VOLUME LXI

Two Dollars Per Year

TAWAS CITY, MICHIGAN, FRIDAY, MAY 5, 1944

NUMBER 18

TAWAS CITY

BROTHER AND SISTER GET HIGH HONORS

Neil and Linda Libka Are Co-Valedictorians Class of '44

Neil Libka, eighteen year old Senior at Tawas City High School, with a scholastic average of 90.4, has made the highest record of the sixteen members of the Class of '44, and will be valedictorian this year. His sister, Linda, is only three-tenths of a point behind him, with an average of 90.1 which makes her co-valedictorian. Because of her brother's three-tenths point lead, Linda will act as class salutatorian, although she and Neil are tied with a score of 90 per cent.

It is particularly pleasing to the school faculty to have the two Libkas achieve this honor, since they have always showed such high caliber of citizenship in and about school. Both are good leaders, obedient to discipline, well mannered, honest and ambitious. Both have distinguished themselves in athletics and band as well as academic work. Linda has won a scholarship at Ferris Institute, but has decided to return it unused.

For outstanding leadership qualities, Neil has won an award from the Danforth Foundation which will be presented as a part of the graduation exercises. Neil expects to join the service after graduation, and his sister hopes to attend business college and become a secretary.

Their many friends wish them both every success.

Lawrences to Open Lunch Room Wednesday

Mr. and Mrs. Otto Lawrence will open their new restaurant in the Gabler's Lunch Building next Wednesday, May 10. The building has been completely remodeled and decorated, and furnished with modern equipment and presents an excellent appearance.

The Lawrences have been operating the lunch room in the Decaire Building for the past few months. This has been leased by Mrs. Donald Oberg and Betty Miller of Bay City and will be known as the Tawas City Sandwich Shoppe. They take possession Saturday.

The Herald extends its best wishes to the owners of both lunch rooms.

Tawas City Recreation Committee Organizes

A meeting of the Tawas City Committee of the Youth's Recreational Foundation was held Friday evening for the purpose of organizing and discussing a tentative program of activities and co-ordination of various organizations interested.

The committee consists of George W. Myles, chairman; R. A. Rollin, secretary; Mrs. Joseph Stepanski, treasurer; James Leslie, and Judge H. Read Smith.

A A A Feed Payments Now Being Made

Dairy feed payments are now being made at the AAA office for the months of February, March and April. Farmers should forward their production and sales slips of payment as soon as convenient. Deadline date for February payment is June 30, 1944.

The payment rates for May, June, July and August will be 35c per cwt. for whole milk and 6c per lb. for butterfat. For September, October, November, December and January, February, March 1945 the rates will be 60c per cwt. for whole milk and 10c per lb. for butterfat. These payment rates are subject to Congressional action.

Miss Jessie Martin

Miss Jessie Martin, who made her home with Mr. and Mrs. Leader K. Dahl at Foote Dam, died of a heart attack on Sunday, April 30. She was born in Glasgow, Scotland on July 15, 1895.

Funeral services were held May 2nd at the Evans Funeral Home with Rev. M. W. Gustafson officiating. Burial at Oscoda. Several friends from Detroit attended the funeral.

Card of Thanks

We gratefully acknowledge all the kindness and expressions of sympathy extended to us during our recent bereavement.

The Brown Family.
LOST—Black and white female Beagle hound, flag and collar. Reward. Harry Goldsmith.

23 Burleigh-Sherman Young Men Complete Farm Short Course

Some 50 F. F. A. boys, farmers and businessmen of Whittemore assembled Friday evening at the Burleigh Township Rural Agricultural School to honor 23 young men from Sherman and Burleigh townships for the completion of an adult night school in farm machinery repair and truck and tractor repair.

The completion of these two concentrated short courses was celebrated by a complimentary banquet given by the businessmen of Whittemore, and prepared and served by the girls of the home economics department of the school.

The short course covered a period of ten weeks duration, and was given under the direction of Agricultural Instructor Frank Madaski. F. B. Pedersen served as instructor of the "Farm Machinery Repair Class," while Charles Belleville guided those in the "Truck and Tractor Repair Class."

The adult students brought their (Turn to No. 1, Back Page)

Whittemore P-T. A. To Install Officers

Whittemore P-T. A. will hold their May meeting Tuesday night, May 9, and the following officers will be installed for the coming year by the past presidents:

President—Mrs. Horace Powell.
Vice President—Mrs. Gerald Bellon.
Secretary—Mrs. Duncan Valley.
Treasurer—Mrs. Ivan O'Farrell.

Women's Club Holds Annual Meeting

The Whittemore Women's club held its last meeting of the season Saturday afternoon, with twenty seven members answering roll call.

Mrs. H. B. Brockenbrough read a paper on Spring Flowers and Mrs. Charters gave a reading and a poem as a tribute to Mrs. Lee Campbell, a deceased member.

Election of officers followed and the following were named for the ensuing year:

Mrs. Roy Charters was reelected president; Mrs. Ed Graham, vice president; Mrs. George Jackson, secretary; Mrs. Sterling Cataline, treasurer.

Saginaw People Lease Sawyer Restaurant

Mr. and Mrs. John Snyder of Saginaw have leased the restaurant in the Sawyer building and will take possession May 23. They expect to have the restaurant in operation early in June.

FOR SALE—Entire household furniture, including new Duro-Therm oil heater, 2 oil tanks, one 250 gallon, one 400 gallon. Mounted deer head, quantity of wall board and plywood. Other articles too numerous to mention. Inquire Mrs. Kribbs, Sand Lake. Call this week and next.

FOR SALE—30 H. P. gasoline motor. Heavy duty, 4-wheel trailer, good shape. Also 8-inch heavy duty jointer, A1 shape. Harry Goldsmith, Phone 261.

FOR SALE—Bees new hives, and all kinds of supplies. Several small buildings, also cedar posts. Contact Paul Harvey, Game Area, Oscoda.

FOR SALE—30 H. P. gasoline motor. Heavy duty, 4-wheel trailer, good shape. Also 8-inch heavy duty jointer, A1 shape. Harry Goldsmith, Phone 261.

FOR SALE—30 H. P. gasoline motor. Heavy duty, 4-wheel trailer, good shape. Also 8-inch heavy duty jointer, A1 shape. Harry Goldsmith, Phone 261.

Clean-Up Day

Monday, May 8th to Monday, May 15, have been designated as Clean-Up Days for Tawas City. Residents are urged to put their rubbish in boxes or containers and place at street curb.

People wishing to burn grass in the city must secure permit from Fred Musolf, chief of the Tawas City fire department.

John D. LeClair, Mayor.

EASTERN STAR ASSOCIATION TO MEET HERE

Tri County Semi-Annual Meeting Next Thursday

The Semi-Annual Meeting of the Arenac, Iosco and Alcona Association, Order of Eastern Star will be held Thursday, May 11, at Tawas City.

The afternoon session will consist of singing; greeting by Jennie Harrell, Whittemore, president of the association; presentation of the flag by Whittemore Chapter; and dress of welcome by Mrs. Jessie McLean and response by Mrs. Leone Townsend; folk dances by the primary department of the Tawas City schools; presentation of guests, and business meeting.

In the evening there will be songs and music; memorial by Grace Chapter, and installation of officers. Lois Fuerst, Grand Warder, of Whittemore will act as installing officer, with Alma Pake, installing marshal.

The association officers are: Jennie Harrell, Whittemore, president; A. E. Greve, Hale, vice president; Myrtle Baiko, Omer, vice president; Emmelle Mark, Tawas City secretary; Carrie Streeter, Standish, treasurer; Anna Hanson, East Tawas, chaplain; Alma Pake, Whittemore, marshal; Margaret Powell, Whittemore, organist.

Board of Review

The Board of Review for the City of Tawas City will meet Monday, Tuesday, Wednesday and Thursday, May 15, 16, 17, and 18 for the purpose of reviewing the several assessments rolls of the city and such other business as may lawfully come before it.

Albert H. Buch, Clerk.

IN the SERVICE

Pvt. Francis Klinger, age 36, son of Mrs. Martha Klinger of East Tawas, is reported missing in action in the North African area on April 20, according to a telegram received by the family last Saturday. Further word is anxiously waited. He had only left the United States about 18 days before the telegram was received.

Lieut. Walter Hertzler, stationed at Camp Atterbury, Indiana, visited several days with his brother, Prosecuting Attorney Herbert Hertzler, and family.

Master Sgt. Walter Kasischek has been transferred from Fort Winfield Scott, California, to Hdq. Btry., 130th C. A. Bn. (AIA), Camp Breckinridge, Kentucky.

Oscar Stark, chief of staff and senior vice president, District No. 9, Veterans of Foreign Wars, of Alpena was in the city Saturday in the interests of that organization. Stark says that with the great number of men now in foreign service, who are or will be interested in becoming members of the Veterans of Foreign Wars, new posts of the organization are being established in many localities, and that the Tawas area is large enough to support such a post along with its American Legion activities. He says that the Alpena Post now has a number of service men in the Pacific and European war areas signed up as members, and that they are deriving many benefits from such membership.

Sgt. and Mrs. Alvin Kendall and daughter, Sharon, arrived Saturday from Fort Reno Oklahoma, for an 18 days visit with their parents and friends.

90 Descriptions Sold At Annual Tax Sale

Ninety descriptions of tax delinquent land were sold at the sale held Tuesday at the court house by County Treasurer Grace Miller. The receipts from the sale amounted to \$595.99. Special interest was shown in property which might be used for resort or recreational purposes.

Mother-Daughter Banquet

The Daughters of Isabella are sponsoring a Mother and Daughter Banquet at Gifford's Grill next Tuesday evening at 7:00 o'clock. An interesting program has been arranged.

Irene Lodge Hostess To District Rebekahs

Tuesday afternoon Irene Rebekah Lodge No. 137, was hostess to the District Rebekah Association with 150 women attendance.

Mrs. Pearl Wickert, Noble Grand of the hostess lodge, presided over the opening and closing of the association meeting.

Mrs. Lulu Bartley and her association officers presided over the business sessions.

The welcome and response addresses were given by Mrs. Wickert and Mrs. Sheppard of West Branch, respectively.

Mrs. Laura McKenzie sang, "My Prayer for Today," and Mrs. Zetta Timpson, assembly president, as well as her guest, Mrs. Daggett, and six out of district officers were presented.

Standish Lodge conducted the Draping of the Charter. The afternoon session closed with remarks from the president.

At six o'clock the banquet was served at the Temple dining room. This was presided over by Mrs. Biskner and her committee.

The meeting again assembled at the Community Building at seven o'clock with Mrs. Wickert presiding. Mrs. Lulu Bartly conducted the business meeting.

Lovely music and humorous readings by Mio Lodge were enjoyed by the audience.

Prescott Lodge gave a beautiful Memorial, and degree work was exemplified by the East Tawas Lodge and their captain, Mrs. Lena Herstrom, who was presented with a lovely gift from the staff.

The new district officers elected are: Mrs. Lucy Marsh, Mio Lodge, president.

Mrs. Jennie Lazenby, Rose City Lodge, vice president.

Mrs. Margaret Neiman, Standish Lodge, secretary.

Mrs. Stella Richards, West Branch Lodge, treasurer.

Three Certificates of Perfection were awarded by the president.

The assembly president gave very fitting remarks and spoke on the project of "A Fleet of Ambulances" from the Rebekahs this year.

ALABASTER WOMAN DIES LAST MONDAY

Mrs. J. L. Brown Funeral Held Thursday Afternoon

Mrs. J. L. Brown, highly esteemed resident of Alabaster for 45 years and widow of the late James L. Brown, commercial fisherman, passed away at her home residence Monday afternoon, April 24. Funeral services were held from Emanuel Lutheran church, Tawas City, Thursday afternoon. She was laid to rest in the Tawas City cemetery.

Anna Dorothy Dietrich was born Buena Vista township, Saginaw county, April 15th, 1865, and departed this life at the age of 79 years and nine days. She was one of three daughters and eight sons of the late William Dietrich.

In February 1887 she was united in marriage to James Lafayette Brown of Green Bay, Wisconsin, and for ten years resided at Saginaw. Their next home was at Bavort where Mr. Brown was engaged in the fishing business. Crossing the ice in the winter of 1899, they settled in Alabaster on the Iosco-Arenac county line to continue in the fishing business, except for a period of four and one-half years spent at Seal Beach, California.

Her health had been failing the past year and on Saturday morning she suffered a paralytic stroke of the speech area, followed by a more severe stroke 12 hours later. On Sunday she regained consciousness and speech for short intervals, recognizing the immediate family. She grew weaker Sunday evening and slept peacefully away to be with her Lord and Savior whom she loved and in whom she placed her full trust.

Mr. Brown preceded her to the Great Beyond 22 years ago.

She leaves to mourn her loss, three daughters, Mrs. Nettie King of Comins Michigan, Mrs. Mabel Benson and Mrs. Alice Anderson of Alabaster; three sons, G. W. Brown and Harlan C. Brown of Port Hope; 16 grandchildren; 12 great grandchildren and many other relatives and friends whom she held in high esteem.

She was happy in the service of her Master. Her heart's desire was not only to serve Christ, but to serve others in any capacity possible. She was always a willing giver in the cause of Christ. Her unmeasurable love and faithfulness to her family will always be outstanding in the memory of her children.

Mrs. G. A. Pollard of Ossineke and Mrs. Wm. Gurvey of Alpena attended the W.S.C.S. meeting at the Methodist church on Tuesday.

Bay City visitors on Tuesday included Mrs. Raoul LaBerge, Mrs. D. J. Bergeron and son, David and Mrs. Clara Barkman.

An honor roll bearing the names of sixty-one men, now in the service and former members was dedicated last Sunday at the Methodist School. Sixty-one candles arranged to form a cross were lighted by relatives and friends to honor those serving their country.

Mrs. Percy Scott gave a reading. The church school communicates with each boy school and communicates with each boy school at least once a month. More than 300 letters have been sent out in the past five months. Mrs. G. N. Shattuck, Church School Superintendent and Mrs. John Colver, Service Chairman are in charge of the program.

Mrs. Sadie Herrington was hostess to the P.N.G. Club Thursday afternoon. Pot luck lunch and a social afternoon was enjoyed.

Mrs. Bert Bonney entertained Thursday afternoon with a Pyrex shower honoring Mrs. Ida Nelem, whose marriage to Edmund A. Gaggeron of Detroit will take place May 6th. The afternoon was spent in visiting and making a book of receipts which was presented to the guest of honor.

A lovely lunch was served from a lace covered table with appointments of spring flowers, lighted candles and favors.

Guests who attended the shower included Mrs. Wm. Deckert, Mrs. Charles Hewson, Mrs. Simon Goupil, Mrs. Nellie Mills, Mrs. A. Jackson and Mrs. Harry Patterson.

Ohio Man to Teach Music at East Tawas

The following extract from the Daily News of Troy, Ohio, will be of interest to many Iosco county people: "Announcement was made by Frank L. Humberger, supervisor of music in the Troy schools the last 34 years, that he had presented his resignation to the Troy Board of Education and will accept a state retirement effective at the close of the present school year. He has accepted band work in the East Tawas, Michigan, schools beginning the middle of June. The band, augmented by other musicians of East Tawas will present several concerts during the summer on Lake Huron shores. Mr. and Mrs. Humberger have sold their residence at Troy and when school closes will move to their cottage in East Tawas which they erected seven years ago for a summer home and which they will now convert into a permanent residence."

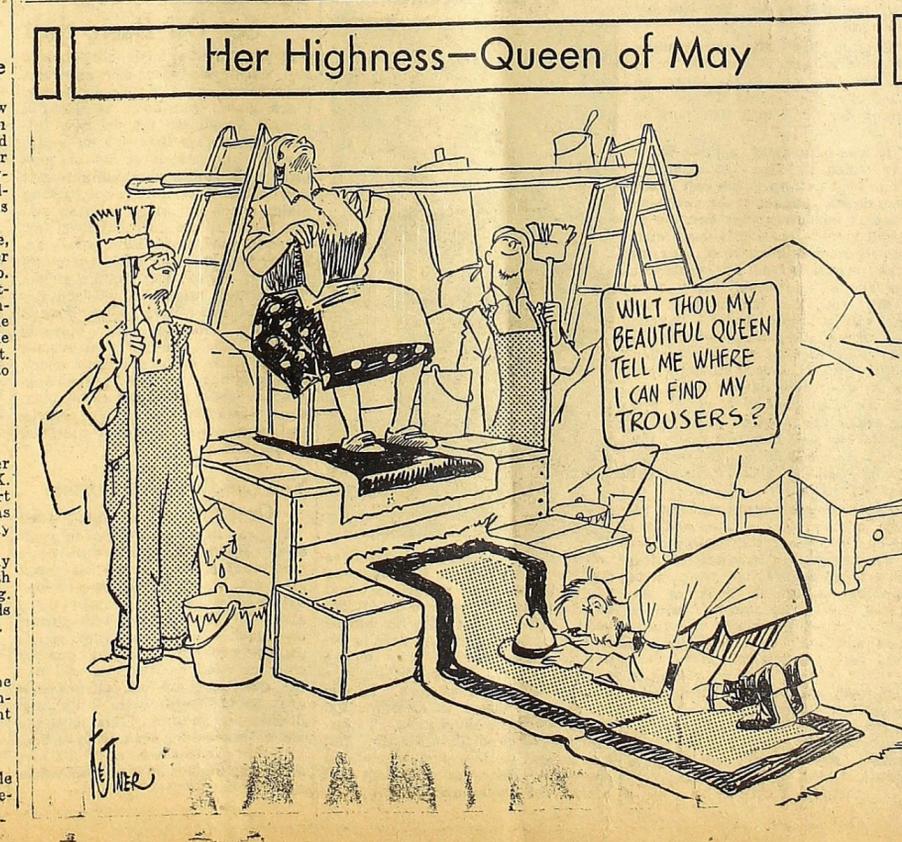

Mrs. Lucy Marsh, Mio Lodge, president.

Mrs. Jennie Lazenby, Rose City Lodge, vice president.

Mrs. Margaret Neiman, Standish Lodge, secretary.

Mrs. Stella Richards, West Branch Lodge, treasurer.

Three Certificates of Perfection were awarded by the president.

Her Highness—Queen of May

WILT THOU MY BEAUTIFUL QUEEN TELL ME WHERE I CAN FIND MY TROUSERS?

QUEENS DIE PROUDLY

© WHITE by W.L. White W.N.U. FEATURES

THE STORY THUS FAR: Lieut. Col. Frank Kurtz, pilot of a Flying Fortress, tells of that fatal day when the Japs struck in the Philippines. Eight of his men were killed fleeing for shelter and Old 99, with many other Fortresses, was demolished before it could get off the ground. After escaping to Australia, what is left of the squadron flies to Java where they go out on missions over the Philippines. The bombardier takes up the story and tells of a flying trip to Brazil, Egypt, Iraq, India and Java. A battle in the clouds in which swarms of Zeros attack an E model Fortress is described, and in which the Zeros come out second best. Seven Zeros are shot down.

CHAPTER XII

"We've already lost altitude waiting for the Major (we'd boxed him in so he could stay with us and the Zeros wouldn't tear him to pieces), and he seems to have developed engine trouble. We're down to 23,000 feet. And I'm the lead bombardier.

"But now the whole plan is again altered: I get it over the command radio. We're to lay them in chains across this target. So I set up the bomb sight again, put the cross hairs on that cruiser.

"It is a perfect run. I even have time to take my eye off the sight, and fire bursts at two more Zeros as they attack from the front. They start way out ahead, to the left and a little below us. Now, coming on in at me, they cross over and up, toward the center of my fuselage, their guns pounding, and then slip on back and dive straight down and away.

"I get one because he miscues. Then I jam my eye back onto that bomb sight. Everything is riding pretty—the cross hairs right where I want them, the bombs about ready to be released.

"A second before the bombs leave my plane, I see that Jap cruiser starting to turn (he's figured our bomb-release line to the hair). He's turning toward us as I watch the bombs go down. By the time they arrived, the cruiser is three-fourths through a turn of 180 degrees. The first bombs are falling short—three of them. Now mine come—two direct hits on the cruiser, the other two going over. The plane back of me gets some direct hits. My left wing man's string is barely in front of the cruiser, my right wing man's string is barely behind it—the damned thing seems enveloped in bombs churning the water, and debris flying above the foam. Boy, that Japanese captain just turned the wrong way!

"But now our formation swings and heads for home, Zeros still swarming around us, and we're still losing altitude to stay back to protect the Major, who seems able to use barely enough throttle to keep her in the air. After forty minutes the last Zero drops away; they're short of gas and aren't chase us any further.

"Presently, over the command radio:

"Robinson to Skiles. Go ahead."

"Skiles answering."

"Radio the base at Malang to have an ambulance ready. We have two badly wounded men aboard."

"We wonder who they are. One is probably the tail gunner, since we saw Robinson's plane taking so many tracers there. The other must be their radio operator, or else they could have sent their own dot-dash message back to base.

"Meantime our radio operator is telling Malang to have the ambulance out. Our plane is now leading the formation. Major Robinson's just behind us. We've drifted slowly down to 4,000 feet altitude, protecting Robinson. Then, all of a sudden, Robinson's plane swoops down beneath us about 1,000 feet, and the incline sends it scooting on out in front of us, heading a little toward the coast of Borneo. Is Robinson going to beach her? And now over the command radio:

"Skiles to Robinson. Is there anything wrong?" our pilot asks.

"But there is no answer. We watch. Now Major Robinson is making a gradual turn, as though to rejoin the formation. But halfway in the turn his plane starts nosing over, goes into a dive, goes faster—straight down at the sea. We watch, holding our breath. Just before he goes in, his tail elevator blows off. The poor guy must have had the stick clutched back into his stomach trying to pull out of that dive, and the terrible air pressure on those elevators ripped them off. There's a huge splash—flame—a spiral of black smoke, and a widening circle of yellows, reds, and black, which is burning gas and oil on that topaz-green water.

"The second after it hits I call Lieutenant Duphrane on the interphone.

"My God, Duke," I said, "did you see that?"

"Yes," he said. And then in a minute he said, "Thank God those Japs didn't see it."

"The formation circles above the dead Queen. We circle until the fire dies away, peering down at the widening disk of oil. But there is no sign of anything else on the surface.

"Until then it hadn't seemed like a battle—just a game. But now I feel like someone had kicked me in the guts. There were guys on there I'd drunk with. We'd sat around and lied to each other. I'd seen it happen, but I couldn't believe what

I saw—it seemed like a bad dream. "When we landed, all the crew assembled for the critique, each member dictating just what he had seen to the officer. That's when I was credited with three of the eight Zeros we knocked down. After the critique no one had much to say. We were all thinking about what we saw happen.

"They told us to go to the barracks and get some rest. But an hour later I found that the whole crew had, one by one, drifted back out to the plane—cleaning guns, improving gun positions, doing things we'd suggested back in the States but no one had ever got around to doing. Throwing away those small inadequate ammunition cans, and rigging the guns so you could set a whole box of ammunition in there, figuring ways of putting more guns in the nose—.50-caliber ones that really pack a punch. And cussing hell out of the bottom turret. It has remote control—you look through a mirror and everything is backwards, and you have to know exactly where the plane is going before you can line the sights.

"We'd found out our machine-gun oil would freeze at high altitudes, and we were figuring how to clean and oil the guns so they would best

Boy, that Japanese captain just turned the wrong way.

operate up there. You couldn't tell the officers from the men (remember, we had no maintenance crews in Java; we did all the work ourselves) and my pilot had his coveralls on, installing an extra oxygen outlet in the tail. After seeing what had happened to Robinson's tail gunner, he figured if his tail gunner got wounded, another man in the crew could go back there and they would both stay on oxygen.

"The E of course was a big advance over the D. But any new model will have little things wrong that you never find out until you take one up and fight it.

"All through Java we did it all ourselves—the officers right along with us, helping load bombs and checking valves. We flew in weather out there you wouldn't drive out to the airport in back here. But the Japs were flying it too; they'd come in strafing and we'd have to jerk our old mutts off the ground quick."

"Anyway," said Frank Kurtz, "we had stopped the Japanese there in Macassar Strait for a while. The little Dutch Navy helped, but mostly it was American air power. We'd sunk quite a gang of them, so the rest had to go home and lick their wounds, realizing they couldn't move in on Java until they had air control. This meant they would have to clean us out of our advance fields in Borneo and the Celebes. It wouldn't be hard, for the Dutch had no troops to speak of on these islands. Everything had had to be withdrawn to hold Java. But it took time for the Japs to take over our little advance bases at Samarinda and Kendari, and being new to war, we foolishly thought Time was on our side. We were thinking of those thousand planes. We hadn't learned that Time in war is a treacherous ally who favors anyone who will use him.

"But meantime Colonel Eubank had hauled me down to the ground for a while to do a different job. Too many wars were going on. The Japanese were running a pretty good one, but against them were the American Air Force, the Royal Dutch Air Force, the American, Dutch, and Australian navies, all of us running wars of our own.

"Finally it was agreed that every night they'd deliver to me in Surabaya a safe-hand message, giving the position of every American ship in those waters. We'd swap information about operations, so everyone would be pulling together. It

was a liaison job, and since I'd have to deal with Navy men so heavy with rank and gold braid on their sleeves they looked like they'd had their arms up to the elbows in scrambled eggs, the Colonel gave me a set of captain's bars, so I could talk up to them. Presently I was dealing with everyone—the Dutch and the British, too.

"The Dutch, for instance, were begging for help in Sumatra. It's that long island which parallels Malaya, pointing down in the direction of Java. The Japs weren't in Singapore yet, but already they were swarming across the narrow seas from Malaya trying to grab the oil refineries at Palembang. So the Colonel sent the Forts."

"We got to Palembang the last week in January," said Sergeant Boone, the gunner. "The Dutch there were certainly swell to us. There is a huge refinery in the town, and they took us to a club sponsored by Standard Oil Company—a palace. All the club members would drop around to be sure the Air Corps had a place for the night. A Dutch officer took the rear gunner and myself to his quarters. He'd married an American girl, so he spoke good English. We had on only greasy coveralls, but he took us right into his quarters—all air-conditioned and mosquito-proofed. The native couple they had as cook and houseboy gave us the first home-cooked meal we'd tasted since the war.

"The Dutch officer was a fine-looking big blond guy. He brought out clean pajamas for us, and some of his uniforms we could wear for dinner. He was depressed. Early in January he had evacuated his wife and child to Java—for safety, although that seems queer to say now. He himself was staying behind, in command of native ground troops, to defend those refineries. He hadn't heard from his wife. You could see he was very much in love with her. Also that he didn't think much of the military setup they had in Sumatra, so he doubted that he would ever see her again.

"He'd been back on a visit to Holland just before the Germans came in. Since then he'd had only one letter from his mother—smuggled out. She had had a couple of German maids from over the border. They made good servants for the heavy work, but just before the surprise invasion they'd been called back to Germany. It was the same, she said, all over Holland. So no wonder, he said, that the Germans knew the name of every Dutch officer in Holland. The morning of the invasion, the Gestapo would knock at the door, and when the officer opened it, would shoot him down in cold blood. This was why, he explained, the Dutch Navy was so incapacitated for officers. He was very bitter. He was in wonderful physical condition—been leading native troops through the jungles. Said his wife was high up in the Java mountains and hoped she was safe. Next morning we left on a mission and never saw him again."

"We came up a little later," said the Bombardier, "and by the time we got there, the Japs were moving into the river's mouth, just below Palembang. The weather was overcast—a ceiling of 2,000, so we had to work down below that. None of us liked it, because a Fort is a hell of a big easy target so close to the ground—never built for that. As we came in, so close to the ground, our radio operator called Skiles on the interphone.

"Captain," he said, "oxygen doesn't agree with me, but I'm willing to begin chewing it any time now," and I broke in, "You can say that again."

"Captain Northcott was leading the mission—six planes we were, and when we sighted the target he called over the command radio, assigning our flight to a transport on the left.

"It was a monster, a huge Maru liner which I've seen as a luxury cruise boat tied up to the San Francisco docks. Suddenly she cut loose a hell of an antiaircraft barrage at us, all coming from this one transport—a regular Fourth of July at three o'clock in the afternoon. It was like looking down into a cone of fire, with this transport at the tip, and smoking red-hot rivets, they seemed like, whizzing up at us. They were rocking us around when suddenly we shuddered violently and almost went over on our back. An ack-ack shell had burst under one wing near the fuselage. Big pieces of it tore a huge hole just where the wing joins the fuselage, and one embedded itself just a few inches from Captain Skiles.

"We were already on our run, almost at the release line, and the jar had thrown out the bomb sight—it was completely inoperative. But I'd done some practice low-altitude bombing at Muroc back in the States, so I said the hell with a bomb sight—I'd guess at it. I was good and mad at the shaking-up we'd got. "All right, you . . . here they come!" I hollered, and dropped four in rapid succession. They landed in a cluster about twenty-five feet from the transport. The other four I released more slowly. We'd come down to 1,000 feet now, and that's low.

(TO BE CONTINUED)

Smart Apparel, Household Items Can Be Made From Cotton Bags

By CHERIE NICHOLAS

IT'S IN the bag, that new smock you need or pretty pinafore you covet, or a sun-suit for little sister. The bag is the same cotton bag that holds your flour, sugar, salt and other such commodities as are packaged in cotton.

One of the most fascinating and thrifty hobbies imaginable is that of creating, not several, but hundreds of attractive and useful household items and articles of apparel from cotton bags. It adds to the fun of converting bags into smartly wearable clothes if you keep a stock of gay rick-rack braid and colorful boil-fast threads and yarns on hand just to give an extra flourish of trimming and embroidery touches to the garments you make. There is no limit to the intriguing accents that can be given to your chic bag fashions, and at such a trifling cost, too. Then, too, you can inject real drama into the bag-sewing program by dyeing some of the cotton squares in gay Mexican blues and reds, yellows and purples. Make these up into picturesque peasant dirndl skirts and dresses that are worked out in striking color contrast.

Best of all is the patriotic spirit you show when you salvage fabrics. The housewife who converts cotton bags into the many useful items they are capable of becoming under the magic of willing hands and minds not only serves herself but conserves essential fabrics for her country.

Under the slogan that "a yard saved is a yard gained for victory," the Textile Bag Manufacturers' association has prepared a 32-page booklet "A Bag of Tricks for Home Sewing." This free booklet presents practical ways in which bags can be used to make decorative pieces for home, clothes for the family and

very pretty costume accessories. For the charming dress sketched above to the left in the illustration, the designer uses the bag fabric in its natural color, highlighting it with gaily colorful rick-rack used to trim the low-cut U-neckline, the front opening, the pockets and the sleeves.

The attractive pinafore centered at the top is made of unbleached bags. You can either hem this apron all around or pipe it with bright colored cotton bias tape-binding such as is available at all notion counters for a few cents outlay. To give it extra fillup, trim it with an applique of flower motifs cut from bright cotton print. You can buy packaged assortments of cutout cotton figures and you'll find them a source of joy as they can be used to trim in so many effective ways.

The dress to the right demonstrates convincingly what smart fashions can be turned out of the unbleached cotton bags. Gay colored accents can be added, such as contrast piping or multi-colored rick-rack also the new green, red, blue and yellow plastic buttons which are being used in rotation. Contrast bodice tops are excellent style and this same model could be made up in this way. Here's where the bags dyed in high colors can be made to yield new glamour. Dye up some of the bags you have on hand, you'll be surprised how effectively they work into the scheme of things. The adorable little play dress below to the left with rick-rack trim is pretty enough to set any little girl's heart all aflutter. The youngster to the right in the little sun-suit and matching bonnet is due for applause at any style show. Note the bolero, the bag and the weskit and the bridge luncheon set, each of which is made of cotton bags.

Reprinted by Western Newspaper Union.

Print Accents

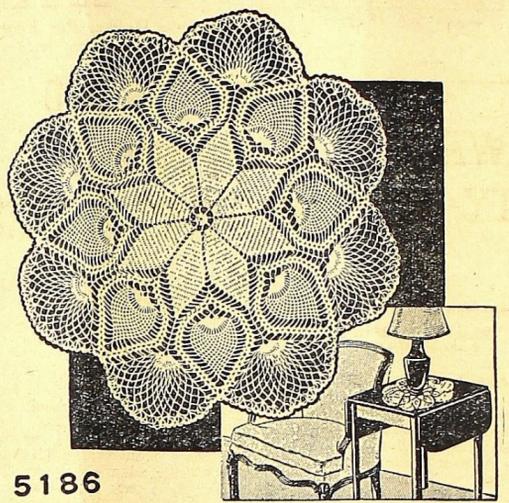

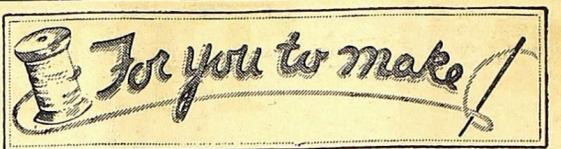

A new style technique that offers endless possibilities is that of using print for matching accessories and as accent to the costume itself. We used to think that a print blouse was the whole story but now in order to make news a print blouse must be teamed with something else made of the same pattern. In this instance a blouse is accompanied by gloves of the same print. To further unify the costume the wool suit has inserts at the shoulders of the same silk and rayon polka dot that makes the blouse and the gloves.

Taffeta Accessories Set Off Basic Suit

If you have a basic suit—bolero and cardigan types are smartest this season—or a simple long-torso black gown, you have achieved a perfect foundation for the new taffeta accessories that are so swag-gery. It's the newest of fashion gestures to brighten your simple suits and dresses with splurges of striking plaid, check or stripe taffeta. You can make an old garment look new by adding these dramatic taffeta accents. You can buy such intriguing items as a weskit of Roman stripe, the stripes made up horizontally with tailored bows used instead of button fastenings. Then there is the modish sun-back sleeveless blouse made of bold taffeta check having a huge bow-tie at the neckline, the whole affair cut on the bias. Most sensational of all are gloves and bags made of taffeta matched to the hat.

You Can Be Either Formal Or Informal in Gingham

You can dress up or down to occasion in gingham. If it's formality you seek wear a black and white check gingham, which has a yoke of low-cut décolletage also a gypsy scarf about the hips worked with glittering black beads. With your sports slacks wear a gingham cowboy shirt in vivid colors. You will like the new gingham accessories that are being worn with suits and dresses this summer. Hats, bags and gloves made of gingham have high fashion rank this season. You'll love these gay fabrics fit for all occasions this season.

5186

ONE of the easiest of the famous "pineapple" designs to crochet—it takes only 3 balls of cotton thread—measures 16 inches across and is a charming combination of pineapple motifs, palm leaves grouped around a center diamond design.

To obtain complete crocheting instructions for the Pineapple Dolly (Pattern No. 5186) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

AROUND THE HOUSE

For painting shelves that are too close together to use an ordinary brush and for other tight corners, make a "right angle brush." Cut the handle off an ordinary brush and fit the remaining stub of handle into a hole bored in a piece of wood about 10 inches long.

When following a recipe in a cookbook or magazine, it is easier to fasten an ordinary trouser hanger at the top to hold the pages open, hanging it on a hook or nail above the kitchen table. In addition to being easier to read, it keeps the cookbooks and magazines from getting soiled.

Prolong the life of rubber footwear by keeping it away from light, heat, grease and cleaning fluid. Heat weakens and cracks rubber, and makes it sticky. Sunlight has two rubber enemies—heat and light. Oil, grease and tar make rubber swell and get weak, and cleaning fluid also weakens it.

Turning a belt is easy if you insert a tape a little longer than the belt between the two strips of material. Stitch the tape at one end at the same time the end of the belt is closed. To turn, simply pull the end of tape that sticks out and the belt is right-side out in a jiffy.

Take the shine off your clothes with sandpaper. First, sponge the spot with cleaning fluid or with water to which has been added a few drops of ammonia or vinegar. When the fabric is dry, take a small piece of sandpaper and lift the nap by briskly brushing the spot. Don't brush too hard, however, or you may remove the nap entirely.

Johnny Was for Making Most of His Resources

Little Johnny's mother had just presented the family with twins, and the household was in a state of excitement. Father beamed with pride as he took Johnny on one side. "If you'll tell your teacher about it, I'm sure she will give you a day's holiday," he said. That afternoon Johnny came home radiant. "I don't have to go to school tomorrow," he announced proudly. "Did you tell your teacher about the twins?" asked his father. "No, I just told her I had a baby sister. I'm saving the other for next week."

To avoid losing a handkerchief under a bed pillow in a sick room at night, sew a pocket on one side of the pillowcase.

To pipe with rick-rack, turn the raw edge of the fabric once or twice to the inside and stitch rick-rack over it.

TAME Give it that well groomed look. Add lustre. Keep your unruly hair lying flat. Always use Moroline Hair Tonic. Large bottle 25c. Sold everywhere.

Kidneys Must Work Well- For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.
Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulates the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

"Are they still putting lots of pins in men's shirts? If so I'll buy a few."

DO YOU have a large wall space somewhere in your not fill it with a group of matched nouse that looks rather bare? Why brackets on which you may make an attractive arrangement of bric-a-brac and trailing vines?
This sketch shows a set of three brackets in a quaint old-fashioned heart design over a davenport in

the living room. The center bracket is fourteen inches wide with one of the matching smaller brackets on each side. The sketch also shows how easy it is to cut out the heart design with a sharp knife after boring holes with a brace and bit. Any school boy who has the use of a coping saw or maybe a jig saw may make these graceful brackets.

NOTE—Mrs. Spears has prepared an actual size pattern for all the pieces of this set of wall brackets, with complete directions for cutting, assembling and finishing. The lines of these brackets are so well proportioned that you will be proud to own them. Ask for Pattern 263 and enclose 15 cents, which covers cost and mailing. Address:

Aid to Enemy
"Any American who wilfully neglects to pay his taxes on time or to invest every cent he can in War Bonds is surely giving aid and comfort to the enemy. . . . We have a job to do and we are all called for service to our country. Our dollars are called to service too. Let us all ask ourselves, 'Shall we be more tender with our dollars than with the lives of our sons?' — Secretary Morgenthau.

Mr. and Mrs. Clarence VanWormer have leased the Elmer Streeter farm at Hale.

John Swartz, who is at Archangel, Russia, says that the peasants there don't do much in the winter except fish. He says that the winter was not too bad, but that he is looking forward to spring.

Senator Lodge of Massachusetts Italy in her demands for the port of Fiume. He says that Italy's demands rested on the ground of her safety and protection. That Italy has sacrificed 500,000 men for the benefit of the allies without no reason to enter the war except allied pressure.

State of Michigan
The Probate Court for the County of Isosco.

At a session of Said Court, held in the Probate Office in the City of Tawas City, in said County, on the 10th day of April, A. D. 1944.

Present: Hon. H. Read Smith, Judge of Probate.

In the matter of the Estate of Adolph Christenson, Deceased.

It appearing to the Court that the time for presentation of the claims against said estate should be limited and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased by and before said court.

It is Ordered, That all creditors of said deceased are required to present their claims to said Court at said Probate Office on or before the 20th day of June, A. D. 1944, at ten o'clock in the forenoon, said time and place being hereby appointed for the examination and adjustment of all claims and demands against said deceased.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once in each week for three weeks consecutively, previous to said day of hearing, in the Tawas Herald, a newspaper printed and circulated in said county.

H. READ SMITH, Judge of Probate.

A true copy. Dorothy Buch, Register of Probate.

State of Michigan

Circuit Court for the County of Isosco, In Chancery.

John Henry, Plaintiff, vs. Hannah S. Bullis, George S. Darling, Phoebe A. Darling, James E. Watson, Elmer E. Hatch, Viola Hatch, Charles E. Hatch, their unknown heirs, devisees, legatees and assigns, Defendants.

ORDER OF PUBLICATION

At a session of said court held at the courthouse in the City of Tawas City in said county on the 28th day of March, 1944.

Present: Hon. Herman Dehnke, Circuit Judge.

On reading and filing the bill of complaint in said cause and the affidavit of H. Read Smith attached thereto, from which it satisfactorily appears to the court that the defendants above named, or their unknown heirs, devisees, legatees and assigns, are proper and necessary parties, defendant in the above entitled cause, and,

It further appearing that after diligent search and inquiry it cannot be ascertained, and it is not known whether or not said defendants are living or dead or where any of them may reside if living, and, if, dead, whether they have personal representatives or heirs living or where they or some of them may reside, and further that the present whereabouts of said defendants are unknown, and that the names of the persons who are included therein without being named, but who are embraced therein under the title of unknown heirs, devisees, legatees and assigns, cannot be ascertained after diligent search and inquiry.

On motion of H. Read Smith, attorney for plaintiff, it is ordered that said defendants and their unknown heirs, devisees, legatees and assigns, cause their appearance to be entered in this cause within three months from the date of this order, and in default thereof that said bill of complaint be taken as confessed by the said defendants, their unknown heirs, devisees, legatees and assigns.

It is further ordered that within forty days plaintiff cause a copy of this order to be published in the Tawas Herald, a newspaper printed, published and circulated in said county, such publication to be continued therein once in each week for six weeks in succession.

HERMAN DEHNKE, Circuit Judge.

Countersigned: R. H. MCKENZIE, Clerk of Circuit Court.

Take notice, that this suit, in which the foregoing order was duly made, involves and is brought to quiet title to the following described piece or parcel of land situate and being in the Township of Grant, County of Isosco, State of Michigan, described as follows to-wit:

Land in the Township of Grant, Isosco County, Michigan, described as: Being a part of Sand Lake Resort, a subdivision of part of Government Lot No. 2 of Section Eleven (11), Township Twenty-two (22) North, Range Six (6) East, Isosco County, Michigan, viz: Lot numbered Seven (7) of Block Numbered Two (2) and part of "Chubs Rest," described as commencing at the Northwest corner of said Lot No. Seven (7), thence North eighty six (86) degrees West two hundred nineteen (219) feet; thence South one degree twelve minutes (1° 12') West to the North line of Saginaw street; thence East along said North line to the Southwest corner of said Lot No. Seven (7); thence North along the West line of said Lot No. Seven (7) to the point of beginning and also Lots Numbered One (1) and Two (2) of Block Numbered Three (3) and a parcel of land in Out Lot No. 1, described as commencing at the Northeast corner of said Lot No. One (1) of Block Three (3); thence East along the South line of Saginaw Street one hundred (100) feet; thence South, parallel with the East line of Block No. Three (3) one hundred fifty (150) feet; thence West to the Southeast corner of Lot No. Three (3) of said Block No. Three (3); thence North one hundred fifty (150) feet to the beginning.

H. READ SMITH, Attorney for Plaintiff.

INSURE your future—Save WITH WAR BONDS

Vitamin U
Vitamin C prevents scurvy. Keep teeth, bones, blood vessels healthy, helps prevent anemia. Daily requirements: Oranges, lemons, grapefruit, or tomatoes in any form (juice, soup, raw, canned). Also in onions, berries, and vegetables. Very unstable. Destroyed by overcooking and too much water. Use raw fruit and vegetables when possible; if cooked, serve juices. Potatoes baked in skin retain vitamin C.

Carried Own Spices
Fashionable gentlemen of the Seventeenth century carried spices in their pockets, ever ready for use in flavoring food or drink.

TEST PROVED!

Enterprise Solo-Kote OIL BASE FLAT PAINT

For All Interior Surfaces
ONE COAT SEALS AND COVERS

SAVES MATERIAL—SAVES LABOR
Solo-Kote is a genuine oil paint that must not be confused with so-called water base paints. It is not a temporary type of paint such as those utilizing water as a base. It seals, primes and covers in one coat and is so dense that it is ideal for use on wallpaper, plaster, painted wood, wallboard, brick, metal and other interior surfaces.

EASY TO APPLY—COVERS PERFECTLY—HAS REMARKABLE HIDING QUALITIES
Solo-Kote is easily applied—perfectly smooth with unusual spread and exceptional hiding ability. Its finely ground pigments combined with Enterprise Special "Test Proved" Oils provide an interior paint that has won the acclaim of all who have used it.

WASHES PERFECTLY... TIME AND TIME AGAIN
Unlike water base wall paints, Solo-Kote may be washed time and time again. The oil used as the base of this paint has perfect resistance to water and soaps. Its ability to wash means long life and economy.

Price \$2.75 per Gallon

SPACIOUS CHAPEL AMBULANCE SERVICE

We Met the Challenge...

"We are the food army of Michigan. There are nearly 200,000 of us—each with our family, our bit of soil, our hopes, our ambitions. Ours is a never-ending battle—sometimes against drought or rain, against cold or heat, against pests and disease, against shortages or surpluses, and always against time.

"No state in the union grows a greater variety of products. Proud as you must be of Michigan's industrial contribution to ever-approaching Victory, proud, too, you should be of her agricultural greatness. For Michigan, last year, was asked to produce a record-breaking tonnage of food—food to feed our own people, food for our fighting men around the world, food for our allies, food for the starving in China, in Africa, in Italy.

"It was a challenge to the farmers of our state. And we accepted it, though there were many who said it couldn't be done.

"We won the battle of food. We won it in spite of the help we didn't have, the equipment we couldn't obtain. We won it in spite of a jesting Nature that washed out our early plantings, bogged down our tractors, destroyed precious days and weeks. We harvested nearly 500 millions of dollars' worth of vitally-needed food, an all-time record.

"We met the challenge as you have met the challenge in your work—as your food retailer and wholesaler from the smallest independent to the largest chain store operator met it without complaint. They were beset with problems, too—ration stamps, ceiling prices, countless Government reports, increased operating costs, inadequate help and often shortages of merchandise.

"They made it possible for the food we produced to provide you with the energy to do a fighting job on the home front.

"They brought you our luscious berries, cherries, melons, peaches, pears, plums and apples from our fruit areas . . . sugar from our beets, millions of gallons of health-building milk, cream and other dairy products for your children and war workers, golden honey, top-grade potatoes in abundance, poultry, eggs and meats from our farms . . . fresh vegetables in never-ending streams and much more packed in our canneries . . . peas and beans and tomatoes and body-building, vitamin-enriched root vegetables . . . carrots, turnips, beets . . . all from Michigan farms and orchards and processing plants.

"The cooperation of your food merchants made our victory possible. Michigan working together has overcome almost impossible odds. That is the bright hope of the future as we enter upon a new season . . . we who till the soil of Michigan and distribute its food."

Washington, D. C.
More U. S. Troops for India?
 Certain senators, even including some of the President's supporters, are irked over curtailment of the Australian army, simultaneous with British requests that we send more U. S. troops to India.

The British request was made by Field Marshal Sir John Dill, former British Chief of Staff, now liaison officer in Washington. Sir John, personally one of the most charming and popular members of the British embassy, suggested to U. S. war chiefs that, in view of the Jap invasion of India, the United States might send more troops to that area.

The reply he got was: "What about the tremendous army you already have in India?"

Sir John had to admit that this huge British army is spread out through India largely for the purpose of preventing internal revolt.

Senators who have learned about this conversation are all set to do some blasting, should the White House send more U. S. troops to save the British Empire in India. However, they probably won't have to blast, because the President himself is understood to feel strongly on that subject.

KAISER'S NEW PLANE

Very little has been heard of the giant wooden transport plane which Henry Kaiser proposed building more than a year ago. However, the plane is nearing completion—though with no thanks to the navy.

Behind the scenes, the navy has done all it could to block the plane and at one time proposed cancelling the contract. Some insiders attribute this to pressure from the Martin bomber plant, which has already constructed a giant flying boat, Mars, for the navy.

However, the new Kaiser wooden transport plane will be so big that the Mars could almost be carried inside. Its fuselage alone will be big enough to hold a freight car. Its wing spread is 100 yards and it can carry a payload of 60 tons, in addition to gasoline.

At one time, the navy got so insistent that the contract for the plane be cancelled that famous record-holder Howard Hughes, now a partner of Kaiser's, had to plead with the RFC to let him continue. The big flying boat is being financed by RFC funds, and Hughes actually promised to put up a \$500,000 performance bond in case of non-fulfillment of contract, plus a guarantee to pay all costs personally beyond a certain date.

The big plane should be finished early in the summer.

FARMERS GET A BREAK

Chalk up a score for Congressman Lyndon Johnson of Texas and Economic Czar Fred Vinson in helping the farmer on the price of eggs; also in cutting the profits of dried-egg manufacturers to the tune of several million dollars a week.

It happened through a queer quirk in price ceilings. The price on dried eggs had been fixed by the OPA at 25 cents a pound, but meanwhile the price at which farmers were selling their eggs to the dried-egg processors dropped from around 40 cents a dozen to 20 cents a dozen. Despite this drop in price, the dried-egg processors continued to get the benefit of the high ceiling price, while buying eggs from the farmers at one-half what they did before.

The spread between what the farmers got paid and what the egg processors sold for was so great that the processors were making money at the stupendous rate of \$8,000,000 a week — until Texas' Lyndon Johnson stepped in with protests to Judge Vinson. The latter has now upped the price which the farmer gets for his eggs.

RUSSIAN WEARINESS

U. S. officials just back from Russia report a war weariness among the Russian people. This is not to be confused with military strength or weakness. Obviously, the military machine is operating with an efficiency such as never before.

For 25 years, Russia has been torn by war, revolution, or internal strain. Even during days of peace, the severe economic effort deprived the ordinary citizen of many elementary comforts of life.

But now, they see victory around the corner and want it to come quickly. Beyond that, they see security coming from cooperation with the other big powers of the world, giving them the time necessary to build up a state in which, according to the precepts of the Soviet philosophy, the dignity of the individual can be recognized and enjoyed.

MERRY-GO-ROUND

Judge Sam Rosenman now occupies the suite of offices vacated by the late Marvin McIntyre, White House secretary. Rosenman formerly had only a tiny cubicle under the eaves. . . . White House intimates suggest that the President probably doesn't intend to fill Mac's place. Instead of three secretaries Steve Early, ("Pa") Watson and McIntyre) he will have only two, plus Sam Rosenman as counsel. . . . If FDR intended to run again, he might be more anxious to fill the vacant post.

Republican Keynote and Daughters

Gov. Earl Warren of California, who is to be keynote speaker of the Republican party national convention to be held in Chicago in June, and his two daughters, Nina (left) and Dorothy. The girls attest they are staunch supporters of their Dad as they give the victory sign to the camera.

THE current season's most unpleasant task confronts us, so in deference to tradition this department makes its annual baseball selections. In order to prolong the agony, today's soul-stirring outpouring will be devoted solely to the National league.

And that is as it should be. The job is considerably easier in the senior circuit. The National league contains the only first class club in baseball this season — the St. Louis Cardinals.

All in all, the Western clubs are stronger this year. There is a very good chance that an Eastern team will not be able to break into the first division.

Cardinals Strong

Things wouldn't be so gloomy if the strength in the Western clubs were evenly divided. But the Cardinals are more menacing than they were a year ago. They haven't as strong a club as the 1943 offering, but they haven't been hurt nearly as much as the seven other clubs in the league. Remember that the Cards won by 18 lengths over the Reds, with Brooklyn 2 1/2 games behind and the Pirates 25.

Here is the way this department muddles things up:

- | | |
|------------|--------------|
| St. Louis | Brooklyn |
| Chicago | New York |
| Cincinnati | Boston |
| Pittsburgh | Philadelphia |

The Cardinals have suffered but few important losses — Outfielder Harry Walker, who may return with a medical discharge, Second Baseman Lou Klein, Infielder Jimmy Brown and Pitchers Al Brazle, Murry Dickson, Howard Krist and Ernie White.

Manager Billy Southworth still has Pitchers Harry Brecheen, Mort Cooper and Max Lanier. His World Series infield shows only one change, Emil Verban from Columbus having replaced Klein at second. The outfield presents three veterans—Stan Musial, Johnny Hopp and Danny Litwhiler. Walker Cooper, one of the best catchers in the game at the beginning of the last season, is available. So are many other stars of the St. Louis cast.

It's customary to pick the Cubs for second place. In fact, one gets in a disagreeable rut by naming the Cubs to place. Last year Mr. Wrigley's hired men wound up an inglorious fifth, 30 1/2 games out. But the present season finds the club fairly well equipped with experienced pitchers. And good pitching can land the club in second place. (Somewhere we've heard that song before.)

Mound Losses

We string along with Cincinnati for third place largely because of Manager Bill McKechnie. The Reds have been hard hit in their once-strong department — the pitching staff. They have lost Johnny Vander Meer and Clyde Shoun. They will mourn the loss of Lon Frey at second. Others—including Eddie Miller and Gerald Walker—are susceptible to the draft.

But Master William McKechnie is a sound, resourceful and reliable leader. He has a habit of successful operations. The rejection by the military service of First Baseman Frank McCormick has strengthened the Cincinnati club. McCormick is a long distance hitter who will make quite a difference in the final standings.

The Pirates may prove to be a surprise club. Frank Frisch has a good infield, with Babe Dahlgren replacing Elbie Fletcher at first base, Bob Elliott back at third, and Frank Gustine and Pete Coscarart in between.

The Dodgers' unhappy plight is made all the more evident by the report that Manager Leo Durocher is likely to play.

The Giants are weak. They will do well to end up in sixth place and may be forced to get along without the services of Manager Mel Ott, who is 1-A.

The Braves have a new bankroll to work with. Bob Coleman, the new manager, is widely known as a developer of young players. But the present emphasis isn't on youth in the big leagues.

We will not attempt to discuss the Philadelphia Story other than to remind you that the club is now known as the Blue Jays. Remember that names don't mean a thing.

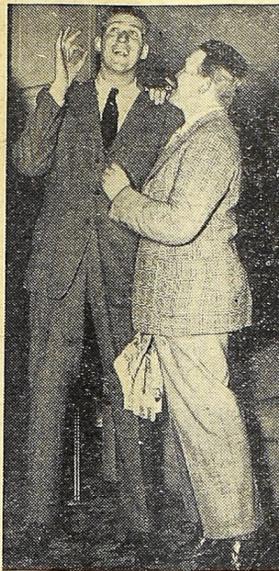

SPORTS SHORTS

Frank Mancuso, rookie catcher for the St. Louis Browns, was making his fifth parachute jump when he suffered injuries which led to his honorable discharge from the army. Regulations call for five jumps from a plane to qualify as a jumper.

The Jim Corbett-Bob Fitzsimmons match at Carson City, March 17, 1897, was the first fight to be filmed.

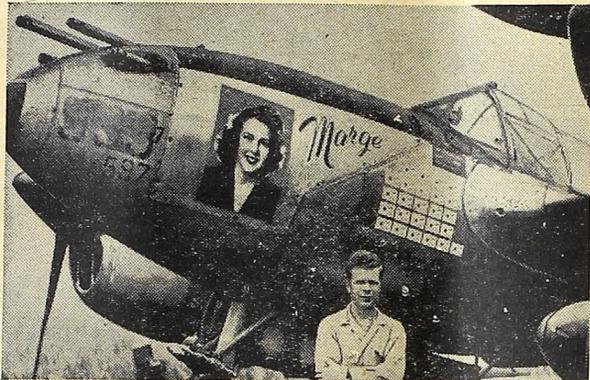

Harry Stuhldreher will conduct a clinic for state high school football coaches at the University of Wisconsin late in August.

T-a-l-l Tale

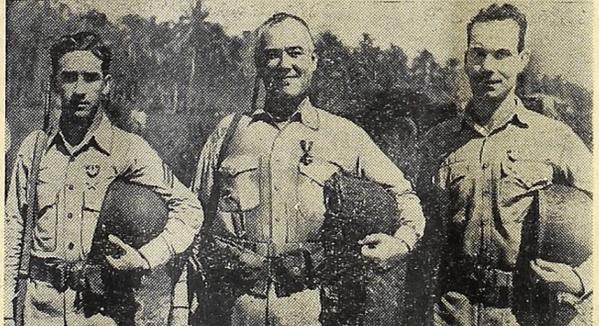

His 6 feet, 8 inches often causes Pitcher Mike Naymick of the Cleveland Indians to be asked the question "How's the weather up there?" On an idle day Mike is trying to convince Pat Seerey, Tribe fielder, that it is the same as with 5 foot, 9 inch teammate.

Major Bong's Favorite Interests

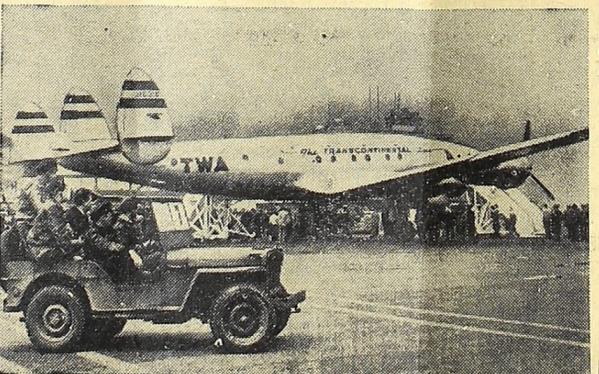

Maj. Richard Bong, leading ace in the South Pacific, is posed here standing beside his favorite plane. On the nose of the fighter ship is another of his favorites—his sweetheart, Marge Vattendahl. Also pictured are 25 of the 27 flags of the Rising Sun brought down by the major, which completes the pictorial trilogy—as banging Japs is Bong's favorite pastime.

Triple Headaches for the Axis

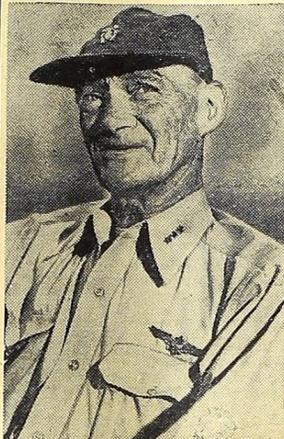

Top: Albert, Herbert and Gilbert Giertz, 19-year-old triplets from River Grove, Ill., who are studying to be ground observers at Farmingdale, N. Y. Below: This trio earned the sobriquet of "The Three Musketeers" as a result of their scouting patrols on Bougainville. They proudly display the array of decorations they have garnered in the campaign.

Sky Giant Shatters Cross-Country Mark

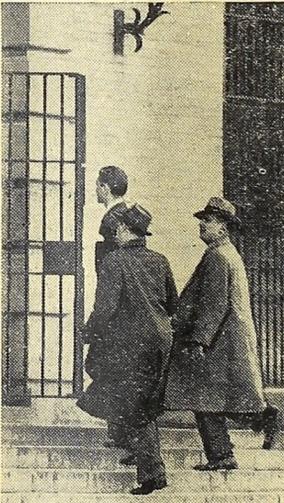

Lockheed's "Constellation," 80,000 pounds of transport plane, alights at Washington airport for delivery to army after shattering transcontinental speed record with hop from Los Angeles in 6 hours, 58 minutes. The four-motored giant has a wingspread of 123 feet, is 95 feet long, travels with load of 10 tons at more than 300 miles per hour.

Pacific Leader

A candid closeup of picturesque Vice Admiral Mitscher who commanded the carrier task forces which accounted for lion's share of triumphs in 28 months of Pacific war. He was prominent in the gigantic assault on Palau.

Enters Sing Sing

Wayne Lonergan (hatless) is shown as he entered the yawning gates of Sing Sing prison to begin his sentence of 35 years to life imprisonment for the slaying of his wife, Patricia.

Youth's Loss

Stricken with grief, 11-year-old Richard Trenkler kneels in the middle of a New York highway alongside the body of his pal "Scotty." The dog was struck by a hit-and-run driver.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D., Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for May 7

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

PAUL CROSSES INTO EUROPE

LESSON TEXT: Acts 16:13-15; Philippians 3:7-14. GOLDEN TEXT: I press on toward the goal unto the prize of the high calling of God in Christ Jesus.—Philippians 3:14.

Pressing "toward the mark" (Phil. 3:14) well describes the zeal and intense devotion with which Paul lived his life for Christ. He was wholehearted in giving himself to the preaching of the gospel. Our lesson tells of his carrying of the gospel into Europe by the guidance and blessing of the Holy Spirit.

It seems appropriate to consider the two Scripture portions in reverse order, looking first at Paul's declaration in Philippians of his passion to know Christ, and then in Acts of his purpose to make Him known. The man with vision is eager to serve. "A task without a vision makes a man a drudge; a vision without a task makes him a visionary; a task and a vision makes him a missionary."

I. Paul's Passion to Know Christ (Phil. 3:7-14).

There were many things in Paul's life of which he was proud, until he met Christ, and then everything else lost its importance and interest. All things in life are relative in value and our attachment to them is determined by our heart attitude.

Now being spiritually minded and having found in Christ real satisfaction for his soul, the Christian counts as refuse the things in which the world takes such pride and satisfaction.

To "know Him" calls for a depth of experience, sacrifice and of joy which is not easy to describe in words. It begins with a divine righteousness imparted by faith. Self-righteousness will not suffice. This is not a matter of law, but of grace.

It is a resurrection faith and therefore powerful. It is a faith which accepts suffering for Christ as a part of fellowship with Him—not only bearable but glorious because it is in the power of His resurrection.

That fellowship is one day to be complete and eternal, for there is to be for Paul the assured experience of a personal resurrection out from among the dead (v. 11). The faith of a Christian looks beyond the grave.

All this has to do with the present, as well as the blessed future. The man who has this kind of spiritual experience shares the purpose of Paul expressed in verses 12-14. Here there is no resting back in self-satisfied comfort, no pride in one's past victories, no sense of having "arrived."

Paul saw not only the necessity but the blessedness of going from victory to victory. Too many Christians of today are entirely satisfied with what they have attained (and it is usually all too little).

There is a prize to be gained, the prize of our "high calling in Christ Jesus." Let us, like Paul, be filled with holy dissatisfaction with ourselves until we reach that blessed goal.

II. Paul's Purpose to Make Christ Known (Acts 16:13-15).

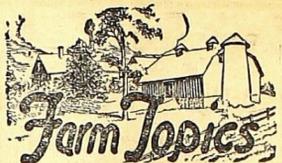

The story of the conversion of Lydia has many elements of special interest. It presents the turning point in the progress of the gospel, which by the grace and leading of God brought it northward to Europe rather than southward into Africa. Many of us have heard because of the way Paul was led, and one wonders if Europe and America might not otherwise have been the "dark continents" rather than Africa. We are what we are by the grace of God.

Then we note that the first convert was a woman. She was not the last woman to give an attentive ear and a believing heart to the gospel message. The church through all its history has been blessed by the readiness of women to bear and heed the gospel.

We like to note that she set a pattern of hospitality and service which her sisters in the church have maintained (see v. 15). She "constrained" the visiting preachers to enjoy the comforts of her fine home, and thus put forward the work of Christ (see III John 5-8).

It is encouraging to note how perfectly the leading of the Holy Spirit worked out in the experience of Paul and his brethren. The Lord sent His prepared messenger to the place where there was a prepared heart waiting to receive the Word with gladness.

We may confidently go on the errands of our God, knowing that when He leads, He goes before and prepares the way. That does not mean that there will be no trials and difficulties. Paul had plenty of them (see II Cor. 11:23-33). But it does mean that we may go with the assurance of blessed results, in His name, and with the grace to bear whatever comes along the way—for His glory.

Federal Researchers Aid Food Production

Dept. of Agriculture Lists Discoveries

Aids to the increased production, utilization and conservation of food figure prominently among recent accomplishments of the U. S. department of agriculture's scientific research workers. Such developments are vital to a nation at war, it is pointed out, with food needs increasing and expected to continue to rise.

Food production developments reported for 1943:

1. Found that sweet potato meal, made from dehydrated sweet potatoes, compares favorably with corn as a feed for steers.
2. Determined that mowing of sagebrush encourages the growth of better species of pasture plants, thus increasing gains of beef cattle. In some cases production of beef per acre was more than doubled.
3. Showed that when hogs are fattened to weights beyond 275 pounds, the rate of gain decreases materially while the feed required per pound of gain increases.
4. Found that hogs can utilize small amounts of hay, about 5 to 10 per cent, in their rations with benefit. Legume hays proved most satisfactory.
5. Determined that when laying hens were fed grain sorghums (yellow milo and hegari) in a well-balanced diet, the sorghums were equal in value to corn.
6. Established methods for rearing calves satisfactorily with less milk than customary, thus releasing additional milk for human use.
7. Showed that when cows receive all the legume hay and silage they want, they will produce well and economically on a single-grain ration.
8. Demonstrated the efficacy of substitutes for scarce insecticides in controlling the potato leafhopper, pea weevil, tomato fruitworm, Mexican bean beetle, Colorado potato beetle, and plant bugs that feed on seed pods of sugar beets.
9. Made available 35 new varieties of important crop plants developed by plant breeders.

Ground Hogs' Hoofs Make Protein Feed Supplement

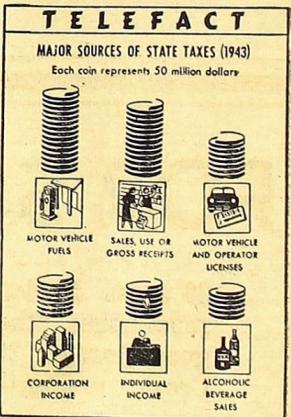

Swine hoofs, a waste product of packing plants, can make a good protein supplement for animal feeding when finely ground and mixed with other protein feeds, Gordon Newell and C. A. Elvehjem, research men at the U. of W., found. It will probably not be practical to use hoof powder as the only protein supplement, since apparently it must be used in large amounts—as about 30 per cent of the ration—to get good results in chick rations.

Indications are that hoof powder "teams" very well with soybean meal, the most popular and economical of present-day supplements. Neither is a complete protein, each being low in certain amino acids, but one helps supply what the other lacks.

Hoof material is low in histidine, methionine and tryptophane, since additional amounts of these amino acids improved it so as to give good results when fed as 18 per cent of the ration.

Powdered hoof obtained thus far has proved to be a variable product, some samples being quite unsatisfactory. Evidently methods of processing it need to be standardized.

Thus far packing houses have not seen their way clear to prepare powdered hoof for the feed market. They are interested, but the shortage of labor and equipment is a formidable obstacle in launching new sidelines at present.

'Aerosol Bomb' Sprays New Insecticide

A new type of "bomb" is expected to revolutionize the spreading of insecticides. This discovery, called an aerosol bomb, is a small cylinder that spreads insecticides under high pressure. The "aerosol" is made by dissolving pyrethrum extract and sesame oil in a liquefied refrigerant known commercially as Freon. Methyl chloride and other materials can be substituted for Freon, which is scarce.

Let's Face Facts

Farm Machinery Output At Double 1943 Level; But Remains a Problem
By **BARROW LYONS**
WNU Staff Correspondent

Several senators from farming sections are predicting that the War Food administration is going to have a rude surprise within a few weeks when it discovers that farmers are not planting the acreages expected of them this year — partly because they cannot get farm machinery they need to make up for the shortage of manpower.

Equally positive are officials of the War Production board that there will be enough machinery with which to plant, cultivate and harvest all crops. War Food administration points confidently to early reports of acreage planted and says that if average weather prevails, crops will be adequate for domestic needs — but with less to spare for feeding foreign populations than UNRRA will request.

Here is the argument that WPB gives: Last year only about 40 per cent of the machinery manufactured in the base years — 1940 and 1941 — was produced; but this year about 80 per cent of the base year production is planned. Production is running close to schedule on some items and lagging on others. Harvesting and hay gathering machinery seems to be furthest behind.

Harvesting machinery is in much greater demand than the supply. In this field authorized schedules are, on the whole, almost 125 per cent of base period production, but it is not now expected that schedules will be met. How far output will lag depends largely upon labor supply and the demand of the military for critical components.

Scheduled Increases

Combines with width of cut over 10 feet are scheduled for the fiscal year ending June 30, 1945, at 118 per cent of base output, those between 6 and 10 feet at 110 per cent and smaller ones at 75 per cent. Schedules for binders are not as great in proportion to base output. But the programs for potato diggers and pickers, beet and vegetable harvesters are much higher.

Furthermore, repair parts may be manufactured in whatever quantities needed. Altogether, the farm machinery industry is programmed to turn out nearly twice the volume of equipment it did last year — but, frankly, the program is not going to be completed.

However, an indication that the situation is not as serious as last year is that the volume of complaints is far less. One WPB official, who last year at this time was receiving from 50 to 55 telephone calls a day from congressmen requesting him to look after constituents, is at present receiving very few urgent requests for farm machinery.

There is one certainty — farmers must give more attention to repair of equipment than ever before. In this country they have hardly begun to take repairs as seriously as farmers in England or in enemy nations. Those who have been to England say the British are far ahead of us in that respect, and reports coming from Germany indicate that a fine job is being done there on the repair problem.

Dealers throughout America, however, have been advised to order repair parts by telegram, and manufacturers to ship by airmail. No red tape or forms are required. All a farmer needs to do is to tell his dealer that he needs the repair parts.

Many Repairs Needed

Recently the results of a survey of repair needs made by the WPB Office of Civilian Requirements was published. It showed that in 1943 owners of 42 per cent of the mowing machines of the country required repairs for their equipment, and that 13 per cent of those needing repairs did not get them; 42 per cent of the owners of combines required repairs, and 8 per cent of those requiring them were not serviced. These were among the worst repair records.

But it is the belief in WPB today that repair troubles should be virtually a thing of the past, and that normal servicing will be obtained.

In Indiana, cooperative repair shops have been established which have been a great aid in obtaining speedy repairs. In a few other states repair shops have been established as part of the agricultural college extension services, and farmers come from all parts of the counties to avail themselves of these facilities.

On the whole, machinery manufacturers are handicapped by labor shortages, lack of motors, chains, malleable iron and castings.

To obtain the best distribution of farm machinery, manufacturers this year were authorized to dispose of 80 per cent of their output where they thought it would do the most good. Twenty per cent was under allocation of the War Food administration to supply in areas where supply appears to be short. The opinion of those responsible for this program is that it has been working fairly well.

Gasoline Can Be Made Cheaply From Plants, Scientist Claims

New Process Can Convert Vegetable Matter to Oil, Coal or Asphalt.

Gasoline and coal can be made from carbohydrates — bountifully supplied in plants like wood, sugar cane, potatoes, and many others — in a quick chemical imitation of a process which took nature millions of years, Dr. E. Berl, research professor of Carnegie Institute of Technology, declared in a paper read to the American Chemical society.

From 100 long tons of Louisiana dry sugar cane, he said, his process will make 2,980 gallons of gasoline, 3,430 gallons of middle oil, 1,210 gallons of lubrication oil, and 8½ long tons of raw cane sugar.

This method, the result of 18 years of investigation, is relatively cheap and simple, Dr. Berl stated. It assures a supply of these fuels, on which modern civilization is based, after the depletion of coal and oil stocks supplied by nature. It will create a great new demand for agricultural products, expanding farmers' markets, with possibly even present-day jungles becoming the "farms" for materials to make oil, gasoline, and even coal.

Internationally, the process means that there need be no "have-not" nations in oil or coal if there is land area enough to grow carbohydrates, for liquid fuel will be at the disposal of practically all civilized nations, according to Dr. Berl.

The future farmer might even have a simple installation on his own farm to make his own fuels to run his tractors and heat his home.

Nature's Chemistry.
"Nature, by a not very well explained photochemical reaction, produces every year huge amounts of carbohydrates," Dr. Berl explained. "Due to their reactive nature, they have been converted since former geological periods into coal, asphalt, or oil, depending on the geo-chemical conditions which existed during this conversion."

"We can now imitate nature and by using higher temperature and pressure we can produce in a very short time the same important raw materials. In our moderate climate the farmer can produce large amounts of carbohydrates containing materials which in coming years will become the welcome raw material for chemical synthesis, especially for the production of liquid fuels."

Dr. Berl gave this striking example of the potential reservoir of oil in agriculture:

"In 1941, America's 32,000,000 automobiles used 55,600,000 tons of liquid fuel. To make same amount of fuel from sugar cane, "4 per cent of the cropland harvested in the United States (320,000,000 acres) and more than 2 per cent of the land available for crops (570,000,000 acres) would be necessary."

"More liquid fuel could be produced than those 32,000,000 cars used in the last 'normal' year in the United States if the 260,000,000 tons of plant waste produced per annum in this country could be converted into liquid fuels."

German Way Inefficient.
Germany makes synthetic liquid fuel by the expensive and difficult method of hydrogenation of coal and of carbon monoxide, producing about 9,000,000 tons a year, Dr. Berl continued, but nearly twice that amount could be made "if the sugar cane production of Hawaii, Puerto Rico and the Philippine islands and Cuba were used."

"As for coal, plant material with about 50 per cent carbon content can easily and quickly be converted into

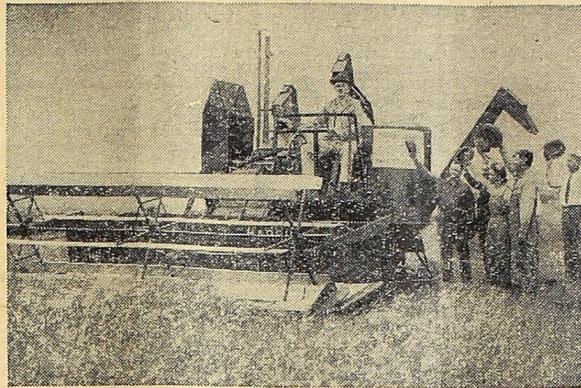

coals with more than 80 per cent carbon.

"It is now possible to convert any carbohydrate-containing material which contains cellulose, starch, or sugars into bituminous coals with desired properties," he stated, "and to make asphalt and crude oils identical with the materials which nature puts at our disposition."

In the case of crude oils, from which gasoline is made, "this conversion can be carried out with rather high yields in carbon in simple, cheap apparatus. By the use of higher temperatures and pressure, this liquid fuel production from plant materials which now contain two-thirds or more of their weight in carbohydrates can be telescoped into short-time intervals, whereas nature needed many millions of years for this same process."

Some experts, Dr. Berl said, believe that present production of 230,000,000 tons of crude oil annually will consume the United States' known oil reserves in about 15 years. So it is apparent how important this new process is which offers oil from such plants and wastes as wood, sawdust, sugar cane, bagasse, molasses, sorghum, potatoes, cornstalks, grass, leaves, Irish moss, seaweed and algae.

'Harvest Brigade' Gets Started in Texas

One of the hundreds of self-propelled combines in the Harvest Brigade gets under way in a vast field of flax near Kenedy, Texas. Sponsored by the Massey-Harris company, in cooperation with the War Food administration, the Brigade was created to harvest a million acres of the increased planting necessitated by war demands. From Texas the Brigade will sweep north through the Great Plains states to the Canadian border, cutting small grain wherever farmers ask for help. Operating the machine in the picture is J. C. McCarn. Standing (left to right) are J. J. Pogue Jr., flax grower; Fred C. Knight, Texas director of the Massey-Harris company; and Mr. and Mrs. R. J. Turner, owners of the flax farm.

"GAY GADGETS"

Associated Newspapers—WNU Features.

LOOK PURTY, PLEASE!

If you're not taking each other's pictures with your own cameras, you're getting yourself snapped at the dime store. What do you do with all these snapshots anyway? Do you tuck them away in a fuddy-duddy picture album or do you play any of these teen-tricks with them?

CUTOUT CUTUPS—For a new kind of picture album that will really keep your gang in stitches, cut out pictures from magazines and put them with heads cut from photos of your friends. Imagine, mounting the head of some freckled

face wolf on the cutout figure of Lana Turner, or the face of a pretty girl on the figure of a soldier. There are endless possibilities and lots of fun too. Try it.

PAPER DOLLIES—Here's what the gals are doing to encourage the boys to get a "paper dolly they can call their own." You buy a paper doll book at the dime store and you cut out a doll and mount her on a piece of cardboard, cut to fit.

Every day you dress your Paper Dolly in a paper replica of the outfit you are wearing. Pin her to a lapel or sweater and see how quickly the boys get the idea of stealing her to wear on their own jackets and sweaters. The tricky part of this new fad-fashion is to see that your Paper Dolly is dressed like you every day, whether you are wearing it, or whether some local wolf is sporting it over his heart. If a boy has appropriated it (and we hope so) you will have to bring a cut-out paper outfit to school each day and make a quick change before the bell rings. When do you get time to do your work, is what old Pickle Puss would like to know.

BRIGHT LIGHTS—Paste cutout pictures of your gang on a parchment lamp shade. Shellac (if you can get shellac) when completely covered. Cute decoration for your room.

SNAPPY SUN GLASSES—The frames of an old pair of sun glasses, without the side pieces, can be used for photos. Paste the pictures on the glass sections; color the frames

What to Do

By **PHYLLIS BELMONT**

The Rambling Rhymster

By **LES PLETTNER**

Back Yard
He'd been around the country and
He'd seen a lot of scenes;
Through west and east and north and south,
To know what travel means.

He had covered it well over, and for it had high regard.
But still he liked to contemplate
The view of his back yard
He had seen the Rocky mountains in their awful majesty,
Driven through their twisting passes

In a fragile jalopy,
And he'd sung their hearty praises
Like an amour-smitten bard,
But he warbled even harder
Of the view in his back yard.
He'd seen the fabled wonders
Of the great Pacific coast—
Seen the fairy movie city,
With its stars—a shining host—
And yet he gladly ambled back,
His old home state toward,
To view again the scenery
Within his own back yard.

Weather
Of all things unpredictable,
With which we're blessed or cursed,
Things which we'd like evictable,
The weather is the worst.
At times it under zero is,
It crackles and it snaps,
And bites the features on our phiz.
It freezes our earlaps.
And then it switches right around.
A tickle sort of dame,
And thaws the snow right off the ground.
To go back where it came.
One day we wake up in the morn,
To sky that's overcast,
To day that's dismal and forlorn
With sleet a-falling fast.
Then comes a day of tender spring,
Of lovely mud and slush;
Where blade of grass and leafy thing
Peer from beath the mushy.
While sometimes there come perfect days,
Like heaven upon earth,
When Nature shows her fairest ways,
And all is joy and mirth.
Yes, verily, the weather is
A something strange to see;
A thing of change and flux and fizz,
Of vast variety.

Much U. S. Cash Has Gone Down With Sunken Ships
WITH THE UNITED STATES PACIFIC FLEET.—Hundreds of thousands of dollars in United States currency have been lost in the Pacific since the start of the war—pay roll funds carried aboard men-of-war that have been sunk.

The greatest single money loss recorded to date was more than \$400,000. It went down with the Cruiser Chicago off Guadalcanal, in the Solomons, January 31, 1943.

Lieut. (jg) Richard Meredith Jones of McKeesport, Pa., demanded a search by two senior officers and a sworn statement to show he did not have any of the Chicago's pay roll money when he was picked up from the sea by a rescue ship. The greenbacks will not be profitable for postwar treasure hunters.

Jones reported the exact amount of the loss and the denominations of the bills to the treasury department.

Eyes Can Distinguish Five Types of Color

Colors may be classified into several types according to their appearance to the eyes. First, there is the common type of surface color, which appears to lie on the surface of an object. Next, there is expanse color, as is seen in looking at the blue of the sky. This sometimes is called "two-dimensional" color. Then there are objects with lustrous color, as silk or metals. One sees the surface color plus reflected light radiating above the surface.

A fourth type is transparent color, as obtained when looking at an object through a colored pane of glass. Another kind of color is referred to as bulky, or "three-dimensional" color. This is a variety of transparent color obtained by looking at objects through a fog or a cloudy liquid. Finally, there is luminous color, seen by the eyes when looking at a flame, or a translucent surface, as of a lamp shade behind which is a light source.

Man With Artificial Arms Found Best for Hot Job

CHICAGO.—A baking firm couldn't keep anybody on one job—removing fruit pies from ovens. The juice burned their hands. Gloves were too cumbersome. Finally, the problem was solved by a man with artificial arms. Edgar T. Stephens, secretary of the Illinois Association for the Crippled, cited the case as an example of how the organization has put 1,800 handicapped citizens to work.

PATTERNS

SEWING CIRCLE

1938
6-14 yrs.

Barbara Bell Pattern No. 1938 is designed for sizes 6, 8, 10, 12 and 14 years. Size 8, short sleeves, requires 2½ yards of 39-inch material; ¼ yard contrast for collar.
Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.
Send your order to:

SNAPPY FACTS ABOUT RUBBER

A researcher in things rubber reported that in 1858 the trade in rubber products ran between four and five million dollars annually and the industry employed 10,000 workers. Vulcanization had been known less than 20 years then.
The extra man-hours required in the manufacture of heavy tires for military airplanes, trucks, combat vehicles and for civilian trucks, buses and farm tractors mean that the major share of the fire-building manpower and facilities available must be devoted to this job, in the opinion of John L. Collyer, B. F. Goodrich president. These are the essential needs from a current fire standpoint.

SCHOOL NOTES

The Band Concert

Our band concert with Harrisville
was an immense success. The bands
paraded through the business sec-
tion of the city, and then each of
the Tawas City band members took
a Harrisville band member home to
dinner.

Both bands assembled again at
eight o'clock at which time the
massed bands presented a fine pro-
gram to a large audience.

On Saturday, May 6, we shall go
to Harrisville and present a similar
program.

It was very pleasant to play host
to the fine young people of Harris-
ville, and we hope we may partici-
pate in a similar event soon.

Junior-Senior Banquet

On May 13, the Junior-Senior
banquet of the Tawas City high
school will be held. The dinner will
be served at Gifford's Grill, follow-
ed by dancing at the Barnes Hotel.

Arthid Lake will act as toast-
mistress; Eunice Ross, Junior pres-
ident, will give the address of wel-
come, and Roy Landon, Senior
president, will make the response.

Norma Lou Westcott is the class
prophet, and Willard Musolf will
read the class will.

own farm machinery, trucks or trac-
tors to the work shop at the school
and spent three evenings each week
for the past two and one-half months
upon the repairing, adjusting or
completely overhauling of this equip-
ment, with the result that farm
equipment on these 23 farms is
nearer ready for a heavy summer's
work than ever before.

Wayne E. Grimm, superintendent
of schools at Whittemore, served as
toastmaster at the honor banquet.
Speakers on the program who com-
plimented the students for their
forefront in having their farm
machinery in the best possible state
of repair at a time like this, when
food production is so vital to the
war effort, included Instructors
Frank Madaski, F. B. Pedersen
and Charles Bellville, and County
Agent W. L. Finley. The graduation
sheepskins were awarded by George
Partlo, chairman of the Burleigh
Township Board of Education.

Interesting farm machinery and
war pictures were shown by the In-
ternational Harvester Company, un-
der the direction of William Fuerst
of Whittemore.

The short course graduating
class includes: Charles Ward, Lans-
ing Beardslee, Gerald Bellen, Clifford
St. James, Sr., Clarence Bellville,
Nelson Ostrander, Fred Kohn Ethon
Thompson, Clifford St. James, Jr.,
Clarence Provoost, Dornace Bellville,
Orville Strauer, Nelson Provoost,
Octave St. James, Garfield Provoost,
Martin Siegrist, Harold Siegrist,
Victor St. James, Harvey Groulx
John Dickey, Merton Partlo and
Raymond Gay.

Children's Fund Report

The Children's Fund reports that
the District Health Department
serving the counties of Alcona, Iosco,
Ogemaw and Oscoda has received
aid from the fund for the past 14
years.

Dr. Robert C. Strode, health offi-
cer for this area, reports that the
department staff made 2,885 field
visits during the year and that 466
vaccinations for smallpox and 452
diphtheria immunizations were
made. Fifty-three whooping cough
vaccinations were also done.

For the control of tuberculosis,
828 tuberculin tests were made, 134
x-rays of the chest taken, and 44
nursing visits made.

Expectant mothers under nursing
supervision had 175 visits and 249
postpartum visits were made. In-
struction was given in the care of
infant and preschool children by
means of medical conference and
nursing visits, 637 for infants and
925 for preschool children. One
thousand five hundred seventy-five
school children were referred to the
health department for examination
and 152 defects were corrected.

In the field of sanitation 1,425
visits were made.

Fifteen children from the area re-
ceived care at the Central Michigan
Children's Clinic and four were re-
ferred to its Child Guidance Service.
No dental program was available
during the year.
