THE TAWAS HERALD

STRETCH STRETCH STRETCH

... yourself into more comfort ... into a smoother fit ... greater fashion . . . ease of movement . . . and a sensational new active wardrobe! You can do ALL this by sewing with stretch fabrics. After you master a few very simple "tricks of the tailor," you will be just delighted with the fashions you can make.

TOGETHERNESS

NEVER HAS your wardrobe had the figure-flattering possibili-ties it has now. Since stretch "gives," you can fit clothes closer to the body without having that harsh tight look. The clothes you make for your most active sports will move with you yet will spring right back into shape and keep their bright, fresh appearance

right back into shape and keep their bright, fresh appearance almost forever. Although new and sensational, stretch is already available in a great variety of fabrics from fragile-looking batistes to heavy gabardines. You can choose anything that please you including STRETCH corduroys, STRETCH flannels, STRETCH linings and for Summer date dresses you might try a STRETCH cotton brocade. The stretch is either lengthwise or crosswise (occasionally the fabric has a two-way stretch), however, the usual type available to the home sewer is the crosswise variety. Be sure to keep the direc-tions in mind when buying fabric. For example, when your selection has crosswise stretch and you want the garment to stretch in the lengthwise direction, see that the fabric is wide enough to place the pattern on the crosswise grain. YOUR KEY TO SUCCESS — PURE AND SIMPLE STYLES

YOUR KEY TO SUCCESS - PURE AND SIMPLE STYLES

YOUR KEY TO SUCCESS — PURE AND SIMPLE STYLES Many of the most fashionable pattern envelopes are now marked in bright, bold letters, "Suitable for Stretch." However, you can choose from any basically simply pattern you like. Pure lines with few buttonholes are the easiest to, work with and you will need the same size pattern you would for any other fabric. As an example, take the dashing 3 part set shown here. It's Simplicity 5838 and along with the trim pants, sleeveless bateau neck blouse and cardigan jacket, the pattern also offers you a pleated skirt and smartly fitted shorts. You could do the jacket and pants in a silky, stretch cotton and the blouse in an equally care-free dacron-cotton blend. Or, you might join this season's happy "bright-as-a-daisy" look and do the pants and jacket in a splashy cotton print just bursting with flowers...it's guaranteed to get you voted best-dressed in your fashion set! SACE SECRETS FOR SMOOTHER STRETCH This great new modern fabric requires very little extra care but

Success hasn't gone to its price

After all, you don't get the No. 1 place (or stay there year after year after year) unless you give people a lot for their

things as you go. Like however much economy or excitement you'd want, our miserly 140-hp Six to our ferocious SEE THE U.S.A. Turbo-Jet V8, 325 hp on order.

This great new modern fabric requires very little extra care but there are a few hints which will help you to get the style, smooth-ness and wear you should from stretch. First of all, be sure to let the fabric relax for 24 hours before actually cutting it. Use very sharp pins and be careful not to stretch the fabric while cutting your pattern. Be sure, too, to use the proper thread in sewing. TASLAN is a textured nylon which is especially suited for stretch since it has the "give" corresponding to that of the fabric. Its great strength is particularly important for active sportswear and you can happily match it to anything since it comes in 30 fashion-able shades. able shades.

JUST SOME ODDS AND ENDS

... sew seam tape into the seam lines where stretch is not desired (such as the shoulders)... taper darts to a very fine point so they will press out smoothly... buttonholes should be made in the oppo-site direction to the stretch and reinforced with a patch of sheer site direction to the stretch and reinforced with a patch of inter-iron-on interfacing... do not use seam binding on the hems as it will not "give" with the fabric... use stretch fabrics or tricot for lining so as not to lose the effect of the stretch... and do steam press very carefully to avoid stretching. These are just a few of the things which will help you in working with this fabric of today but if you would like a leaflet giving further details for sewing stretch and knits, just send a stamped, self-addressed envelope to the streng Edites of this newsapper glong with your request for the Sewing Editor of this newspaper along with your request for Leaflet S 861.

Research biologists of the Conservation Department are on the threshold of gaining an electronic "edge" in studying the movements and habitat needs of game. Stealing a few pages from space-age technology, these men are "bugging" whitetails with transmitter-equipped collars at the Department's Cusino wildlife research station near Shingleton in the Upper Peninsula. After the deer are released within the station's mile-square enclosure, biologists will tune in on the animals' travels later this spring by manning directional receivers to pick up different signals from each of these tiny transmitters. After using the Cusino station's enclosure as a testing ground for the next year or so, the Department plans to expand its radio telemetry study to track deer, bear, coyotes and, possibly, bobcats on open wild lands. Electronics will also be brought into play this fall to chart the comings and goings of elk in the northern part of Lower Michigan. In southern Michigan, similar studies are scheduled later on small game and deer. Mich. Dept. of Conservation

Kindergartners Visit Sterling Chick Hatchery Tuesday

About 160 kindergartners from Tawas Area School received practical education, as well as fun, Tuesday when they visited the chick museum at Sterling Hatchery on M-76. The children saw the development of eggs and were then able to play with baby chicks. Miss Clara Bolen, elementary principal, said the trip proved to be 'fun" for the parents and other adults accompanying the group.

THE TAWAS HERALD

Score 2 in 5th to Win 3-2 **Over Oscoda**

A two-run fifth inning gave the Tawas Area Braves a come from behind victory over the Oscoda Owls last Wednesday night in a Northern B Conference contest. Trailing 2-1 going into the fifth,

Tawas scored two runs after two batters were out.

Mike Roach, starting pitcher for the Owls, breezed through the first four innings, allowing three hits. Bob Sieloff, winning pitcher for Tawas, allowed three hits during the first four innings and two runs scored.

The big fifth for Tawas saw Lorenz lead off with a walk. Howard Rollin fanned and Bill Groff forced Lorenz at second base. A key play of the game saw Groff stealing second base. Darrell Welch cracked a single to score Groff. Dale Frank's routine fly in left field was dropped and Welch scored the winning run.

Oscoda jumped into an early lead when Kennedy walked, Roach doubled and, after Goss struck out, Lane was safe on an error and Kennedy scored. Oscoda scored in the top of the fourth when Lane singled and went all the way around the bases on errors

Tawas scored its first run when Welch walked, Frank and Sieloff Rollin, rf struck out and Humphrey blasted Wilkinson, 3b a triple along the right field line.

The Braves now have a two win, one loss record, having reg- OSCODA istered victories over West Branch Mickle, 3b and the Owls in the NBC. The lone Kennedy, 3b

loss was at Alpena.

you have gas heat, let'the Joneses' keep up with you.

(You've got the best there is.)

You're entitled to feel smug as well as comfortable if you heat with Gas. That's why, where Gas is available, practically everyone gets it. Want the facts? In the areas we serve, some 700,000 families heat with Gas. (That's hundreds of thousands more than those who heat with electricity.)

It probably never occurred to you that anyone who had the opportunity would heat with anything but Gas. That's understandable. But there are other heating systems. Some are dirty. Some are expensive. Gas is neither, as you know.

Gas heat is filtered heat, clean heat, free of dust. It's "fresh air" heat. It's circulated uniformly through your home. You're free of that stuffy "vacuum bottle" feeling. Smoke and odors slip away. So does stale, germ laden air. And Gas is healthfully humid, not bone-dry.

So much for creature comforts. Gas is easier on your budget, too. Costs as little as 1/4 of what you'd pay for electric heat. And you have even comfort throughout your homeeven in your basement. Besides, Gas comes to you in underground pipes. You can't run out of it. No power failure cuts it off. It's there. And mighty comforting. Maintenance? You can practically forget it. The silent blue flame of a Gas burner just can't wear out.

Pity about "the Joneses," isn't it? But they can have Gas heat, too. It takes only about four hours to convert most heating systems.

Get with it, "Joneses": Live modern ... for less ... with Gas.
