

# Energy Crisis to Have Side Effect

Although state motor vehicle highway fund collections for the fourth quarter of 1973 were up 12 percent over the same period in 1972—attributable to an increase of two cents a gallon in the gasoline tax—a decline in revenue because of gasoline shortages and reduced driving can be expected when collections for the first quarter of 1974 are distributed to counties and municipalities.

Reginald Bublitz, city manager of Tawas City, reported Monday that the current energy crisis was one of the principal topics at the annual legislative conference of the Michigan Municipal League (MML) held last Wednesday and Thursday at Lansing.

Bublitz said that the energy crisis is of such importance that the MML has established a new committee to deal with the many problems at the local level. He said the state is being requested to provide at least another 25-million dollars in state revenue sharing to local units.

The city manager was told that Tawas City, for instance, could expect a reduction from 10 to 20 percent in its motor vehicle highway fund check. This check amounted to \$8,582 at the end of December.

As a direct spinoff of the energy crisis, a reduction in state income tax return can be anticipated due to the employment situation in the automobile industry.

The city manager emphasized that expected reductions in revenue must be considered when the city begins to consider its new budget shortly.

"This year may prove to be the most critical for cities from the standpoint of the economic situation," said Bublitz. He said that additional revenues are the primary need of cities in order to meet governmental responsibilities.

Bublitz learned at the conference

that Michigan cities would lose 170-million dollars as the result of cuts in federal assistance. At the same time, the year will also be critical in that federal controls are anticipated on local matters which formerly were of local concern only. Included are such areas as land use and zoning, public employee relations and pension systems.

Gov. William Milliken gave the keynote address and touched on many problems which are facing local units of government. The conference, largest ever held by MML, was attended by nearly 800 persons, or about 50 percent more than anticipated.

## Cage Tourney Pairings Are Announced

Pairings for the district basketball tournament next week at Ogemaw Heights High School finds Tawas Area Braves meeting Pinconning on Tuesday, March 5; Standish-Sterling plays Ogemaw Heights on Thursday, March 7. The district final is to be played Saturday, March 9.

The class D district tournament at Hale opens Monday, March 4, with the host school playing Arenac Eastern, Fairview and Au Gres tangle on Tuesday, March 5. Winner of the first game plays Mio-AuSable on Wednesday, March 6. Tuesday and Wednesday night winners are to meet Friday, March 8, for the district trophy.

All games start at 8:00 p. m.

## Plan Final Action on Sewer Districts

Final action on adoption of three special assessment districts for construction of sanitary sewers is to be held Thursday night by the Tawas City Council. This session is a continuation of a hearing adjourned from February 21.

Following council action, the city is to make application to the Municipal Finance Commission for permission to sell special assessment bonds in the amount of \$244,121.88 and general obligation bonds of \$60,878.12 to finance the project. The latter represents the city's share of the construction.

Final construction plans for the three districts have been approved by the state health department and construction bids may be advertised prior to receipt of state approval in order to determine if engineers have provided enough "cushion" on preliminary cost estimates.

The city's bonding attorney is to establish new sewer rates in order to guarantee the general obligation bond portion of the project, which is to be repaid through revenue.

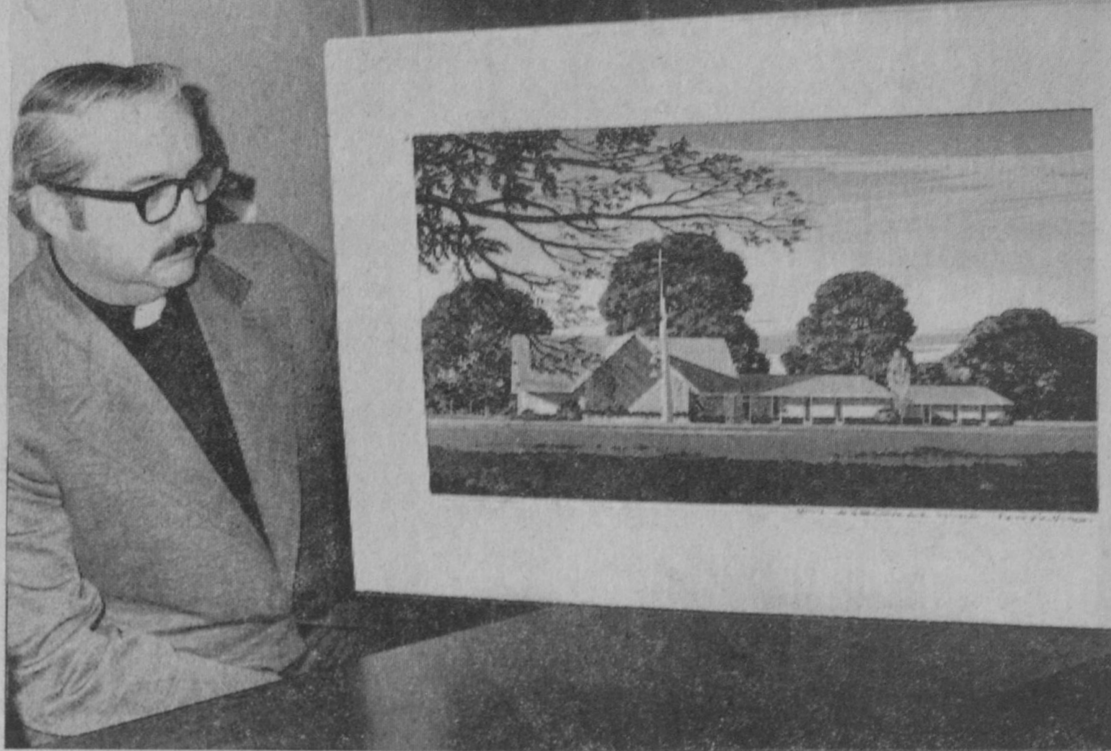

The three projects are as follows:

District No. 1, Spring Street-River Street, has an estimated cost of \$150,000 for 4,180 lineal feet of sewer main and assessable footage of 5,720. Construction in the district would require \$108,680 in special assessment bonds and \$41,320 in general obligation bonds, which includes a river crossing being financed by the city.

District No. 2, from the Hobby Lot to Hale Street, has an estimated cost of \$25,000 for 1,170 lineal feet and 1,044.85 feet of assessable footage. Special assessment bonds would amount to \$19,852.15 and the general obligation bond portion would be \$5,147.85.

District No. 3, US-23 - Margo Street, has a total estimated cost of \$130,000 with 4,130 feet of sewer main and assessable footage of 6,683.67 feet. Special assessment bonds would be issued in the amount of \$115,589.73 and the general obligation bond portion would be \$14,410.27.

Cost of construction is based on a rate of \$19 per foot for all three districts.

LOOKING over an architectural drawing of the new Tawas United Methodist Church, which is to be constructed at the intersection of Fifth Avenue and M-55, is the Rev. Kenneth Tousley, pastor.—Tawas Herald Photo.

## Schedule Ground Breaking for Easter Sunrise Service

An Easter sunrise ground breaking service has been scheduled for the new \$366,025 Tawas United Methodist Church to be constructed at the intersection of Fifth Avenue and M-55 in Tawas City.

This announcement was made Tuesday by the Rev. Kenneth Tousley, pastor, which follows the opening of construction bids on February 15.

Low bidder for construction was Davison and Son Builders, Tawas City. Davison's base bid was \$323,000, which was increased to the total bid through several alternates, including a 100-car blacktop and lighted parking lot.

The pastor said that the building committee, which had been authorized to accept bids according to guidelines from the church conference, was pleased with the bidding. Seven bids were received ranging from Davison's low to a high of \$390,000. The second and third low bids came in the \$332,000 and \$399,000 price range.

The contractor has told the building committee that, hopefully, the project may be completed within 300 days. Timing will depend greatly upon weather and availability of materials.

"If everything goes right, this would put us in the new church for New Year's Day services on January 1, 1975, although the contractor has said that there is a possibility that the church could be completed by Christmas," said Tousley.

Preliminary plans for the new church were approved in May 1973 by the church conference. The church was designed by Merritt, Coe and McCallum, Farmington architectural firm. Original plans as approved have remained unchanged. The 300-seat sanctuary, of block

and brick construction, will have an overflow area in the fellowship room, a nursery, kitchen, office and youth room with fireplace. Construction of the new church was brought about through a merger of the Methodist Churches of the Tawas in 1968. The West Parish in Tawas City was sold last year

and the East Parish at East Tawas is presently being used for services. The first campaign to raise funds for the new church was concluded two years ago when \$6,000 more than the goal of \$74,000 was pledged. The church opened a campaign in January to raise \$107,000 over the next three years.

The car then turned north on Newman Street, turned west on Franklin Street and made its way to Monument Road and Wilber Road. Apparently unfamiliar with the area, the driver turned off on the dead-end Galion Road, Shastal got out of the stolen car and attempted to escape in the woods, but was apprehended by officers.

A petition by 21 employees in the county building last month asked that salaries to those employees be brought in line with a new wage package for the sheriff's department, which had been adopted at the commission's first meeting in December.

When no action was taken on the request, a controversy developed and employees petitioned the United Steelworkers of America for the purpose of collective bargaining.

This action follows denial of union recognition last month by the county

PRECEDING Thursday night's special meeting, members of the Tawas City Council will inspect the house shown directly behind the Mathews Street bridge to give consideration to purchasing the property for a public fishing site-purchase area. The house, one of the oldest structures in the community, was once owned by the late Mr. and Mrs. William Hatton. The property has been offered for sale to the city by the Federal Housing Authority.—Tawas Herald Photo.

## Propose Commission Talks On Three-County Landfill

Possible cooperation with Ogemaw and Arenac Counties in establishment and operation of a three-county landfill authority is now being considered by the Iosco County Board of Commissioners.

Although no action was taken by the Iosco Board of Commissioners at its meeting last Wednesday, a meeting is to be arranged with the other two counties to discuss such an arrangement.

Prior to meeting with the other counties, a special meeting is to be held between the Iosco Board of Commissioners and local units of government to get the thinking of townships and cities. Mrs. Marian Ulman, secretary of the Iosco Townships Association, was present at the session and is to make the necessary arrangements.

Robert Foster of Oscoda, commission chairman, said that preliminary discussion on the three-county landfill had taken place. He said it was felt that Iosco should assume about 50 percent of the total cost and the

remainder would be split equally between the other two counties. If the program receives approval, Foster said Iosco may wish to ask voters to approve a levy of one-half mill of taxes to finance this county's share.

In other business, the commission endorsed a letter from Iosco County Senior Citizens Council which is seeking an appropriation of \$10,000 in federal funds to help provide essential transportation for the aging people of this county.

Clyde Soper, president of the Iosco County Senior Citizens Council, told commissioners that senior citizen centers located in the county are presently utilizing two station wagons to provide transportation to aged persons with essential trips. He said that a school bus had been donated to the council by Whitmore-Preseott Area School and that Wurtsmith Air Force Base had agreed to put the bus into running operation.

The council president said that

schools of the county had shown excellent cooperation by providing buses for trips, but now that the fuel crisis has taken its toll, buses are no longer available.

It was reported that additional volunteer drivers are needed for operation of the ambulance in the Hale area. At the present time, one man is taking responsibility for this service. It was stated that Tawas Hospital would provide the tuition of \$50 for training each new ambulance attendant.

Appropriations approved by the commission included \$6,200 to Northeastern Michigan Mental Health, \$280 for comprehensive health planning, \$1,765 to East Central Michigan Planning and Development Region, \$14,002 to District Health No. 2 and \$2,250 to the Michigan Association of Counties.

Low bid of \$3,667.99 from Ingis Ford Sales was accepted for furnishing a new patrol car for the sheriff's department.

## Jury Returns Guilty Verdict

An Iosco Circuit Court jury deliberated 24 minutes Thursday before finding Richard Garries guilty of delivering a controlled substance. He was arrested August 21 with chloral hydrate in his possession.

## Snowmobile Accidents Hurt Three Persons

Three snowmobile accidents and a burglary were investigated during the past week by Michigan State Police from East Tawas.

Richard Bertsch Jr., 18, Tawas City, was treated at Tawas Hospital Friday for a severe bruise to the right foot. John Brugger Jr., 25, Tawas City, told officers that the snowmobile tipped over and Bertsch's foot was pinned under the machine.

Jerome C. Maziarz, 38, Bay City, was treated Friday at Tawas Hospital for a fractured ankle sustained when he thrust his leg out to balance his snowmobile.

Garford E. Bassett, 16, East Tawas, was treated Saturday by a local physician when his fingers were caught in the track of a snowmobile operated by Joseph J. Jurczyk, 14, East Tawas.

On Friday, Albert Zubek, owner of Zubek Motor Sales, reported that a burglary had taken place at his place of business sometime during the preceding night. A steel window sash had been forced to gain entry.

THIRD ANNUAL youth-business idea exchange was held Wednesday, February 20, at the Holland House, East Tawas. One hundred seniors from three high schools of the county participated in the event sponsored by Tawas Chamber of Commerce and the Michigan State Chamber of Commerce, along with business firms of the county. Turn to page 1, sec. 2, for story.—Tawas Herald Photo.

## Hindsight Needed Engineers Erred in AuGres' 'Operation Foresight' Project

Engineers apparently should have used a little "hindsight" or at least listened a little more closely to non-professional advice in designing a federally-financed flood control program in Arenac County last year dubbed "Operation Foresight."

A new 4,000-foot dike constructed in AuGres Township is keeping the angry flood waters of Saginaw Bay off lake shore property, as it was designed to accomplish; but, faulty engineering apparently has created a new problem—water accumulating behind the dike is not able to flow into the bay.

Engineers for the United States Army Corps of Engineers, who designed the \$50,000 system, did not figure on a drop of several inches in the water level of Saginaw Bay. Drain tubes equipped with flaps to hold back bay waters during storms and allow lowlands to drain at other times are now sitting high and dry. Regardless of the level of Saginaw Bay, however, water is trapped on the lowlands.

Two alternatives are now open to residents of AuGres Township. One method of getting rid of water covering farmland and invading homes is to pump the water into the bay; the other would be to lower six large drain tubes. The latter alternative would only be effective during low water periods as flaps would have to be closed to keep bay water out of the tubes.

Both alternatives would be at township expense as the project has now been turned over to the local unit.

Last summer, township officials were reluctant to criticize the corps' handling of the project for fear of losing it. The local chairman of the flood project suspected, at the time, that the drain tubes were being installed too high and he so informed corps representatives.

The engineers replied with a set of figures explaining why they were set at that level. "You just did not tell them what to do," said the local official.
