Many Volunteer for School Advisory Council Service

Citizens throughout the Tawas Area School District are enthusiastically volunteering for service on the five subcommittees of the school advisory council, states John Monarch, one of the co-chairmen of the council.

Starting March 30, meetings have been held in nine of the ten communities of the district. The attendance was fine at each of these meetings, and people expressed their interest by freely

volunteering for service to assist in getting the kind of a school needed for the district.

The final meeting will be held Tuesday evening at the Tawas City School Auditorium. Meetings have been held at Whitney, Alabaster, Vine, Watts, Laidlawville, Anschutz, Upper Townline, Wilber and East Tawas.

The object of these meetings was to secure these volunteer committee members, states Monarch. "But if you were unable to attend you may volunteer for this important service," he said.

The subcommittees are: Curriculum, finance, community and people, building and site, and transportation. The reports from these committees will be submitted to the board of education for their guidance in arranging a school program and planning the necessary buildings.

The ten meetings were sponsored by the Tawas District Advisory Council consisting of C. Dwight Wood, Carl Babcock, John Monarch and William DeGraw. These men were appointed by the District Board of Education. The appointments were approved at a Tawas Area District meeting held in March.

A Saint
Lesson for April 26, 1953

A SAINT: What picture does that word call up? A haggard figure in a loud-colored robe, sitting in a stained glass window? A hermit in a lonely cell, praying incessantly to God? All wrong. Saints have pretty stormy lives, as a matter of fact, and it often happens that the people who boarded with them did not realize they were saints at the time. Our famed St. Paul is no exception. He was, as we remember, a missionary; and missionaries have their troubles. They are something like salesmen; and like most salesmen, they are not selling in a vacuum. They are selling against some pretty keen opposition and competition. The story of Paul's work is like a series of fights. Indeed at the end of his life he summed it all up by saying, "I have fought the good fight."

Dr. Foreman

Big Cities Are Bad
Paul was up against it all the time, one way or another. A good sample of the sort of thing that made his work hard was his stay in Corinth, not to mention his troubles with the Corinthians ever after. Corinth was one of the great cities of the Roman Empire at that time. It was a transfer point for cargoes bound from the east to the empire's capital, Rome. It was a center for professional athletics. Everybody in the place had the idea of getting rich as fast as possible. It was not noted for culture, or for religion or morals. Indeed it was so bad that its morals would make a Roman policeman blush. When Paul wrote Roman 1 he was living in Corinth, and the horrible picture he draws is no more than he could see, so to speak, looking out of his window. Now big cities contain much good. They are the centers of world-wide Christian activities, in many cases today. But big cities are bad too, as everybody knows, and for much the same reason that Corinth was bad. The one god worshipped there, by the majority of its citizens, is Mammon. Money. Why do people crowd into big cities? Most of them are there, directly or indirectly, because they hope to make money faster than they could back home. What chance has the gospel of love in such a place? A real chance; but it has to fight.

Half-Religion
Paul stuck to cities for his missionary work because he was, after all, a city man and understood city people. But still it was a fight. Besides the indifference of people who cared for no god but themselves, there was bitter opposition from people who already had a religion, and a right good one. Paul suffered sharper attacks from the Jews than he ever did from downright pagans. People who already have something good are more likely to be fanatical against what is better than are people who have nothing. For instance, nowadays the great new revision of the Bible is getting more bitter opposition from people who have a good but old translation—the King James—than from people who don't have Bible at all.

Highbrows
In Acts 17 there is told at some length what is only hinted at in Acts 18—the kind of trouble Paul had with the Greeks. In dealing with Greeks he was up against the true highbrows of his time. The Jew had a very practical mind; but the Greek mind was always worrying with very difficult questions, to which the answers have not all been given even down to this present day. Paul had to argue with these people—he couldn't just knock them over the head with Bible texts; the Greek mind didn't bash in easily. And Paul won some of them. Indeed he was more successful with them than he was with his own people, somewhat to his own astonishment. But that is one hurdle that Christianity meets everywhere: the opposition of people who want to have all their questions answered before they will consent to believe. There is surely nothing wrong in having a bright mind, and nothing at all wrong in having the best education one can absorb. But any person who insists on God's explaining himself to him before he, the man, will give his heart to God, is demanding the wrong thing. God's grace is for the humble.

Puts a Good Mark on a Man!

Regardless of where he drives, no man is wholly a stranger to the people about him—if he sits at the wheel of a 1953 Cadillac.

His name may be unknown—and also his occupation—and, likewise, the whereabouts of his home.

But he is not without standing. For his Cadillac marks him as a man of character and substance.

Wherever he may be, let him arrive at the door of a distinguished hotel or restaurant—or let him seek the car of anyone for direction or information . . . and he has the courtesy that goes with respect.

And let it be said for Cadillac owners that, almost invariably, they respond in kind.

Indeed, the honor which Cadillac does to its owners is the fruit of the honor they have so long bestowed upon Cadillac. When so many wonderful people favor a particular make of car over such a long period of time—the car must inevitably become a mark of distinction.

All of this, of course, comes to the owner of a 1953 Cadillac as an extra joy and satisfaction.

It comes in addition to the magnificent performance of Cadillac's 210 h.p. engine and improved Hydra-Matic Drive . . . the wonderful comfort of Cadillac's new Air Conditioner* . . . the car's soft, easy, relaxing ride . . . its marvelous balance and handling ease . . . its long life and dependability . . . and its truly amazing economy of upkeep and operation.

Put them all together and they spell the grandest satisfaction in all the world of motoring.

Have you seen and driven the 1953 version of the "Car of Cars"?

If not—we should be happy to see you at any time. Why not come in today? *Optional at extra cost.

ABOUT YOUR HOME

By Frances Dell

In the life of every roof there comes a time when it is much wiser to replace than to patch again.

There is a wide variety of choice in roofing materials. Choose from asphalt, wood, asbestos, metal, slate and clay tile. Many of the new varieties come in geometric and random shapes, and almost any color you could desire.

When buying a roof, the initial cost is not the only factor to be considered. An important point is the shape and slope of your roof. Steeply pitched roofs are best shingled. Sheet or roll-type roofing is best on flat or shed-type roofs. A clay tile roof or slate roof needs a stronger structure supporting it than does an asphalt, asbestos or wood shingle roof.

Metals—galvanized iron, copper, zinc or aluminum—are best used on roofs with a slight pitch. Asphalt roll roofing is practical for flat roofs.

Durability and maintenance costs are items to deal with. Almost any roofing is damaged by strong winds. Wood shingles are subject to rot in damp, humid weather. Slate, tile and asbestos shingles may break if walked on.

Asphalt may be torn in a high wind. Sheet steel and tin are subject to corrosive gasses and must be painted.

It is well to remember that all of one's education does not come out of books.

What's new about "TT" DYNAFLOW?

The TAKE-OFF'S TERRIFIC!

It's only fair to warn you.

When you try a new Buick with the sensational Twin-Turbine Dynaflo Drive,* you'll tingle all over with thrill.

You'll sweep your speedometer needle from zero to 30 mph so quickly, you won't have time to breathe but twice. You'll move from a standing start to legal speed so quietly, you'll practically hear your heart beat. You'll experience such complete and utter smoothness every step of the way, you'll be wholly relaxed, refreshed, and ready for more.

This is not dream stuff. This is real.

This is what actually happens when you're at the wheel of a new 1953 Buick with TT Dynaflo.

Twin Turbines in the Dynaflo unit, instead of just a single one—in addition to other engineering advances—make the tremendous difference.

So you feel a firmer and more immediate "take hold"—get far faster getaway, new quiet and efficiency, plus infinite smoothness to and through every speed range.

There's a lot more to be had, of course, in these great new Buicks. Higher horsepower and compression ratios. A still finer ride. Easier handling. Improved visibility. More comfort and richer interiors.

But start with take-off—the greatest in Buick's fifty great years—and learn the rest of the story from there. Can you drop in on us this week?

T.C.H.S Wins League Opener

Play at Hale This Friday Afternoon

The Tawas City High School Baseball Team racked up an 11 to 2 win against Harrisville in the opening games of the Huron Shore League season. The game was played at the Tawas City Athletic Field Tuesday afternoon.

The Elks staged a five run uprising in the second to assure the win. Three singles by Landon, Humphrey and Deloch; two walks and a pair of fielder's choices accounted for the five runs.

They added three more runs in the fifth on a double by Gackstetter, two errors, a walk, a hit batter and a wild pitch. In the sixth the final Tawas run was scored when Rollin tripled and came in on a ground ball.

The Harrisville players weren't very successful in solving Revord's pitching slants and he allowed but two hits. These came in the third inning, and combined with a stolen base and three errors accounts for both Harrisville runs. In the seven inning game Revord struck out 12, walked one and allowed two hits. Harrisville used Kilbourn, Walker and Kelly for mound duty, with Tawas getting 11 runs on seven hits. Between them they gave up seven walks and struck out eight.

Extra base knocks were a triple by Rollin and doubles by Gackstetter and Revord.

Games coming up in the Huron Shore League include a game here April 23 with AuGres and a game at Hale April 24.
