It's practically no effort at all for a sprinter to walk. It's a breeze for a weight-lifter to pick up a child. And so it is with the 1956 Buicks in cruising-for these are the mightiest powered Buicks yet built.

Take the '56 Buick CENTURY pictured here.

It's almost a loaf for this beauty to cruise a superhighway at a legal 50 mph. At that point it's using less than 10% of its pedal-to-the-floor power.

And that's just the reason for the record-high power and compression ratio in your big 322-cubic-inch V8 engine. You and your engine can take it easy so much of the time.

You have no qualms about the response at your command. Your power plant has no need to breathe hardso it saves gas, stays young, lasts longer.

So when you take the wheel of a '56 Buick, you take it easy, and still lead the parade.

You know you can call out the reserves with a touch of your toe.

And you find you silk through a whole day's driving

Get 4-Season Comfort in your new Buick with FRIGIDAIRE CONDITIONING-now at a new low price

Buick's 1956 power-packed CENTURY hardtops-the 2-door Riviera, Model 66R (at top), and the 4-door Riviera, Model 63.

with the flowing ease of today's new Variable Pitch Dynaflow.\*

For not only does this advanced new Dynaflow give you stepped-up gas mileage and brilliant new getaway response at only part throttle. Not only does it permit you to switch the pitch for full-power safety-surge take-off.

It also gives you absolute smoothness in acceleration and deceleration like you get in no other car in the world.

Drop in on us this week for a sampling of the best performance yet-and for a firsthand look at what else goes with the best Buick yet.

\*New Advanced Variable Pitch Dynaflow is the only Dynaflow Buick builds today. It is standard on Roadmaster, Super and Century-optional at modest extra cost on the Special.

DROPS IT AND CATCHES WITH HER KNEES

## Brucellosis Caused by One Specific Germ

When a cow is branded as a Bang's reactor, it is usually too 'ate to do anything about it. But most dairy farmers do not want to wait until it is too late, claims Marvin Davenport, county agri-cultural agent for Iosco County. They want to know how the cow gets the disease. Here is how Glen W. Reed, extension veter-inarian at Michigan State Uni-versity, explains the trouble: Unlike mastitis, which cows seem to get in many ways, bru-cellosis comes from one specific germ. That germ is in abundent numbers in the gential tract of eactor cows.

Reed explains that since the brucella organisms incubate from 30 to 200 days, some cattle nay be carrying the disease even f they test negative. These cattle may react even within a cattle may react even within a week after passing a test. Brucellosis organisms get in the cattle mainly through eyes, skin and lungs. The germs are expelled during calving and heat periods to infect other ani-mals in the herd. By Baldwin Lodge, 100 Open installation was hal

Reed mentions that other sources of the disease are public pastures, stock yards, infected trucks, barn tools and farm imlements. cember 22
