A "Frankenstein" In a popular book, Frankenstein

in chemistry and anatomy who created the monster Frankenstein is a synonym for a man whose own works bring him to disaster or destruction. The monster of the romance bears no name, but the name of his creator has often been transferred to him, so that a "Frankenstein" has come also to signify, in popular usage, a being of the most appalling ugliness and brutality, having no trace of the moral sense whatever.

duced to \$6,000.

One in Seven on Relief

TWELVE million American workers are totally unemployed. More than 18,000,000 persons, or oneseventh of the population of the country, are receiv-

ing public assistance from the federal, state or local governments. From 1933 to 1937 inclusive the federal and state governments have spent \$19,400,000,000 for work relief and other forms of pub-

lic assistance. These far from cheerful figures were in a preliminary report of the senate committee on relief and unemployment submitted by Chairman

At the time the report came in, Harry Hopkins, WPA administrator, was telling the house appropriations committee, holding hearings on the administration's recovery-relief program, that the proposed \$1,250,000,-000 relief appropriation would enable 200,000 to be added to federal aid rolls, bringing the total number to 2,800,000 persons.

This money, he said, would last only for the first seven months of the coming fiscal year. He refused to estimate how much would be

needed thereafter. The senate committee report in general absolved the WPA from charges of graft, waste and inefficiency, but in some respects it sharply criticized the administra-

tion's relief policies. To the discomfiture of administra- in uniform. J. W. Hill, national tion leaders, the committee recom- secretary of the bund, asked a conmended that the senate's revenue bill repealing the undistributed profits tax and modifying the capital gains tax be adopted as a major aid to economic recovery. Retention of those taxes is in the house bill backed by President Roosevelt.

One Spending Bill Passed

WITHOUT a record vote the house passed the first of the new spending bills, appropriating \$903,000,000 for the Department of Agriculture during the next fiscal year. Of the total sum, 201 millions are for the building of new roads, this being one of the President's pump-priming suggestions.

Help for Utilities

PRESIDENT ROOSEVELT now is planning to extend government aid to the public utilities, which have suffered severely from government competition. This was learned after he had conferred with RFC Chairman Jones, and Douglas and Hanes of the SEC. The purpose is to aid the utilities in financing new construction, through the RFC lending program. Employment of now idle workers is the aim.

A.F. of L. Follows C.I.O. Lead

A MERICAN FEDERATION OF LABOR, following the example of the rival C. I. O., entered politics on a national scale by forming an organization to back selected candidates for public office.

The action, emphasizing anew the split between the two labor associations, indicated that the labor vote will be divided in many state primaries and November congressional elections.

Fight in Pennsylvania

DEMOCRATS of Pennsylvania are split wide open over the campaign for the May primaries, and Gov. George Earle is in the middle of the hot fight. He is seeking the nomination for senator. Mayor Wilson of Philadelphia, supported by Senator Guffey and John L. Lewis, is opposing him. Wilson charged that Earle had borrowed arge sums from M. H. McClos-Philadelphia Democratic organiza- and Tchorum.

NEVILLE CHAMBERLAIN'S dream of security for peace in Europe through amicable arrangements of the democratic governments with the dictators may yet be realized. Anyhow, consummation of the deal was brought nearer when Lord Perth, British ambassador to Rome, and Italian Foreign Minister Ciano signed the treaty of friendship which had been under negotiation for weeks. The pact is designed to end the long feud between the two nations, and it is probable France will join in after negotiations with Mussolini already suggested by Foreign Minister Bonnet. The British prime minister, of course, hopes that later Hitler can be brought into the group and that there will be formed a London-Paris-Rome-Berlin quadrangle in place of the Berlin-Rome axis.

Anglo-Italian Treaty

Temporarily, the treaty provides for friendly relations between Britain and Italy in the Mediter-ranean and the Near East, but it does not go into full effect until 'such date as the two governments together shall determine." In other words, Italy must first have withdrawn its troops from Spain and Britain must have recognized Italy's conquest of Ethiopia. The former may be delayed until France has won final victory. The latter depends upon permission from the League of Nations council, which has been asked by Chamberlain.

In essence, the treaty is a promise by each side not to attempt to change the status quo in the Mediterranean or Red sea areas nor to injure each other's interests there in any way.

Italy is to reduce her forces in Libya to peace time strength, and will adhere to the London naval treaty limiting the size of warships. The Suez canal is to be open to all nations equally in war or peace. Italy will abide by the international nonintervention committee's ruling on volunteers in the Spanish war and in case to withdraw from Spain entirely when the war is ended. Italy declares it has no territorial or political aims and seeks no privileged economic position in Spain, the Balearic islands, Spanish Morocco or Spanish possessions overseas.

Political leaders in Berlin did not minimize the importance of the Anglo-Italian pact, but insisted that the Berlin-Rome axis was not weakened. They were awaiting somewhat anxiously the visit of Premier Daladier and Foreign Minister Bonnet to London, scheduled for late in April. There were no indications in London or Paris that Britain and France were ready yet to deal with Hitler. But it was rumored that Poland might join them and Italy in a four-power pact.

Plot Against Carol Foiled

MEMBERS of the Iron Guard of Rumania formed a big conspiracy to seize King Carol and pro-claim a Fascist state. But the

authorities got wind of it and Corneliu Codreanu, leader of the Iron Guard, and 1,500 of his followers were thrown into

A black list was found in Iron Guard headquarters, po-lice said, containing the names of 2,000 Rumanian leaders

King Carol who were to be arrested once Codreanu was in power. Huge quantities of arms and munitions also were seized. In Paris it was believed the plot was a development of the efforts of Nazi Germany to win a hold in Rumania,

Jasper Bell, named by Vice Pres- chairman of the investigating comident Garner are: mittee before which Dr. Townsend Donahey of refused to testify.

Barcelona in Peril

SPANISH insurgents, having reached the Mediterranean at the port of Vinaroz, spread north and south along the coast and ef-

fectively cut off Catalonia from the rest of loyalist Spain. Veteran Spanish and Italian troops, led by Gen. Garcia Valino and Gen. Miguel Aranda, blasted their way into Vinaroz in a single day of severe combat, and Valino then started a northward

drive on Tortosa, Gen. Valino where important coastal highways

converge. Franco's next great objective was Barcelona. His forces were beginning a new movement against that city from the west, and his naval and air fleets left their bases to cooperate.

Mayor Dore Is Dead

SEATTLE'S spectacular mayor, John F. Dore, died after a long illness. He had failed of re-nomination in the recent primaries. Dore key, contractor and co-leader of the especially about Kirshehr, Yozgad ing executive. He was allied politically with Dave Beck, labor leader.

Baseball and Hockey Keep Stewart Busy

By GEORGE A. BARCLAY

Bill Stewart, manager of the Chicago Blackhawks, could give you a personal testimonial concerning the veracity of the old saw that "all work and no play makes Jack a dull boy." Compared to Bill the one-armed paper hanger, the Swiss bell ringer, and the perpetual motion man are pikers.

You'd think a man would be entitled to a rest after accomplishing the miracle of winning the world's hockey championship with a team that people tittered at when the play-offs began. But not Bill, No sooner was the Stanley Cup series over than he donned his spikes, mask and chest protector and began calling balls and strikes as a National league umpire.

When the world's series was finished on October 11, last year Stewart grabbed a plane in New York and flew to Muskegon, Mich., to take charge of the Blackhawks in his first year as their manager. Bill had been a referee in the National Hockey league in between baseball seasons for several years. He developed ideas on how hockey should be played as a result of his observations of the various teams. How successful those ideas were was demonstrated when the underdog Hawks bagged the cherished Stanley Cup by routing the favorite Toronto Maple Leafs.

Hockey Student

The Hawks had finished sixth in a league of eight teams and barely edged into the Stanley Cup finals. First they took on the Montreal Canadiens. Everybody said they'd be a pushover. In the first game it looked as if the prediction would come true. The Canadiens won. Then the teams moved to Chicago and the Hawks captured two games, winning the right to meet the New York Americans, winners of the series between the second-place teams of the league's two divisions.

In the series with the Americans the Hawks repeated their winning performance. That put them in the finals for the Stanley Cup which never before had been won by an American team managed by an American. Their opponents were the admittedly superior Toronto Maple Leafs. The Hawks were on the spot.

The first game was at Toronto. Late in the day of this contest, Stewart regretfully decided that Mike Karakas, his star goalie, would have to be left out of the line-up because of a broken toe.

Bill Stewart

Confident that they would have an adequate defense man in Andy Kerr, a reserve goalie of the New York Americans, the Hawks were dumbfounded just before game time by a maneuver of the crafty Connie Smythe, the Leafs' manager. With the connivance of league officials 'English Alfie" Moore, a castoff veteran, was foisted on the Hawks although his afternoon had been spent in a tavern and his orders for more ale had been frequent. But by some magic, Alfie played a whale of a game, made himself a hockey hero and held the Leafs to one goal while the Hawks were scoring three.

League politics again intervened and Moore was declared ineligible for the second game. Paul Goodman, an inexperienced recruit who had never seen a major league hockey game, was substituted. Goodman was easy for the Leaf marksmen. Red Horner, the Leafs' bad man, contributed to the rout by breaking the nose of Doc Romnes and cutting Hawks Roger Jenkins and Louis Trudell to the skull with his stick. The Leafs won 5 to 1. Back they came to Chicago for

the third and fourth games. Mike Karakas was back in the nets, his broken toe protected by a special steel guard. With the score tied at a goal apiece late in the game, Doc Romnes, who earlier got retaliation from Horner with his stick, gave the Hawks the win with a long hard shot.

In the final game the Blackhawks who couldn't possibly do it, won easily, taking the now demoralized Maple Leafs by a score of 4 to 1. So Bill Stewart is a happy although tired man. And if he misses a few close decisions in the early

days of the National league season,

maybe it will be because he's think-

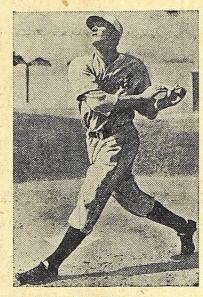

ing of hockey instead of baseball.

Another Ruth?

Rudolph Preston York, Detroit Tiger catcher who hails from Atco, Ga., has two ambitions this season. One is to break Babe Ruth's record for home runs. The other is to help bat the Tigers to the American league pennant. If Rudy accomplishes the first ambition, the second may automatically take care of itself.

York is hoping for the greatest season a ball player has ever had. Fans who saw him in the South this spring marveled at the way he bashed balls out of the parks. He wasn't establishing any new marks as far as his average was concerned, but whenever his bat met the ball, it was good for a non-stop

Rudy has no illusions about being a great catcher although Cochrane says he is a very much improved receiver. But he does know he can hit the ball. He also knows it is possible to break Babe Ruth's rec-

Rudy York

ords, because he has crashed one down already. He drove out 18 home runs in a single month— August, 1937-which was one more than Ruth ever recorded for a similar period.

His total home run production in 1937 was 35. York had been tried out around the infield and found wanting. Detroit was desperate for catchers after the accident to Mickey Cochrane, so they put Rudy behind the plate. When Cochrane told him he was to be the club's regular catcher, he began a batting stampede that made history. The season was then about two-thirds over, but he socked the ball at a clip that sent his average up 60 points. When the season closed he was the only batter in the league to average better than two bases every time he connected for a hit.

Polish Behemoth

Stanislaus Zbyszko, ancient Pole who was formerly king of the heavyweight wrestlers, is back in the United States, not as a wrestler, but as an impresario. Somewhere in the hinterlands of Poland he caught up with a giant named Wladyslaw Talun, who is first cousin to the "missing link" and who, Zbyszko believes, will be the next heavyweight wrestling champion.

Talun, towering six feet, eight inches in height and weighing 278 pounds was a lumberjack in one of Poland's vast forests. Zbyszko took the youngster to South America with him several years ago. This modern Gargantua didn't wrestle with any of the Gauchos, but spent hours each day learning the fundamentals of catch-as-catch-can from the old master.

Two months ago Zbyszko brought Talun to the United States. The pupil had apparently learned his lessons well, for he has had 20 matches and has yet to lose. None of his matches have gone beyond 12 minutes.

The bald-pated Zbyszko is enthusiastic about his young charge. For sentimental reasons he would like to see another Pole grab the championship, for Zbyszko is a great patriot. During the war when Poland was making a bid for independence Zbyszko, who had gathered a large fortune through his mat career, tossed practically everything into the treasury. Like his famous compatriot, Paderewski, the elder Zbyszko is a brilliant pianist.

Here and There—

For the fifth time in the 38-year history of the American Bowling Congress a perfect 300 game was bowled during the meet in Chicago. Mike Blazak of Conneaut, Ohio, was the bowler who entered the hall of fame along with Billy Knox of Philadelphia; Charlie Reinlie, Kenosha, Wis.; Jack Karstens, Fort Sheridan, Ill., and Carl Mesenberg, Scranton, Ill. Approximately 1,800,-000 games have been bowled in the tourney since 1900, so the chances of getting a perfect score are one in 360,000 . . . Ray Schalk, Jr., son of the greatest of White Sox catchers, is a starting pitcher for Hyde Park high school, Chicago. Young Schalk, although weighing only 140 pounds, is still growing and by graduation time two years hence may get a nod from organized base-Rogers Hornsby has finally land-

ed another baseball job, this time as coach of the Baltimore Orioles in the International league. The Rajah is also to be a pinch hitter. The club management emphasized the fact that he had been signed solely in a coaching capacity and not with any idea that he would succeed Bucky Crouse as manager. © Western Newspaper Union.

National Topics Interpreted by William Bruckart National Press Building Washington, D. C.

Washington .- Dear Editor: I wish | could dodge writing a column this week. The whole On Our Way - Washington pic-Where? ture is so dis-

turbed; the course is so uncertain; the future is so indefinite, that I must confess my inability to properly appraise and report on the situation. You will remember President Roosevelt once wrote a book which bore the title, 'On Our Way." I guess that is correct as it applies to the national government now; only I can not figure out what the way is or where we are going.

To explain in some detail what my personal problem is, let me say that before I write each week, I have canvassed many, many people's opinions and have obtained the facts that are necessary for the discussion which I undertake. There has been no change in my method of work. Yet, I find myself ten days after Mr. Roosevelt has announced his new and larger spending program totally unable to get heads or tails of the story. That is to say, I have found both the heads and the tails but none of the heads or the tails seem to be from the same carcasses. They don't fit. So, therefore, I must write that I

have found nobody who has been able to tell me where we are going. I listened to Mr. Roosevelt's radio speech and read his message to congress about the \$3,012,000,000 which he proposes to spend to stop the depression; I talked with officials of the Treasury and members of the federal reserve board of governors about the billion and a half of idle gold that is to be made "active" again, and I have looked into the program by the Reconstruction Finance corporation which is prepared to loan almost two billions to commerce and industry. There is so much activity about it, among the executive departments, that it seems something must come of it. There is activity at the capitol, too, but it is in the nature of a row over the question whether all of this spending will do any good.

The one tangible thing evident around the capitol is that perhaps 40 per cent of the representatives and senators have been left rather cold by the idea of a great new spending program. Somehow, they look back on the previous pump priming operations and they tell me that the pump was primed by a total of about eight billion dollars without causing the water to flow freely as a good, streamlined New Deal pump ought to work. These things they are saying in commit-tee consideration of the various phases of the new program by which the President expects to bring back prosperity-or, at least, by which he hopes to check the depression.

There is a depression now. That may not be news particularly, but official. It was a cession" for some seven or eight months, according to all official pronouncements, but now that soft word has grown claws and it has become a bold, bad depression. It is too bad that the depression had to come just when congressional elections lay ahead. Of course, there can be no connection between the spending campaign and the elections! Not being able to analyze the situation-a fact admitted at the start-I naturally would be the last to say that retention of house or senate seats is as important as providing funds for relief of the destitute, loans or grants to states, cities, counties or businesses that might otherwise find votes against New Deal candidates. We must forget that phase.

Now, obviously, being one who is unable to understand what is going on, what the plans Will It are if it is planned Work Now? that way, I should wait and see what

will come out of the pump this time. But I am impatient. I am rather cynical, too. Whenever these things have failed to work once, I naturally have to be shown why they failed once and will work the second or the third or the fourth time they are tried. Around many of the New Deal propaganda bureaus, however, I have been assured that the vast spending plan will work this time. Indeed, it was intimated to me that I was rather stupid, just plain dumb, because I failed to understand. Really, the assurances given me by the press agents has had much more conviction than Mr. Roosevelt's speech.

One reader of my column wrote in the other day to inquire whether I believed all of this spending meant we are headed into inflation. At the moment, I am not much alarmed about that. All of the makings for a fine inflationary period are available. I mean that if congress were to be stampeded by the confusion that I have mentioned, there could be a regular flood of printing-press money. Congress, however, is not going to be stampeded. The sentiment is too evenly divided for and against the idea of spending our way back to prosperity. There are individuals in congress who actually think that the public debt of

the nation is already too large. They think really that the new spending ought to be limited just to caring for the distressed unemployed. Of all things, they would refuse to vote out more money unless that money were to be used for feeding and clothing people.

I think I should mention also that there are a goodly number of persons at the capitol who have lowered themselves to the level of playing politics. They are even ridiculing our President. They are saying that most businesses, little as well as big, have lost confidence in Mr. Roosevelt and that it does not matter whether the New Deal spends one billion or ten, it will fail to restore that confidence. Being a simple-minded soul, I just stand by and listen to that. On the other hand, the heads of three important magazine publishing houses have told me lately that their advertising contracts are being cancelled right and left. The national adver-tisers have told the publishers they have to conserve what money they have because they don't know what is going to happen.

I do not understand why they are so frightened. You will remember Mr. Roosevelt said he had urged congress to enact only four laws that would affect business. That is, four this session. One of these is the bill, as described by the President, "to put a floor under wages and a ceiling over the hours of labor." All that legislation would do, of course, is bankrupt businesses here and there. But those can't be successful anyway. They haven't made any money in several years and why worry about them.

The message of the President did not make any mention of the laws that hold the country back. It is to in Plans be assumed he did

not want to disturb business by calling attention to them. Matters of taxation, for instance. I am told in this connection that the tax rates must go higher next year. There is going to be a much larger deficit in the Treasury than was anticipated in January when I wrote in these columns how the budget was going to be balanced next year under plans out-lined by the President. Something slipped in those plans. Now, they don't know at the Treasury when the budget can be balanced. Surely, not next year, because here is something more than three billions to be spent out of next year's money supplies that had not been counted on. This hateful depression is causing so much trouble!

I hope I have not made this Washington situation appear too mixed up. The circumstance has me quite puzzled, as I have plainly tried to say.

There has been a story, a rumor, circulation in Washington about a tiff between Mr. Roosevelt and Vice President Garner. Not that I believe in recording mere rumor, but more because of a sentence that was reportedly used by Mr. Garner, I want to write about it. The Vice President is a lovable soul, kind and amiable. He has a number of Texas expressions that appeal to me because they say so much in so few words.

Well, according to the rumor, Mr. Garner and a group of congressional leaders were in conference with the President. They were talking about the depression, or maybe the recession. What to do about it; how to meet it, and what the causes were. The President, it seems, has been sold the idea of this spending program as an aid to business, a priming of the pump. Rumor has it that Mr. Garner was asked what he thought could be done. His reply, a typical Garner answer, was: "Why don't you let the cattle put on some fat, Chief."

quite displeased with the idea conveyed, an idea President that the govern-Displeased ment had better quit harrassing business, quit trying to remake the country and reform human nature. Mr. Roosevelt subsequently denied the report vehemently, even rather angrily. There has been no denial or confirmation from Mr. Garner. He has been so silent about the thing that it is positively thunderous. As I said, I know of it only as rumor, but I do know that Mr. Garner's silence has convinced thousands of persons that there is some

The President was reportedly

"a mouf full." So, Mr. Editor, if you are still with me, let me say that the new spending program is going to be no more successful in restoring the country to prosperity than the earlier attempts. The nation can spend \$450,000,000 in constructing new public buildings. Suppliers of material will sell that brick and stone and cement and plumbing supplies, etc. But after the job is done, darkness falls again and the men are out of

basis in fact for the report. In any

event, the astute Vice President, if

he made the remark, certainly said

work. © Western Newspaper Union.

ADVENTURERS' CLUB

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

> "Ice Age in the Bronx". By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY:

For a long time I've been telling the cockeyed world that you don't have to go places to find adventure. I remember once saying that you could get more thrills just by sticking around your own home town than you could by signing up with Admiral Byrd for one of his exploring trips to the South pole.

And now, here comes John Standmann of the Bronx to tell me I was right about that South pole business. Admiral Byrd went down into the Antarctic to study the ice age, but Jack Standmann stayed home and studied another ice age—in the Bronx.

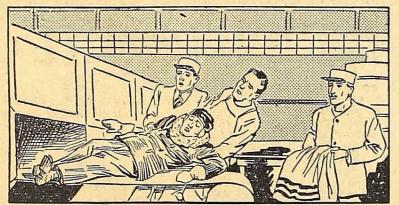

The Admiral loaded up a boat, signed on a crew, and sailed away toward the South pole, but Jack just put on his coat and a pair of gloves and in ten minutes found a spot that was just as

pair of gloves and, in ten minutes, found a spot that was just as cold as anything the Byrd expedition was able to dig up in a year's stay way down there at the bottom of the world.

It was in June, 1932, which is a doggone strange time for a man to go Arctic adventuring in the Bronx. Jack was working in an ice-cream factory and that more or less explains everything. The plant was a new one, and a lot of new-fangled machinery had been installed in it. One of the machines was the big steel conveyor that carried packaged ice-cream into the freezing chamber. That machine was the special bane of Jack's existence. The freezing chamber was a long tunnel where the temperature ran around forty below zero. Moisture used to gather in there and turn into ice. During a week's time, enough of it used to collect so that there was danger of it stopping the machinery. Then, Jack found himself facing a job he didn't like very well.

Working in Forty Below Zero.

The job was to crawl inside the freezing tunnel and hack and chip out all the ice. It was a chore that took every bit of two hours, but it had to be done a little at a time, for no man could stand that 40 below zero temperature for more than 20 minutes at a stretch. It couldn't be done

Jack Was Pulled Out of the Freezing Tunnel.

while the plant was operating. It had to be done after closing time. The result was that Jack had to work overtime, and most of the evening at it.

On this particular day, the plant had been working overtime itself. The minute the machinery stopped running Jack put on a lot of heavy clothes, slipped his hands into a pair of thick warm gloves, and crawled about 30 feet along the belt conveyor into that freezing tunnel. He worked as fast as he could, but he had been in there only about a quarter of an hour when his clothes were frozen so stiff that he could hardly move about and his gloves were so hard and brittle he could scarcely use his hands. He had just about decided to crawl back and thaw out when

suddenly he heard the door of the tunnel open, saw the lights go out, and then heard the door slam shut again.

Locked in the Tunnel to Die.

It was cold enough in that tunnel, but Jack suddenly went colder. He knew all too well the meaning of that slamming door. The light switch was just inside it. The watchman, not realizing that anybody was in there, had turned out the lights and locked the tunnel door. Even with the door open, Jack couldn't have groped his way out of the tunnel along the perplexing maze of conveyor belts. He had been abandoned in that lasted until noon next day. freezing hole-to die.

Jack started to yell-he yelled until he was hoarse. But it was like in a vacuum. The walls of the tunnel were insulated and sound proof. He began to crawl along the tunnel, his clothes freezing to the steel at every foot of the way. His gloves were as stiff as boards. The cold was penetrating to the very marrow of his bones. Pretty soon he would begin to get sleepy-and then-

Nearly Crazed With Horror.

It wasn't a pleasant subject, but Jack couldn't help thinking about it. Would they find him dead in the morning? Another idea struck him—a gristly, ghastly thought. When morning came, they would start the conveyor, and his stiff, dead body would be ground to pieces by the cogs of the great steel belt. Out of that machine, built to deliver the fixings for parties and the makings for kids' ice-cream cones, would come a sickening mass of frozen and lacerated flesh-flesh that had once been Jack

A prey to thoughts like that, Jack almost went crazy. "It's hard to explain the honor of freezing to death in a pitch-dark tunnel," he says. "In my frenzy I imagined I had been in there for hours. I knew I'd be as stiff as my own gloves long before morning. But suddenly it occurred to me that I might try knocking on the wall."

Jack didn't have much hope that that would work. The walls were too thick. But at one point-a place where a cold storage compartment adjoined the tunnel, the wall was not insulated at all. And at that point he started hammering with all his strength. Would anyone go into that compartment? Would anyone hear his frantic signal?

Jack pounded for a long time. His body and face were numb, and his flailing arms were the only parts of him that had any feeling left in them, when suddenly, the lights went on. Someone yelled to him, and Jack doesn't remember whether he answered or not. But presently he felt himself being lifted out of the tunnel and carried out into the warm

Well sir, if anybody in the Byrd expedition had any adventure as thrilling or as nearly fatal as that, I haven't heard of it.

Government Short Wave Propaganda Machines Now Fight Wars Once Waged With Guns; - Even Uncle Sam Does His Part!

By JOSEPH W. LaBINE

One hundred years ago Italy and Great Britain might have gone to war over their current differences in northern Africa.

Today they foresake armed force in favor of a more subtleand more effective-weapon. Short wave radio broadcasts are fighting the war in Palestine, just as Russia and Germany are adopting an aerial offensive against each other.

The whole world is engaged in a terrific battle of microphones, fighting with unending streams of propaganda that preach con-

flicting political philosophies into the beleaguered listener's ear. Americans know of this battle; they know how Russia, Great

Britain, Italy and Germany are leading the attack with powerful transmitters that emit propaganda 24 hours a day, aimed at every nation on earth.

What many Americans do not realize is that their own nation is in the thick of the fray, preaching the "American way" to impress foreign listeners with the soundness of democratic government. When President Roosevelt delivered his state-of-the-Union message to congress last winter, his words were sped to every corner of the earth by the National Broadcasting company and the Columbia Broadcasting System, in a series of transmissions and re-transmissions that

How Europe Does It.

Yet this display of propagandizing is but a tempest in a teacup compared with Europe's businesslike procedure. Almost every Old World nation has its governmental department devoted to preaching political doctrine.

Germany, like other nations, has a definite "policy" of propaganda. Its broadcasts, by intensely powerful short wave, are directed first to reach "colonies" of overseas Germans wherever they may be, making them conscious of their ties to the fatherland and preaching Nazi philosophy. Germany's second pur-

pose is to build "good will," and third, to boast of the Nazi union's greatness and the justice of her aspirations.

"Jamming" the Air Waves.

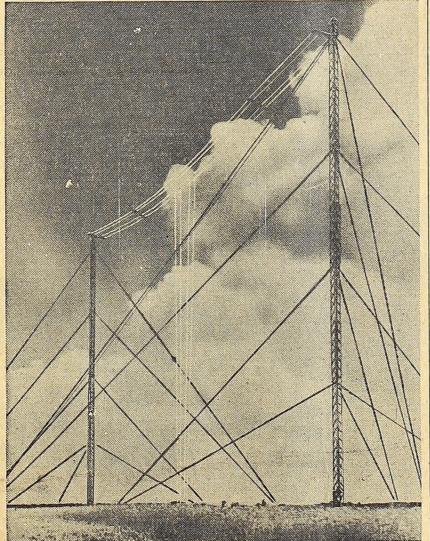

Naturally, one of Germany's biggest radio battles is with Russia, from whence come mighty surges of propaganda daily, aimed at Nazi receivers and preaching the Communist doctrine. Germany's counter procedure is to "jam" the air by filling the wave length with a noise so loud that it drowns the Moscow speaker.

More dramatic by far was the recent radio clash between Great Britain and Italy. In Palestine, where revolts between Arabs and Jews have been commonplace and distressing, Great Britain charged Italy was fomenting trouble, wooing he Arabs via short wave broad cast. It was discovered that someone had thoughtfully provided Arabs with hundreds of radio sets. conveniently locked so that only Italian stations could be tuned in.

Great Britain immediately leveled powerful transmissions at the Arabs. She, too, distributed receivers, locked so the owners could tune only British programs.

Broadcasting "Culture."

Irrespective of the doctrines they preach, the short wave barons employ similar tactics. Political

Huge short wave antennae, the weapon in this modern struggle between democracies and dictatorships. These are the masts of a Polish govern-

speeches would become tiresome, so music is often interspersed.

The favorite means of disseminating propaganda is through "news reports." Interesting and informative, these broadcasts provide sug-ar-coated pills of bias for the credulous listener.

Broadcasts are usually made in several languages. Italy transmits in English, Spanish, Serbian, Chinese, Japanese, Turkish, Greek, French, Portuguese and Albanian.

Few continents are more courted by broadcasters than South America. Mussolini, catering to the Latin kinship of his listeners, is making a heavy play for our southern neighbors. But he must combat equally strong efforts on the part of Moscow, Germany and Great Britain. The latter nation has just completed new stransmitters for broadcasts in Spanish and Portuguese to 85,000,000 South Americans.

Brazilian Education.

But the South Americans themselves appreciate radio's value in dio station must carry a government program from 6:45 to 7:45 terial, with 5 yards of bias banding or braid to trim. propagandizing. In Brazil, every rapartment of propaganda. South America is a natural hotbed of politics, because both Hitler and Mussolini enjoy encouraging the trend to absolutism now prevalent in that continent.

But the United States, conscious of South America's proximity, is not twiddling its thumbs.

Both NBC and Columbia have established international broadcasting departments. The former operates | Bell patterns are well planned, languages, Spanish, Italian, French, Each pattern includes a sew-chart languages, Spanish, Italian, French, German, English and Portuguese. The programs are "designed to provide America's challenge to elaborate short wave systems broadcasting programs throughout the world from powerful stations in Great Britain, Germany, Italy, Russia, France and Holland."

Licensed Receivers.

By contrast, two other democracies-Great Britain and Francehave government-operated systems which derive their revenue from listeners' licenses. With domestic radio under federal control, foreign short wave broadcasts can easily be justified as a supplementary service to colonists and other "interested parties."

In the world's mad attempt to contact people with short wave can be read two opposing purposes. The kindlier explanation is that foreign broadcasts are breaking down national boundaries and creating a greater understanding among the peoples of the earth.

Unfortunately, such is not the

Observers are convinced that in the last analysis radio is being boomed as part of a general preparation for war. When and if a conflict does come, these vast communication systems will be of inestimable importance. Even as they are fought now, battles may be waged through the ether. Threats will be hurled to the enemy and counter-threats received. Germany's experience in the World war, when her cables were cut and communication facilities were destroyed, proves that the greater the number of channels of communication under a country's control, the stronger the position of that nation in the event of war.

Some say that radio favors the democracy in propaganda wars, because dictators refuse to risk the loss of that hypnotic effect afforded by personal appearances.

If such is the case, Great Britain, France and the United States may come through victorious in the current hostilities. But who can discount the threat of Europe, where only three out of thirty national broadcasting systems are privately owned and operated?

Disease Fatal to Civil Warriors In the Civil war, disease killed more soldiers than did war wounds, says the Standard American Encyclopedia. According to a statement prepared by the adjutant general's office, 67,058 were killed in battle, 43,012 died of wounds, and 199,720 died of disease.

Popularized Philippine Mahogany The late President Taft is credited with first popularizing Philippine mahogany in the United States. As governor-general of the islands, he became familiar with the wood, and directed that it be used in the White House when he became President.

Bats Are Animals Bats are animals, not birds. They

suckle their young at the breast and are classed by zoologists as flying mammals. But there was a time before the habits of bats were understood when they were classified

Birthstones

Birthstones for the various months are: January, garnet; February, amethyst; March, bloodstone; April, diamond; May, emerald; June, agate or pearl; July, ruby or carnelian; August, sardonyx; September, sapphire; October, opal; November, topaz; December, turquoise and lapis lazuli.

Growth of Angora Rabbit Wool Angora rabbit wool grows at the rate of one inch a month. Young rabbits are first clipped at eight weeks. This initial raw wool is classed as baby wool. The animal is then clipped every three months.

Using His Big Voice

Jud Tunkins says a loud voice gives a man a big chance in life. He has to decide for himself whether he will be a side show barker or an opera baritone.

Mistakes, Responsibility "De man dat never makes a mis-take," said Uncle Eben, "is mighty apt to turn out to be de man dat's most expert in shiftin' de 'sponsibility when anything goes wrong.'

Tests Prove the Power of Food

Demonstrate a Vitamin-Rich Diet Is Vital to Health

By C. HOUSTON GOUDISS

MANKIND owes many things to the animals which have been used as test subjects in laboratories all over the world. As doctors and scientists have waged their war against disease, as they have made great strides forward in the study of foods and nutrition. they have carried on many of their experiments with rats.

The rats pictured here dramatically illustrate the power of food to influence growth. Although these two rats are exactly the same age,

brother. Where one animal is puny and underdeveloped, the second is fat and sleek and full of vitality.

What has produced such a difference in weight and general physical well-being? Merely a slight difference in diet. The two rats have lived under identically the same conditions, but the smaller animal on the left has received food lacking in sufficient vitamins, while the other rat has been fed the same diet, reinforced with vitamins.

If a well-balanced food ration is vital to the health of animals, how much more vital it must be for human beings. Surely the lesson is plain to see. If a mother wants her children to thrive she must feed them adequately. The child who is receiving a diet lacking in vitamins has no chance to grow and develop properly. Nor will the adult on a deficient diet attain or maintain optimum health.

EDITOR'S NOTE: To plan a diet wisely, to recognize the foods rich in important food elements, we must learn to utilize the discoveries of science. We must keep abreast of the newer knowledge of nutrition as it is presented by wise, unbiased interpreters such as C. Houston Goudiss, nationally known food authority, who each week offers his 'What to Eat and Why" column in this newspaper. In this column Mr. Goudiss translates the latest developments into simple, non-technical language. By following his articles regularly, it is easy to keep in step with the most up-to-date findings of nutritional science.

HERALD -ANT ADVS PAY!

Highest Peak in Alps

Mont Blanc, the highest peak in the Alps, is in the French province of Haute Savoie near the Italian border. It is often erroneously supposed to be in Switzerland due to the fact that many travelers and tourists see the peak from Geneva, only 40 miles away.

"Keep" a Secret Never inquire into another man's

secret; but conceal that which is intrusted to you, though pressed both by wine and anger to reveal it .-Horace. Goby, Shore Fish

A goby is a carnivorous shore fish on nearly all temperate and tropical coasts.

Telling Things

Jud Tunkins says it's always wrong to tell what isn't so, and sometimes foolish to tell what is.

STATE OF MICHIGAN The Probate Court for the County

At a session of said Court, held at the Probate Office in the city of Tawas City in said county, on the 20th day of April A. D. 1938. Present, Honorable David Davison,

Judge of Probate. In the matter of the Estate of Mrs. Estella Fox, deceased:

Frank Humphrey, having filed his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that ad-rinistration of said deceased be gran. ted to Frank Humphrey or some

other suitable person.

It is orered, That the 16th day of May A. D. 1938 at ten A. M., at said Probate office is hereby appointed for hearing said petition.

It is further ordered, that public notice thereof be given by publication of a copy hereof, once each week, for three successive weeks previous to said day of hearing in the Tawas Herald, a newspaper printed and circulated in said county.

MANY New and Improved FEATURES ON THE NEW **WORLD'S STANDARD** DE Caval **SEPARATORS** THESE new De Laval Separators are the crowning achievement in the 60 years of De Laval's leadership. They have STREAMLINED BOWL many new, important features and improvements, which we are certain will be of interest to every cream producer. They will separate more milk in less time; produce more cream of better quality; run easier; are easier to operate, clean and wash; and will last longer than any separators ever made. They are the most beautiful of all cream separators, and really must be seen in order to be appreciated. SYNOPSIS

James Lambert tries in vain to dissuade his beautiful foster-daughter, Leonora, from marrying Don Mason, young "rolling stone." He tells her, "Unless a house is founded upon a rock, it will not survive." Leonora suspects the influence of her half-brother, Ned, always jealous of the girl since the day his father brought her home from the deathbed of her mother, abandoned by her Italian baritone lover. Don since the day his father brought her nome from the deathbed of her mother, abandoned by her Italian baritone lover. Don arrives in the midst of the argument, and Lambert realizes the frank understanding between the two. Sitting up late into the night, Lambert reviews the whole story, of Nora as a child, at boarding school, studying music abroad, meeting Don on the return trip. In the morning he delivers his ultimatum, to give Don a job with Ned for a year's showdown. When Nora suggests the possibility of running away with Don, Lambert threatens disinheritance. Don agrees to the job, but before a month is over, his nerves are jumpy, he cannot sleep at night, he is too tired to go out much with Nora. Nora soothes him with her music. Nora grows quieter, and broods over Don, complains to her father of Ned's spying on him, and decides that rather than see Don's spirit broken, she will run away. She urges her father to put an end to the futile experiment. James Lambert is obdurate and angry. Lambert tells her that if Don quits she will quit with him; that he will he through with her. He adds that if she quits she will quit with him; that he will be through with her. He adds that if she tires of her bargain it will be useless to come to him for help. Later Don and Nora discuss the situation. Don promises to buck discuss the situation. Don promises to buck up and take life more calmly. "We'll stick it out," he says. With the coming of spring, Don is full of unrest and wanderlust, and takes long walks at night. One evening a poor girl speaks to him, and in his pity for her, he gives her money. A car passes at that moment, flashes headlights and moves on. A terrific heat wave ushers in the summer, and Nora refuses to go to the country with her father.

CHAPTER IV-Continued

"I'm staying here, that's all," asserted Leonora. "Ned and his family will be only too glad to keep you company. It will save them money. That a ways appeals to Ned, you know; and Corinne will be spared the bother of opening her own big house, something she grumbles about for weeks beforehand. Or if this plan doesn't work out, Aunt Jean would stay with you. Perhaps you'd like that better anyway. Ned, Junior is getting to be a pest. That boy needs some good oldfashioned chores, if you ask me."

"What do you know about chores?" chuckled her father; then added, before the girl could answer: "You can't stay here, child."

"Why not? The house is always open.' "But you'd suffocate, Nora."

"And what about Don, with no place but a boarding house bedroom or a park bench to spend hot evenings? He's enduring a lot for me, Daddy. If I can't hang around and drive him out into the country after his work's done, I-I'm a Her father considered this in si-

lence, pondering on the miracle of love does to one. He had sometimes thought Nora a bit heedless of other people, partly because most of her own desires had been catified so easily; yet she was deliberately contemplating a summer in the city just to make life pleasanter for that young man. It was, he reflected, immensely surprising. He said: "Will Don let you do it?"

"He's not to be consulted. Of course he'll protest when he finds out, Dad; but you know how stub-born I can be!"

"I do," smiled James. "Ring for a cold drink, Nora. You look apoplectic. I can't say I like this plan of yours, my dear; but I suppose you'll honor us for the week-ends." "Does that invitation include

"It does if I can get you no other way," her father confessed with honesty. "Don't you realize, daughter, that I'm likely to miss you?'

Nora was touched. She said, gently: "That's nice of you, Dad, especially when I'm driving you almost crazy. I'd kiss you if it weren't so

blazing hot."
"Don't!" James protested. "Human contact a day like this would be unbearable."

Yet the truth was, he would have welcomed her kiss with pleasure because he felt that they were friends again. The knowledge comforted him greatly. Despite the heat and Nora's decision about the summer, James felt more light-hearted than he had for weeks. Even some guarded questions put by Ned that night, questions as to where Don Mason spent the evenings he didn't spend with Nora, failed to disturb him.

"You'll have trouble pinning any damaging conduct on that young man, Ned. He's not our sort, of course; but there's nothing wrong with his morals. I'm sure of that.' "What makes you so sure, Fa-

"Partly things he's told me himself-things about his life, you know; and partly from observation. Did you spend every evening with Corinne the year you were engaged,

"No, but-" "Look here," broke in the older man, "have you heard something about Don-something unsavory?"

Ned admitted he hadn't; and, deciding there would be no virtue in worrying his father, dropped the subject, to James' evident relief. In fact, James Lambert went to bed in an uncommonly agreeable frame of mind. Things seemed to be working out all right. The knowledge

Arctic explorer, had made an impression; and several people had spoken warmly about the fellow. Folks liked him, apparently. And he was doing well enough in the office, considering that the work was new to him-that he'd had no training. No doubt Don would see, after a while, that a man with a family

must settle down. Yes, James went

to bed in a peaceful frame of mind. Not so Nora. To save Don the trip across town by trolley she had driven out and picked him up at his boarding place. He was waiting for her on the steps in white trousers and blue coat-the correct picture of a handsome young man appropriately attired for a hot evening; but one glance told the astute Nora that something was wrong. She said, returning his somewhat patient smile of greeting: "Hop in, Don; but slip your coat off first. No reason for being more uncomfortable than necessary."
"Oh, may I?"

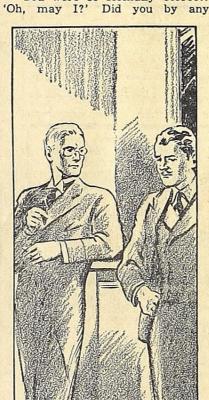

At his tone, Nora threw a covert glance in Don's direction. On edge, she decided; and answered tactfully: "Of course you may. Toss it in back. You can take off your necktie too, for all of me.'

His face softened. Save for that one wan smile it had been grim be-

"You're a good scout, Nora. I'll

smile of understanding blent with amusement. "You were so formally correct!

"Look here, have you heard something about Don?"

chance mistake me for Emily Post,

Don really smiled. "I'm afraid I don't know what the lady looks like. My formality was the result of an ugly disposition, I suppose. You looked so cool and comfortable and sleeveless, darling, it made me resentful. I've been so damnably hot all day. Will you

forgive me?" One soft hand left the wheel, touching his a moment. Then she

said briskly: "Remove that tie and unfasten your collar too, Don. Now slump down comfortably and forget your manners. Who cares for appearances after a day like this? Once we get far enough from these hot pavements you'll revive. Don't try to talk if your head has gone on strike. Just rest. I'm sorry, dear.'

Don obeyed, grateful for silence, the healing cool of evening, and Nora's nearness. The city was left behind after a while. The silence deepened. Dusk drifted into dark while somewhere high, high above them a star was born-another-and tiny lights spangled the sky. Don thought: "If I could get the feeling that I'm only a part of this immensity—that my own small troubles don't really matter. . . Or if my head would stop this confounded throbbing. . ." He said, after throbbing. . . ." He said, after more miles had slipped away, speaking so suddenly that the girl started: "Nora, what makes me different from other people?"

She stopped the car, and turning, faced him in the starlight. "Are the rest of us all cut from

the same pattern, Don?" "Not you," he answered. "God never made your double; yet even you can accept a way of living that suffocates me. Tell me the truth. Am I a sort of savage?"

She answered soberly: "You're just yourself, darling. I don't want animal energy. you different. Oh, Don, don't fret about it any more! Do you imagine there aren't others who possess the craving to break away-escape-do something that no one else has done before? How far would science advance without your kind, my dear? that Don had dined not once, but If you'd take things more calmly- producing glands and the speed with

several times with a world-famous | not let yourself get tense-relax a | him that miracle of boarding little . . .

Quick anger sprang into his blue

"Relax! Can a man relax when ten thousand imps are pounding on his brain? If I could sleep for a week-Look here," he broke off, contrite all of a sudden, "I've no business talking to you like this. I'm ashamed of myself. Sometimes I think that's half the trouble these days-being ashamed. I used to believe that I amounted to something, Nora; but now I feel so inefficient. Perhaps I can't judge things in their true proportion, for even a trifling error in my work appears a crime! I actually wonder if my morale is slipping. I can't help seeing myself as I look to your brother, Nora, and-and that hurts. A fellow can't go on scorning himself like that and get anywhere, can he?'

She answered, her low voice very gentle: "I think you exaggerate your failures, Don. Only today Father told me that you were doing well. He's not discouraged with your progress, dear; but Ned makes you nervous. And why shouldn't he? I've felt his scorn, too, Don. I know how it hurts. For a long time I've suspected that he despises me a little because of my birth. Ned's so conventional. He can't help feeling a bit uncomfortable, I suppose, that anybody born as I was should be his sister."

There was a silence before Don said grimly: "If I believed that, Nora, I-I think I'd kill him with my bare hands!"

"Thanks, dear; but that wouldn't help matters." Nora spoke lightly, and the tension of the moment broke, as she wished it to. "Besides, Ned has his own good points, you know. He's devoted to Dad, unselfishly devoted, I am sure; and his morals are-impeccable! There are even moments when he's lovable-when I could love him myself, if he'd let me. But you mustn't look for understanding in a man of Ned's type, darling. It may not be his fault that he sees only one side of life. He was probably born that way, and nothing has happened since to change him. Gee! isn't that breeze delicious? Perhaps tomorrow will be more bearable. I'm going to take you home this minute, Don. You need sleep more than conversation. How's the head now?" "Better, beloved, thanks to your

ministrations.' This was a lie told cheerfully in her behalf; but Nora, her eyes on a spasmodically twitching eyebrow,

CHAPTER V

was not deceived.

Despite a refreshing coolness in the air as they rode toward home, the mercury soared next day Promising though the breeze had seemed, it came to a discouraged end before Don got to sleep, and after a few short hours of restless slumber he wakened to a sense of suffocation. The only window of his small room faced east, and already the sun, streaming across his bed, felt scorching. The day before on seeing a wom-

an walking the hot pavement with a 'summer fur" thrown over her shoulders, Don had judged her "an imbecile." Now, with a glance at his own dark suit hanging neatly across a chair, he called himself something even stronger, and rising, delved into his trunk in search of some long-packed linen trousers, the work of a native tailor in Jamaica. The fact that they needed pressing was immaterial. At least, they would be more bearable than serge. A glance into the hall showed

even at this early hour) Don's tip was twice the cost of his simple meal. Her surprised question: "Isn't this a mistake, Mister?" brought a glimpse of the engaging grin that had been absent from his countenance for many days. "It's a feeble attempt to counter-

houses: an empty bathroom; and

act the weather," he responded, rising. "Blow it in on ice cream sodas if you survive," and the girl's spontaneous smile of amazed gratitude stayed with him a while, the one bright spot in the hectic subway jam.

So the day began, a day that was to be of vast importance to Don, to Nora, and to her father also. By ten clock the sidewalks swarmed with shirt-sleeved figures. By noon the ambulance gong was sounding with alarming frequency. When one of the stenographers collapsed and was sent home in a taxicab, Don envied the girl. He found it well nigh impossible to get down to work -to concentrate. Yet there was an error somewhere, which, he thought nervously, must be located before Ned Lambert happened in. And to make things worse his head had begun its infernal hammering. Perhaps when the others were out at lunch and things were quieter, it would clear up.

They were gone at last. The noisy typewriters were silent; and save for the rumble of traffic far below, the room was still. Don stood at a window in an effort to fill his lungs with better air; but it was too hot to be refreshing, and back at his desk again discouragement engulfed him, thick and impenetrable as a London fog.

Four months more! He could never stick it-even for Nora. He was no good-absolutely. That wise old man had certainly shown him up, Nora once said that she wasn't worth all that these months had cost him. Well, he mused bitterly, was she? Was anything worth this terrible inertia? Was anything worth taking the joy from life?

Joy? Don started, raised his head as if wakened rudely from a bad dream. He was a fool-a damn fool not to see things clearer. What joy would he find anywhere-without Nora? What sacrifice was too great-for her? He had been right last evening when he said that his morale was slipping. Why else should he have such thoughts? He must buck up.

It came to him then with a sense of healing, that the opinions of others didn't matter, if Nora understood. And she did-bless her loyal heart! His girl knew that he wasn't a weakling. She didn't scorn him because his nerves were jumpy and he couldn't sleep. She realized the truth, if no one else did: that nothing in life had fitted him for a job of this sort, and that when the damnable year was over and he got away from everything . . .

Don turned, nerves quivering again; and with a gesture meant to appear casual, covered his open ledger with the morning paper. Ned Lambert, apparently cool, obviously unruffled, stood on the threshold. Something about his smug, immaculate appearance maddened Don. though the older man said pleasant ly enough: "Have you been to

Science Hunts Yardstick for Energy Displayed by Both Man and Animals

The first known clinical museum in the world for the study of comstill more until at last myriads of parative glandular effects on body energy has been established in Cleveland.

A year's research by three expeditions, two within the United States and the third to Africa, led by Cleveland's Dr. George W. Crile, renowned brain surgeon and gland specialist, are the basis for its foundation.

The exhibit, containing thirtyeight specimens, is composed of everything from a guinea hen to an elephant. Each is mounted and accompanied by life-size models, taken from actual organs, of its thyroid gland, adrenal glands, brain and heart.

Dr. Crile believes the research will result in a definite step toward mathematical measurement of the relationship between gland size and

Of most interest to the surgeon is the fact that man is the only animal in whom the thyroid gland is prevailingly larger than the adrenal.

Dr. Crile disclosed that he has discovered a specific relationship existing between the size of energywhich the chemical process controlling activity in animals takes place.

"Animals that are alert or travel great distances, such as the deer or ostrich, have relatively large thyroid glands," Dr. Crile observed, 'while animals which depend on outbursts of speed or of great activity, such as rodents and lions, have large adrenal glands."

Almost every known species of African wild life is represented in the exhibit. Among these is a complete specimen of an African

Many Varieties of Honey How's your taste for honey? Are

you one of those fortunate people who has really studied honey, and can identify the many varieties of this sweet by taste? The true honey-lover begins to recognize types as soon as he sees it. By its taste he can tell what part of the world it came from; and from which flowers the bees drew the nectar. Red and white clover honey, orange and raspberry blossom flavored honey Grecian hymettus, Australian and New Zealand honey butter, peanut butter honey-these are some of the epicures' favorite varieties.

Lesson for May 1

FOLLOWING VISION WITH SERVICE

LESSON TEXT—Mark 9:14-29.
GOLDEN TEXT—All things are possible ohim that believeth.—Mark 9:23.
PRIMARY TOPIC—When Only Jesus Could Help.

JUNIOR TOPIC—At the Foot of the Moun-

tain.
INTERMEDIATE AND SENIOR TOPIC—

Living Up to Our Knowledge of Christ.
YOUNG PEOPLE AND ADULT TOPIC—
Following Vision with Service.

One of the lessons that seems hard to learn and to keep constantly effective in the life of a Christian is that mountain-top experiences of spiritual uplift are not an end in themselves but a preparation for service. All too often we come to regard such times of peculiar blessing, whether in the privacy of our own room, or in the great conference of Christian workers, as something which should glow warmly in our own hearts, making us glad in the Lord, and not as a background and preparation for ministry to others. One might just as well hope to feed the physical body constantly without any work or exercise and keep in good health, as to feed the soul on good things, do nothing for God or fellow-man, and still avoid what someone has called "spiritual

dyspepsia." The writer has just attended a most unusual and blessed Bible conference, the leaders of which rightly apprehended this truth. Evangelism was the matter chiefly in mind, but instead of announcing the theme of the week's meetings as "Evangelism" the program presented it as "Preparation for Evangelism." That is sound spiritual sense. We came not to discuss evangelism itself so much as to prepare ourselves to go out and evangelize. God help us to do it!

Jesus rightly characterized the time in which he lived as I. A Faithless Generation (vv. 14-

"Jesus found in the valley disputing scribes, a distracted father, a demon-possessed boy, and defeated disciples." The unbelief which called forth the rebuke of Jesus "is revealed in different phases. There were the scribes, willful and persistent unbelief; there was the father, unwilling unbelief; there was the boy, irresponsible unbelief; and there were the disciples, unconscious unbelief. The whole atmosphere was an unbelieving atmosphere" (Morgan).

As we look at that depressing picture of long ago, let us consider ourselves lest we also be tempted to "limit God" by our faithlessness. The most casual reader of Scripture cannot help but see that God seeks out and honors faith, and as we begin to study God's Word with care we realize that the fundamental of all fundamentals is really to believe God. Some Christian men and women are living out a tremendous testimony for God by fully believing Him and His Word, but many of those who profess to follow Him actually make Him appear ridiculous before the world because their unbelief makes Him out to be a "small" God instead of the infinite, eternal, omnipotent God.

II. The All-Powerful Saviour (vv.

The keynote of our first division might well have been the sad words 'they could not' in verse 18. But now the Son of God has come and the new keynote is the inspiring words of verse 23, "all things are possible to him that believeth.' There is no problem too difficult for our Lord: there is no sorrow too deep for His comfort: there is no challenging opportunity too great for His enabling power.

III. Prayer the Connecting Link (vv. 28, 29).

The disciples in chagrin at their inability to deal with the difficulty of the demon-possessed boy, having witnessed the power of Christ in delivering him, begin now to realize that evidently even though uncon-scious of it, they had come into the powerless position of unbelief.

What a solemn warning there is

for us in the experience of these followers of the Lord. Like the termites who destroy the very life and strength of wood-and yet leave it apparently whole, only to crumble in dust when it is put under the pressure of daily use-there are spiritually destructive influences which all but unconsciously destroy the virile strength of the Christian. Prayerlessness is the most effective weapon of Satan at this point. Without prayer there is no power. Real problems are not successfully met nor are opportunities grasped "but by prayer."

Happiness

Happiness grows at our own firesides and is not to be picked in strangers' gardens.-Douglas Jer-

Our Business It is to you, who are grown men,

noble and honorable, that the whole world calls for new work and noble

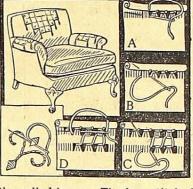

Silence Helps The soul needs silence more than

speech.

Italian Hemstitching For a Chair Set

THE chair set shown here is made of an even meshed cream linen, marked off in squares of Italian hemstitching. Tiny scrolls in outline stitch with two diamonds in satin stitch are embroidered in all the outside corners. The scroll motif is shown at lower left. The tassels are made by raveling strips of the material and then rolling them.

The chair back piece measures 15 by 10 inches finished, and the chair arm pieces 71/2 by 71/2 inches. Allow %-inch at all edges for

the rolled hems. The hemstitched squares measure 21/2 inches. Mark them in pencil. The method of hemstitching the rolled edges is shown here at A and B. Remember that a moist thumb always helps in rolling an edge evenly. Italian hemstitching is really just two rows worked together as shown at C and D. To prepare the rows, draw two threads, skip four and then draw two more.

Readers who have received their copy of Mrs. Spears' book on Sewing, for the Home Decorator, will be pleased to know that Book No. 2 is now ready. Ninety embroidery stitches; fabric repairing; also table settings; gifts; and many things to make for yourself and the children. If you like hand work you will be pleased with this unique book of complete directions for every article illustrated. Postpaid upon receipt of 25 cents (coin preferred). Just ask for Book No. 2 and address Mrs. Spears, 210 South Desplaines St., Chicago, Ill.

Hidden Benefits

Few housewives realize the underlying advantage of the use of a good light-oil furniture polish! Most polish is used only for the luster it bestows on the chairs, tables, piano, woodwork in the home. Rubbing the polish on cleans the furniture-works up a glow-and the outward effect is fresh and sparkling! But that is only part of the housewife's reward. For out of this domestic routine comes definite benefit to the furniture! A reputable polish, with a light oil base, does what is known as "feeding" the finish. The "massage" causes the oil to penetrate, seep into the pores of the wood-just enough to lubricate -and keep it healthy! Here, it is important to note that cheap polishes are made with a heavy oil base-and are "greasy" and unpleasant to use. The best polish -made with a fine light-oil baseis never greasy. Applied on a damp cloth (according to directions), it is neat to use and proves a boon to the furniture! Lack of polishing-or the use of a poor polish-will cause the finest wood to dry out, crack, split-for wood is a product of Nature and needs a certain amount of oily moistness. So polish the furniture regularly! Use a quality oil polish-it pays! For not only does the furniture look better-it is better! Its life is preserved!

WHO'S **NEWS** THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—The Nazis haven't bothered Frau Katherina Schratt, Unlike the Pompadours and Montespans, usually among the Frau Katie

Immune to Nazi's Ban

first victims of political upheavals, Austria's "Gnae-dige Frau," as Emperor Francis Joseph called her, has ridden the

surf-board of dynastic and political change for nearly 60 years. She is now eighty-two, doing crossword puzzles, disclaiming knowledge of the current cataclysm, but longing for the "good old days."

In those days, she was pretty Katie Schratt, a dancer in the Burg theater, which was under the patronage of the emperor. After a hit performance, with the emperor attending, she obtained an audience.

"Sire," she said, with a low curtsey, "we cannot maintain ourselves on the salaries you pay. I owe \$50,000 for my cos-

The emperor promised a new benefice for the theater and said he would help her take care of her debts. She was backing gracefully to the door when the emperor said: "Gnaedige Frau, why do you

She stayed 40 years, in a snug little villa by the palace gates. The emperor, after a hard day swinging the scepter, used to drop in at Frau Katie's, split a bottle of Pilsener and sing a few songs. She knew all the mellow old tunes which he particularly liked. She used to darn his socks and tell him when he needed a hair cut.

She refused to accept gowns or jewels, always remaining the "Gnaedige Frau," but the emperor, by an amusing artifice, induced her to accept a fortune in gems. He was a famous huntsman. He told her he was sending her a wild boar he had killed.

She saw no harm in that. When it arrived, it had diamond earrings, a diamond neck-Slain Boar lace and bracelets Is Studded and a diamond breast pin, and its With Jewels back was studded with precious Hapsburg jewels. The money lenders got them, after the emperor's death.

She was supposed to know more of the secrets of the realm than any other person. She guarded them carefully, but did reluctantly reveal a few details of the Mayerling tragedy of 1889.

She said Archduke Rudolf shot himself, after killing Baroness Vetsera. That's the version of the film now running. It would make a good story if somebody could take Frau Schratt to see "Mayerling" and have her write a critical review.

MARK ETHRIDGE becomes "czar" of the radio industry. It is hard to think of Mr. Ethridge as a czar, or even a third assistant Simon Legree, but he clicks neatly as an able, deft, diligent and resourceful executive.

While Mr. Ethridge is only forty-four years old, he is of the type of old-line, leg-man Radio 'Czar' newspaper man, Began Career with an insatiable as a Leg Man appetite for news. A native of Meri-

dian, Miss., with soft southern speech and instinctive courtesy, he ought to be an excellent troubleshooter for the radio, rather than a czar. He was a reporter on the Meridian Dispatch, studied at the University of Mississippi and romped on up through grades to the managing editorship of the Macon (Ga.) Telegraph. He was with the New York Sun in 1926 and his old friends there have been nominating him today for a loud cheer in this

He was lured back to Macon, went thence to the Richmond (Va.) Times, of which he was publisher, and later became general manager of the Louisville Courier-Journal and Louisville Times. He spent the year 1933 in central Europe, on an Oberlander Trust fellowship, studying politics and economics and -the only touch of anti-climax in his career—the Versailles

The radio has picked a man who knows the social and educational box-score as well as good entertainment. He is still general manager of the Courier-Journal, up and coming in the new enlightened leadership of the South. His "czar" job

Talks Too Fast

A certain doctor had the habit of Interjecting the phrase "of course" every little while as he spoke, just as others say "D'you see" or "don't you know." But he said "of course" once too often. For, once, when a patient was very ill, "I hurried to him, and, of course, he died."

Fashion Says Suede From Tip to Toe

By CHERIE NICHOLAS

A MAZINGLY supple, superbly colorful suede is making fashion history this season. Prepare for a revelation when you go suede shopping. Once glimpse the perfectly fascinating clothes designers are creating of this delightful medium and it's our guess you will be wanting to acquire a whole wardrobe of suede. Keenly fashion-alert women are doing just that-dressing in suede from head to foot.

When you sight the new collections the first item of apparel you'll be wanting will be an adorable onepiece dress made of suede caressing as a rose petal to the touch and so light weight you will wonder with what magic tanners' art ever accomplished it.

Everyone loves the colors suede offers. They are that beautiful it can't be told in words, for when it comes to taking dyes there is nothing that surpasses suede.

Then there are startling color combinations exploited, for the more unusual the color alliances this season the smarter. Per example the girl pictured in the oval inset is wearing a double-breasted suit presenting a most striking color scheme in that it tops a skirt of wineberry suede with a jacket in suede that is in gold-nugget yellow. The cone-topped hat and laced envelope bag which she carries with this costume are in "sooty" black

After you have bought a suit and a soft afternoon or sports dress of lovely suede you will begin to look about for accessories and here is

where you will cast away all restraint. You will find that a hat and matching scarf of suede will top off any costume you choose to wear it with, to perfection. Pictured above in the illustration Mary Carlisle of Hollywood fame shows her yen for suede in that she is wearing a hat and scarf in Egyptian clay-color suede which stunningly contrasts her pale blue three-quar-

ter swagger coat. One of the suede accessory items that will lay siege to your heart is a separate bolero of colorful suede. Wear it with any costume you will and it will take on new glory. The one pictured is quite simply tailored but it is possible to get suede boleros with decorative scalloped edges. You can get these in dark tones or entrancing ice-cream or bon bon colors. If it is from a sportswear viewpoint you are choosing, ask to see the lumber jacket types in suede or perhaps one of the sweater pullover models with wool sleeves as pictured in the group will be your style. With plaid pleated skirts they make the costume ideal.

It gives a dress or a coat an unmistakable air of chic to enliven it with a collar and cuff suede "set" or newer still is the collar and tiegirdle twosome of colorful suede. Some are finished with self-suede fringe in the cowboy manner as pictured, and still others have distinctive diamond cutouts bordering the collar and sash ends. These ensembles are to be had in such luscious colors as raspberry red, oriole orange, gold nugget, yankee blue and cavalry red, honey beige

and others.

VEIL-TRIMMED HAT By CHERIE NICHOLAS

Milliners are not only using veils as veils but the hat that is trimmed with veiling is a favorite type that is showing in great numbers. It is a navy colored veil that perks up the white straw as here shown. Furthermore, fashion declares that no costume is really complete without its flower accent this spring. This printed pique jacket worn over a navy dress uses a bunch of nasturtium-red flowers and, what's more, to complete the color scheme the young woman's nail polish is in matching nasturtium to carry out

the flower motif.

LINGERIE BLOUSE IN STELLAR ROLE

By CHERIE NICHOLAS

This is a suit season and a suit season means that the blouse is called upon to play a stellar role. A fashion of utmost importance is the revival of the exquisitely fine and daintily feminine sheer handmade lingerie blouse. We have not worn these charming blouses for seasons and seasons past to any extent but this spring they are the last word in chic. The finely pintucked batiste type is an outstanding favorite. In fact there is almost sure to be a showing of pin tucks somewhere about the blouse, be it lace-trimmed or not. Sprightly jabots are showing their frilly cascades between jackets from openings and even with the conservative tweeds these dainty blouses are correct as the feminine touch is a fashion 'must" this season.

Best Dressed Brides Will Be Arrayed in Lace Gowns

The very best dressed brides this spring will most likely walk down the aisle in lace-maybe in their grandmothers' lace dresses or in the new 1938 laces that are so enbe married in church or in the gar- | go free. den or just "quietly," can have a lace bridal dress fit for a queen, and this may mean the cobwebby Chantilly laces, or the angel skin patoutlines. The church bride, in a truly romantic manner, may wear made up of row on row of narrow in the dungeon. lace with quaint puffed sleeves and square neck.

Daytime Styles Daytime coats with elbow-length sleeves, short bolero jackets and smart zipper fastenings are popular.

THE BOOK SHELF-

'Living Death' In Prison Cell Told by Byron

By ELIZABETH C. JAMES

ORD BYRON'S "The Prisoner of Chillon" is a story of dungeons and chains, of cruelty and death. Beside Lake Leman in Switzerland stands a castle that once saw the members of a noble family. The dungeon of this castle was so deep that the water of the lake seeped through the walls and formed little pools on the prison floor. Sunlight never came into the dark prison, there was only one window and that was high and small. Through it

came light during a short part of the day, but the sunshine never came through, and the distorted light gave a wan and ghostly ap-pearance to the interior of the deep dungeon.

Into this prison were placed three brothers. They were the last members alive of their honor-able family. There

had been seven in the beginning, but the father had been burned at the stake, two brothers had died on the field of battle and their mother had died of a broken heart.

Elizabeth

Placed so that they could not see each other, each man was chained to a rock pillar. Now the three of them languished in their chains which were so fastened that their bodies were soon indelibly scarred.

One Brother Dies. After a time the voice of the second brother, the active, out-of-door one, grew more and more despondent; he spoke more softly and less often. Then he did not speak at all. When the keeper came to bring their water and prison food, he found this brother dead.

The two remaining brothers, the oldest and the youngest sons of the family, talked with each other of the battles and the insurrection that had brought them to this prison. But one day the youngest of the abdomen, lack of appetite, bad family did not answer to his broth-

LORD BYRON A PLAYBOY

Two handicaps attended George Gordon, Lord Byron: his family environment and his own vanity. Gordon grew up without training, for his mother, being deserted by her willful husband, the rowdy Captain Byron, declined into melancholia so overwhelming that at times her mind seemed doomed. The parents left the boy to grow up alone.

Byron's natural pride was enhanced by his unexpected inheritance of the estate and title, for which there had been two heirs ahead of him. His attractiveness combined with his lack of principle kept him in mix-ups with women all his life.

His marriage to a lovely woman of England went happily for only a short time. Soon after their daughter was born. Lady Byron left her husband, never to return to him. She steadfastly refused to give any reason for this, but London soon heard of his behavior in a scandal. He was ostracized, and fled to Italy. Until the end of his life, Byron lived on the continent.

er's voice. There was only quietness in the dungeon, broken by the hysterical cries of the eldest son shrieking to his brother to stay with him. But he had died.

Terror, Then Calm.

For a time he was stunned with grief; he lost track of time or place. He was not conscious of anything except vague oblivions. Then gradually his senses returned to remind him that he was alone in the prison cell. When the keepers came and found that he had burst his chains they did not consider that it was worthwhile to chain him fast again, so they left him free to walk about the dungeon.

Then he wanted to see the world again, and he made steps up the side of the uneven rock wall until he could clutch the ledge of the window and pull himself up to look out through the little opening. Across the waters of Lake Leman and opposite the castle, he saw in the distance an island, green and bright in the summer sun.

Freedom Meaningless.

Then one day he was set free. Someone came to the castle and made negotiations. After a time a keeper opened the heavy barred chanting. Every bride, whether she door and told him that he could now

The prisoner stood alone on the shore of the lake. Where could he go? He had no one in the world to whom he could return. Every terns, or the sheer lace with cord kinsman had been killed, there was no friend left who would welcome him. He was still as much alone as a gown hinting of an earlier era if he were yet chained to his pillar

Lord Byron wrote his poem, "The Prisoner of Chillon," from a true story. There was a prisoner, one Francois Bonivard, kept for four years in the dungeon of the Castle of Chillon, near Lake Geneva.

C. Houston Geudiss Discusses LAXATIVE FOODS ★

imprisonment and death of the last Nationally Known Authority on Food Shows How Right Diet Can Help You to Avoid Health Hazards of Faulty Elimination

By C. HOUSTON GOUDISS

HOUSANDS of men, women and children are alive today because we have learned how to prevent many types of this is a great aid to body rhythm. infections and how to cure diseases which once caused un-

We have reason to be proud | Foods which tend to form a lit of the achievements of science | tle gas in the intestines, including in fighting disease and length- spinach, onions and cauliflower, ening the span of life. But we should be ashamed of the fact that hundreds of thousands of individuals are not getting the most anges, lemons and grapefruit, act out of life-indeed they are not as a mild stimulus to increased peristaltic motions. realizing half their potentialities because improper eating and faulty habits of hygiene cause them to suffer from that great evil moting normal elimination is vitaof civilization—constipation.

EVILS OF CONSTIPATION Someone has called constipation

the most deadly disease, and while this may seem like an ex- the diet is deficient in vitamin B. treme statement, it Yeast, egg yolk, milk, whole grain becomes justifiable cereals, liver and green leafy vegwhen one realizes etables are good sources of this the untold misery vitamin. and wretchedness that may result when food residues remain to stagnate and putrefy in the body.

Constipation muddies the complexion, dulls the eye and befogs the brain. It causes a general feeling of discomfort and fullness in the breath, coated tongue, a feeling of lassitude and a tendency to become easily fatigued.

By weakening resistance, opens the way to numberless diseases. Serious complications, such as irritation of the appendix, may occur as a result of the friction of hard masses of waste against the delicate walls of the intestine. Piles have frequently been laid at

the door of faulty elimination. Do you wonder that I consider prompt, regular elimination the keystone of good health. Its importance is readily under-

stood when you consider the processes by which food is digested and absorbed.

FATE OF FOOD IN THE BODY From the mouth, food passes down the esophagus into the stomach, where it is penetrated by the gastric juice. It then passes into the small intestine where it is mixed with the secretions of the liver and the pancreas. Here the nutritive elements are absorbed by minute, hair-like tubes which line the intestinal walls. These tubes converge into the blood vessels and lymphatics which transport nourishment to all parts of the body.

Undigested residues pass into the large intestine or colon, where they are normally moved along by a series of muscular contractions known as peristalsis, and finally evacuated

The amount of the evacuation varies in bulk with the amount of indigestible roughage contained in the food. When there is insufficient bulk to promote normal peristalsis, waste accumulates and we have the condition known as constipation with all its resulting evils. Bacteria prey upon the stagnating material, producing poisons which may be absorbed by the body.

There is not the slightest excuse for allowing this condition to develop. For the misery and wretchedness of constipation may easily be avoided by including in the daily diet sufficient laxative foods, that is, those rich in fiber or cel-

BULK OR FIBER ESSENTIAL Because of their fibrous frame-

work, plant foods are our chief source of cellulose or bulk, and therefore, our greatest aid in promoting normal elimination. Vegetables and fruits are sworn foes of constipation, and unrefined cereals are also extremely valuable.

SOME LAXATIVE FOODS

Foods with an exceptionally high residue include raw fruits, especially those with skins and seeds; dried fruits, as apricots, prunes, figs and raisins; raw vegetables; such cooked vegetables as onions and leafy greens; the legumes, that is, dried peas and beans; whole grain cereals and

Among the vegetables, don't overlook cabbage, lettuce, celery, spinach, brussels sprouts, string beans and green peas.

Have You a Question?

Ask C. Houston Goudiss

C. Houston Goudiss has put at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen Laboratory in New York city. He will gladly answer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hygiene. It's not necessary to write a letter unless you desire, for postcard inquiries will receive the same careful attention. Address him at 6 East 39th Street, New York City.

Guard carefully against overeating, for this practice is a frequent cause of constipation. When the digestive system is overworked, none of its functions can be efficiently performed.

The homemaker is largely responsible for safeguarding her family against the dangers of faulty elimination. For she has it in her power to plan meals that will help normal individuals to avoid the curse of constipation.

Questions Answered

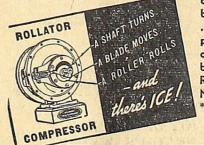

Mrs. B. T. M .- Do not worry if your child prefers the egg yolk to the white. The white is chiefly protein, and he can easily obtain protein from other foods, especialed that it requires twice as long ly milk. But the yolk contains an to empty the large intestine when abundance of minerals and vitamins in addition to protein and fat. Nutritionists have determined that the inclusion of one egg yolk daily in an otherwise adequate diet is an effective method of bal-ancing the intake and output of iron in a child's diet. A sufficient quantity of liquids

Miss S. B .- No, the generous use of cream cannot be considered as a substitute for taking milk as a beverage or in cooked dishes. Cream is much higher in fat and contains less protein, minerals and vitamins, with the exception of vitamin A. Cream de-serves to be included in the dietary for its vitamin A content, but it should not replace milk.

Mrs. A. McK. - Strawberries contain vitamins A, B and C. Recent experiments indicate that they rank with citrus fruits and tomatoes as a source of vitamin C.

School Notes

We note by the paper published by the students of the Bay City Jun-ter College that about fifty students were on the honor roll of the midlle of the second semester. Three of the above fifty have received an all "A"record. One of the three students was a graduate of the Bay City high school, one was a graduate of the Saginaw high school, and the third was none other than our 1937 alumnus

We have received word that Jean Robinson is on the honor roll of Cleary College for the winter term. The University of Michigan covered silent reading tests to be administered to 4,922 freshman in January, 1938. Two factors were considered in these tests; that is, the rapid reading and the ability to secure the thought from the printed page. According to the preliminary report just received, the general medium the interest of the preliminary report just received, the general medium the interest of the preliminary report just received, the general medium the interest of the preliminary report just received, the general medium the interest of the preliminary report just received, the general medium the preliminary report just received the preliminary re dium obtained by the schools was 90.85, while the Tawas City freshmen obtained a score of 110.00 as a medium. The report also indicates that only one student of the 4,922 obtained a higher score than Harold Ross of our own ninth grade.

The juniors wish to express their thanks to those who attended or contributed in any way to their card party last Friday. We know that on these pleasant spring nights the out these pleasant spring nights the out of doors is much more appealing than a game of bridge an so we appreciate even more the effort made to come. High scores vere held in bridge by Mrs. C. T. Prescott and Ira Horton. in Pedro by Dorothy Blust and Hugh Prescott and in bunco by Norma Musolf and Walter Koepby Norma Musolf and Musolf Andrew Norma Musolf Andrew Norma Musolf ke. Home made ice cream and cake were served. The net proceeds for the class were \$13.05.

the class were \$13.05.

We are hoping that nothing will interfere to cause us to change the date of our all-high dance to be held at the city hall this week, Fr day evening. Several times our plans have been unavoidably upset. This dance is to be held exclusively for Tawas City high school students. We hope all interested will attend and have a good time.

have a good time.

On Thursday and Friday of last week, the Freshmen and Sophomores ongaged in their inter-class debates. The Freshmen won the first contest which was between two teams that had been most greatest with the contest when the statement of the state had been most successful in the intra-class debates. Marjorie Musolf, June Hill, and Harold Ross won the victory from Betty Ulman, Hazel Herman, Victor Johnson and LaVerne Koepke. Each class chose a team of its best speakers for a championship debate, and in this, the Sophomores were victorious. Dorothy Blust, Kathleen Davis and Richard Zollweg won the victory from Irene Cunfft, Marion Musolf and Julius Musolf.
