000 commercial units; you have made 1936 the most successful year in all Chevrolet history.

And now, to climax these expressions of friendship, you are displaying even more marked preference for the new Chevrolet for 1937.

It is difficult to express adequate appreciation for gifts so great and so generous as these.

All we can say is, "Thanks a million" for more than a million cars in 1936; and all we can do is offer you the still finer Chevrolet of 1937 in return for the finest friendship ever bestowed upon any motor car manufacturer.

## Buy Christmas Seals Urges Gov. Fitzgerald

ANNUAL SALE CHRISTMAS SEALS - 1936 -

The two great scourges that devastate a country are war and disease. War can be prevented when there is installed into the hearts and minds of men and women the teaching of the Golden Rule, and much of the human family's ailments can be avoided or corrected when the public mind is more conscious of the fact that preventative measures are oftentimes of more value than corrective ones.

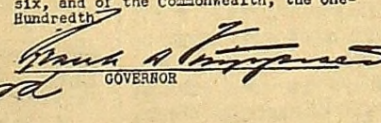

The people are the greatest asset any nation possesses, and to be physically fit is one of the greatest blessings of mankind.

In the past tuberculosis, known as the "White Plague," has increased upon the health of our people, and as a result there has been financial loss to our nation and interrupted cultural and economic development. The progress which has been made in the treatment and care of those afflicted with this dread disease, as indicated by the lowering of the death rate, is a credit to our state. The lowering of the death rate and the sending out of men and women into the world free from this disease has largely been accomplished through progressive and intelligently directed efforts of the Michigan Tuberculosis Association, whose activities have been financed to an important degree through the sale of Christmas seals. Unless the good work which has been carried on in the past is continued, we will lose a large part of the money and labor expended in the past.

I am in hearty sympathy with the support of this and any other movement that has for its purpose the eradication or retarding of physical ailments among our people.

THEREFORE, in conformity to a properly established custom, I, Frank D. Fitzgerald, Governor, hereby direct the attention of the people of our Commonwealth to the Annual Sale of Christmas Seals, the proceeds of which are used in the care of tuberculosis patients, and urge that each one of us patronize this sale as generously as our financial condition will permit.

Given under my hand and the Great Seal of the State, this 15th day of October, in the year of our Lord, One Thousand Nine Hundred and Thirty-six, and of the Commonwealth, the One Hundredth.

By the Governor:  GOVERNOR  
Secretary of State

URGING THAT Michigan people make a generous purchase of tuberculosis Christmas seals this year, Governor Frank D. Fitzgerald has issued the official proclamation reproduced above. More than 60,000,000 of the tiny seals are being distributed in the state this year by the Michigan Tuberculosis Association and affiliated organizations. Funds raised will be used to carry on the fight against the White Plague that has been waged by the Association since 1908. The sale opens officially on Thanksgiving Day and will continue through to Christmas.

**Freezing Gasoline**  
 Gasoline, according to the United States bureau of standards, has no definite freezing point. It slowly stiffens up like wax at temperatures much lower than those commonly encountered in the Arctic, and as the temperature is lowered it gradually becomes more and more viscous until it is a solid mass. The temperature at which ordinary gasoline solidifies ranges from 180 degrees to 240 degrees Fahrenheit below zero. Gasoline containing benzol will solidify at higher temperatures in proportion to the percentage of benzol.—Indianapolis News

In some sections, a few handfuls of grain are thrown into the flames, a souvenir of the old custom of offering a sacrifice to the sun.

**Secretary of the Treasury**

He is liable, on conviction, to a \$3,000 fine, dismissal and may never thereafter hold office under the federal government. The same provisions apply to the treasurer of the United States and the register of the treasury.
