NATIONALUSED **CAR WEEK HERE** Parade, Bonfire, and Dance

Are Features of First Day

With a parade of ancient and de-crepit motor cars of early "vintage," to be followed by a huge bonfire of old cars on the shore of Tawas Bay, planned for this Saturday afternoon, Nave been visiting in Flint, returned old cars on the shore of Tawas Bay, planned for this Saturday afternoon, March 5, dealers of Iosco County are

planning participation in the Nation-al Used Car Exchange Week, March to 12.

Instituted by the automobile dealers and manufacturers of the nation to start the wheels moving in the automotive industry and thus pro-mote better times in Michigan—the heart of the motor car industryand throughout the country, Nation-al Used Car Exchange Week will help rid the nation's highways of old and obsolete cars, which constitute a driving hazard on the nation's highways and will promote the sale

of used cars of more recent manufacture. Throughout the entire week, deal-

rs everywhere will stage special sales on used cars with exceptional values to urge drivers to "trade up" to a better car while stocks are high and prices, low.

Only properly reconditioned used cars will be sold by the dealers. Old, obsolete models that are a menace on the highways will be junked and burned.

The campaign to promote used car sales will be backed by a \$1,250,-000 program of newspaper, radio, and outdoor advertising and other promotion which will be paid for

by the manufacturers. Automobile dealers of Iosco County

Bill sends this message: "Fix up your hair-pin and cork L. Nash.

THE TAWAS HERALD

"Under the Ice!" **By FLOYD GIBBONS** Famous Headline Hunter

HELLO, EVERYBODY: Do you like hunting? If you do, take a page out of the adventure book of today's winner and always carry a waterproof box of matches with you.

Such a box of matches, boys and girls, saved the life of Lloyd D. Henderson of Paterson, N. J., on a hunting trip in the province of Quebec in 1926. Lloyd was up in the Canadian wilds after moose in the late fall of that year and got more than he was looking for.

You travel with snow shoes and sled in that season up in that hard country, and Lloyd's party consisted of himself, an Indian guide named Eli and the guide's dog, Muro. They had been in the woods two weeks and were on their way from one branch cabin, on a desolate lake, known as Kidney lake, to another cabin.

It was 30 degrees below zero as they mushed their way slowly along the shore ice of the lake. Muro, a big powerful Eskimo dog, as gentle as he was strong, pulled their sled over the treacherous ice. The sled, loaded with everything they had, weighed over 300 pounds. Lloyd is no lightweight himself and tips the scales at 250. Luck had been bad, Lloyd says, and he and the guide were trudging along disconsolately. Even the dog seemed to understand and gazed at his master sadly as he stopped now and then to bite the clusters of crippling ice that gathered between the pads of his paws.

Plunged Into the Icy Waters.

Once the dog stopped and whined a little as though asking his master to go no further. In the light of what happened later Lloyd thinks the dog had a premonition of death and wished them to turn back before it was too late. But the men, lacking the instinct of animals, pushed on. The dog led the way, pulling the sled, the guide followed and Lloyd came on a few feet behind.

"Suddenly," Lloyd writes, "I stopped horror-stricken in my tracks. A loud cracking came from the ice and before my eyes it broke and the sled and Eli disappeared from view. I had no time, however, to act, because the next second the ice gave way under me and I plunged into the icy waters of the lake. 'The shock was terrific as the water numbed me to the bone.

thought it was all over with me as I went under and expected to come up under the ice, but I rose to the surface and was able to hang on to the jagged edge. Eli, I saw then, had not gone completely under. He had caught on the edge by his arms as he fell and was clinging to the slippery ice as I was. The plight of Muro next concerned me and the sight

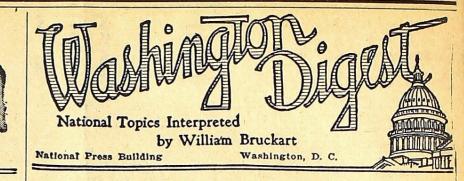

The Dog Was Pulling With All His Strength.

of the terrible predicament of that brave dog is one I can never forget. "He was still on the ice fighting for all he was worth to keep his footing. The heavy sled—made heavier still by the water—was slowly dragging him after it. Although all our food, supplies and guns were on that sled, I know we were both thinking only of the dog at that moment.

Dog Perished Doing His Best.

"He would dig his toes-claws spread wide-into the ice and pull with all his strength, but little by little the brave dog was being dragged closer to his death. Nothing would save him, I knew, once he was in that water.'

Well, sir, Lloyd goes on to say that suddenly it occurred to him to cut the dog loose from his traces. He reached for his knife. But the intense cold had already done its work. A coating of firm ice covered

Washington .- Changes in President Roosevelt's policies have been coming so fast Changes lately that about Come Fast

all I am able to do this week is to review the situation. I have gathered information and advice from

many official sources in an earnest effort to understand what is happening, but with all of that I am quite incapable of what I would regard as a complete analysis. As the air pilot would report while flying through fog: the visibility is zero.

The proper basis for a start, therefore, appears to be with recollection that one of the cardinal policies of the Roosevelt administration was control of agricultural production to accomplish higher prices. Another basic plank is the foreign trade policies under which reciprocal trade treaties have been negotiated with numerous foreign nations. These two planks were designed to make markets available for what we produce, first, through scarcity of quantity and, secondly, to stabilize the world exchange of goods on price levels which we, in this country, considered to be worth while. Various other legislative acts and White House announcements came into the picture also, but we need not be concerned with them just

now. Well, the higher prices began to materialize. They came along to the point where eight or ten months ago there was genuine evidence of a speculative boom. Mr. Roosevelt said recently in a statement to the press that the outlook on this circumstance was a bit alarming. Suddenly, however, the depression settled down on the country. The President took note of it after a time and announced that prices had to come down in order to encourage buying by the consumers. That was in January of this year. Early in Feb-

ruary, he told the press that there had to be higher prices to bring the country out of the depression. Subsequently-it was on February 18, I believe, he took another position on the price question. He said in a formal statement: "It is clear that in the present

situation, a moderate rise in the present price level is desirable and that this rise need not and should not extend to all prices."

So that now we are committed to a price rise on some commodities and present or even lower prices on some other commodities. It is to be presumed (because there is nothing to show a contrary view) that all of the machinery of government is to be used to bring about price rises in "some commodities" but not all of them.

However, to continue our review: I reported to you in December, 1937, and have mentioned several times oil companies getting together. He since that there is a trust busting

porting more agricultural commodities than it exported. I could not find when that condition had obtained before. Certainly, there have been few times in our history when that has happened.

The department figures showed that the United States imported 18 per cent more commodities from the farms of the world than it exported from our farms. Further examination of those statistics reveals the disturbing fact that the bulk of those imports were things which our American farmers could have grown right at home. I can find no other reason for the condition than that the reciprocal trade treaties which were to bring us prosperity have taken prosperity to

some other farmers. The circumstance caused me to wonder then whether these trade treaties are not slowly grinding the American farmer into the dust. I have tried to find out how the new farm aid law, which restricts production further in the United States, is going to help this situation. Accepting Secretary Wallace's statement that it will result in higher, prices for our farm products, will it not by the same token make a greater difference between foreign prices and our own? And if that be true, is not it to be expected that there will be more imports of farm products from foreign lands? My reasoning brings an answer of "yes" in each case, and so I cannot see where we are going to get "balanced expansion" out of those factors.

Now, as Al Smith used to say, let us look at the record as it concerns the trust-busting drive and its relation to prices, employment and the like. I simply have no patience at all with the big business groups that ignore or forget their responsibilities to the public. There is no excuse and can be no excuse for crushing any individual who is trying to run a business of his own. It is one thing, however, for a business to have grown big because it serves its public well and quite another thing for the same group to have attained its bigness through savage tactics.

* * *

That brings me to the recent conviction of the oil companies in a trial that was held Trust

at Madison, Wis. Busting As far as I have read the record in that case, the basis of the charge by

the government was that the oil companies had used a pricing system which was fostered by the infamous NRA, a policy laid down by congress. Secretary Ickes of the Department of the Interior, now one of the loudest mouths in the chorus of bust the trusts, insisted on the wrote letters to them to that effect.

ian propaganda in the British territories in the Near East in return for which Italy will guarantee not to include anti-British propaganda in its Bari radio broadcasts.

Withdrawal of foreign "volunteers" from Spain was to be demanded by Britain, and it was understood in London that Chancellor Hitler of Germany had agreed to that, and that Italy would not refuse, although Mussolini especially wishes that Franco be granted belligerent rights.

-*_

France in Tight Place

FRANCE, it was expected, would adopt a course parallel with that of Britain, for, as Foreign Minister Delbos said, she might otherwise find herself isolated in Europe. However Premier Chautemps served notice on Chamberlain that the French would join in the proposed fourpower pact only if protection were assured for Czechoslovakia and Austria. The French secret defense committee met to organize an arms expansion program involving \$855,400,000 and to lay plans for defending the Czechs against German aggression.

The Chamberlain plan leaves out Soviet Russia, an ally of France; and the French also seemed likely to lose another ally, for Poland, it appeared, was about to enter into an agreement with Germany against Russia. Field Marshal Goering, Hitler's right-hand man, was in Warsaw, entertained by President Moscicki, Foreign Minister Beck and Field Marshal Smigly-Ridz, head of the Polish army. That soldier and other leading Poles believe war between Germany and Russia will break out before long. They don't like the Germans but fear that if Stalin lost the war Hitler would proceed to grab Poland.

Isolationists Cheered

A MERICAN isolationists saw in the new European developments the eclipse of the internationalism fostered by President Roosevelt and Secretary Hull, and were greatly encouraged in their determination to keep the United States free from foreign entanglements. At the same time the proponents of powerful national defense were elated and the administra- economics since 1935.

appointed to succeed Eden temporarily. This change was in effect another triumph for Hitler, was especially regretted by France, and threatened to precipitate a serious crisis for the British government.

Viscount Halifax, lord president of the council and former viceroy of India, is a personal friend of Hitler and an insistent advocate of immediate friendship with Germany and Italy, even at the cost of great concessions by Britain. He was sent to Berlin not long ago to talk over matters with the Nazi leaders.

-*-Crop Insurance Manager

ROY M. GREEN of Missouri has been made manager of the \$100,000,000 federal crop insurance corporation, the agency created uner the new farm law to insure wheat growers against crop failures. The appointment was made by the board of directors, which also Peru. From there the bombers selected Cecil A. Johnson, formerly of Ames, Iowa, as its secretary. Green has been chief of the Agriculture department's division of fi-

constitution, a parliament composed of guilds of farmers, workers and intellectuals. Both the chamber of deputies and the senate are reduced in size and election of members is to be by trades and professions, not by po-

King Carol litical parties. The king will appoint half the senators and will have veto power over all legislation. All Rumanians are de-

clared equal, with radical distinctions, and religious freedom is friendly settlement with Germany granted with the Orthodox Rumanian church as the state religion. thony Eden, British Trials by jury are abolished and the death penalty reintroduced for who has fought the certain crimes.

The constitution was created by pean dictators for Rumania's powerful crown council, a special body established by King Carol to define general policies. -*-

Hungary Offers Pay

JOHN PELENYI, minister from Hungary, revealed that his government has proposed a readjust-ment of its "war debt" whereby it would repay the United States the full amount of its original loan but without interest. -*_

Parker Gilbert Dies

PARKER GILBERT of New S. York, who at the age of thirtytwo won fame by his brilliant work as agent general for war reparations, died of heart disease. After completing his job in Berlin he became a partner in J. P. Morgan & Co., dealing especially with matters of international finance.

Army Planes' Great Flight

-*-

SIX bombing planes of the United States army air corps successfully completed an epochal mass flight of 6,000 miles from Miami, Fla., to Buenos Aires. The only intermediate stop was at Lima, roared over the snow-capped Andes and landed at the Argentine capital, where thousands cheered the nance in the bureau of agricultural economics since 1935. Lieut. Col. Robert Olds. aviators. The planes carried 48 men

melting point.

Lloyd's gloved hand. The glove was frozen stiff to his hand. Eli had thought of the same thing, only to find his hands likewise helpless.

Lloyd says he could see the tears on his guide's face start and freeze on his wan cheeks as the dog he loved like a child slipped slowly after the sled. Muro's hind legs were now only inches from the edge of the ice. The dog looked around at his master, whined plaintively and the next second slid over the edge and disappeared forever.

The men sobbed aloud, but the fate of the poor dog brought them both back to their own deadly danger. Lloyd's 250 pounds made it impossible for him to pull himself up on the ice. The edge of the ice broke at each effort and each effort made him weaker from the cold. He finally stopped trying and hung frozen to the edge waiting for the end.

Eli was a lighter man, and after what seemed hours he was able to draw himself up on the ice. He crawled on his stomach to shore and Lloyd through glazed eyes saw him go and did not blame him.

Saved by His Faithful Guide.

But Lloyd's Indian guide had no intention of deserting him. Back he came cautiously on his stomach, pushing a small pine tree in front of him. Lloyd was able to wrap his arms around the tree and was soon on shore

And then their troubles really began. With clothes soaking wet and freezing fast in the deadly cold they began their fight for circulation. They ran eight miles in that condition. Lloyd says the guide's face was black from the cold and he had to hit him to keep him awake. Cold kills by making its victim sleepy, but Lloyd wouldn't let the guide rest. More dead then alive they reached the cabin, and that's where Lloyd's waterproof matches come in.

His frozen hands finally got a blaze started, and the two lay before the fire and thawed out. No food was in the place, but they heated water and drank it hot throughout the long night. They stripped and dried their clothes and at dawn started the long trek back to their permanent camp. Both men made it and Lloyd was soon on his way home.

But the guide, Eli, took to his bed and never got up. Pneumonia set in and the brave Indian went to join his beloved dog in the Happy Hunting Ground.

Platinum could not be used in ancient times because of its high five and eight years. drive on that is as big and as broad as the famous "big stick" which constitutional but the decision was Theodore Roosevelt used when he was President. Twenty-nine cases against so-called monopolies are pending now in federal courts and the federal trade commission has to grant privilege of agreement on some others in process of prosecu- prices for purposes of stabilization. tion. The prosecutions range all the way from ladies' half-size dresses and against individuals who design styles through the list to Aluminum Company of America.

Now, while the trust drive has been on (and some folks have been cruel enough to charge that the trust busting drive is to keep the folks from realizing we are in a depression), another thing has happened. I refer to the passage of the new farm aid legislation. I have do it. They picked a New York not been able to understand the law, but Secretary Wallace calls it one of God's blessings to the farmers because he says that it will re- did in the oil case. duce or limit production and thereby force a greater return to the farmers. In Mr. Roosevelt's statement on the general price situation, however, he spoke of the new pro-

gram as follows: "Our program seeks a balanced system of prices such as will promote balanced expansion in production. . . . This is not a policy of restriction; it is a policy of abundance."

I seem to recall some phrases of a few years back which described the plans as leading, first, to higher prices for agricultural products through "scarcity"; then, there came "the more abundant life" and later balanced abundance. I assume the "balanced expansion" must represent something taken in between the other policies, but I

frankly do not understand. That is this report to you by way of a review.

* * * Although admitting that much of the new program is too deep for me

and from which results have begun to show. Take the reciprocal trade treaties as an example. I came across some figures down at the Department of Commerce the continue to ask each other: "Where other day and they were something of a revelation. They showed that in 1937 this nation of ours was im-

constitutional but the decision was based on the question of congressional authority to delegate powers to the executive officers. It did not declare that congress had no right

We might also look at some of the tactics employed by the government. Robert H. Jackson, who was the spearhead and spokesman for the trust busting drive, lately has been promoted to the job of solicitor general of the United States. Mr. Jackson told a senate committee considering his nomination that he had picked "the proper forum" for the oil case. He said the Department of Justice would continue to court to hear the case against the Aluminum company in order to get the proper kind of a jury as they

The tactics used in the Aluminum case seem to me to be almost reprehensible. For instance, the government had been anxious to set a date for the trial and the Aluminum company counsel urged early action. The record of that day in court in New York revealed that when Judge Knox proposed a date early in April, Walter Rice, one of Mr. Jackson's assistants, admitted to the court that the government did not yet have enough evidence to prosecute.

This seems far afield from the price question. I wonder if it is so far off the subject. As I said earlier in this discussion, legal action against anybody, individual or corporation, is destructive, demoralizing and expensive. I know nothing about the merits of the oil case or the aluminum case or any of the the reason why I have attempted others beyond what I have picked up in the records. On the other hand, however, it is plain for anyone to see no "price structure" can be arranged for "balanced expansion" if the federal government is going to decree one course of action for business with one hand and write an obituary for the same business with the other hand. That is to say, if the people are unable to know or understand what their government policies are, it is quite likely that those same people will are we going and what is the end going to be?"

By GEORGE A. BARCLAY MORE than 100 rookies are being taken to the various American league spring training camps this year. How many of them will make good and stay in fast company?

That is a question that eight American league managers would like to be able to answer right now. But looking over the records of

these recruits and gathering dope from the minor league managers who tutored them in 1937, it is evident that a very competent bunch of new men are getting tryouts in the junior circuit.

The Boston Red Sox seem likely to retain at least eight of the players brought in from Minneapolis and Little Rock, Ark. Among these are Catcher John Peacock, Pitcher Charles Wagner and Outfielder Henry Gaffke of Minneapolis; Pitchers Emerson Dickman and Dick Midkiff, Infielder Jim Tabor and Outfielders Deal and Nonnekamp of Little Rock.

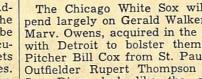

Mike's New Pitchers

Mickey Cochrane, who recently announced his definite retirement as an active player at Detroit, appears to have some likely recruits. Detroit's roster is long on pitchers. Mickey will have 17 to choose from. Elton Benton, who starred with Memphis last year, seems ready. Among other good prospects are

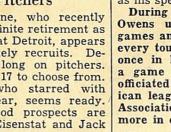

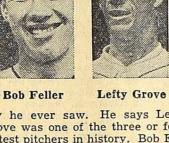

Corbett, Infielder Frank Croucher and Outfielder Roy Cullenbine. The Chicago White Sox will depend largely on Gerald Walker and Marv. Owens, acquired in the trade

with Detroit to bolster them, but Pitcher Bill Cox from St. Paul and Outfielder Rupert Thompson from

Giants Short Lived

The circus giant, the man with abnormally long legs or other ab-normalities of frame, is a shortlived human. Tall men fall into two classes, those who attain their extraordinary growth because of inherited tendencies and those who become freaks because of some upset in the glandular functions. The man who "comes by his height natny, given to research in such matters, found that a number of men ranging from 7 feet 6 inches tall to 8 feet 7 inches had an average life of thirty-four years. The oldest died at forty-five, the youngest at twenty-seven.

has been a consistent deflationist, so terial, with Pitcher John Humphrey far as education is concerned. He of New Orleans, Outfielder Geoffrey wants fewer and better students in Heath and Third Baseman Kenny the colleges. He assails the col- Keltner of Milwaukee out in front leges which would "teach anybody The acquisition of Catcher Rollie Hemsley from the St. Louis Browns,

> The New York Yankees' rookies come from Newark, which won the International league pennant by 24 games last year. Pitchers Joe Beggs, Atlee Donald and Second Baseman Joe Gordon seem ready to step into the lineup and make good.

Connie Mack is believed to have four recruits who will give the Athletics considerable aid and comfort this season. These include Pitchers Bill Potter from Columbus, Ohio, Steve Kalfass from Trenton, N. J.,

First Baseman Bill Hasson of Williamsport and Second Baseman Lodigiani of Oakland, Calif. The St. Louis Browns appear to

have strengthened themselves not only in their recent major league trades, but by the acquisition of Pitcher Vito Tamuulis and First Baseman George McQuinn of Newark, and Pitcher Muncrief of San Antonio.

Several of Bucky Harris' Washington recruits appear to lack experience, but Outfielder Frank Case and Pitcher Mike Krakakaus of Trenton and Pitchers Leonard of Atlanta and Phebus of Chattanooga are highly touted as being able to deliver the goods in big-league style.

Diamond Flashes

Fifty nationalities, or combinations of nationalities, are represented in the Na-tional league. Three have Indian strains: Guy Bush of the Cardinals is English-Indian; Roy Johnson of Boston, Norwegian-Indian; Tom Baker of the Giants, Irish-Indian, . . Lee Grissom, Cincinnati south-paw rookie, was unable to beat either Pittsburgh or St. Louis last year, losing four to the Pirates and five to the Cards. But he beat Boston four times and Brookurally" usually lives a normal life lyn thrice ... Lou Fette of Boston defeated span, but the freak seldom attains middle age. An insurance compa-game. It was the most victories any pitcher chalked up over one team ... Nine players in the league have hit more than 100 home runs in their N. L. careers. Nineteen players still in the league have driven in more than 500 runs. Twenty-six have made more than 1,000 hits . . . Biggest margin held by any club over another since 1900 is the Cubs lead over Boston, 519 to 301.

New David Harum

G ABBY STREET, foxy old man-ager of the St. Louis Browns, has earned himself the undisputed title of the David Harum of the American league with three deals this winter which have brought him seven first class players in return for the three he traded, plus abut \$20,000 in cash.

In the first trade, the Browns obtained Pitcher Buck Newsom, Outfielder Buster Mills and Infielder Ralph Kress from the Boston Red Sox in return for Joe Vosmik. In the

Rollie Hemsley.

second deal they sent Rollie Hemsley, veteran catcher whose play has ranked with that of the game's greatest backstops, to the Cleveland Indians for Catcher Billy Sullivan, Infielder Roy Hughes and Pitcher Ed Cole. In their third trade they swapped Shortstop Bill Knickerbocker to the New York Yankees for Utility Infielder Don Heffner and are said to have also received \$20,000 in cash from the Yanks. © Western Newspaper Union.

if the hay contains one-third or more of legumes it is not necessary to feed grain containing more than 16 per cent protein.

and sunshine" treatment, four "con-

trol birds" were exposed to exactly

the same conditions, except that

they were given no sulphur. This

group showed no visible reduction

in infestation, either indoors or out.

In other tests, sulphur feeding

was combined with the spreading

of sulphur about the yards and in

the houses in a "two-way" treat-ment for combating "sticktight"

fleas. The sulphur diet was aug-

mented by adding 100 pounds of sul-phur to each 400 square feet of yard

area, and by placing a light coating

of sulphur on the floor of the houses

Sulphur was found to be effective,

Growing Out the Calves

Profitable to Dairymen

Professor Savage from Cornell

university believes that the cow and

the man who feeds her are more

important than the feed formula.

Where other items are properly

controlled he has demonstrated that

under the litter.

ently complete.

No dairy farmer can expect a profitable herd if he neglects to properly grow out his calves. Professor Savage believes a calf ought to have 350 pounds of whole milk during its first eight weeks and this should be supplemented by a good calf starter until the calf is well able to take care of a standard fitting ration.

A calf starter used successfully at Cornell is made up of 645 pounds ground corn, 560 pounds rolled oats, 200 pounds bran, 100 pounds linseed meal, 60 pounds white fish meal, 400 pounds dried skimmilk, 10 pounds steamed bone meal, 10 pounds ground limestone, 10 pounds salt, 5 pounds reinforced cod liver oil.

Of Interest to Farmers.

Feed is one of the most important factors in egg production.

Quarter pound eggs are laid by a Manchurian breed of chickens.

Watch closely for throat infection. It spreads rapidly and will result in death by choking.

Ducks can be bled in the mouth the same as turkeys or chickens; this is the proper way to kill them.

Estimated annual loss to poultry industry in the United States from eggs that fail to hatch is \$20,000,000.

Sunflower seeds are very high in protein and fat and are unlike most of the other poultry grains that we use.

. . . Eggs laid by Kentucky hens in

one year would reach around the earth at the equator if placed end to end.

. . .

The color of egg shells depends on the breed of hens. It in no way indicates difference in food value or quality.

. . .

Economists say farmers fare better when they have bounteous crops to sell at moderate prices than when they have scant crops to sell at high prices.

Jardeners ture He does say, however, that

G ROW better flowers by planting them in the kind of soil in which they can perform best. Though your soil may be good and rich, certain flowers will not do as well in it as in poorer ground. In rich soil plant zinnia, petunia, portulaca, snapdragon, stock, he-

liotrope, marigold and salvia. Nasturtium, love-lies-bleeding, Joseph's coat, celosia, alyssum, California poppy, calendula, love-in-a-mist and hollyhock are suggested by the Ferry Seed Institute for growth in poor soil.

Heavy soil containing clay is good for sweet peas, pansies, stocks, carnations, scabiosas, den. 5c a packet and up. 1938 snapdragons and most of the pop-**NOVELTIES too!** Ferry-Morse ular perennials.

The following prefer a soil of light texture:

Petunia, Portulaca, celosia, hollyhock, love-in-a-mist, annual phlox, calliopsis, nicotiana and all the climbers.

vinca.

'HE soup described below is delicious. It has a delectable flavor and the rich color of the pimientoes gives just the desired red touch to the finished product. 1 tsp. salt 2 slices of onion 1 can cream of celery soup 1 cup milk 3 pimientoes 1/2 tsp. paprika

If canned condensed soup is used, prepare according to directions on the label and then add 1 cup of milk. If canned ready-toserve cream of celery soup is used, pour the contents into a pan and add the cup of milk. Rub the pimientoes through a sieve and add to the soup. Add salt, onion and paprika and heat until the soup is hot. Stir frequently to prevent scorching. Remove the onion before serving. Serves 6.

The food with red color in the main course might be a ring mold made with canned beets.

The red color for the dessert might be supplied by a raspberry gelatin made with a can of red raspberries.

MARJORIE H. BLACK.

What Is Proper Use of Furniture Polish?

In a recent investigation, it was proven that many, many homemakers use furniture polish incorrectly-pouring it on a dry cloth, for application to the furniture! This is a gross waste of the housewife's time, energy and her polish! And the latter is usually blamed. We refer, of course, to oil polish-for this type is best to clean, beautify and preserve the furniture. The best oil polish is not greasy, because it's made with a fine, light-oil base. The polish should be applied on a damp cloth -thoroughly moistened with water, then wrung out. Saturate this cloth with the polish-spread on-and rub lightly. The "wet" of the cloth smoothly distributes the polish-and the finish absorbs, receives it evenly! This correct procedure takes the "labor" out of polishing - and requires far less tiresome rubbing! A dry cloth is then used to easily work up the glow, which is even and uniformthe desired effect! This-and only this-is the proper way to use a good oil polish!

... because O-Cedar not only cleans as it polishes, but preserves your furniture-"feeds" the finish, prevents drying-out, cracking. Insist upon O-Cedar Polish, for furniture, woodwork and floors (with the famous O-Cedar Mop). O.Cda

CHAPTER XIV-Continued

0

-16-"You make a great mistake," said Dorado pleasantly, "two mistakes. It is not so easy to die as you think, also you would be no use to me dead. I wish you only kindness and goodness and a long life as the Senora Pepe Dorado." He paused. "We will enjoy La Barranca together."

She stared at him over the half empty plate, set it aside on the cot but retained the three-tined steel fork. With a single sweeping movement, unbelievably swift, he leaned forward and struck the murderous weapon from her hand so violently it went flying out into the night. "You want things to be unpleas-

ant, hein?" he cried, his eyes flashing. "Good. From now on you eat with your fingers like the peones. You don't sleep in here where there's plenty of air, no! You sleep inside in the dark-no fire, no air, nothing. Me, I stay here and ten

men more." "All right," said Joyce, a faint light of hope dawning in her eyes.

"Can I go now?" "Yes, now," said Dorado, calming himself by a mighty effort. 'Perhaps tomorrow when the priest comes you'll have more sense.'

"What good would that do you?" asked Joyce quickly. "You know as well as I no marriage by a priest is legal in Mexico."

"No? You know so much, eh? Then you know that for the world the church is everything." Again he smiled. "After the religious consummation you won't mind so much the civil ceremony." Again he called and the same two men came back to carry cot, mattress and blankets into the innermost room. He followed, waving a brand from the fire into a flaming torch and propelling Joyce before him. He pointed with his chin along the farther reaches of the drift. "Perhaps you think you can climb out that way. Try it and I give you for a present to the men who catch you."

Left alone in darkness Joyce crept to the cot but not to lie down. Dragging a blanket over her shivering shoulders she sat on its edge, elbows on knees and her chin cupped in her hands. It was no good thinking-no good at all-but she could listen, keep on listening. How often had she boasted to herself she was afraid of no man alive! She was afraid now; fear seemed to melt her bones and set the teeth in her head to chattering. Another sound came to her ears, a single snore and soon after a veritable chorus. There was something actually comforting in the harsh dissonance and the longer

but with a grip like the grasp after | open, never stirred. He spoke to death. Her head drooped between her. her arms, struck and struck again.

So this-not that other-was to be the end. Dirk kneeled beside her. "Joyce! For God's sake, Joyce! You've got to speak! Oh, Joyce, wake up. Darling, we've got to get away, you've got to ride!"

"Let up on it," advised Leonardo harply. "Can't you see she's sharply. passed out? Get on your horse, se-nor, and take her. Hurry!" Dirk mounted Tronido. "I'm ready; what are you waiting for? What are you doing?"

"You never can tell," said Leonardo, pausing to knot a tie rein to one of the thorn trees. "There's a bare chance the senor who went below may crawl out of this hole alive and if he does he's going to find a horse. Tobalito?" "Presente!"

"Give me a hand with the senorita."

Together they lifted Joyce and placed her in Dirk's arms. Sitting on the ridge of the cantle he gave her all the saddle he could and trembled for fear Tronido might act badly under the unaccustomed burden, but the horse seemed to know exactly what it was all about. They

Thrust Dirk Back When He Attempted to Follow.

started, Tobalito as guide in the lead, Dirk next and Leonardo, armed, bringing up the rear. A it continued the more did it soothe whinny from the tethered range po-'ny rang out sharply across the des-

"Joyce, you aren't awake, are you? Can you hear me? Just move

something-your hand or your lips. Show you hear me." There was no answer by sound or sign, nevertheless so strong a feeling of content pervaded him he could not doubt all would yet be well. Tobalito knew better than to follow the barranca too closely; he made a detour through little-used paths known to few but himself. The pace slowed from a canter to a walk and Dirk, glad his companions knew no English, began to talk. "Joyce, I love you. Whether you

can hear me or not doesn't matter in the least since anyway I'll be telling it to you over and over again. I don't know when it began or where it will end, and I don't care. I'm part of you and you of me. There's nothing cheeky in what I'm saying, really there isn't, because it's just something that's happened and can't be helped. I love you. I belong to you the way your hand belongs. You can do anything you like with me except cut me off. If you do that, you'll bleed-bleed to death."

Abruptly his face leaned lower, nearer to hers. "Oh, that's non-sense!" he cried. "How do I know? What makes me think you'll bleed? How can I keep on believing it if you don't say so? Oh, Joyce, darling, please speak, please tell me. How can you be so near my heart and not answer it? I can feel yours and it's still-so still it's almost as if it weren't beating at all. But you can't be dead since I still live. My blood is your blood. Everything I was, everything I'm going to be, has rushed into this moment with you in my arms. Because I love you. I love you."

Tobalito debouched suddenly from the shadowy recesses of an arroyo and came to a halt with Dirk beside him; Leonardo drew level. In plain view, only a few hundred yards away, stood the white mass of La Barranca. To the right was the towering blot of trees, melting into the inky expanse of the lake choked and over again."

with hyacinths. To the left stretched the illimitable prairie, marked here and there with the black candelabra and exclamation points of cacti. No light showed from the hacienda, yet they knew eyes were watching from every angle as they advanced toward the eastern gate. It swung open at their approach and they entered. Promptly it slammed shut behind them.

Luz took command of Joyce, still inert, and thrust Dirk back when he attempted to follow. Adan Arnaldo, gloomy because poor horsemanship had prevented his joining the rescuing expedition, led him to Don thoughts. I lay in them and Jorge in his office where he was dreamed. I felt safe and happy, greeted with the news a courier had come through from Mexico City and tossed dispatches for himself and Blackadder across the now impassable barranca. Dirk opened the long envelope bearing his name with some trepidation and was relieved to find it a personal missive, written in the ambassador's own hand. "My dear Van Suttart," he read, "at last word has reached me through General Onelia of your whereabouts. For your diligence in following out to the letter the instructions in a certain cable from the department you are to be commended. For assuming I was to be kept in pitch darkness as to your movements, thereby robbing me of sleep and turning my hair from gray to white, I intend urging your dismissal from the service on the grounds of malfeasance unless you return at once to your regular duties. As you have darkened my days, so will I blacken your name-

find that indeed we cannot.

"Bad news?" asked Adan, noticing Dirk's thoughtful expression. "Not particularly," said Dirk, "but I guess I'll have to rush back

if it's only to square myself." "Give us your account of the rescue, my son," said Don Jorge plead-ingly. "We have been very patient."

"Forgive me, Maxie; I've been rude as well as selfish," said Dirk, and plunged into a detailed account of all that had happened.

As he finished Luz came in search of him with the good news her mistress had awaked and wished to see him. For the first time he entered Joyce's bedroom. It was more cheerful than any other in the house. There was an open fire, burning midst and gone His way. Now He gaily, and opposite it two high windows looking out upon a walled garden. Between them stood a bed with scrolled back and no footboard. Its towering tester made it seem a throne but Joyce, her dark head half buried in pillows, looked too small for a queen. He sank on his knees and seized her listless hand. "Joyce," he whispered, "didn't you hear? Nothing at all?"

"Hear what?" she asked, her eyes studying his face feature by feature.

"When I was holding you in my arms on Tronido," he explained. "You were close to me, your heart against my heart. My lips were beside your ear. Oh, Joyce, you couldn't have stayed unconscious all that time-you must have heard."

"But what was it you said?" she insisted, looking him full in the

"I-I told you I loved you," stammered Dirk desperately.

"Was that all?' "No. I said a lot of things. I think I said some of them over

"What were they?"

He knelt in silence, looking into her grave eyes. His hand dropped hers, the arm he had thrown across her waist grew lax. His head fell forward.

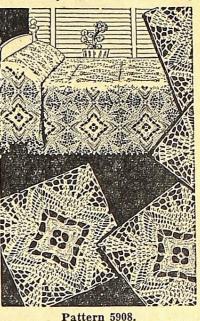

"I don't know," he whispered. 'I've forgotten. I can't remember a word.

So swiftly he never knew how it happened her arms were around his neck and she had drawn his head down against her breast.

"Oh, Dirk, darling, of course I heard! I heard all you said and a lot more. It wasn't only your arms how he could ever be a preacher or a missionary. Well, he can, and that were around me, it was your

her. Presently she fell sidewise, stretched out and tumbled into unconsciousness. She awoke to the flare of a wax match. So it was here-she had slept and the terror was upon her! Her throat thickened and closed tight as she discerned Blackadder's eyes, cavernous and glowing. Not the end after all she thought drowsily, thank God

only another dream. But his whisper took on form, became actual words. "Joyce, don't make a sound. Lis-

ten. Do you see this rope? Wait. I'll light another match. Now look. I'm going to tie the end of it around your waist for safety, but the rest will be up to you." The second match went out but the whisper kept on. "Take the rope in your hands. That's it. Now follow it. Walk as quietly as you can, test out each step before you put down your foot. Just follow wherever it leads." His hands brushed across hers, seized the rope and gave it three sharp pulls. "Good-by, Joyce."

"Good-by." She had answered automatically but now something in the manner of his final whisper troubled her and she frowned but presently was intent on carrying out his orders to the letter. She had gone quite a distance before she noticed there was no slack. Even her bemused mind knew what that meant; somebody at the other end was taking it in. Suddenly the rope slanted upward so sharply she stumbled and fell to her knees. She was up again in a moment and stood quite still,

wondering if the sound of her fall had been heard. Apparently not. She continued, resting more and more weight on the rope as the climb grew steeper. Several yards of the ascent were behind her when a stone that had seemed firm sank away and went rumbling downward The next instant the roar of a dozen voices reverberated far down, far behind her, so the very earth seemed to shake. Then three lonely shots. Then an answering deafen-

ing volley. Now she knew why Helm Blackadder's good-by had lingered so strangely in her ears. The rope was lifting her, dragging her upward faster than she could place her feet. Her knee struck

ert air. Startled, Tobalito put spurs to his flea-bitten mount. Dirk found a trot galling, but was at ease the minute Tronido reached out into the cradle-like motion of his swinging canter. He shifted Joyce so her head lay against his shoulder, passed the reins to his right hand and with his left held her knees securely. Though her coma persisted he knew she lived by the faint tremor of her breathing and be-

cause while at first she had seemed rigid and cold now he could feel his own warmth gradually stealing into her veins.

But he was troubled about something else. "Leonardo," he called over his shoulder. "Do you really think there's a chance Blackadder's still alive?"

"None, senor; he did not wish to live."

"Why do you say that?" Leonardo rode closer, not caring to shout his answer. "He really died when he came to after we'd pulled him out at the place of the fallen bridge. He spoke and told us all, but I could see it was a dead man talking."

"Are you loco?" asked Dirk.

"No, for I've seen it happen before," said Leonardo. "With some men pride takes the place of blood and bone; destroy it and they die. It was so with him. His tongue talked but only to tell us of his shame; I could see his heart and eyes were dead. He knew he could never return to his ancient path, never walk upright except to death. So he died, God and the Virgin rest his soul.'

"Then why did you leave the horse?" asked Dirk. "Do you expect a miracle?"

"No." said Leonardo hesitatingly, distressed at being driven into a show of his secret thoughts, "though in my country miracles have often happened. I think I was moved. senor, in the manner of my ancestors, to make a living sacrifice to the memory of a brave man."

Dirk imagined a faint stirring within the burden in his arms, something vaguely different from the mere persistence of life. He peered down at Joyce's face, tilted here, an elbow there, and sometimes her shoulders dug into the damp loam of the disused shaft. Breath went out of her, stayed out. Her hands still clung to the rope,

glad to be sure I'd bleed if ever I cut you off. You kissed me once in your way, now I kiss you in mine. I'm kissing you with my heart against your face." A dull boom rent the air and

trailing it came a weird howl that passed over the house; there followed a rending of branches in the outer garden and then a terrific explosion. Dirk leaped to his feet and stood transfixed. Joyce sank back against the pillows, wide eyes staring at him questioningly. All the hacienda stirred into life with the hum of a threatened swarm of bees. Shouts were heard, presently punctuated by the thump of Don Jorge's approaching staff. Joyce half rose, her shoulders gleaming white but strong above the yoke of her filmy nightdress. Abruptly she seemed no longer too small to be a queen.

"That was no earthquake," she stated; "it was a gun-a cannon." (TO BE CONTINUED)

When the rivers are literally translated from the Siouan, closed and her lips, though half low their boats drift toward the means "land of the sky-blue water."

it is such folk that God often calls. "What is this wisdom?" (v. 2). 2. The wisdom of Jesus was the wisdom of God (John 7:16). But how could they know that? How can we know? In John 7:17 Jesus gave the answer: "If any man will do his will, he shall know of the doctrine, whether it be of God, or whether I

speak of myself." We see then that the reason for their unbelief was really an unwillingness to do the will of God. The controlling motive of their life was wrong. Had they been moved by a desire to do God's will, and a purpose to live in accordance therewith (even though there might have been failure in that earnest effort), they would have known that Jesus had His wisdom from God.

II. The Power of Divine Commission (vv. 7-13).

Just as unbelief hinders even the Son of God, so faith in God and obedience to His command makes of weak and poorly equipped men the mighty servants of God. In fact, their very dependence on Him for all things sets them free to devote themselves fully to the ministry of preaching and healing.

Note that they went "two by two." We have forgotten that divine plan, and often send men into remote and dangerous pioneer work -alone. Man needs fellowship; he needs counsel and control.

Consider also how they were to learn to trust God for their daily sustenance (vv. 8,9). They suffered no lack (see Luke 22:35). These rules for the life of religious workers were modified later (Luke 22: 36), but the principle remains the same-the man or woman who is not ready to depend on God for everything had better not set out to follow Him. It is a blessed and delightful life!

Resisting Interference

It is sometimes pretty hard to do something you feel is right against American Indians had an importhe interference of all the world and tant part in naming many states of her little brother. Sometimes it's a the nation. Wyoming was called good thing to say "right or wrong, "M'cheuwomink" by the Indians, a that's my story, and I'm going to Smithsonian institution survey restick to it," no matter how many veals. Nebraska means "flat wawell-meaning friends may advise ter," to the Sioux tribes; Oklahoma otherwise .- Ouise Vapel.

Mother's Work

"The future destiny of the child is always the work of the mother.' -Napoleon.

need neglect even minor head colds.

Here is what to do: Take two BAYER tablets when you feel a cold coming on - with a full glass of water. Then repeat, if necessary, according to directions in each package. Relief comes rapidly.

The Bayer method of relieving colds is the way many doctors approve. You take Bayer Aspirin for relief - then if you are not improved promptly, you call the family doctor.

All Life Is Music All one's life is music, if one touches the notes rightly, and in time. But there must be no hurry .- John Ruskin.

What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

Safety Workers Recruit Science In Battle on Highway Fatalities

Automatic Gadgets Will Eliminate Human Element in Autos of the Future, Say Pioneering Engineers-Read and **Gasp at Their Elaborate Precautionary Plans!**

By JOSEPH W. LaBINE

Automobile accidents dealt sudden death to 39,700 persons and cost the nation two billion dollars last year.

That is not news. It is an all-time record and a disgrace which should be emblazoned in letters of fire along every highway of the land, although it already has screamed from many headlines in the last few weeks.

But today, for the first time, there is a definite, organized war being carried into every corner of the United States by an army of 8,000,000 who, with their families, make up a quarter of the nation's population, in an effort to drive the grim reaper from the highway once and for all.

THAT is NEWS.

And scientists today are able to predict confidently that the time is in sight when science will take over the control of a moving car when it is not

safe to leave the control in the driver's hands-and restore that control to the driver at times when nature would ordinarily take it away from him.

THAT is news, too.

Twelve far-seeing national, civic, educational and business organizations are recruiting the troops for the war on death.

One would expect to find lined up in such a campaign the American Automobile association, the Automotive Safety Foundation, the Highway Education board, the International Association of Chiefs of Police, the National Automobile Dealers' association and the National

Safety council-and so they are.

Here are traffic developments predicted for the future: (1) Guiding cars automatically by invisible rays from cables in a street. (2) Ending motoring's "hazard zone" with-in effect-a battery of windshield wipers through non - skid methods. (3) Infra-red rays from car to car to slow down vehicles approaching too rapidly. (4) Radio beam warnings from one car to another. (5) Electric eyes to control highway lighting so that any given area is illuminated only when traffic requires it.

on the road-10,000,000 more cars than now choke the highways!

Except for the relatively few heavy traffic routes which are properly lighted, the inadequate systems used for illuminating the highways, and the blinding glare of headlights on the road, are two chief reasons given for rural roads being the scene of most fatal auto accidents.

Clintock. This development will Science is developing a new sys-tem of highway lights for certain areas which will supply long-range also make use of infra-red light rays and photo-electric cells, he visibility without glare-illuminat-When the first "one-lunger" ing the road so that a driver can chugged down Main street, a speed see as far ahead as in clear dayof 30 miles an hour was considered remarkable, and as a result, no parlight. ticular demand was put on the

brakes. Nowadays, stock cars are Because the taxpayers would manufactured with much greater groan if all highways were floodspeeds, and more efficient brakes lighted by this new lighting syshave followed-brakes which can tem, traffic experts say that glare-less headlights will be necessary on bring cars to a stop in less than half the distance formerly required, 90 per cent of the highways. Here, if the proper traction can be obtoo, science has the answer in de-Such traction is a simple matter when road surfaces are dry, ac-

ORE than ever the spring M fashion picture is going strong for suits. Somewhere in the current collections "your suit" is holding forth, waiting only for you to come and get it.

Which is by way of telling you that the styling of suit costumes is so diversified this season you can depend upon being perfectly "suit-ed" in that the fashions for spring and summer 1938 include models typed to every individuality.

Suits that lead in the style parade come out definitely in favor of color. Which is most significant news and should be kept in mind when choosing the new spring outfit. Even more newsy is the fact that many of the smartest suit costumes favor two colors rather than one. They highlight, for instance, such intriguing combinations as raspberry and navy, maple or brown and beige, gold color with black, or they contrast a pale blue woolen with red fox trim and so on.

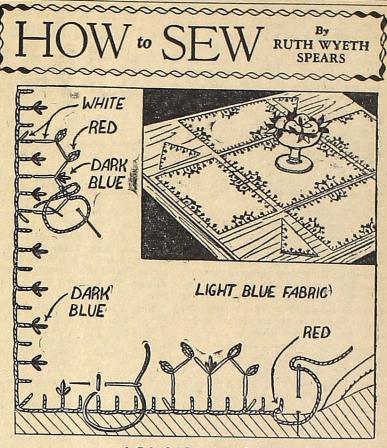

It's going to be tremendously interesting to go suit hunting this spring for just such stunning models as here pictured are typical of what you will be shown throughout your quest in the better shops and departments. The three-piece costume suit to the left makes two-color its theme in a dramatic styling of black nubby wool combined with the same wool weave in the striking gold color that is so new and so fashionable velopment of polarized glass for headlights and windshields to elim-inate glass dimensional state of the patch pockets are decorated with black is accurated

tel woolens, such as grayish blues and the once old-fashioned and now new-fashioned "old rose," and a list of soft lovely muted shades might be cited. Seen to the right in the picture is a charming two-piece costume suit tailored of fine wool fabric in a beguiling light blue. The fur is red fox. You'll love the color combination. The dress has cutout embroidery on the blouse.

For the new suits the dominant silhouette is square shouldered, straight and decidedly boxy in line. This trend is seen in dressy as well as casual models, the chief distinction being a matter of fabrics and ornamental details. Quilting, embroidery and fur trimming distin-guish costumes in the dressy category while contrasting appliques and novelty fabrics highlight the casual types. Of greater promi-nence than in any recent season is the tuxedo front employed on innumerable garments from full length coats to jackets ending at the hip. Many suits are of fabrics that

favor pencil stripes, checks small or large, lightweight tweeds that are nubbed or flecked, some in gay plaids, others herringbone or diagonals and there's a list of colorful airy homespuns shown.

From the signs that tell, it's a navy spring. With navy in the lead

A Colorful Luncheon Set

WE HAVE been hearing a by-step directions for making slipgood deal about American covers and dressing tables; curhandcrafts lately. Of course, tains for every type of room; quilts have always been important among our needlework hand- ful articles for the home. Copy crafts. So many readers have written asking me for more of the old fashioned embroidery stitches that were used in making crazy South Desplaines St., Chicago, Ill. patchwork that I have collected dozens and dozens of these quaint

stitches from old quilts. This gay little double house effect built upon blanket stitches with chain stitches flaunting from all gables was the invention of someone's great-grandmother and I couldn't resist using it for a luncheon set of light blue linen. It originally adorned a light blue

satin patch in a quilt and all the other colors indicated here in the sketch are the original colors.

All the strands of six-strand mercerized embroidery thread were used for the luncheon set. The mats were hemmed first and then the blanket stitches were taken through the hems to make a firm edge as shown at the lower right. All the other stitches used are clearly illustrated. Just the edge stitches without the little houses were used for the napkins. Many more authentic old patchwork stitches are illustrat-ed in a new leaflet which is free upon request with the booklet of-

fered herewith. Have you a copy of Mrs. Spears' new book SEWING? It contains forty-eight pages of step-

move grease and dirt from hair brushes and combs, wash them in a quart of water to which a teaspoon of ammonia is added; rinse and dry in the sun.

Fluffy Meringue.-If you like fluffy meringue for your pies, add a teaspoon of baking powder to the well-beaten whites of two eggs before adding the sugar.

Sweet Omelet .-- A tablespoon of sugar added to the regular omelet batter will produce a sweet omelet that is especially popular with youngsters.

Washing Parsley. — Parsley washed with hot water keeps its flavor better and is easier to chop.

Glowing Lamps .- Here's a tip

for country readers who use gas or lamps. Never wash the glass globes as it makes them crack. Sprinkle methylated spirit on a clean soft rag, rub it on the globes, leave for a few minutes, and then polish. They'll be like new.

stars are in motion. The name morning star is

Do you fe

But it is encouraging to learn that the banner is also being carried by such ordinarily independent groups as the American Legion, the General Federation of Women's Clubs, the National Congress of Parent-Teachers and the National Grange. Particularly the National Grange, for in the rural areas more automobile accidents result in swift and horible death, relatively, than in the more crowded thoroughfares of the cities.

Science Takes a Hand.

And it is especially heartening to discover that two active groups represent the scientific resources of two great universities. These are the Traffic Safety institute of Northwestern university in Evanston, Ill., and the bureau of street traffic research of Harvard university at Cambridge, Mass.

Two "crystal-gazers" of science -Dr. Miller McClintock, director of the Harvard bureau, and Prof. John M. Lessells, of Massachusetts Institute of Technology-recently startled the automotive world with visions of the day science will make highway accidents next to impossible.

Dr. McClintock speaks of the day to come when invisible "electric bumper" rays will prevent one motorist from colliding with another, no matter how careless he may be.

"It is possible to lay in the pavement itself electrical cables which, when a car comes to a dangerous curve or around an obstruction, would automatically take the steering from the driver by radio control and thus center the car over the cable and steer it safely around point where the car makes con-the curve or obstruction," Dr. Mc-Clintock explains.

Pointing to the success of "in-visible eye" controls in other fields, the scientist predicts the use of electric bumpers. This would be made possible by installing infrared lights in the rear of automobiles, which would actuate photoelectric cells in front of other cars. This "invisible eye" would reduce the speed of a car overtaking another too rapidly.

Lighting the Way.

Cars of the future may themselves turn on and off the lights They expect, on the basis of presused to illuminate highways at ent trends, that the next 20 years

Emphasis is on English walking suits of the type pictured. Indeed the costume that tops a skirt of handsome plain wool with a jacket that is tailored of colorfully plaided wool that assumes a very British air in its many-pocket detail and

general feeling of superior workmanship and material has become quite an idol of fashion for town and country wear among the smart set. The stores are showing similarly styled two-pieces in dashing color combinations.

TRAILER CLOTHES **NEW FASHION THEME**

By CHERIE NICHOLAS Now that that there is an increasing enthusiasm shown for trailer travel, a new phase of fashion challenges the creative genius of designers. Here's describing the latest or shall we say earliest in trailer outfits as displayed at the spring style revue recently presented at the Merchandise Mart in Chicago. Practical and at the same time very attractive mattress ticking denim was the wise fabric choice for this utility outfit. The overalls with zipper in front are backless above the waist, and there is a little boxy jacket to complete the ensemble. It's a perfect outfit to wear when you go trailering.

Color of Frock Trim Is

Often Picked Up for Hat For afternoon, often the color of its trim is picked up to make a bright felt hat that rises in any direction that proves becoming. Braid trim may be repeated on a hat, sequins often make the top of a flat crown, ribbons follow the dress trim or cutouts of the dress fabric are appliqued onto the edge of a long veil. Sports hats worn with tweed and

dark wool suits follow the bright tones of blouses, the crowns taking a high, tapering line. Berets are adapted for all occasions-there are high, stovepipe crowns and fan-shaped brims rising from the front or back of turban-shaped hats.

Concealed Heels

Concealed heels are one of the latest contrivances for adding inches to the size of small women, and men as well. Built snugly into the inside of the shoe, they provide the desired height without affecting the outer contours in any way.

Two Kinds of Vampire

The Greeks believe that there are two kinds of vampire-one dead, but retaining a sinister half-life by preying on the blood of the living; and the other still alive. Thus, we are told that the vampires of Thessaly and Epirus are "living mer, mastered by a kind of somnambulism, who, seized by a thirst for blood, go forth at night from their shepherds' huts, and scour the country, biting and tearing all that they meet, both men and beast." According to another authority, this type of vampire is particularly active wher

the moon is at its full.

Rats Live Three Years

The white rat, which is an albino mutation from the ordinary Norway rat, has a life span of about three years, and this corresponds to the human life span of ninety years, comparative physiological studies of the rat and man show. The longest life span observed in the rat is the equiv alent of 112 years in mar

The Fenny Post

The Penny Post was an institutes ransplanted from London by Benja min Franklin soon after he was appointed one of the two deputy postmasters for the Colonies in 1753, and ike its London counterpart, had grown up in the post office but, strictly speak ing, was not a government function The main difference between the two was that in London the profits from the local post were assigned to a court favorite, while in America they were the perquisites of the individual postmasters or the carriers whom the htter night appoint.

Wide Difference in Taste

Scientists have found that people differ widely in their ability to taste various substances.

East Tawas ADVENTURE IS COMING IN THE AMERICAN BOY

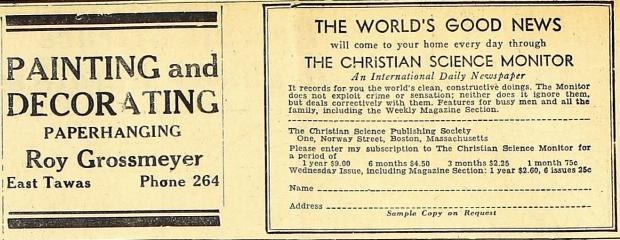

Readers who like adventure and the lure of the far places will find plenty to please them in coming issues of THE AMERICAN BOY Magizine. They'll read, for instance, of seamen and sabotage and San Francisco water-front trouble; of daring adven-ture in the world of pseudo-science, and of a feud aboard a plunging, rolling battleship.

They'll read, too, of excitement aboard a transport plane blaring over jungled Mexican mountains, and of stranger planes that are not bound to earth but swing through the noiselessness of space. Readers can follow a young ex-Mountie as he searches for clues in the wild northlands, and Tierney, the pie-eating detective, on the trail of city criminals.

A new feature in THE AMERICAN BOY is picture pages that tell stories. Pictures, for instance, that vividly show a day in the life of a coast guardsman, and how an Eskimo husky sled dog does his work. They trans-mit the thrill of battling a hundred heirs, devisees, legatees, and assigns" of the said Joseph N. Marquis, also known as Joseph L.
