TET

THE TAWAS HERALD

THE STORY THUS FAR: Forty-fouryear-old Wilbert Winkle, who operates a repair shop in the back of his home, is notified by his draft board that he is in 1-A. He breaks the bad news to his domineering wife, Amy, who is quite perturbed. On arriving at camp Mr. Winkle is given his physical, and to his great surprise and dismay, is accept-ed for the army. He takes the oath of enlistment and gets so many "shots" he cannot remember just what they all are for. He is sent to Camp Squibb, a thousand miles from home, where he meets Mr. Tinker, a man of his own age. Mr. Winkle gets KP and some bayonet practice, in which he does not do so well.

CHAPTER VIII

Once more Mr. Winkle fired the machine gun. By moving it about sufficiently he managed to send several bullets where they were supposed to go. He clung to the trigger desperately, hoping to do well, if only by accident.

The Sergeant had to yell for him to stop. "Pop," the Alphabet told him fondly, "if it was anybody ex-cept you, I'd know he was gold-bricking. In that case I'd make him into the best machine-gunner on the range. But I guess you and any kind of a gun ain't the kind to make friends. You got to learn' some more, but you'll never learn much.

He clung to the trigger desperate-Hy, hoping to do well, if only by accident.

All right, Private Tindall, let's see what the master mind can do." Freddie sat nonchalantly at the gun. It was the first time he had followed an order with any kind of grace. He looked around. The Lieu-

tenant was far down the line. "You see that target?" Freddie when the reclassification notices asked Sergeant Czeideskrowski.

"Yes, sir—that is, I hope so, sir." | verely, a good deal put out that this "We're satisfied with you in most | little ruse had been discovered so easily. respects, if that's what you mean. "Look," he said, "here we work Like the Army?" "I like it, sir." Mr. Winkle knew up to be Thomas A. Edison slow-

like. Starting from the ground. I this to be the stock answer to the think you heard the Captain menquestion. tion something about procedure sheets. You got yours?" Mr. Winkle held it up. The Lieutenant seemed to know it, too, and to want a little more in-

formation, for he rephrased the question. "Happy in it?" Mr. Winkle hesitated.

"Answer just the way you feel,' the Lieutenant instructed. "Well, I can't say I'm happy, sir. I'm not exactly a fighter, that is, with my fists, so to speak. And be-ing away from my wife and . . ."

"Your regular work? You miss that?' "Yes, sir. But I recognize why

I'm here." "You know the new regulations

that went into effect the other day. You're over thirty-eight and can get a discharge if you go into a war industry. Why haven't you applied?' Amy had written that she would

leave it up to him, and that she would be proud of him no matter what he decided. As yet he hadn't given her a formal answer. Now he seat of the trouble was the fuel system. He checked the gas supcedure, to the carburetor. He swiped with his screw driver again, and this time, when he pushed the start-er, Army procedure was triumphant. prepared it.

"I'd like to stay in the Army," he heard himself telling the Lieuten-ant. "If you want me." The Lieutenant glanced at him once, with approval. "I'm going to

"Don't connect my lecture," the

WFA Created a Gigantic Icebox of Leased Mine

The War Food administration is now storing 75,000 tons of food in a leased limestone mine near Atchison, Kan. Its 12,000,000 cubic feet of caverns are equivalent to nearly one tenth of all public refrigerated storage space in this country today. While the construction of a warehouse with this capacity would cost about \$15,000,000, the chief expense of equipping this vas struck by the beauty of the mine was \$1,000,000 for machinery

to make this one. It would be

skirt, whip together a brilliant green flannel vest as shown above to the right. For this modish vest that looks (save for its color) all the world as if it had been snitched from big brother's suit, less than a yard of material is required. Worn with a topcoat or jacket made of the same check as the skirt, you will have one of the new weskit suits

That's you.' "Shoot the gun instead of your

mouth," Jack advised. Freddie glared at him.

Freddie took his time at the gun. Finally he fired. Delicately he handled the bouncing death. He sliced the up and down marks on the target. He sliced those running across. He cut to ribbons those marked on a slant.

When he was through he asked triumphantly of the Sergeant, "How do you like yourself now?"

The Alphabet regarded the target with regretful admiration. "If there was somebody else than a rat who did that," he observed, "it would be One-A nice and I would send him a gold-engraved invitation to join the machine-gun crew I think the Lieutenant's going to let me make up."

The first Mr. Winkle knew of it was the sound of loud voices coming from the rear of the barracks. Running out with other men, he discovered that Jack hadn't waited to get Freddie away from camp.

When Mr. Winkle rushed forward to stop it, he was caught and held by one of the huge arms of Mr. Tinker, who advised fiercely, "Let'm alone."

The battle was progressing on pretty much of an even basis by the time the Alphabet arrived on the scene. Afterward, Freddie claimed that he was swinging at Jack when he hit the Sergeant. Jack recounted the same tale when one of his blows caught the Alphabet instead, and in his case he was sincere but not appreciated by the higher authorities.

As they were led off to the Lieutenant by Sergeant Czeideskrowski, Jack called to Mr. Winkle, "Please don't-"

"I won't," promised Mr. Winkle. He didn't even write home about the incident when both the warriors were given terms in the stockade.

Mr. Winkle was ordered to report to the orderly room. Wondering what serious breach of military etiquette he had committed, he departed to the accompaniment of encouraging remarks from his comrades.

"It was nice knowing you, Pop." "When you get to England, drop us a card.'

The Lieutenant leaned back in his chair behind his desk and regarded him. "Getting along all right?" he asked.

and his name was listed with that of Mr. Winkle, was not pleased. "Me!" he complained. "I ain't

than the one he now occupied.

in the Army to be any nursemaid to a jeep. It ain't right! It ain't right for a minute!"

"You better write to the Secretary of War about it," advised one of his squad who was remaining an infantryman. "You just write to him and he'll fix it up for you."

The Messrs. Winkle and Tinker moved in new circles.

They changed to barracks at one of the far ends of Camp Squibb, so many miles away that it might have been a different world. Their associates were all mechanically inclined individuals. These spoke their language better than had their previous companions, and over them all was a slightly technical aura.

Their office during business hours was a large, hangar-like building. Two lines of engines, mounted on high wooden frames, were placed down its length. On these they worked, in select groups of four, with a Technical Corporal over each

quartet, and a supervising Captain miraculously clad in coveralls like their own.

Mr. Winkle, who could repair anything, here really learned about Army regulations, which presumed that he knew nothing about a combustion engine. They also held that there was only one way to do a specified job, the Army way, and

that anything else might as well not exist. "We will now," lectured his Cor-poral instructor, "locate the trouble in this engine, which won't run." To illustrate, he turned on the ignition

and pressed the starter with his hand. The motor turned over, but refused to start. The Corporal looked about at his four men, peering at their nameplates. "Winkle, you

take it." Mr. Winkle, who had been regarding the engine idly, had already no-ticed the trouble. "Why," he said, "the carburetor's out of adjust-

ment.' He swiped briefly but expertly at the carburetor with his screw driv-

er, snapped on the ignition, pressed die. the starter, and the motor roared. piece." The Corporal, looking apoplectic, gestured wildly for him to shut it

Mr. Winkle obeyed.

Indignantly, the Corporal put the carburetor out of adjustment again

and then addressed Mr. Winkle se-

right?" he "Getting along all asked.

would join him this time. "How about it?" he inquired. "No," Mr. Winkle replied judi-

ciously, "I don't think so." "I know you're married and all, but that ain't any reason you can't enjoy yourself."

Mr. Winkle shook his head.

"I ain't trying to get you to do anything you don't want to do," argued Mr. Tinker. While they stood discussing it, with

Mr. Tinker making most of the comments, they saw two soldiers coming along the street. One was Jack. but they couldn't believe their eyes at first when they recognized the other. They hadn't seen Jack or Freddie

since the fight. Incredible rumors, which they refused to accept, had reached them that Freddie had finally been broken into small pieces and was being put together again in another form.

Now the soldier on Jack's arm stood straight. He was confident, but not arrogant. And no mustache blackened his upper lip, which was shaven clean.

Mr. Tinker was the first to speak, to Freddie. "That ain't you, Tindall."

Mr. Winkle stared, perplexed, from one to the other of the young "It can't be," he said. men. Jack laughed. "Sure it is. He's an Army lug now." He nudged Fred-

"Go on, yardbird, speak your Freddie had been standing with his face slightly flushed, making no comment. Now he looked sheepish for an instant before he said ")

guess I owe you an apology, Mr Winkle.

er will easily have success making any one of the toppers shown because the patterns used are so easy to follow in that they stress simplicity in every detail.

standing wherever you go.

as well as career girl activities or

that women look smart, well-

dressed and well-groomed. How-

ever, in these bond-buying times the

spirit within stirs to conserve one's

charm in one's appearance. What to do! The answer is simple.

Sew at home and thus create a lot

from a little. You can vary your fall

costume with "made-at-home" top-

pers styled after the manner of the

It's amazing how little material it takes to make any one of the toppers shown here. There's magic in a bolero that you can slip on over a crisp white shirt and presto!you have a complete change of outfit, just as you see pictured above to the left in the group. It took only a scant yard of bright red wool

right, too. The pattern for this is simple and it is very easily made. You will especially like the square neckline as well as the voguish sidebuttoned fastening. Choose colorbright flannel or gabardine or jerbright plaid skirt.

Lace Lends Glamour Satin Vogue Extends

simple deep rose-colored This dress is given a dashing and attractive note by artfully trimming the shoulders and waistline with black lace. The tall chapeau which is the new trend in millinery is fashioned in matching black lace. Black accents on bright-color gowns is a whim of fashion that is going over big this season. It is also smart to wear black accessories with gay wool frocks.

Tunic-and-Trouser Sets

There is fashion news in this season's tunic-and-trouser se's that are made of velvet, and other rich fabrics. This year the velvet ensembles bespeak of a feeling of richness in that they are embroidered with sequins and nailheads. Many of the velvet tunics are elaborated with gold braid trims.

sey for this practical and youthfully styled topper, that can be worn with most any type of skirt. Black jersey is ever so smart to wear with a Released by Western Newspaper Union. wings of a dove, I'd fly--' From Hat to Footwear Satin is having its big moment this fall. Black satin is being used for everything from hats, gloves and shoes to stunning suits and dresses that are ever so smart for immediate wear. In fact, they will give service the winter through worn under furs. Satin is the key to dressup fashions. Women of fashion are showing a liking for the basic gown that is simply styled with a view to stressing the latest slim silhouettes. With these dresses that flaunt flattering necklines, they wear a single important piece of glittering jewelry. There is every indication that satin in delectable colors will fashion gala frocks to wear during the social season. Also blouses of color-lovely satin will lend the touch that tells to the new fur-trimmed costume suits. In the millinery field the hat that is creating a sensation is the fisherman-

back type that sweeps its soft brim back from the forehead and falls like a curtain at the nape of the neck. For these milliners use black satin, and a smarter hat is not to be seen on avenue or boulevard. Handbags of satin are quite the thing this fall.

Spotlight Accessories That Set Off Costumes

Here are a few charming accessories you will be wearing with the new fall costumes. There's the new sequinned cravats which will give swank touch to your dinner suits. Give your slim basic dress new uplift with a soft tied sash of satin or chiffon velvet. Animal pins with jewelled eyes are smart on sports sweaters.

place.

"Cats, my dear!" said the spinster. "I hate the very sight of them. I had a sweet little canary and some cat got that. I had a perfect parrot, and some cat got that. I had an adorable fiance once and-oh, don't mention cats to me!"

Backbone of the yeast industry is bakers' yeast, generally grown in molasses. More than 248,000,000 pounds will be made in 1944, mostly for civilians. This material, containing some 70 per cext moisture, sold in bulk for about 13 cents per pound in 1939. The vitamin content of bakers' yeast is low, only about onethird that of brewers' yeast, but it is possible by changing the nutrient to produce a high-vitamin bakers' yeast.

Bakers' Yeast

Birdsfoot Trefoil

Birdsfoot trefoil is primarily a forage crop for land that is not to be plowed often. It does best on good soil, but will grow and persist on rather wet situations and on shall low, drouthy soils.

Must Last Lifetime

If your eyes tire easily, or become irritated, obtain competent professional ophthalmic advice without delay. You have two sets of teeth, and can get along even with artificial teeth, but your eyes must last a lifetime.

Hatched Unicks

In 1934 some 76 per cont of the chickens grown in North Carolina were hatched under hens but last year the hens were credited with only 21 per cent of the hatched chicks, say BAE reports from Washington.

Practical Spraying With such home-grown fruits as

apple, peach, grapes of the bunch variety, raspberries, blackberries, and dewberries, a practical job of spraying can be done with a bucket, knapsack or barrel sprayer, result-ing in reasonably clean fruit.

Oldest Material

Wood is the oldest material used by man.

Indiana Counties Five Indiana counties (those in which its five large citles, Indianapolis, Fort Wayne, Gary, South Bend and Evansville are located) contributed over 40 per cent of the property taxes levied in the state during the 10-year period, 1933-1942, according to a study made by the Taxpayers Research association of Fort Wayne. Indiana has 92 counties. The total property tax levied in the state for the 1933-1942 decade totalled nearly a billion dollars.

Clothes Moths

If the house becomes badly in-fested with clothes moths, to a point where overstuffed furniture and rugs are damaged, it will be best to have a commercial exterminator called in. Fumigation of the entire house with cyanide gas is a sure and effec-tive way of eliminating clothes moths but it must be done by an experienced person, since the gas is dangerous.

Jap Outcasts When Shintoism rose in Japan its teachings prohibited the eating of the meat of animals. Groups that continued eating animal meat or handling animal hides were declared "unclean." Called Etori or butchers, the prejudice against them became widespread. Today, as always, the outcasts are permitted to do only the lowest type of work - chiefly the jobs of butchers and tanners. family attended the funeral of Mrs. Simons nephew at Mikado Sunday.

Brewer's Yeast The widespread pharmaceutical

use of brewers' type yeast is based on its high content of the vitamin B complex. A dried extract containing the vitamin values is available for capsules and tablets.

THE TAWAS HERALD

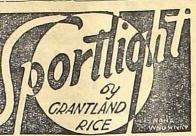

Washington, D. C. NEWSMEN AND FDR

Most important college of amateur physicians anywhere in the world, approximately 200 strong, now meets Tuesdays and Fridays at the White House. . . . These are newsmen assigned to cover the President. They assemble, make careful scrutiny, write lengthy analyses of the President's complexion, ner-vousness, every facial expression; try to interpret these in relation to his health. . . . Actually the Presi-ident looks thinner, not too well tanned, but calm and fit, though he shows obvious sign of wearying at the scores of questions thrown at him during press tussles. . . . FDR still knows how to turn charm on and off, calls newsmen by their first names, teases them about "dope stories." . . . Since his return from the Alaska trip, Roosevelt is seeing more people than in the last six months, is growing more aware of domestic issues.

DUMBARTON OAKS Secretary Hull's message to the opening Dumbarton Oaks peace par-ley had whole paragraphs paralleling Woodrow Wilson's statement of January 16, 1920, on the eve of the first League of Nations council meeting. . . . "It is our task here," Hull said, "to help lay the founda-tions upon which, after victory, peace, freedom and a growing prosperity may be built for generations Twenty-four years to come. ago, Wilson said: "It will bring the League of Nations into being as a living force devoted to the task of assisting the peoples of all countries in their desire for peace, prosperity and happiness."

•••• INDIAN TYPHOON When Amb. William Phillips' fa-mous letter advising Roosevelt that India was a U. S. problem leaked into print, the British government sent instructions to all British con-suls in this country to inspire let-ters to editors, plus editorials in the local press. One man in New York alone wrote 76 letters to different newspapers. . . Later, British con-suls sent copies of editorials, etc., to the British Embassy, with accom-panying notes, showing what a good panying notes, showing what a good job they had done. . . In the Em-bassy, Jossleyn Hennessy, British public relations man for India, left off the accompanying notes, sent the editorials to Sir Olaf Caroe in New Delhi, so Sir Olaf could see what a good job Hennessy had been doing. Sir Olaf then sent them to London. Sir Olaf also cabled London that he had been able to keep the Phillips letter out of India so far, but "under existing conditions" it was sure to be smuggled in, in which case it would be published by the Indian press and there was nothing he could do to stop it. . . . By "existing conditions," Caroe meant

Indian officials who smuggle news into India despite censorship. Once inside India, the British can't prevent publication in Indian newspapers.

A FTER the war there is certain to be a shift in more than a few cities so far as baseball and football are concerned along major lines. There will be a new tidal wave of sport, a greater boom than sport knew after the first World war in 1919 and 1920.

It is almost certain that Los Angeles, on its way to 5,000,000 or

6,000,000 population, will be one of the new main centers in both baseball and football.

With transportation so far advanced and new improvements coming Los Angeles will be only a few hours awayfrom New York, much less Detroit and Chicago. Grantland Rice

Los Angeles for some time has been one of the big

sporting centers of the country. Los Angeles has known football crowds, plus track and field crowds, above 100,000 at the Olympic. How many other cities can match this? As a major league baseball city I doubt that any two other big league towns could outdraw this fast growng metropolis on the West coast.

Los Angeles isn't the only present minor league city now out to break into the big league show. Baltimore is another. So is Buffalo. Both fine prospects.

Baltimore has already proved to be one of the best football spots in the country where crowds from 40,-000 to 50,000 are willing to pay out money to see pro exhibition games, and where Navy and Notre Dame can pass 60,000.

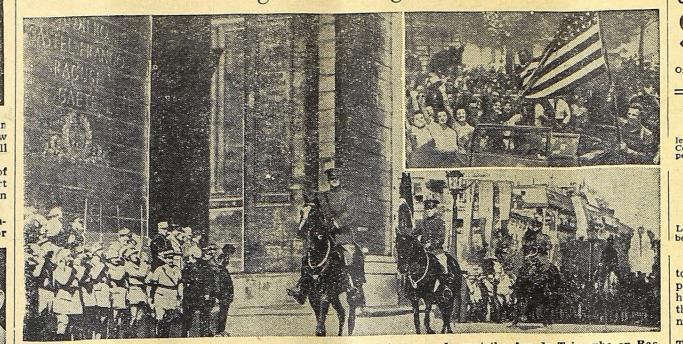

St. Louis is almost sure to lose

The rush to professional football after the war ends will be on the terrific side. In addition to the present pro football league, I know of at least three other leagues that are under way, or will be started soon.

These will range coast-to-coast and from Texas to the Canadian border. There is hardly room enough for more than two major football leagues, so the unsuccessful team

will take a neat beating on the financial side. Selections of cities that have spectator accommodations will play a big part in naming the survivors. Just where they will find enough talent to handle the proposed new leagues is another guess. But there are more than a few willing to risk anti-British subversion on the part of their cash along these lines.

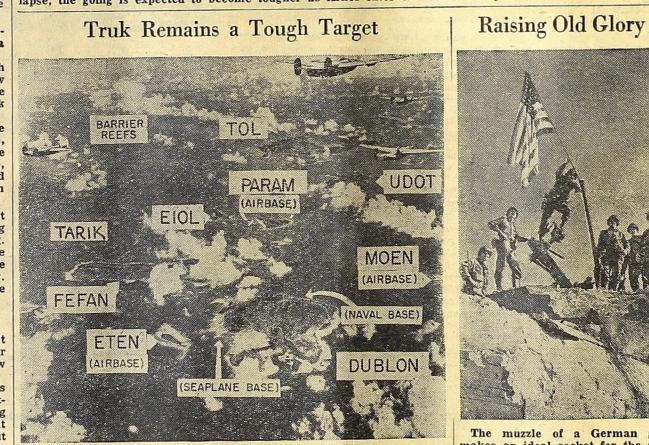

In addition to the cities that make

Just as in 1919, when Gen. John J. Pershing led the victory parade past the Arc de Triomphe on Bastille Day, a new generation of Yanks have entered the city of Paris. Behind General Pershing is 1st Lieut W. J. Cunningham, bearing General's standard, followed by Maj. Gen. James G. Harbord, chief of staff, A. E. F., and on the grey horse, Gen. George C. Marshall, present chief of staff, who was then Colonel Marshall, aide to General Pershing. Insert shows the first U. S. flag brought into Paris by the liberating Yanks in World War II. The U. S. troopers carried the flag through the streets.

Map showing general direction of the twin drives of the U.S. Third army toward German territory. The arrows drive through the battlefields of World War I, where the fathers of present-day doughboys wrote a brilliant page of American military history. The column driving from Troyes (1) is believed to be headed for Luxembourg. The push that drove across the Marne from the Seine (2) might yet spring a surprise and flank the rocket coast (3) from which the Germans launch their robots. Except in case of complete col-lapse, the going is expected to become tougher as Allies enter German territory.

The Liberating Yanks Again Enter Paris UNIFORM INTERNATIONAL SCHOOL esson By HAROLD L. LUNDQUIST, D. D. The Moody Bible Institute of Chicago. Lesson for September 17 Lesson subjects and Scripture texts se-lected and copyrighted by International Council of Religious Education; used by permission. THE KINGDOM STRONGLY ESTABLISHED

LESSON TEXT-II Samuel 2:4-7; 5:1-10. GOLDEN TEXT-They that trust in the Lord shall be as mount Zion, which cannot be moved, but abideth forever.-Psalm 125:1.

Position and power are important to a king, but of even greater importance is the winning of the hearts of his people. Only as he has them with him can he build a great nation.

IMPROVED

David was the Lord's anointed. The kingdom was his. But God expected him to make the necessary effort and use his own abilities to bring it into a place of honor and usefulness. God gives us all we have, but He does not shower it down on us; we must go out and possess it.

Note in the three verses that precede our lesson (vv. 1-3) that David moved forward only after prayer and divine guidance, Little wonder that he succeeded.

I. The Southern Tribes Declare

1. The Southern Tribes Declare Their Loyalty (2:4). The nation was divided into two parts, Judah in the south and Israel in the north. To bring them together again called for consummate skill. David had it.

When Saul had diea, David showed his respect and genuine loyalty to the king by his actions and by his song of lament which we find in II Samuel 1. Then by the Lord's leading he went to Hebron, the national capital of Judah, and there awaited the will of the people.

Their declaration for David-was not long in coming. They knew and respected him. He had shown himself to be their friend (I Sam. 30:26) and now they made him king. It was the first step and a long one in the right direction.

II. The King Makes Friends by Being Friendly (2:5-7).

The men of Jabesh-gilead, hear-ing that the Philistines had killed Saul, went for his body and gave it suitable burial. This gave David occasion to show his fine spirit of appreciation, which naturally warmed the hearts of all those who had loved and followed Saul. It was excellent strategy, but at the same excellent strategy, but at the same time it was the natural expression of a kind heart.

He that would have friends must show himself friendly (Prov. 18:24). And why not? The friendly and

Hidden Gold Conserves **High Protein Feed**

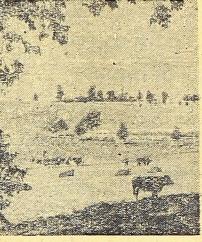

Proper Fertilizers Essential War Need

Good pasture will provide livetock growers with "hidden gold" in the form of beef-making feeds that will conserve vitally needed protein crops, if proper management methods are followed.

"Pasture must continue to occupy. a more essential place in the nation's livestock producing program until the war's end for several reaa statement by the Middle sons," West Soil Improvement committee points out. "Shortages of labor and machinery have shown no signs of marked improvement. The scarcity of high protein feeds continues. Because of these facts, farmers will have to rely on pasture crops as a major source of sustenance for their livestock.

"Grains will, of course, be fed but farmers will want to use every bushel of grain where it will help make the most meat.

"Practical experience of successful livestock growers has demon-strated that high-producing pasture combinations will yield a beef pound

Pastures Aid Increase

age per acre that compares favorably with the return from crops with higher seeding, tillage and harvest costs. For instance, a mixture of alfalfa and brome grass made more than 3 pounds of beef an acre daily in a test in Michigan.

"Bringing pastures to a high production level and maintaining them at this rate requires good manage-ment methods. This means following a soil conservation program that builds up fertility and provides plant foods that will assure a good stand of legumes and grasses. In such a program the use of a fertilizer containing phosphorus and potash plays an important part.

"Where a permanent pasture crop is planned, farmers will find generally that a top dressing of fertilizer this fall will pay for itself many times in producing earlier and more succulent grass for spring grazing next year as well as a heavier growth later.

open-hearted kindness of some Christians does more to win others to Christ than the brilliant discourses of some cold, exclusive Christian worker. Most of the Lord's work is done by ordinary people with warm hearts. Is there any reason why we cannot all be winsome and attractive in Christ? III. The Northern Tribes Recog nize Their King (5:1-5).

. . .

WASHINGTON PERSONALITIES Breath-taking Bob Gros, California lecturer, has the faculty of coming to the nation's capital every year and interviewing more big-wigs per hour than anyone else in the U.S.A. He has just finished one of his breathless trips and sizes up performers on the Washington merrygo-round as follows:

Wendell Willkie - "The thinkingest, guttiest guy on the merry-goround; politically unastute."

British Ambassador Lord Halifax -"Worst dressed, but one of the most charming. His sleeves were patched with red thread, he had on almost threadbare gabardine pants.'

Donald Nelson-"Determined that small industry shall have a chance to reconvert now, before the armistice.'

Economic Stabilizer Fred Vinson -"The best balanced."

Secretary of the Navy Forrestal-'Quick, likable, expounds this philosophy: 'Administration consists 95 per cent of smoothing out human frictions. The secret of American success is driving, restless energy that makes you have ulcers.' "

Secretary of War Stimson-"The most arbitrary."

Small Business Administrator Maury Maverick—"The most twofisted and dynamic."

Jim Farley-"The most realistic political analyst, the most bluntly and disarmingly frank."

In general, Gros found Washington taking the war in its stride; officialdom much more settled down than last year; less excitement, less hysteria, more efficiency.

. . . MERRY-GO-ROUND

C Senator Hiram Johnson, who rarely appears on the senate floor any more, still occasionally attends night baseball games at Griffith sta-dium. . . Other ball fans are Senators Chandler of Kentucky, Walsh of New Jersey, Stewart of Tennes-see, and Mead of New York, all frequent box-holders at the ball park

John L. Lewis faces the greatest rebellion against him in years when the United Mine Workers hold their annual convention in Cincinnati.

up the present major football league, those under consideration include Los Angeles, Baltimore, Buffalo, Dallas, San Francisco, Atlanta and New Orleans, with a second team in New York.

One point to think about is that not all members of the present big league make any financial killing. New York and Washington head the pack. The Chicago Bears have done well. Brooklyn had lost good money. Cleveland was no mint-and the same goes for Detroit.

Green Bay Successful

Green Bay, with a series of great teams, has made a fine showing for its size. But I wouldn't know how much money Green Bay has made. It will be interesting to watch this rush to pro football when the fightings ends. It will at least be a big break for the players who can sit back and take the top offer. But they will first have to be sure they will collect.

There should be room enough for two major leagues in football, just as there is in baseball, with the same world series arrangement for the wind-up. But the battle to establish the second league may easily be a wild and woolly affair, where the fur will be knee deep before the finish.

I don't believe anyone can doubt there will be a large and active postwar boom in every form of sport. There are too many reasons for this to happen, with some 10,000,000 veterans looking for excitement.

Whether or not this boom can match the quality of the first post-World-war boom that gave us Ruth, Dempsey, Bobby Jones, Tilden, Man o' War and others in those high altitudes is something only the next few years can show.

. . . Sammy Baugh and the 'T'

The majority of pro football coaches will tell you that Washington's Redskins are the team to beat this season - the toughest assignment that each must face. For in addition to more experienced material the Redskins still have Sammy Baugh, who is supposed to oper-ate from the T-formation for a change.

Sammy is hard to handle from any formation, including the entire alphabet.

Truk atoll still remains a formidable Jap central Pacific bastion. This photo was taken from one of the Seventh AAF Liberators attacking the air bases on Eten, Param and Moen, and the naval and seaplane bases on Dublon island. The 25 miles of bomb-run over Truk is one of the most hazardous of any in the Central Pacific.

After a Robot Bomb Struck

Air raid wardens and volunteers bring out casualties from the ruins of a block of flats struck by a German robot bomb in South England. Part of the building is still blazing in background. Recent figures released said that 17,000 homes are destroyed every 24 hours by the flying bombs. The total number of casualties caused by robots is not given.

The muzzle of a German gun makes an ideal socket for the flag staff as American soldiers raise "Old Glory" over the battered citadel of St. Malo. It was here that the German "Mad Colonel" held out for 11 days after St. Malo fell.

Shy Guam Natives

A bare-footed old lady peeks over the shoulders of other Chamaroo natives on Guam after the U. S. marines took over most of the island and the natives joined the Yanks.

A period of seven years elapsed before this took place. The house of Saul was not willing to yield its supposed rights to the throne, and there was fighting and struggle. In it all David showed himself to be upright and considerate.

There is value in gradual development and in the struggle for the right. Had David found immediate success one wonders whether he would have gained the strength he needed for the future.

Then came the day when Israel, the tribes of the north country, of their own accord chose to put themselves under David. Note that it was because of their regard for him (vv. 1, 2) that they came to him (v. 3). That was great gain.

A united people! How important that is in the affairs of the nations. Nothing is more disturbing or a greater hindrance than internal friction. We ought to deal quickly and decisively with any group or force in the life of our nation which is clearly divisive or disloyal.

Think, then, how important it is that God's people in the Christian Church stand together in undivided loyalty to Christ, our King, and in loving devotion to one another.

IV. The King Established a National Capital (5:6-10).

Jerusalem, which was to be the "city of David," and which figures so prominently not only in history but in prophecy, had to be wrested from the hands of the heathen Jebusites, and be established as the sacred city and the capital of the Jewish nation.

Note that the kind and considerate king was not a weakling. He knew how to fight and to win. Verse 8 is difficult to interpret, but evidently does not mean that David was cruel. The Jebusites taunted him by saying that their blind and cripples could hold the wall against David's men. Then they doubtless put their best soldiers on the wall, and David said to his men, "Let us take these cripples."

We see in verses 9 and 10 that David was not only a fighter, but also a builder. He began then the development of Jerusalem, the great city of which we are yet to hear wondrous things.

"Agronomists at state colleges and experiment stations are glad to cooperate with farmers in providing information covering the most effective use of fertilizers on pasture crops. One important fact should be borne in mind in considering the soil's nutritional needs. This fact is that while crops such as alfalfa and clover add to the soil's nitrogen supply, they eat up its phosphorus and potash reserves."

Wild Plants Studied For Vitamin Content

Experiments to determine the vitamin value of various wild plants have been conducted by the U.S. department of agriculture, looking to a time when other sources of important vitamins might be lacking. Buffaloberry, a native fruit of the western states and one of the popular fruit-bearing shrubs recommended for erosion control, proved exceptionally rich in ascorbic acid (vitamin C). A generous serving of the berries was found to furnish about twice the standard daily allowance of vitamin C. Jam made from the berries contained about

two-thirds as much of this vitamin as the fresh fruit. New Hampshire-grown wild blueberries were found to contain a fair supply of vitamin C if eaten raw. Experiments showed wild rice as a good source of several B vitamins-thiamine, riboflavin, nicotinic acid, and pantothenic acid. And ordinary field mushrooms, Agaricus

campestris, were also found to be rich in these four B vitamins.

Whole Milk Selling

A quarter of a million farmers have switched from selling farmseparated cream to selling whole milk during the last five years. Farm sales of whole milk at wholesale increased from 40 billion pounds average for 1935-39 to 60 billion pounds last year, a jump of 50 per cent. This increase was much greater than the total gain in farm milk production. It is not expected that postwar conditions will change this picture to any degree.

USDA's Crop Forecasts Based On Reports From 300,000 Farmers

Voluntary Information

Comes From Every State

By AL JEDLICKA

There might be a lot of fancy fig-turing involved in the U. S. department of agriculture's crop reporting, but when the monthly estimates are released to a waiting press to be flashed around the country, they are of real value to farmers in planning acreage and studying the markets, and of interest to business in plotting sales of machinery or processing equipment, etc.

Because some unscrupulous speculators once pulled the blinds aside to listen in on the figuring of the crop reporting board, the latter's meetings are now held in the utmost secrecy, with members secluded behind locked doors and sealed blinds and compelled to bring their own lunches. Before the individual state reports are brought in to the board, only the latter's chairman and the Secretary of Agriculture have access to them.

The largest organization of its kind in the world, and a model for other countries, the USDA's crop reporting board is extraordinarily unique in that it relies upon the voluntary cooperation of some 300,-000 farmers. Although their efforts prove of profit to themselves, many look upon the work as the highest responsibility.

According to Dale Bormuth of the USDA's Chicago office, the crop reporting board, working through its 41 field headquarters, receives its March acreage estimates through state assessors or inquiries of farmers representative of their sections. As a result of the studies of acreage intentions, farmers may be inclined to change crop plans.

The June report establishes the acreage actually planted, Bormuth said, and these figures serve as the basis for future estimates.

Following the establishment of the acreage, the next important step is the forecast of the yield, with the individual reporters asked to state their normal crops if weather conditions were good and insect damage under control.

From July to October in the case of field and truck crops, and from

November to July in the matter of winter wheat, the hundreds of thousands of individual reporters then furnish information on the progress of growth to the field offices, with the board carefully checking on the whole national picture.

In forming their conclusions, Bormuth said, the field offices follow a highly technical procedure, applying their own experiences against the estimates of the individual reporters, and considering such factors as moisture and insects in their calculations. In receiving this data, the board itself then passes its own judgment on the basis of its own

overall information. As a further base for figuring, the U. S. census bureau's dicennial statistics are used as an indicator of what may be expected in longrange crop development.

As could be expected, the field directors compiling state reports must contend with many incon-sistencies in formulating data. A few individual reporters may submit outlandish estimates, or then again, some groups may purposely make low projections. In addition, the crop reporting service must be careful to cover all areas in which

the estimates between them all so as to strike a true picture. Another complicating factor, Bormuth said, is the reporting on new crops, where the board cannot be guided by past experience. In all of its reporting activity, however, the board is being constantly assisted by the USDA's experimental stations at Ames, Iowa, and Raleigh, N. C., where new procedures are in development.

a given crop is grown, to balance

In the case of special crops, Bormuth said, the board works hand in hand with grower groups or trade associations in arriving at comprenensive figures.

And I'm the immovable object!" greater than replacements.

Over Half of Incomes Increased savings and income tax

payments were the major changes in the 1943 wartime pattern of saving and spending from the pattern in 1942 as shown in records just summarized for 340 Illinois farm families, according to Mrs. Ruth C. Freeman and Miss Irene Crouch, home economists, Illinois college of agriculture.

The saving and spending pattern changed radically in 1943 from the prewar year 1941. Although the amount spent for family living was 14 per cent more than the amount spent in 1941, on the average families bought less commodities and services because prices had gone up considerably more-29 per centthan the 14 per cent increased

spending. Net money receipts averaged \$5,141, which was 41 per cent more than the amount available in 1942 and 93 per cent more than in 1941. Outstanding feature in the wartime use of net money receipts by these 340 families was the large proportion used for savings-from 13 per cent on the under-\$1,000-money-receipts level to 60 per cent on the \$5,000-and-over level. Average for the whole group was 53 per cent. Savings included on the average three per cent for life insurance premiums, 15 per cent for war bond purchases, 20 per cent for debt retirement and 15 per cent for new

investments. Not all the savings can be interpreted as financial progress, the home economists point out, because scarcity of new goods has prevented normal replacements. Thus the total depreciation in farm and home inventories was much name and address.

What to Do By PHYLLIS BELMONT

.....

Invitations to a party, whether they be for a dinner, supper, dancing or any other kind should be carefully considered.

Be sure your guest list is not too large. This can be gauged by the size of your home, the amount of help you have, and your appointments. If you have a list of twelve, better cut it to ten and be sure.

Select your guests in relation to one another. Choose some for their brilliant conversation and some for their decorative assets, but be sure they are all interested in some one thing, so they will have a common ground on which to meet.

The telephone is usually the best medium for conveying invitations. It's informal and friendly, giving a personal touch to your invitation. Of course, there are times when the telephone doesn't fill the need. But then, you may write, using either your visiting card or one of the new 'informal" cards containing your
