AIR ISN'T JUST something you breathe any more. It's a special substance for protecting phone cables from the ravages of moisture. By keeping the lines open, air makes your phone service more reliable. It is pumped into the cables under pressure

so that even if there are leaks, water cannot get in because the air pushes out. And the air helps locate leaks. Once the area of the leak has been located by testing, the exact spot is found by applying liquid soap over the cable-the escaping air forms a bubble.

NECKTIES AND TOBACCO ARE PROBABLY the most popular things that will be given to Dad on Father's Day. But if he's far away and can't be with you on Sunday, you can be sure that a Long Distance phone call would be at the top of a list of things he'd like to have. The usual low Sunday rates are in effect to help you enjoy a leisurely telephone visit. It's a fine way to please Dad, and it'll make you feel pretty good, too!

BESIDES BEING FATHER'S DAY,

June 21st is also the first day of Summer-time to begin thinking about vacations. But thinking alone won't make a vacation good. Only planning and preparation will do that. That's where the Yellow Pages comes in so handy. It'll tell you where to buy the diving goggles, camera film, sports clothes, sun glasses, luggage and guide books you'll need. More than that, the Yellow Pages lists hotels, motels, restaurants, theatres and other amusements, so it's the quickest way

of getting to know your way around a new town. Start with the Yellow Pages and end up with a truly great vacation.
