

Famous Animal in Aleutians

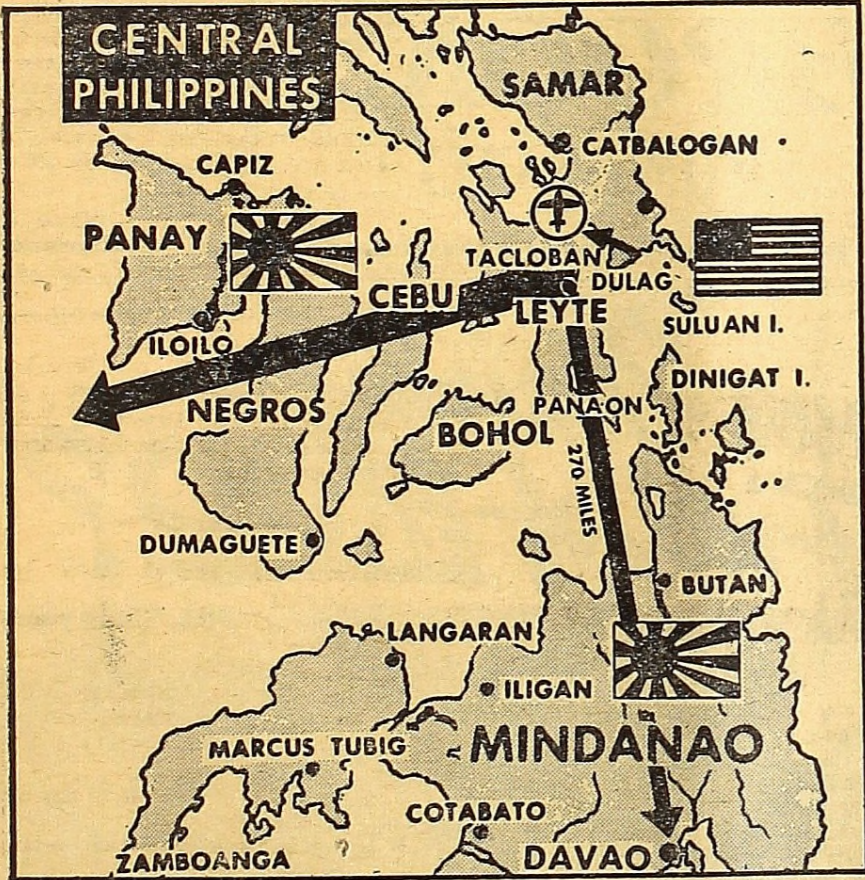

Here is "Babe," the most famous animal in the Aleutian islands. Babe, a cow, was brought to that western outpost by plane and now provides seven quarts of fresh milk daily for the headquarters staff. In charge of Babe is Earl Gist, seaman 2/c, of Cincinnati, Ohio. Shown at the right, looking over the famous cow, is G. L. Peterson of Minneapolis. Dehydrated milk is being used by most of the troops in that section as well as other war theaters.

Silver Has New 'Lone Ranger'

The Lone Ranger and his famous horse "Silver" visited the White House and gave the President's grandson, John Boettiger Jr., a ride around the White House grounds. Photo shows the Lone Ranger, Bruce Beemer, standing beside "Silver" with John in the saddle while his mother, Mrs. Anne Boettiger, holds the bridle.

Ready Airfields for Smash

As U. S. troops expanded their wedge on Leyte island and drove the Japs into the hills, the newly taken airstrips were being put in order for air drives on major Jap areas. As arrows indicate, the next major steps are expected to be aimed at Mindanao and various islands in the central Pacific. This move will be a direct smash at Jap supply lines.

Aces Again Register at Formosa

Davis, Tappahannock, Va., shown after returning from air raid on Formosa. Morris' score is now eight Jap planes shot down in combat in addition to hits on land marks.

Hero Plants Flag

T/S Michael J. Ryan, Brooklyn, N. Y., had the honor of planting the first American flag on Philippine soil when General MacArthur's troops landed at Leyte. Ryan had previously been cited by General MacArthur for heroic work.

Make French Wine

French soldiers attached to a French armored unit sample freshly made wine. Soldier in barrel is treading juice from the grapes, somewhere on the continent. Their unit is a part of the Allied command under General Eisenhower.

Leads Polish Aces

Lieut. Col. Stanislaw Skalski, who shot down 18 German planes to become Poland's leading air ace of the war, is shown upon his arrival in New York City. The 28-year-old air fighter has been in action since 1939 over Poland, Africa, Italy and France.

Risked All for Us

WHAT pitcher in baseball has had the greatest combination of speed and a curve ball?

This argument developed with great speed recently in a gathering of baseball notables. Your correspondent put this matter up to a long list of managers and old players, who should know what they are talking about. It was generally agreed that Walter Johnson had the king of all fast balls. That's about all old Barney needed in his prime.

It was also conceded that among the smarter pitchers you had to rate Alexander, Mathewson and Hubbell. Dizzy Dean was also given a high rating as an all-arounder with speed, a good curve and a change of pace when necessary.

I think it was Casey Stengel who added up all the qualifications needed and his score card put Carl Hubbell on top. After all Hubbell won 24 consecutive games.

Cy Young drew the nomination for durability, including arm and head through more than 500 victories, 510 to be exact.

The list of great pitchers is extremely long, dating back to 1900. There was Ed Walsh—Addie Joss—Smokey Joe Wood—Jack Chesbro—(both Walsh and Chesbro won 40 or more games in one season). There was Herb Pennock and Lefty Grove and Ed Plank. There was Bob Feller, one of the best. And Dizzy Vance, voted the most effective of all pitchers excluding Johnson, Alexander, Matty and Hubbell finished under a blanket.

Connie Mack's Decision

In the midst of all this confusion we finally decided to put the problem up to Connie Mack, who has only been around in baseball a brief matter of 60 odd years.

"Just what is the argument about?" Mr. Mack asked.

"The argument is this—what one pitcher had the greatest combination of speed and curves?"

"My goodness," Connie said. "I think that's quite simple. His name is Rube Waddell. Now Johnson had the best speed. But Walter only had a fair curve ball. His speed was enough. Matty and Alexander depended largely on control and smartness. Grove and Feller both had fine speed. But you are talking about both factors—speed and curves."

"Now I'll tell you about the Rube. He had terrific speed. He was a big, loose, lanky fellow who was almost as fast as Johnson. I know outside of Johnson I never saw any one faster."

"But his curve was even better than his speed. The Rube had the fastest and the deepest curve I've ever seen. You know what great hitters Lajoie and Cobb were? What wonderful batting eyes they both had? Well, I've seen the Rube pour one over that started and looked waist high. I've seen both Larry and Ty swing at this pitch as the catcher dug it out of the dirt. I've seen great hitters miss Rube's curve ball more than a foot. I honestly believe that the Rube's curve often broke at least two feet. But what is more important it was a fast curve, one that came up in a hurry and then ducked like lightning."

"Now, I'm not saying Waddell was the greatest pitcher of all time. I'm saying that he could have been and should have been for the simple reason that he had more natural stuff than any other pitcher I've ever seen. I mean by this that he had the best combination of what you are talking about—speed and curve. But the Rube had too many sidelines. Now and then he'd take a few days off and go fishing, without saying anything to me about it."

I recalled one of the last times I ever saw Waddell pitch. He had Cleveland beaten 1 to 0 in the last of the ninth when an error, a Texas leaguer and a pass filled the bases with none out. The next three coming up were Lajoie, Bradley and Flick, three of the best.

The Rube had brought out two friends who were sitting in a box. He left the pitcher's mound and walked over to the box remarking, "Ladies, I'll be with you in about two minutes."

He then struck out Lajoie, Bradley and Flick on nine pitched balls. I'll have to string with Mr. Mack on this opinion, which I like to do on any opinion Mr. Mack has to offer.

Georgia's Contribution

The Red Clay Hills of Georgia have given sport more than their share of stars. It was in this state that a kid by the name of Tyrus Raymond Cobb came to fame around 40 years ago, via Augusta and Detroit.

It was from Atlanta another kid named Bobby Jones moved into the national spotlight of golf back in 1916 at Merion when said youth was only 14 years old. Such champions give any state a running start.

Proficient Knockers

Negative criticism does not call for a special degree of intelligence. Even the mentally sterile person can be a very voluble destructive critic. Neither does it take a great deal of energy.

Many lazy men are very proficient fault-finders and "with alarm viewers." The truly active person is perhaps the most lenient judge of the activities of others, simply because he has no time to be a flaw-picker.

SNAPPY FACTS ABOUT RUBBER

Progress of our Pacific war program and the growing possibilities of reasonably quick recapture of some rubber areas in the Far East have made men who know the rubber industry best emphasize the need for sound policies to deal with the economic and political problems which the gradual return of natural rubber will raise.

Mexico has its own way of conserving tires. Mexican motorists are required, by government regulation, to keep their cars idle one day a week. Car owners select their "motorless day" and then must display on their windshields a sticker of a color designated for that day of the week.

Birdfoot Trefoll
Birdfoot trefoll is primarily a forage crop for land that is not to be plowed often. It does best on good soil, but will grow and persist on rather wet situations and on shallow, drouthy soils.

Provided Soldiers
North Carolina provided more soldiers for the Confederacy than any other state. Its military population was 115,369, but 127,000 responded to the call. Nearly twice as many Tar Heels were killed at Gettysburg than soldiers of any other state.

Administered Cheaply
Michigan county governments, on the whole, are administered most cheaply in the more populous counties, the Michigan public expenditure survey reports. By the same token, the most expensive counties (those with 10,000 population or under) are the least populous. The survey also finds that the larger the county the lower the per capita cost, the high costs in the smaller counties being due, in part, to maintaining a minimum government which could render services to a much larger county at no extra cost. In the smaller counties, roads are responsible for the greatest share of costs.

Artificial Eyes
Germany, through her "Reichsverband," controlled the export of artificial eyes and the glass for making them. Her monopoly was comparable to that of the Venetians who kept their glass-making artisans virtually imprisoned on the island of Murano in the 16th and 17th centuries. Until the war, practically all artificial eyes were blown from a special glass with a velvety texture that could be made only in one place in the world—the little town of Lauscha in Thuringen, Germany.

U. I. Board
To maintain the average soldier in continental United States during his first year of service, the quartermaster corps spends \$215.35 for his food, \$173.70 for his clothing, \$44.70 for his individual equipment and \$31.31 for his barrack equipment, a total of \$465.06. The cost of feeding a soldier is now 59 cents a day, three cents a day less than a year ago.

Timely Watering
Losses of young plants can be avoided by timely watering and by shading them for a few days after they are transplanted. The gardener who wants to make permanent shading frames instead of using newspaper or other makeshift can stretch burlap, cheesecloth or other fabric over laths or other light lumber. Legs 12 to 18 inches long make the shades easy to handle.
Diving Helmet
In the early days of the now-famous Max Gene Nohl's deep sea diving experiments he fashioned himself a simple diving helmet from a 5-gallon paint can with an inserted glass window and connected air hose. Nohl now holds the record of walking on the ocean bottom at 420 feet under water depth.

Poultry Ration
Experimental work has shown that poultry require somewhat less phosphorus and calcium in their feed than when minimum amounts feed by adding extra amounts of this are used. This means that vitamin D can, in part, compensate for a lowered phosphorus content in the vitamin. However, this does not imply that by adding plenty of vitamin D the phosphorus and calcium content of feeds can be disregarded.

Stuffed Potatoes
Another way to serve potatoes when butter is scarce is stuffed. Cut the baked potato in half the long way, carefully scoop out the inside so as not to break the shells, then mash and season the part scooped out with salt, pepper, hot milk and thin cream. Then stuff it back into the shells, brush the top with fat, and brown a few minutes in the oven. Chopped green tops of onions or chopped parsley sprinkled over the top adds a touch of spring.

Must Last Lifetime
If your eyes tire easily, or become irritated, obtain competent professional ophthalmical advice without delay. You have two sets of teeth, and can get along even with artificial teeth, but your eyes must last a lifetime.

Heavy Eaters
Food purchases for the approximately 11,000,000 men in our armed forces total about twice that for an equal number of civilians.

Is Your Crankcase Full of MUD?

THIS is the crankcase pan from an automobile. Its owner stuck to peacetime rules and had his oil changed regularly every 1,000 miles. But look what happened! Black, mud-like sludge by the hand-full almost ruined his motor by clogging oil screens and oil lines, cutting off the oil flow.
Sludge forms fast these days because with lower wartime speeds and shorter trips motors don't heat up enough to drive off impurities. Fight wartime sludge and save your motor by following new wartime recommendations.
Have your Sinclair Dealer—
(1) Drain used oil at recommended intervals, while motor is hot.
(2) Flush parts clean with flushing oil.
(3) Refill with fresh, clean Sinclair motor oil.

Supply Family

One hundred asparagus plants set 18 inches apart in rows 4 feet apart will amply supply the average family. The Washington varieties are preferable. The plants should be set as soon as the ground is fit to work. The roots should be spread out, crowns up, in furrows 6 inches deep, but should be covered with only about 2 inches of soil. As the plants grow the furrows may be filled in gradually until the ground is level again.

Worker Trend

John D. Durand, population expert of the U. S. census bureau, predicts that by 1950 over three million women who never worked before will have joined the labor force; this group, he says, will include an alarming number of women over 35 who are "likely to be a serious complication in the postwar employment problem because of the preference of most employers for younger workers."

Soup Mixes

Soup mixes consisting of soya flour or grits, other legume powders, dry skimmilk and seasonings may include up to 40 per cent soya, says the USDA bureau of human nutrition and home economics. With cereals like corn meal, cracked wheat, oat meal, hominy grits, rolled oats or granular wheat cereal, 15 to 20 per cent of soya grits or flakes may be used with good results. In quick breads and yeast breads there may be from 15 to 20 per cent soya flour.

Indiana Counties

Five Indiana counties (those in which its five large cities, Indianapolis, Fort Wayne, Gary, South Bend and Evansville are located) contributed over 40 per cent of the property taxes levied in the state during the 10-year period, 1933-1942, according to a study made by the Taxpayers Research association of Fort Wayne, Indiana has 92 counties. The total property tax levied in the state for the 1933-1942 decade totalled nearly a billion dollars.

Oil Leadership

Year after year the United States has held world leadership in oil—63 per cent of all oil production in 1941 against 11 per cent for second-place Russia. Of all foreign producers only Russia has challenged the United States position. In the period 1898-1901 Russia led the world, fell behind the United States in later years.

Yeast Fermentation

Other yeast fermentations, such as that of molasses to make industrial alcohol, yield by-product yeast, but the product is usually so contaminated that recovery is not worthwhile. However, some cattle feed consisting largely of corn protein with a little yeast is being recovered from the residue of corn fermented to alcohol as a wartime measure.

Farming Country

Although the majority of Finland's more than 3 1/2 million people make their living normally by farming and dairying, the nation's cultivated areas amount to less than one-tenth of the land spread. Leading crops are typically northern—rye, barley, oats, wheat, potatoes, and hay. Pre-war Finland exported chiefly forest and dairy products; imported—in addition to machinery and industrial materials—meat, fruit, coffee, grains, tobacco and processed foods.

Thomas Jefferson

Thomas Jefferson, whose 200th birthday anniversary was celebrated April 13, was the first man to put plow making on a scientific basis. Plows have been used by man for more than 3,000 years. The Greeks used the butt of a tree to which they added a metal point. The points for these primitive plows were made as late as 1923 in Connecticut for shipment to other agricultural areas.

Disastrous Fires

Forest and grass fires in the United States in the past five years have burned over an area as large as the entire New England states. The timber burned in one of these years would have built 20,000 Liberty ships.

Hatched Chicks

In 1934 some 76 per cent of the chickens grown in North Carolina were hatched under hens but last year the hens were credited with only 21 per cent of the hatched chicks, say BAE reports from Washington.

Eggs Make Sauce

Eggs help make a delicious cream sauce. First make a white sauce and then add a small amount of the sauce to a well-beaten egg. Stir the mixture into remaining white sauce. Serve on vegetables or in other creamed dishes.

But do we give them the greatest weapon of all?

IN providing our men with the wonder weapons of all time, is our job complete? Have we given them our best?

No! Not until every free dollar in America is invested in War Bonds have we provided our men with the greatest weapon of all. For it is support from the folks at home—support that lets the soldier know we're backing him to our limit—that gives him the greatest part of his fighting strength.

Curiously enough, the farms of America need those War Bonds as urgently as our boys need the weapons and the supplies those Bonds will provide. For as those Bonds mature, they will replace machinery and equipment and provide cash to maintain those farms as profitable business enterprises.

Have any of us yet really done our best?

Let's give those boys the greatest weapon of the war—all the War Bonds we can possibly buy!

5 REASONS FOR INCREASING YOUR WAR BOND PURCHASES

1. The tempo of this war is hitting its highest point. Government expenditures for war are at the peak. MORE MONEY IS NEEDED... NOW!
2. In proportion to WHO HAS THE MOST MONEY, individuals are not buying their share of War Bonds. America must correct this situation.
3. War Bonds provide the farmer and rancher with the financial reserve he must have to survive the ordinary ups and downs of farming as a business.
4. Money will be needed urgently as a future date to replace and repair farm equipment, machinery, and buildings. War Bonds will provide it.
5. War Bonds are the safest investment in the world, return a good rate of interest, are easy and convenient to buy... from bank, post office, rural mail carrier or Production Credit Association.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, and eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
